The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

THE HARLAN & HOLLINGSWORTH CO.,
WILMINGTON DELAWARE.

MANUFACTURERS OF ALL KINDS OF

RAILROAD MACHINERY.

SILVER PALACE SLEEPING CARS of the **finest finish**, also all kinds of PASSENGER AND FREIGHT CARS, DUMPING CARS, HAND CARS, WHEELS and AXLES, STEEL SPRINGS, and in fact EVERYTHING for the **full equipment** of a road.

From our long **experience** in Car building, and our **facilities** for doing work, we are enabled to give ENTIRE SATISFACTION in every particular.

From our LOCATION, and CONVENIENCIES FOR SHIPMENT, we can supply southern roads with dispatch, and ship at reasonable freights.

We are also extensively engaged in building IRON VESSELS and IRON STEAM BOATS, STEAM ENGINES and BOILERS and **Machine Work in general.** All orders executed with dispatch and on reasonable terms.

WEST POINT FOUNDRY.
Paulding, Kemble & Co.

Manufacture all Kinds of Machinery—Marine and Stationary—Blowing Engines, Presses, Boilers, Bridges and Piers, Rifled and Smooth-bore Cannon, Wrought and Cast Iron Work for Buildings, and for all other purposes.

Office in New York, 30 Broadway.

RICHARD P. OSBORNE,
CIVIL ENGINEER,

FREIGHT AND PASSAGE GREATLY REDUCED.

Through rates, New York to San Francisco:

First Class.	Steerage.
$140 to $180.	**$65.**

according to location of berth.

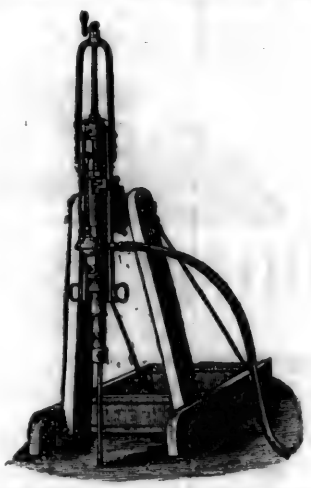
These rates include berths, board and all necessaries for the trip.

Next steamer of the above line leaves Pier No. 42 North River, foot of Canal street, at 12 o'clock noon,

ON NOV. 20.

One hundred pounds baggage free to each adult. Medicine and attendance free.

Nov. 20, ALASKA, CAPT. GRAY, connecting with CONSTITUTION, CAPT. ———



Steamer JAPAN, will leave San Francisco Dec. 4, for China and Japan.

NOTICE TO SHIPPERS.

For reduced rates of freight apply on wharf. Freight for steamer ALASKA, received until 4 P. M. on FRIDAY, Nov. 19. All usual facilities afforded shippers in collecting inland charges, &c.

For freight or passage tickets and all further information apply at the Company's ticket office on the wharf, foot of Canal street. F. R. BABY, Agent.

BURLEIGH'S PATENT
Pneumatic Rock Drill

Is now in successful working operation in New York, Chicago, Jersey City; also at the Hoosac Tunnel (Mass.,) Lake Superior, Colorado and Nova Scotia Mines, Union Pacific and Boston and Hartford Railroads; also in deepening the beds of the Illinois and Michigan Canals, and Des Moines Rapids, and numerous other localities.

The Burleigh Drill is adapted to all kinds of rock cutting in open cut Mining, Tunnels, Sewers, Quarries, &c., drilling holes from 1½ to 5½ inches in diameter. The Drills are worked either by steam or compressed air. For all kinds of work under ground compressed air is used, serving as a perfect ventilator, as it is exhausted from the Drill. At the Hoosac Tunnel the compressed air is carried upwards of a mile and a quarter, and at that distance works eight Drills at the same time. Information in regard to the ownership of the different State rights. Prices of Drills, Air Compressors, &c., can be obtained at the office of

J. T. & W. H. DALY,

Port Huron and Chicago Railway Line.

The sagacity and foresight of the projectors and engineers of this line, in determining on its present location, are now evidenced by the unusual amount of local and municipal pecuniary aid which has been, and is being, extended to it, by the communities through and near which its route has been laid. We have not at present before us the figures showing the amounts which have been voted in the Indiana and Illinois sections of the line, but in the Michigan portion alone there has already been donated as follows:

By Battle Creek City	$85,800
Battle Creek Town	14,600
Benton	7,800
Bellevue	12,100
Carmel	14,400
Climax	15,000
Eaton	13,900
Flint	30,000
Lansing	22,200
Lapeer City	13,000
Marcellus	15,000
Penn	15,000
Penfield	10,700
Port Huron	42,000

Other towns in same section soon hold elections for same purpose, and will doubtless more than double the above amount, as in all cases, thus far, the proposition, when acted on, has been adopted almost unanimously.

The value of public aid, given in this manner to a road, cannot be justly measured by the figures which represent the number of dollars thus added to the Treasury of the corporation; for, not only is it a gift of so many yards of excavation, or tons of iron, reducing by just so many hundred thousand dollars the requirements to be met by loan, and thus rendering the loan just so much more secure, and consequently easy of negotiation, but it is also an assurance that the people of the cities and towns upon the route are determined to do all in their power to hasten the completion of the enterprise, and to *sustain* it when completed.

The railway lines, which have realized the fullest measure of success, are those which not only possess the advantage of affording short and practicable routes between distant commercial centres, but which, in addition to the *through* freight and passenger traffic which they thus secure, also derive large accessions from the *local* business of the country through which they pass. This way traffic, which is so essential, can only be gathered from a country rich in natural resources, and peopled by liberal and enterprising citizens who will improve its agriculture, develop its mines, cut its forests into lumber, utilize its streams, establish mills, furnaces, factories and workshops, and more than all, give of their means to provide such lines of communication as will ensure easy and rapid conveyance of all their products and manufactures to a market. And there is no criterion by which such a people may be known more surely, than by the alacrity and liberality with which they respond to requests for material aid to railway enterprises in their own vicinity.

We regard, then, the success of the Port Huron and Chicago road as an assured fact. As a through line between New York and Chicago it commends itself by an unanswerable argument, viz., that it is the shortest of all the routes connecting with either the Erie or New York Central roads.

Connecting at Sarnia, (in Canada, opposite to Port Huron,) with the Grand Trunk, or Great Western Railway of Canada, the distance from Chicago to New York is twenty-one miles less than by either the Michigan Central or Southern lines. In addition to which, trains on this road will be able to cross the Peninsula of Michigan at an unusually high rate of speed, because the most abrupt grade on the line is less than forty feet to the mile, and the sharpest curve is 1,910 feet radius. By these facts, it will be made evident to all who have any knowledge of engineering, that very great speed may be attained, not only with comparative immunity from danger of accident, but also at a much reduced expense in the way of fuel, and wear and tear of machinery.

To these advantages as a through line, it also adds those of a local nature. There are certainly Railroads in the United States, which *equal* it in this particular, but it is also true that few *excel* it.

For fertility of soil its region is probably surpassed by a portion of that traversed by the Illinois Central Railroad, but by no other in America, (and even those Illinois prairies are behind Michigan in production of *wheat*.)

Its coal measures are exceedingly rich, though of course inferior to those of Pennsylvania, and salt and gypsum are largely produced in the Grand River and Saginaw Valleys.

Among the articles considered most profitable as Railroad freight, is lumber, and in this Michigan is pre-eminent, particularly that portion of the State which is traversed by the eastern end of this Line, (there being now annually manufactured in the single county of Genesee more than *twenty millions of feet*,) and the production of all this section will be very largely increased, because the Port Huron line affords a new means of transportation to water carriage and a market.

The municipal aid above noticed, carrying with it, as it does, an assurance of the good will and co-operation of communities which people the line, is not undeserved. The road has been, and is being, pushed with great rapidity; and it has been, from the first, the determination of the officers having it in charge that no superficial or inferior work, in any particular, should be permitted. All the iron upon the line weighs 56 lbs. per lineal yard, instead of the 50 lb. iron (often of inferior quality) which has been laid on too many of our Western roads. There has been no expense

spared in the ballasting or other details of track laying, and the road, as far as completed, has been pronounced by an old track master of the Michigan Central Road, to be fully equal to that of the last mentioned corporation. Certain it is, that one of the company's new locomotives, made by Messrs. M. Baird & Co., of Philadelphia, did recently run over the newly laid track between Battle Creek and Lansing at the rate of fifty miles per hour without inconvenience or danger.

We think the municipalities have done well in voting their aid to the line, and we think, too, that the company has fully deserved it.

Western Maryland Railroad.

Both branches of the Baltimore City Council have passed an ordinance authorizing and directing the city register to pay the coupons on the Western Maryland Railroad Company's bonds guarantied by the city, to the amount of $700,000, due on the first of July past, and the interest that may hereafter accrue and be unpaid by the company. The money has been already paid for the July interest, the passage of the ordidance referred to only being necessary to legalize said payment.

☞ The receipts from customs, in coin, at the port of Baltimore for the year 1868, were $6,217,496 41. For the ten months ending October 31, 1869, they were $7,736,843 08—excess, $1,519,346 67. The total receipts in coin and currency were in 1868, $6,302,457 93, and in the ten months of 1869, $7,811,172 92—an excess of $1,508,714 99. It is estimated that the receipts for the remaining two months of the year will approximate $1,200,000, bringing the entire receipts of 1869 up to fully $9,000,000, which will be nearly $3,000,000 in excess of 1868.

☞ The receipts of the Oil Creek and Allegheny River Railroad in October, were $200,000; and for the ten months ending October 31, $1,701,074 18. The company have a surplus of nearly $200,000 on hand, and no floating debt whatever.

☞ Ground was broken at Fremont, Nebraska, on the 5th inst., for the Fremont and Elkhorn Valley Railroad. A large force of graders were on the ground and immediately went to work. Ten miles of this road will be completed this year.

☞ Arrangements are being perfected for the construction of the Baltimore and Pikesville Railroad. The sum necessary to build the road complete, with turnouts, stations, cars and motive power, is estimated at from $75,000 to $90,000. The distance to Pikesville from the city limits is about 6½ miles. About $25,000 has already been subscribed.

☞ Trains will commence running on the Junction and Breakwater Railroad to Lewes, Del., about the 15th inst.

☞ The following gentlemen have been elected directors of the Atlantic Mail Steamship Co. for the ensuing year: S. G. Wheeler, Jr., O. W. Joslyn, A. W. Dimock, John Falconer, L. A. Jacobus, E. Y. Lansing and P. W. Holmes. Inspectors of Election—Charles F. Davenport, Charles H. Meigs and Homer M. Williams. At a subsequent meeting of the directors the following officers were elected: Samuel G. Wheeler, Jr., President; Henry J. Quinan, Treasurer; J. O. Baker, Jr., Secretary.

Memphis and Charleston Railroad.

The earnings of this road for the years ending June 30, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$589,824 41	$600,544 37
" freight	465,845 79	478,138 25
" mail	41,700 39	34,371 53
" express, etc.	77,543 54	69,710 07
	$1,174,914 13	$1,182,759 22
Expenses, viz:		
Conducting transp	$282,685 62	$254,125 91
Motive power	258,278 28	241,257 22
Maintenance of way	206,610 07	200,013 26
Maintenance of cars	82,533 89	86,149 88
	$830,107 86	$781,546 27
Net earnings	$344,806 27	$401,212 95

Compared with the previous year, the gross earnings show an increase of $7,845 09, with a decrease in expenses of $48,561 59—making the increase in net earnings, $56,406 68. The report says:

In the last Annual Report, it was estimated that the expense of operating the road for the future would be not more than $720,000 per annum. But owing to the unexpected high price of common labor, which has increased the prices of wood, lumber, cross ties, etc., this has been exceeded about $61,000; and so long as the present price of the staple production of the country is maintained, we cannot expect a reduction in the cost of labor. It has not been considered to the interest of the stockholders to reduce the outlay at the expense of the property of the company—the good condition of which has been fully maintained.

The necessity of running double daily passenger trains to connect with Virginia and Georgia still exists; although not profitable, our connections cannot be made without it. The probabilities are that, after the first of October, the Virginia line will meet us at Chattanooga with a double daily train, which must necessarily increase our passenger receipts.

From the General Superintendent's Report you will learn that our through freight business has largely increased during the past year. This has resulted mainly from the improvement made in the through freight schedule, and reduction in time between the Atlantic seaboard cities and the Southwest.

The indications of a heavy through freight business this fall and winter are promising, while our local business cannot be less than that of last year, with fair prospects of an increase.

The roadway department is in charge of a Chief Engineer, whose report states fully its condition, together with the details of his operations, as well as the itemized statement of new improvements made in roadway, buildings, bridges, etc. From his report it will be seen that there has been expended in permanent work and equipment, $226,592 93; while for the previous year it reached $375,421 52, showing a decrease in expenditures for permanent work of $148,828 59. This decrease is not obtained at the expense of the roadway or rolling stock, which will be found in an improved condition.

On the first of April a contract was entered into with Colonel M. B. Prichard for the building of the bridge over Tennessee River at Florence, to be completed by the first of October, but owing to high waters and bad roads, he has been unable to get the timber for his false work as anticipated, from which cause its completion will be deferred materially.

During the year 28,700 of the 24 inch rolled chairs, equal to about fifty-nine miles, have been laid in the track, which, added to those previously in use, makes about one hundred and thirty miles of track with this fastening, adding greatly to the security of the trains, and lessening liability to accident.

It will be observed that the expenses of this department, chargeable to operating the road, have also decreased.

As stated in the previous Annual Report, your finances are easy, the roadway and rolling stock in fine condition. All that is now needed to produce increased net earnings is an improvement in the general business of the country, and consequently an increase in your receipts. Out of a gross receipt of $1,182,759 22 during the past year your net earnings were but $401,212 95.

The receipts of the road may greatly increase without adding proportionally to the expenses.

If your receipts were increased 25 per cent., reaching	$1,478,000
Your expense could not, we believe, increase more than 5 per cent., reaching	820,000
Leaving your net earnings	$658,000

This amount of receipts is nearly $200,000 less than we obtained during the fiscal year ending June 30, 1867, and when the country fully recovers, our receipts should again be as great as then, in which event your net earnings would not be much under $800,000 per annum.

To illustrate this more fully, reference is made to the receipts and expenses of the fiscal year, stated quarterly, as follows:

	Gross Receipts.	Operating Expenses.	Net Receipts.
1st quarter	$212,702 07	$198,887 38	$13,814 69
2d quarter	342,145 27	189,151 76	152,993 51
3d quarter	384,750 27	191,186 70	193,563 57
4th quarter	243,161 61	202,320 43	40,841 18
Total	$1,182,759 22	$781,546 27	$401,212 95

The second and third quarter produced a net revenue of 44.7 and 50.3 per cent. respectively, while the operating expenses were below the average of the year. The first and last quarter only netted us 6.5 and 16.8 per cent. respectively, and the expenses were above the average quarterly expense. This apparent discrepancy in expenditures for the several quarters is explained by the fact that the Summer months, during which period our receipts are greatly reduced, is the most favorable time to repair roadway, and prepare for the Winter business; which being done, we are able to do the heavy business of the Winter months at reduced expense, and could conduct a traffic throughout the year averaging, with the Winter months, at no additional cost, or do a heavier business during the Winter with but small increase in expenses.

In the last Report reference was made to your future connections, the most important of which is from some point on our road to Atlanta, Ga. The prospects are now favorable to an early beginning of the work of building this line, as it is reported the contract has been let for that portion of the road between Guntersville and Jacksonville, Ala. The road from Decatur to Montgomery, Ala., is now under contract, to be completed by the first of January, 1872. These two southerly lines, taken in connection with the St. Louis and Iron Mountain road *via* Columbus, Ky., and Corinth on the one hand, and *via* Memphis on the other, will give us a short line from the grain markets of the West to the cotton regions of the Southeast, which must add materially to the traffic of your road. Besides this, it would give St. Louis a line shorter by one hundred and fifty miles to the Atlantic seaboard at Charleston or Savannah, than to the seaboard at New York, which must ultimately prove beneficial to your interests.

Negotiations are now pending between those representing the Winchester and Alabama Railroad and ourselves for the lease of that road for a term of years. Should the conditions be confirmed by the Legislature of Tennessee, it will be our interest to build, at once, a branch road from Fearn's Switch, six miles east of Huntsville, to the

Alabama and Tennessee State line, there connecting with the Winchester and Alabama Railroad. This will not only give us the trade of several large counties in Tennessee, but also a connection *via* Decherd and the Southwestern Railroad with the line of road to be built from Cincinnati south, by which we will have as short a line from Grand Junction to Cincinnati as by any other route, and from any point east of Grand Junction on our road a much shorter line than any other to Cincinnati. This we regard as promising to become one of our most valuable connections.

The Memphis and Little Rock Railroad is progressing, with indications of a completion within twelve months. This road is on the proposed line of the Southern Pacific route, and in connection with our line, will form the shortest and best great thoroughfare from the Eastern Atlantic seaboard cities to the Pacific coast, and its importance to us cannot be over estimated.

There is a line projected and being surveyed rrom Memphis *via* Jacksonport, Ark., Springfield, Mo., and Fort Scott, Kan., to Junction City, Kan., on the Union Pacific Railroad, Eastern Division, the distance being 420 miles. This would, with the completion of the road from Atlanta, before mentioned, form a line of about 1,000 miles in length from Charleston or Savannah to Junction City, which is less than the distance from St. Louis to New York, and places Junction City 425 miles nearer the seaboard by this line than *via* St. Louis to New York.

The number of bales of cotton transported over the road in 1868-'69, was 119,639, against 95,288 in 1867-'68—an increase of 24,351. The amount received at Memphis decreased 12,154, while the receipts at Chattanooga increased 29,702 bales. The number of through passengers westward was 20,189; do., eastward, 19,014—total, 39,203. Number of local passengers westward, 94,510; do., eastward, 100,753; do., commutation, 27,290—total, 222,553.

Of the 55 locomotives reported last year, 33 are in good order, 4 in running order, 1 requires rebuilding, 3 requires repairs, 4 undergoing repairs, 7 condemned, 2 on Southern roads, and one disposed of in exchange. The 44 engines in use during the year, ran 816,569 miles, at a total cost per mile of 23.5.

The company have 2 Palace sleeping cars; 24 first class cars (19 in good order, 1 rebuilding, and 1 condemned;) four postal cars; 11 second class cars (4 in good order, 2 require repairs, and 5 condemned;) 7 baggage cars; 563 freight, 175 platform, 18 stock, 1 pay, 1 street, and 80 road and hand cars.

Pacific Railroad.

REPORT OF THE COMMISSIONERS.

Hon. J. D. Cox, Secretary of the Interior:

SIR: The undersigned, members of a Commission for the examination of the Union and Central Pacific Railroads, appointed under a joint resolution for the protection of the Union Pacific Railroad Company, the Central Pacific Railroad Company, and for other purposes, approved April 10, 1869, have the honor to submit the following report:

Under instructions from the Interior Department, dated Aug. 14, 1869, four members of the Commission were in Omaha, on August 23, but the instructions of the fifth Commissioner having failed to reach him, he was not present, and it was informally decided to proceed to Sacramento. The Commission met at Sacramento on September 8, all the members being present. Organized by the election of Gen. Hiram Walbridge, President, and Gen. C. B. Comstock, Secretary, and commenced the inspection of the Central Pacific Railroad, usually working from 6.30 A. M. till dark, and occupying from September 8, until September 14, in the inspection of that road.

The inspection of the Union Pacific Railroad was begun Sept. 14, and completed Sept. 23, when the Commission adjourned to meet at Washington, Oct. 13, 1869; but the meeting was subsequently postponed until Oct. 23, when most of the maps and information asked for from the two roads had been received. The joint resolution, under which the Commission was appointed requires it to examine and report upon the condition, and what sum or sums, if any, will be required to complete such roads for the entire length thereof, to said terminus, as a first class railroad, in compliance with the several acts relating to said roads. The instructions of the Interior Department require that the report should be minute, and specify upon the several particulars relating to the construction and equipment of each of the roads which these instructions set forth, and that it should state to what extent, if any, the line of either road deviates from the most central, direct and practicable route mentioned in said acts of Congress. The instructions add: "You will not, however, be restricted to these instructions, but will, in the spirit of the resolution, include in your report any suggestions or facts relating to the road, elicted by your examination, which you shall consider necessary to be submitted to the President of the United States."

The first question that comes before the Commission is: What is meant by Congress in its various acts relating to the Pacific Railroad, by the word, "first class railroad?" Railroads now ranked as first class in this country are far from being perfect at their opening, and have been brought to their present high standard by large expenditures, which a small traffic in the beginning could never have justified. To require the Pacific Railroads to be brought at first to the standard other roads have reached after years of heavy and lucrative business, would be a waste of money. It is evident to the Commission that this was not what Congress desired or intended in requiring a first class railroad. If private corporations had built these roads without Government subsidy, it would undoubtedly have been for their interest to build them at first at the lowest sum consistent with keeping them in operation, and when built, if a paying business should be developed, to have gradually made the improvements which increasing traffic should render necessary. But Congress had made a large loan and an extensive land grant, part of which will be valuable, and in return it required a better road than private interests would have built, a road that should be capable of transporting passengers and freight, with rapidity and safety and certainty, a road as good as the majority of the roads in the thickly settled States. In the opinion of the Commission the requirements of the law will be satisfied, and the designs of Congress carried out if the roads be properly located with judicious grades and have substantial road beds of good width, ballasting, which with proper care shall be able to keep the track in good condition throughout the year, permanent structures for crossing them, good cross ties, iron and joint fastenings, machinery and adequate rolling stock, the more important meahine shops and engine shops being of masonry—and the Commission is glad to be able to say that in its opinion, while some expenditures need to be made, these two roads are such roads today. The expenditures needed for the completion will be given in detail for each road.

Report on the Central Pacific Railroad with Estimates of sums required to complete it.

LOCATION.

In the opinion of the Commission the general location is good, although they saw several places where, it appeared to them, it might be improved in some of its details, perhaps at a somewhat increased expense, but this could only be determined positively by an extended instrumental survey, for which the Commission did not have the time at its disposal. While, as was to be expected, the location is open to criticism, there are no errors, the immediate correction of which should be required by the Government. It is not thought that they exceed reasonable limits considering the haste with which the latter part of the road was built, nor that either bonds or land grants should be withheld for the small distance by which they increase the length of the road. The road is capable of doing all of its business with safety, and certainly the road bed is generally of good width both in cuts and embankments, but a few points were noticed where the embankments were narrow, and an estimate has been made of the cost of widening them.

TUNNELS.

There are fifteen tunnels on the road through solid rock and conglomerate or soft granite. A part of these are arched with heavy wood work, which will last many years. Those not through solid rock and not arched have stood without giving trouble for two or three years and show no signs of failure. We, therefore, make no estimate for arching any of them.

BRIDGES.

The bridges are usually Howe's truss, of good material and workmanship; several of them are, however, lighter, and especially in their suspension rods, than is advisable. They are bridges over the North Fork of the Humboldt over Donner Creek and the two long spans of that over the American River. The piers of the American River Bridge are of wood, and an estimate is made for replacing them with stone. The high trestles west of and in the Sierra Nevada are gen-

erally of a good character, but at least two of them should ultimately be filled and replaced by permanent structures, as also the trestles and temporary waterways east of the Sierra Nevada. An estimade is made for this. The immediate replacement of these trestles, however, should not be required, as they will be safe for four or five years, and in the meantime the necessary experience will be gained as to the waterways required. The masonry, especially on the mountain divisions, is well constructed and of good materials.

THE SNOW SHEDS AT THE SUMMIT OF THE SIERRA NEVADA.

The snow sometimes falls to the depth of 15 feet, making it a problem of great difficulty to secure the running of trains during the winter, but one, it is believed, which has been boldly and successfully met. Through the regions of heavy snow fall, except in some high embankments, the track has been covered with strongly built sheds, boarded in at the sides, thus thoroughly protecting it from snow. There are in these mountains snow slides, and in many places the road crosses their track. Whenever this occurs in excavation a heavy roof is built over the road and extended up the side of the mountain, to which its upper edge is fitted, and the whole securely, fastened to the rock, its slope being such that the avalanche will readily pass over it. These roofs, in some cases, extend up the slope of the mountain from 100 to 200 feet, and are strongly built, to carry the great weight that may be thrown on them. In a distance of forty miles there is an aggregate of thirty-two miles of sheds and galleries, costing, according to the statements furnished by the company, $1,781,000. The iron in the track varies from fifty-six to sixty-six pounds per lineal yard, and is thoroughly spiked on good size cross ties, numbering from 2,300 to 2,640 per mile. About 150 miles of the road are laid with chairs, and the remainder with fish joints. The whole is in good surface and line, and as well adapted to the high rates of speed as average first class railroads in the United States.

SIDINGS.

The sidings, which average about five per cent. of the length of the road, are ample for the accommodation of its business and are judiciously located.

BALLASTS.

A large portion of the road is well ballasted with good material. In making estimates to supply the deficiencies in this respect regard has been had to the character of the materials of which the road bed is constructed and the small rain falls of the Sierra Nevada.

STATION HOUSES.

The station houses west of the Sierra Nevada are not deemed sufficient, and an estimate is made for additional ones further east. While they are but common buildings they are yet sufficient for the present business of the road. When replaced they should be of better character.

WATER STATIONS.

These are sufficient in number and located in convenient places, except in the Alkali country, where some are too far apart for economy in operating the road—in some cases 34 miles—but it is so obviously for the great advantage of the company to get water at convenient distances that we do not think it necessary to estimate for the supply of additional ones.

MACHINE AND ENGINE HOUSES.

The machine shops are considered sufficient, except at the proposed junction of the two roads. There is a sufficient supply of tools and machinery on hand for all shops, except at this junction, east of Rockton. The engine houses are of wood, and these should have walls of brick or stone. Some additional ones are needed. Estimates are made for all these items. These wooden engine houses are first class buildings of their kind, but they should have been built of brick or stone originally.

EQUIPMENT.

The company have on the line of their road 166 locomotive engines, 18 sleeping cars, and 62 first class and 35 second class passenger cars; 28 baggage, mail and express cars; 648 box, fruit and stock cars; 1,293 platform cars; and in the course of construction, according to the statements furnished by the company, 18 sleeping, 31 first class and 25 second class passenger cars, which the Commission believe to be considerably in excess of the number required for the present and immediate future business of the road.

The telegraph line is well constructed and is supplied with a sufficient number of stations.

Estimates for supplying deficiencies on the Central Pacific Road.

For ballasting the track between Sacramento and Alta, $200,000; for ballasting the track between Verdi and Humboldt, $50,000; for ballasting the track between Humboldt and Carlin, $100,000, for ballasting the track between Carlin and Promontory Point, $50,000; widening embankments between Verdi and Humboldt, $5,000; do., between Carlin and Toano, $5,000; do., between Toano and Promontory, $3,000; additional station houses between Sacramento and Alta, $100,000; freight and passenger depot at the proposed junction of the roads, $10,000; engine house at Truckee of brick or stone, in addition to the amount already expended there, $20,000; substituting brick walls for frame in the engine house at Wadsworth, $14,000; substituting brick walls for frame in the engine house at Winnemacca, $11,200; substituting brick walls for frame in the engine house at Carlin, $11,200; for brick or stone engine house at Ferrace in addition to the material now there, $20,000; for brick or stone engine house at the proposed junction with the Union Pacific Railroad, $40,000; machine and repair shops at the said junction, $50,000; tools and machinery for shops at said junction, $20,000; strengthening two long spans of the American River Bridge, $20,000; putting in stone piers at the American River Bridge, $18,750; strengthening the Donor Creek Bridge, $500; strengthening the bridge over the north fork of the Humbolt River, $500; for abutments, straining beam bridges and filling at Arcade Creek, $1,500; to fill up Audubon trestle and put in arch culvert, $1,500; to fill up trestle at station, $450, and put in arch culvert, $1,600; filling trestles and making permanent water ways at $175; short openings of trestle work, $70,000; filling trestles and making water ways at thirteen larger openings of trestle works, $13,000. Total, $576,650.

SURPLUS MATERIAL.

On examining the list of surplus rolling stock, material and supplies, submitted by the company, the Commission is of the opinion that, after making a liberal allowance, this company has more than a million dollars' worth of such property on hand, beyond the immediate future demands of the road.

Report on the Union Pacific Railroad, with an Estimate of the Cost of Completion.

The location of the accepted line is highly creditable to the Engineer of the Company. There are fewer errors than might reasonably have been expected, considering the length of the road and the difficulties encountered. There are deviations from this accepted line at the Promontory Mountains and at Utah, which should be corrected, and at Omaha the bridge line should be built to avoid the present heavy grade. The adoption of this line removes the necessity of reducing the grades on the present location, as heretofore required. An estimate of these changes is made.

ROAD-BED.

The road-bed is a large part of the way of a proper width, both in cuts and embankments, though there are some places where a greater width is needed, for which an estimate is made,

TUNNELS.

There are four short tunnels, three through solid rock, not arched, and one arched with timbers. The Commission have not deemed it necessary to provide for arching with masonry.

BRIDGES, TRESTLES AND CULVERTS.

Several of the high trestles between the Blue Creek Station and Promontory ought to be filled up at once. They were evidently intended as temporary expedients to gain time in opening the road. Below Echo, on the nine hundred and seventy-first mile, two high trestles, and two of the same character near Piedmont, on the nine hundred and thiry-fourth and nine hundred and thirty-sixth miles, should be filled within the coming year, The high trestle at Dale Creek is a good structure, and no estimate has been made for filling this, it being a first-class work of the kind. The bridges are generally well built and of good materials. There are several, however, of 100 and 150 feet on Bitter Creek, where a water way of 40 feet would have been ample. The masonry of these is of an inferior character. The company are now engaged in changing the course of the stream so as to render eight or ten of them unnecessary, and fill the crossings with embankments. An estimate is made for completing those which are to remain. Some of the Howe truss bridges, like several of those on the Central, are light in their suspension rods for the maximum load of a train of locomotives. Several should be strengthened, for which estimates are made. In reference to many of the trestles, not heretofore mentioned, and culverts which we have estimated for replacing, we would remark that practical railroad managers, having due regard to economy, would not replace them by permanent structures so long as they are safe and reliable, which, in the opinion of the Commission, will be four or five years for many of them, at the end of which time experience will point out the size of water-ways with much more certainty than can now be determined.

SNOW FENCES.

Some protection against snow has already been provided and much more will be necessary. The officers of the road seem to be aware of the importance of these and are preparing the material for them. It will, undoubtedly, be expedient to erect snow sheds at some of the exposed points, but experience only can locate them. Properly the saving of expense in operating and repairs will be so large that no railroad similarly situated can afford to be without them. We think, therefore, that it will be safe to leave all this part of the work in the hands of the company, to be done as fast as their experience points out the right places and the character of the structures to be built.

TRACK.

The track is generally good, but a few miles were observed where the heavy traffic near Omaha had worn the rails considerably. To replace them is a matter of ordinary repair and not of construction, this part of the road having been in operation for four years. Abont 450 miles of the track is laid with rail weighing 50 pounds per lineal yard and with wrought iron chairs. The remainder is of 56 pounds and laid with fish joints. The cross ties are generally of pine of full size and good quality, excepting those on about 400 miles immediately west of Omaha, where originally a large proportion were of cotton wood. Many of these have been replaced with pine, oak and cedar, but a large number are still on the track. A part of the cost of replacement belongs to the road, but a portion should be borne by the construction account, as the cross ties were originally inferior; $100,000 above the ordinary repairs is estimated for their replacement, the company now having a large number on hand for that purpose. The cross ties number from 2,300 to 2,600 in each mile of the track.

SIDINGS.

The sidings are ample for the business of the road, amounting to fully 9 per cent. of its length.

BALLASTS.

A considerable portion of the road is well ballasted with good material. Quite a large amount is however, still needed between Promontory and Ogden, and in the Platte Valley. In the latter it can only be obtained for very large hauls, still we regard it so important as to justify us in estimating the expense of procuring it.

STATION HOUSES AND WATER TANKS.

The station houses are of good character, properly located and sufficient in number to accommodate the business of the road. The company have also erected, at convenient points on its line, several hotels and eating houses for the accommodation of passengers. There are several long intervals between the water tanks, but the Commissioner is satisfied all that is practicable is being done by the company to obtain an abundant supply of good water.

COAL.

The discovery of good coal in large quantities, easily accessible at several points on the line of this road, is of great value in reducing the cost of operating.

MACHINE SHOPS AND ENGINE HOUSES.

At several places there are permanent machine shops, well constructed, and fully supplied with machinery and tools. These are properly located. We have estimated for building one more at the poposed junction of the two roads. The engine houses are generally of stone or brick, and of good size. There are points at which others will be required, for which estimates are made.

EQUIPMENTS.

There are upon the line of the road 149 locomotive engines, 26 first-class and 15 second-class passenger cars, besides the sleeping cars in use upon the road, but not owned by the company; 18 baggage, mail and express cars; 88 caboose cars, which can also be used as emigrant cars; 1,107 platform cars, besides 300 leased to and used by other roads. There are three passenger and two express and baggage cars in the course of construction in the company's shop at Omaha. The freight cars are considerably in excess of the present and immediate future wants of the road. In view of the very large amount of material the company have on hand at Omaha, and their ample facilities for the construction of passenger cars, we have made no estimates for an addition to this class of equipment. The telegraph line and stations are sufficient fer present purposes, though many of the poles are not of the most desirable quality.

Estimates for supplying deficiencies of the Union Pacific Railroad from Promontory to Ogden.

Ballasting the track, $46,000; widening the embankments, $6,400; filling the high trestles between the 1076th and 1085th miles, inclusive, $38,000; abutments and piers at Bear river bridge, in addition to the materials on hand, $5,000; work on the Ogden river bridge in addition to the work done and material on hand, $4,000; filling up and making water ways at forty-four short water ways, $20,000; filling up and making water ways at three large openings, $1,200; filling and putting in straining beam bridges and abutments at three large trestles, $5,400; correcting construction and reducing grades to conform to the accepted location between the 1080th and 1085 miles, inclusive, $80,000. Total, $206,000.

Estimates for supplying deficiencies of the Union Pacific Railroad from Ogden to Omaha.

Ballasting the track from Ogden to Echo, $5,000; Echo to Bryan, $70,000; Bryan to Rawlins, $90,000; Rawlins to Laramie, $85,000; Laramie to Ogallala, $70,000; Ogallala to Omaha, $116,500; widening embankments between Ogden and Echo, $3,600; Echo and Bryan, $31,500; Bryan and Rawlins, $12,500; Rawlins and Laramie, $6,000; Laramie and Ogallala, $7,000; Ogallala and Columbus, $18,000; Columbus and Omaha, $9,000; for freight and passenger depot at the proposed junction with the Central Pacific Railroad, $10,000; for engine houses of brick or stone at said junction, $4,000; for machine shops at said junction, $50,000; for an engine house at Green River, of brick or stone, in addition to material on hand, $20,000; for an engine house of stone or brick in the vicinity of Walsitch or Evanston, $20,000; for replacing cotton wood ties in addition to repair account, $100,000; strengthening Pappillion Bridge, $50; widening the pier and changing the bridge at Crow Creek, $1,100; rebuilding the piers and abutments at Laramie, $6,000; for masonry and erecting a bridge at Little Laramie, $3,000; for improving abutments at Rock Creek, $1,000; for repairing masonry at Medicine Bar bridge, $2,500; for rebuilding and repairing the masonry of the Bitter Creek bridge, $21,000; for abutments and piers at Green River, $15,000; for widening the pier at the last crossing of the Black Fork, $1,000; for piers and abutments at Black Fork, 873d mile, $3,500; for piers and abutments at Black Fork, 880th mile, $12,000; for masonry at the crossing of the Big Muddy, 890th mile, $7,500; for masonry at the crossing the Big Muddy, 891st mile, $5,500; for masonry for straining beam bridges between the 946th and 949th miles, including the filling of trestles, $15,000; for abutments for six forty feet straining beam bridges, from 985th to 988th miles, inclusive, $2,400; for arch culvert, $500; for filling trestle at Weber river bridge, $3,000; filling and replacing with permanent water ways thirty-five small openings of trestle work between Ogden and Yellow Creek, $14,000; for filling and replacing with permanent water ways ten large openings between Ogden and Yellow Creek, $11,000; for filling two high trestles on the 973d mile, $12,000; for filling two hign trestles on the 971st mile, $32,500; for filling a trestle at the 970th mile, $2,000; for filling two trestles on Yellow Creek, $2,200; for abutments, filling and putting a straining beam to the bridges at the 960th and 996th miles, $2,500; for filling and replacing with permanent water ways ten small openings of trestle work between Yellow Creek and Piedmont, $2,000; for filling the trestle at the 968th mile, $500; for abutment and a straining beam at the bridge and filling at the 956th mile, $1,500; for filling four large trestles, between the 965th and 934th miles, inclusive, $33,500; for filling and replacing with permanent water ways seventeen small openings, between Piedmont and Bryan, $7,000; for abutments at the crossing of the Big Muddy at the 927th mile, and abutments at the crossing of the Big Muddy at the 923d mile, $3,000; for abutments, buildings and filling eighteen trestles between Bryan and Piedmont, chiefly crossings of Muddy Creek, $326,000; for filling and putting in three culverts between Piedmont and Bryan, $3,700; for filling and replacing with permanent water ways forty small openings of trestle work between Bryan and Rawlins, $16,000; filling and replacing with permanent water ways two larger openings between Bryan and Rawlins, $20,000; filling and replacing with permanent water ways sixty small openings of trestle work between Rawlins and Laramie, $17,000; filling three other large trestles, and putting in culverts, between Rawlins and Laramie, $25,000; filling and replacing with permanent water ways 125 small openings of trestlework between Laramie and Ogallala, $50,000; filling and replacing with permanent water ways 57 larger openings of treslework between Laramie and Ogallala, $29,600; for filling 18 large trestles between Laramie and Ogallala, $50,000; for filling and replacing with permanent water ways 150 small openings between Ogallala and Omaha, $30,000; for filling and replacing with permanent water ways 25 larner openings of trestle work between Ogallala and Omaha, $20,000 for changing the line to the original location at Wintah, $5,000; for reducing the grade and changing the line near Omaha, $60,000. Total, from Promontory to Omaha, $1,586,100.

SURPLUS, MATERIAL AND SUPPLIES.

After examining the lists of rolling stock, material and supplies on hand, submitted by the Companies, and making a liberal allowance for the immediate and future wants of the road, we find they have a surplus amounting to about $1,800,000 in value.

In concluding this Report the Committee desire to state that both companies are doing a large amount of work on their respective roads, and are day by day bringing them nearer to the standard required by law.

This great line, the value of which to the country is inestimable, and in which every citizen should feel a pride, has been built in about half the time allowed by Congress, and is now a good and reliable means of communicating between Omaha and Sacramento, well equipped and fully prepared to carry passengers and freight with safety and dispatch, comparing in this respect favorably with a majority of the first-class roads in the United States.

Respectfully submitted.

(Signed,)

HIRAM WALBRIDGE,
S. M. FELTON,
C. B. COMSTOCK,
E. F. WINSLOW,
J. F. BOYD,
} Commissioners.

Alexandria, Loudoun and Hampshire R. R.

The tenth annual meeting of the stockholders of this company was held in Alexandria on the 3d inst. The President, in his report, states that since the last annual meeting the extension has been completed to Hamilton Station, in Loudoun county, 44 miles from Alexandria. A new contract has been entered into for the construction of this line from Hamilton station to Winchester, as may be hereafter determined. The contract is with H. S. McComb, of Wilmington, Delaware, and other gentlemen, and is now being carried out in good faith. The board confidently expects by the next annual meeting to have the road extended across the Shenandoah river, well on its way to Winchester or its vicinity, by which its trade and travel will be largely increased. The receipts for passengers, freight and mails for the past eleven months amount to $75,673 02, and the expenditures for salaries, transportation expenses and repairs of track, and other items, amount to $58,622 92, leaving a balance of $17,050 10.

Of the first mortgage bonds there has been sold during the year $45,500, making in all $77,000 disposed of. The floating debt of the company, September 30th, 1869, was $124,228, and against this the company holds $71,000 in Clarke county bonds, $10,000 in Leesburg town bonds and other evidences amounting to $88,577.

Mr. Lewis McKenzie was unanimously re-elected president of the company, with the following directors: H. S. McComb, of Delaware; C. F. Lee, of Alexandria; John L. King, of Springfield, Mass.; John Janney, of Loudoun; Henry Lewis, of Philadelphia; Benjamin Morgan, of Clarke, and John S. Kennedy, of New York city.

A resolution was adopted authorizing the directors to apply to the Legislatures of Virginia and West Virginia for such alterations in the company's charter as they may deem necessary, with such increase of capital and authority to issue bonds as they may consider advisable.

☞ The earnings of the Lake Shore and Michigan Railroad in October, 1869, were $1,279,602 56, against $1,249,950 94 in October, 1868—an increase of $29,651 62.

☞ The receipts of the Philadelphia and Erie Railroad for the month of October, 1869, were $320,000.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, November 13, 1869.

Stock Exchange and Money Market.

The call loan market has been unusually well supplied with Money, and rates have been in favor of borrowers, in a temporary form, having ranged from 4@7 per cent. per annum. The large Government houses have had balances offered to them at 4@6; and the Stock firms at 6@7 per cent; in either instances, in amounts exceeding immediate requirements. On the other hand, the discount market has been unusually stringent. The depression in general business, particularly in the interior, the difficulties experienced by New York and Eastern creditors in making collections, and the consequent embarrassments of the mercantile classes, have operated against mercantile credits. Lenders have been very cautious in advancing on business paper; and even the very choicest names have not been quoted at less than 10 per cent., per annum; while good grades have been available at the ruinously heavy discount of 1½@2 per cent. per month. The dealings in business paper have been notably limited, and have led to employment of comparatively small additional sums of money. There has been a consequent accumulation of means, seeking controllable forms of safe and profitable investment, which circumstance has worked in favor of the speculative interest, of Wall and Broad streets, and against the more substantial business interests of the city and country. The city bank deposits were increased, during the week, over 2⅛ millions, and the specie reserve was augmented over 3¼ millions. The banks added nearly 1⅞ millions to their loan and discount averages. The unsatisfactory feature of the last bank return was the reported loss of nearly 2¼ millions of legal tender notes, which was accounted for by the demands for funds from the West and South West; where the financial pressure has been very severely felt. To Cincinnati and Louisville considerable shipments of currency have been made to aid in marketing the hog product, and this drain is likely to increase through the next month or six weeks. The currency balance in the U. S Sub Treasury here at the close of the week was $4,244,711 against $5,997,182 at the close of the preceding week, showing here also a decrease of $1,752,471. A loss of something less than $700,000 of specie was also reported by the Government office.

The specie reserve of the city banks according to the latest return is $25,219,066, against $16,446,741 same time last year. The city bank deposits are now $182,961,840, against $175,556,718 week ending Nov. 7, 1868. The legal tender reserve amounts to $49,857,599, against $47,167,207 same time last year. The circulation now stands at $34,188,663, against $24,353,687 same time last year. The loans are now $252,799,450, against $256 612,191 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $114,980,780 a day, against a daily average of $90,075,108 the preceding week, and $96,918,377 the week ending with Oct. 23, 1869. The current week's exchanges average about $115,500,000 a day. The city banks, last week, reported a gain of $3,293,020 of specie, and of $2,132,958 of deposits, with a loss of $2,220,284 of legal tender notes. They increased their loans, $1,850,617; and their circulation, $52,144.

The city bank exchanges on Wednesday were $83,710,204.

National Bank notes to the amount of $155,170 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $318,873,861, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $19,099,486, leaving, with the existing 1,620 banks, (having an aggregate capital of $422,659,260,) an actual circulation at this date, of $299,774,375. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,552,250; and for the public deposits, $19,508,000—making a total of $362,060,250. The Treasury Department last week redeemed and destroyed $492,197 of worn and mutilated fractional currency, and issued $879,914 of new. The outstanding amount of fractional currency on the 1st of Nov., was $37,035,442, against $33,001,299 on the 1st of October, 1869.

The U. S. Sub-Treasury receipts, week ending with Nov. 6, were $6,494,666 in coin, (including $2,392,000 from customs duties,) and $4,847,565 in

currency; payments, $7,150,011 in coin, (including $3,696,760 of coin interest,) and $6,600,037 in currency; balance at the close of the week, $95,412,313, (including $81,057,394 of coin, and $4,244,711 of currency,) against $94,689,062 at the close of the preceding week, showing an increase of $723,351. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $634,268 in coin, (including $397,046 from customs,) and $399,023 in currency; payments, $336,314 in coin, (including $316,554 of coin interest,) and $326,635 in currency. On Tuesday, receipts, $579,311 in coin, (including $348,000 from customs,) and $405,599 in currency; and payments $300,038 in coin, (including $316,000 of coin interest,) and $414,519 in currency. The balance at the close of business on Tuesday stood at $88,308,276, (including $4,200,178 of currency, and $81,634,620 of coin,) against $96,445,167 a week previous; and $91,209,913 on Oct. 26, 1869. The aggregate receipts of the office in Oct. were $58,880,033, including $11,194,159 from customs; aggregate payments, $53,555,362, including $7,715,080 of coin interest.

The outstanding amount of coin certificates on the 1st of Nov. was $28,731,520, against $24,412,720 on the 1st of Oct., 1869. The Sub-Treasurer at this port, last week, retired $2,253,837 of coin certificates through the receipts for customs.

Government revenues were on a slightly reduced scale, during the week. The excises yielded about three millions; customs at the port of New York, $2,392,000, and at the outports about $800,000 (in coin) more, making the grand total income for the week equal to about $7,069,800 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 64 millions.

Gold has been rather more sought after, on speculative account, and a more active market has been noted, within a range of from 126¼@127½, closing on Wednesday at 127. There has been a moderate call for Gold for Custom House purposes. The export demand has been of little moment, having absorbed less than 3-4ths of a million during the week. Government disbursed, during the week, nearly 3¼ millions of coin interest; while it marketed two millions more. The million sold on Tuesday of the current week brought from 127@127¼. By the *Alaska*, on Saturday, the deliveries of California gold were $19,565.

The coin balances of the Government at this port on Wednesday morning, amounted to nearly 81⅝ millions.

The customs of the port on Wednesday yielded $335,492. The U. S. Sub-Treasury disbursed $295,440 of coin interest, on that day.

The customs demand for Gold last week, averaged $398,666 a day; thus far, this week, it has averaged $372,523 a day, or equal to a weekly aggregate of $2,235,138. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $6,692, and since Jan. 1, $14,778,528, against $6,380,793 same time in 1868. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1869, has been $115,835 945, against $104,258,433 same time in 1868. At San Francisco, from Jan. 1, to Nov. 1, 1869, $7,122,605, against $7,153,308 same time last year.

The exports of specie, from this port, last week, were $640,653, against $264,829 same week last year; total, since Jan. 1, 1869, $29,889,341, against $68,207,430 same time last year. Government disbursed last week through the U. S. Sub Treasury here, on account of the coin interest on the public debt $3,696,760, and since Jan. 1, 1869, $80,635,846, against $74,577,609 same time in 1868. The specie exports from San Francisco, from Jan. 1, to Nov. 1, 1869, were $32,489,688, against $30,458,877 same time in 1868.

The U. S. Treasury receipts from customs at all ports from July 1, to Oct. 30, were about 66½ millions.

The amount of specie sent east by railroad from San Francisco, thus far, this year, has been $5,344,117.

Foreign exchange has been held rather more firmly, on a moderate offering of bills, while the demand has been restricted. Bankers' prime sixty day bills on London closed on Wednesday at 108⅞@109, and on Paris to 5.21¼@5.16¼; sight bills on London to 109½@109⅝, and on Paris to 5.15¾c.@5.13¾. The offering of produce bills has been quite liberal this week. The week's exports of domestic produce have been to the currency value of $4,901,510, making the total since Jan. 1, 1869, $169,157,261, against $141,564,277 same time last year.

Government securities have shown rather more activity, and have been steadier in price, though without buoyancy. The bulk of the business has been transacted in the later issues of the Five-Twenties, and in the six per cent. currency bonds issued in aid of the several Pacific Railroad enterprises. The inquiry for the latter has been, to a considerable extent, for the employment of the funds of saving's institutions and trust companies. The general market closed dull and easier. Government bought in on Wednesday two millions of 5.20s at 112.95 net, all of Messrs. Fisk & Hatch, out of an aggregate offering of nearly eight millions.

U. S. Sixes of 1881 closed here on Wednesday at 117½@117⅞; U. S. Five-twenties of 1862, ex coupon, 115⅛@115⅜; U. S. Five twenties of 1864 at 112¾@112⅞; U. S. Five-twenties of 1865 at 113⅜@113½; U. S. Five-twenties of 1865, consolidated, 115¼@115½; U. S. Five-twenties of 1867, 115½@115⅝; U. S. Five-twenties of 1868, 115¼@115½; U. S. Ten-forties at 107½@107⅝; U. S. Six per cent. currency bonds, 107½@107¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 27.	Nov. 3.	Nov. 10.

Erie	21¾	21	20
Ill. Central	98	98	98
At. and Gt. West	24½	....	....

There has been rather more doing in State and Railway bonds and mortgages, and prices of all really substantial properties in this line have been more satisfactory to sellers. The multiplicity of new railway loans, now being successfully marketed indicate the reviving demand for forms of secure and lucrative investment other than that afforded during recent years by the various issues of the national interest bearing obligations, which latter now command a high premium, and which will probably soon be consolidated as far as practicable into an uniform loan, bearing a lower rate interest than that which the Government had to contract to pay, conditionally, during the late war. The option of making the conversion attached to the Five Twenties has already accrued to the Government on the issues of 1862 and 1864, and will mature on those of 1865 in the coming year. On this account, thrifty people are now more partial to investments in first-class Railway bonds, than they have heretofore been since ante-war times. The first mortgages of the Central, and Union Pacific Railroads are in better request. A new loan, of $2,800,000 of a similar substantial character, to that of the Central Pacific, has been introduced to the market during the week, by Messrs. Fisk & Hatch, in the form of the First Mortgage bonds (bearing interest at the rate of 6 per cent. per annum, and interest and principal being made expressly payable in gold in the city of New York) of the Western Pacific Railroad Company, of California, which road is now in complete running order, between Sacramento and San Francisco, a distance of 130 miles, with a thirty mile fork to San Jose, where it intersects the Southern Pacific Railroad, by which it secures a double route to San Francisco. The road which is without other encumbrance, and is now receiving under the Government authority, the full measure of Congressional aid—forms the westernmost link of the great national central railroad route to the Pacific. With its local business and through traffic, it is already earning in coin nearly four times the amount of all anticipated interest obligations of the enterprise, which is under the same management as that of the prosperous, Central Pacific Railway. Its first mortgage bonds are offered for the present at 90 per cent. and accrued interest in currency. They will probably be all marketed in a few months. Railway and miscellaneous stocks have been moderately active, but irregular, and toward the close weaker in price.

General business has shown less animation, though prices, in most instances, have favored purchasers. Middling upland cotton closed heavily on Wednesday at 25¼ cts. per lb. The stock of cotton now here is given at about 18,500 bales. The receipts at the port this week, have averaged abont 4,500 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 519,750 bales, against 394,250 bales in 1868-'9; exports, same time 202,850 bales, against 128,000 bales same time in 1868-'9; stock on hand at latest dates, 215,300 bales, against 178,000 bales same date 1868. The exports of domestic cotton goods from this port, since Jan. 1, have been 18,460 pkgs., against 21,503 pkgs., same time last year. From Boston, 6,667 pkgs., against 7,544 pkgs. same time in 1868.

At the Live Stock markets, this week, Beeves have been quite sparingly sought after, at from 8@16c., per lb.; week's receipts, 7,125. Milch cows very dull, at $40@$110 each, receipts, 110. Veal calves in fair request at from 4@13½c. per lb.; receipts, 1,697. Sheep and lambs very plenty and heavy at from 3@5½c., and 5@7½c. per lb.; receipts, 88,108. Swine in moderate request at 9@10¼c. per lb., all live weight; receipts, 21,650.

The week's dry goods imports were valued at

$1,239,156, and of general merchandise, $3,189,297, making an aggregate for the week of $4,428,453 specie value, against $3,863,311 same week last year. There has been less call for foreign goods, and some depression of values has been noted.

The ocean freight market has been less active, and rates have shown less firmness, closing rather irregularly. For Liverpool we quote flour at 2s. 4½d.@2s. 6d. by sail, and 2s. 9d.@3s. by steamer, per bbl.; grain at 8d. by sail, and 8½@8¾d. by steamer, per bushel; cotton at ¼d. by sail, and 3/8@7/16d. by steamer per lb.; and heavy goods 20s.@35s. by sail, and 30s.@50s. by steamer, per ton. Total number of vessels in port on Wednesday, 394.

The New York exports, exclusive of specie, for the week ending Nov. 9, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$2,943,195	$4 901,510
Prev. reported	138,621,082	164,255,751
Since January 1	$141,564,277	$169,157,261

The imports for the week ending November 6, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$1,137,381	$1,239,156
Gen. merchandise	2,725,930	3,189,297
Total for the week	$3,863,311	$4,428,453
Previously reported	211,667,434	252,532,800
Since January 1	$215,530,745	$246,961,253

The balance in the Sub-Treasury on Wednesday was $86,736,239 11.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—South Carolina 6s, new, 65½; New York State 7s, Bounty Loan, 109; do., 6s, 1878, 100⅞; Georgia 7s, 91; Louisiana 6s, 65; do., 6s, Levee bonds, 60; Alabama 8s, 90¼; Buff. N. Y. and Erie 1st mort., 86; Milwaukee and St. Paul 1st mort., Iowa Division, 86½; N. J. Central 1st mort., 100; New York Central 6s, Real Estate, 85⅛; New York and New Haven R. ☞ The laying of the track of the Winchester and Strasburg railroad is progressing rapidly.

☞ CHICAGO, DANVILLE AND VINCENNES RAILROAD COMPANY'S 7 PER CENT. GOLD BONDS pay annually, on an investment of $10,000 in currency, $698 25 IN GOLD, while only $475 are derived from $10,000 invested in Government Sixes.

$2,500,000 First Mortgage Sinking Fund Bonds, forty years to run, on 140 miles of road, or LESS THAN $18,000 PER MILE.

Starting at Chicago, the Road runs through the richest lands of Illinois, along the line of Indiana, and from which the local business, bound to this road, is estimated to net $733,000, or nearly THREE TIMES THE SUM required for interest and sinking fund on the WHOLE ISSUE OF ITS BONDS.

It forms part of the SHORTEST LINE FROM CHICAGO *via* Terre Haute, Vincennes, Evansville and Nashville to New Orleans, &c., and opens to the Chicago market rich ORE AND COAL BEDS, sufficient of themselves to insure large earnings.

It also brings the BRAZIL COAL MINES nearer to Chicago by 90 MILES THAN ANY other line.

Total cost of construction and equipment estimated at $4,500,000.

$2,100,000 of stock subscribed, which pays for right of way, grading, bridging, &c.

WHOLE AMOUNT OF IRON ALREADY OBTAINED.

From Chicago to Momence, 55 MILES, NOW OPEN TO BUSINESS, and a considerable part will be finished this autumn.

Pamphlets in more complete detail, with maps, can be had of us on application.

Purchasers may obtain Bonds through our advertised local agents, who will be responsible for their safe delivery, or directly of us, express charges prepaid, the buyer remitting $950 and 7 per cent. in currency interest from October 1, to date, funds current in New York. Any of the Eight Hundred Banks in correspondence with the National Park Bank of New York, will receive and transmit purchase money for these Bonds, and in return receive the Bonds direct from the bank and deliver to the purchaser.

Having personally examined this entire line of road, finished and projected, as well as the country through which it runs, we offer these bonds with entire confidence in their value and soundness.

W. BAILEY LANG & CO., Merchants,
No. 54 Cliff st., New York,
Agents for the sale of the Bonds.

Mobile and New Orleans Railroad.

Track laying on the Mobile and New Orleans Railroad was commenced at Mobile on the 8th inst. This road is being built by Northern capitalists. The grading is well advanced, the iron has nearly all arrived, and an early completion of the road and connection with New Orleans is promised. The distance is 138 miles.

☞ The town authorities of Shelburne Falls, Mass., will soon build an iron bridge, to take the place of the one swept away by the flood. It will be Herthel's patent, cost $58 per foot, and be 360 feet long.

☞ The receipts of the Union Pacific Railroad for the month of October were, from passengers, $577,935; freight, $277,512, and from mails, $23,200—giving an aggregate of $878,617.

Journal of Railroad Law.

RAILROAD COMPANIES—LIABILITY FOR INJURY TO CATTLE THROUGH DEFECTIVE FENCE.

The facts of the recent case of the Illinois Central Railroad Company *vs.* George Whalen (42 Ill., 396,) are fully and clearly stated in the following opinion by

BREESE, J.—This was an action on the case brought by George Whalen against the Illinois Central Railroad Company, in the Marion Circuit Court, to recover damages for the alleged killing of a black mare and a white mule, and injuring a sorrel mule, the property of the plaintiff, by the locomotive and train of the company owned and run by them on their railroad.

The issue was tried by a jury, and verdict for plaintiff.

There was no positive proof the animals were struck by the locomotive, but the presumption is strong they were, as they were found by the side of the road "badly smashed up" and no other reasonable cause could be assigned for the casualty. The jury were justified in finding the injury was done by the cars or locomotive of the defendants.

The injury was discovered on the 22d of October, and the presumption was, it occurred on the 20th of that month, by a train moving south on the night of that day. The principle ground of defense was, that the company had erected a good and sufficient fence at the place where the injury was done. There was no proof this fence was defective on the 20th, but there was proof it was defective on the 22d, the day the discovery was made of the injury to the animals. The jury must have inferred, inasmuch as the fence was defective on the 22d, it was equally so on the 20th, which is a *non sequitur*.

It by no means follows, because a fence was out of repair on a certain day, it was also in that condition on a previous day. There was an entire absence of proof that the fence was out of repair on the day the accident happened, and therefore the company cannot be made liable except on proof of negligence. When a railroad company fails to erect a suitable fence, and an accident happens to stock, negligence is inferred, but when they have performed this duty, then negligence must be proved as in ordinary cases. It is not proved in this case, as no witness saw the occurrence and nothing is shown to justify such an inference.

But it is said by the appellee, there is a count in the declaration, predicating negligence on a failure to ring a bell or sound a whistle, and, on the proof under this count, the verdict was right, whatever might have been the condition of the fence on the 20th of October.

There is no proof to sustain this count. The only witness speaking to this point was Salem David, who says "the train went down that night; did not ring bell or blow whistle as I heard; was at my brother's, one mile from the railroad; did not hear a bell or whistle that night; commonly hear a whistle."

Now, that he did not hear bell or whisle, being one mile distant, does not prove, that one or both was not sounded. Much depends upon the direction of the wind, and the relative positions of the objects. The witness does not say, that, situated as he was, on that night and under the same conditions, he commonly heard a whistle, he might commonly hear a whistle under certain circumstances, which did not exist on that night. There was no proof sufficient to establish negligence on this ground.

It is also insisted by the appellants, that the plaintiff's instructions were wrong particularly the second and third.

The instructions were as follows:

"1. The court instructs the jury, that if they believe, from the evidence that the stock of the plaintiff was killed and crippled by reason of negligence of the said operators of said train in not ringing their bell and blowing their whistle on their part, plaintiff using ordinary care to prevent such accident, the jury will find for plaintiff, and assess his damages as proved.

"2. That if the jury believe, from the evidence, that the stock got upon the road at a point where the company were bound to fence the road, and the road was not fenced, or that the fence was in such a bad condition, that it would not turn stock, and the stock was then killed and wounded, then they should find the verdict for plaintiff, and assess his damages at the amount proved.

"3. The court instructs the jury, that they must take and construe the evidence altogether, and if they believe from the evidence, that the stock was killed and wounded in a place where the company was bound to fence, or that the fence was in such a condition that it would not turn stock, and not within the limits of a town, city or village, and within five miles of a settlement, nor at a public crossing, then they should find for plaintiff, and assess his damages as proved."

To the first no objection is made. The second and third are both subject to just exception, inasmuch as they leave the question of the obligation of the railroad to fence their track, to the jury, whereas this court has always regarded it as a question of law. The statute defines the points and places whereat fences shall be made. The obligation to fence is created by statute, and that alone must be invoked to establish the duty, from the non-performance of which, negligence is presumed.

The judgment must be reversed and the cause remanded, that a new trial may be had.

Judgment reversed.

New York Central and Hudson River Railroad Consolidation.

The following are the terms of consolidation agreed on by the Directors of the New York Central and Hudson River Railroad on the 15th of September last, and ratified by a vote of the stockholders of each road at their several meetings in this city and Albany on the 1st inst:

Agreement of consolidation made the fifteenth day of September, in the year one thousand eight hundred and sixty-nine, between "The New York Central Railroad Company," party of the first part, and "The Hudson River Railroad Company," party of the second part.

Whereas, by an act of the Legislature of the State of New York, entitled "An act authorizing the consolidation of certain railroad companies, passed May 20, 1869," the said companies are authorized to merge and consolidate their several capital stocks, franchises and properties into one corporation. And whereas it is believed that such consolidation will be of advantage to the stockholders of said companies and to the interest of the State.

Now, therefore, this agreement witnesseth, that in pursuance of the said act of the Legislature the parties hereto do hereby prescribe the following terms and conditions of such consolidation, and do respectively agree thereto and to the mode of carrying the same into effect as herein provided.

ARTICLE 1. The said companies do hereby agree to merge and consolidate, and do hereby constitute and form one corporation, by the name of "The New York Central and Hudson River Railroad Company." Said corporation shall continue for the term of 500 years.

ART. 2. The number of the directors of the new corporation shall be thirteen, and the following named persons shall constitute the first Board of Directors, viz:—Cornelius Vanderbilt, of New York; Chester W. Chapin, of Springfield, Mass.; Augustus Schell, of New York; Daniel Torrence, of Albany; H, H. Baxter, of New York; William H. Vanderbilt, of New York; Horace F. Clark, of New York; James H. Banker, of New York; William A. Kissam, of New York; George J. Whitney, of Rochester, N. Y.; Joseph Harker, of New York; Samuel F. Barger, of New York; Samuel Barton, of New York. Said directors shall hold office as such until the first Wednesday of June, 1870, and until their successors shall be chosen.

ART. 3. The following named persons shall be the first officers of the new corporation, and shall hold their respective offices until others shall be appointed in their places by the Board of Directors: Cornelius Vanderbilt, President; William H. Vanderbilt, Vice President; Edwin D. Worcester, Treasurer; Augustus Schell, Secretary.

ART. 4. There shall be an annual election for directors of the new corporation on the first Wednesday of June in each year. Such election shall be held at such place as shall be prescribed by the Board of Directors. The said directors shall be chosen by a majority of the votes of the stockholders voting at such election in such manner as may be prescribed in the by laws of the corporation, and they shall continue to be directors until the others are elected in their places. In the election of directors each stockholder shall be entitled to one vote, either in person or by proxy, for each share of stock held by such stockholder for thirty days previous to any such election. Vacancies in the Board of Directors shall be filled in such manner as shall be prescribed by the by-laws of the corporation. The inspector of the first election of directors shall be appointed by the first Board of Directors. The officers of the new corporation enumerated in the preceding article, or such others as may from time to time be prescribed in lieu thereof, or in addition thereto by the by-laws or regulations of said corporation, shall be appointed from time to time by the Board of Directors, and shall hold their respective offices during the pleasure of the Board.

ART. 5. The capital stock of the new corporation to be now issued shall be $45,000,000, and the authorized number of shares of said capital stock shall be 450,000. The amount or par of each share shall be $100. Two hundred and eighty seven thousand nine hundred and fifty of said shares shall be forthwith issued to the holders of the capital stock of the said New York Central Railroad Company, on the surrender of their stock certificates, in exchange for the shares of stock of said company held by them, share for share, and 160,208 of said shares shall be also forthwith issued to the holders of the capital stock of the Hudson River Railroad Company, on the surrender of their stock certificates in exchange for the shares of stock of said company held by them, share for share. The said capital stock may at any time, at the option of the Board of Directors of the consolidated company, be increased to an amount sufficient to capitalize at par the interest certificates heretofore issued by the New York Central Railroad Company, under the resolution of the Board of Directors of said company, passed December 19, 1868, and also the consolidation certificates authorized to be issued in pursuance of this agreement.

No further or other issue of shares of capital stock, beyond the amount necessary for the capi-

talization of the said interest and consolidation certificates, shall be made, unless such increase shall be first authorized and approved by two-thirds in amount of all the stockholders of such consolidated company. Such increase must be first sanctioned by a vote in person or by proxy of two-thirds in amount of all the stockholders of the consolidated company, at a meeting of such stockholders called by the directors of the company for that purpose, by a written or printed notice to each stockholder, to be served on him personally or by depositing the same (properly folded and addressed to him at the post office nearest his usual place of residence) in the post office at least twenty days prior to such meeting. Such notice must state the time and place of the meeting and its object, and the amount to which it is proposed to increase the capital stock. The proceedings of such meeting of stockholders must be entered in the minutes of the proceedings of the Board of Directors of said company, and thereupon the capital stock may be increased to the amount sanctioned by such vote of the stock holders of the company, and for the purposes authorized by such vote, and none other.

ART. 6. All the bonded or other indebtedness of either of said corporations, including such portions of such indebtedness as may be secured by mortgage or otherwise, and all agreements made by the said corporations or either of them, including especially the debt certificates issued by the New York Central Railroad Company in pursuance of the consolidation agreement of May 17, 1853, and also the interest certificates issued by the said New York Central Railroad Company in pursuance of a resolution of the Board of Directors of said company, passed December 19, 1868, are hereby declared to be valid and binding on the new corporation, and are assumed by and are to be paid and performed by the said new corporation according to the terms, tenor and effect thereof.

ART. 7. For the purpose of equalizing the values of the property of said consolidating companies, and making compensation to the stockholders of said companies, respectively, for all differences in such values, the parties hereto do further agree that there shall be issued to the stockholders of the said companies certificates to be called consolidation certificates, and which shall provide that the same shall be payable rateably, at the pleasure of the company, out of its future earnings, and that until the same be wholly paid off and redeemed, dividends upon the amount thereof shall be paid at the same rates and times as dividends shall be paid upon the shares of the capital stock. Such consolidation certificates shall be issued for such purpose of equalization as follows, viz:

First—To the stockholders of the New York Central Railroad Company there shall be issued consolidation certificates for twenty seven per cent., or twenty-seven dollars on each $100 of the capital stock of said company.

Second—To the stockholders of the Hudson River Railroad Company there shall be issued consolidation certificates for eighty-five per cent., or eighty five dollars on each $100 of the capital stock of said company.

For the purpose of such equalization there shall be retained, out of the assets of the New York Central Railroad Company, the sum of $518,310, which sum shall be distributed rateably among the holders of the stock certificates and the holders of the interest certificates of the New York Central Railroad Company, at the time of the exchange of the stock certificates, after the perfection of the consolidation, as therein provided. The twenty-seven per cent. in consolidation certificates herein provided being the compensation to the stockholders of the New York Central Railroad Company, both in respect to their stock and their interest certificates for eighty per cent. of the par of such stock heretofore issued to the stockholders of said company, in respect to such stock. It is understood and agreed that each stockholder of the New York Central Railroad Company shall, at the time he shall receive his consolidation certificate of twenty-seven per cent., produce the interest certificate for eighty per cent. upon the par thereof corresponding thereto, to the end that the delivery of the consolidation certificate may be noted and receipted for both upon the stock certificate and the interest certificate; and in the event that any interest certificate shall have been separated from the corresponding stock certificate the holder of the stock certificate shall not be entitled to receive the consolidation certificate for twenty-seven per cent. until he shall produce, for the purpose of notation and receipt hereinbefore provided, interest certificates to the amount of eighty per cent. upon the par amount of the stock; but in case such stockholder shall be unable to produce such corresponding interest certificate he shall only be entitled to receive consolidation certificates for fifteen per cent. on par of the stock so produced; and the holder of the corresponding interest certificate shall, when producing the same and receipting therefor, be entitled to a consolidated certificate for the residue, being fifteen per cent. on the amount of said interest certificates.

ART. 8. It is further agreed that the consolidated company may at its option, at any time convert the amount of the consolidation certificates issued in pursuance of the preceding article into capital stock at par, and that such consolidation certificates may be transferred in any sums on the books of the company by the holders thereof, either in person or by attorney, on the surrender of the certificate.

And it is further agreed that the consolidated company may from time to time invest its surplus moneys in the said consolidation certificates by purchase thereof in the market.

ART. 9. It is further agreed that the outstanding interest certificates, issued by the New York Central Railroad Company, in pursuance of the resolution of said company, passed December 19, 1868, may, at the option of the holders thereof, be converted into or exchanged for certificates of the same tenor and effect as the consolidated certicates—the issue whereof is hereinbefore provided for—and that the consolidation certificates which may be thus issued in exchange for said interest certificates may at any time, at the option of said consolidated company, be converted into capital stock at par, as provided for by the article hereinbefore contained, fixing the amount of the capital stock of the consolidated company.

ART. 10. It is further agreed that the Board of Directors of said consolidated company may make and establish such by-laws, rules and regulations as shall from time to time appear necessary for the good Government of the corporation, for the security of the public in respect to their dealings in its stock and securities, and in general for the preservation and proper administration of the property, interests and affairs of the company.

☞ The Treasury Department has paid to the Union Pacific Railroad Company $437,000 in bonds for that portion of the road between the 1,020th mile post and Ogden, at the 1,034th mile post. The Union Pacific Company now owns up to the latter point, but the remainder of the distance, between Ogden and Promontory Point, is still in dispute. It has not yet been settled whether the Union Pacific Company shall have that part of the road, or whether it shall be given to the Central Pacific.

☞ The injunction lately obtained by the Rutland Railroad Company, staying further proceedings before the Supreme Court of Vermont in the case of Cheever & Hart, Trustees, *vs.* Rutland and Burlington Railroad Company and others, has been dissolved.

☞ Work on the upper end of the Bangor and Piscataquis Railroad is vigorously prosecuted.

National Junction Railroad.

The Alexandria *Gazette* says it is reported in railroad circles that the Baltimore and Ohio Railroad Company has determined to endorse the bonds of the National Junction Railroad Company, and to take $200,000 worth of stock in that company; that Assistant Engineer Richard Randolph, of the Baltimore and Ohio Railroad, has been detailed to take charge of the construction of the National Junction Railroad; that the Berme Bank Railroad Company is to take $125,000 of stock in the National Junction Railroad; and that the Berme Bank Railroad, now in progress of rapid construction, will connect with the Alexandria, Loudoun and Hampshire Railroad where that road crosses Four Mile run, and with the Orange, Alexandria and Manassas Railroad at the intersection of Duke and Fayette streets in this city. These arrangements, it is thought, will insure the completion of the Alexandria and Fredericksburg Railroad.

Pennsylvania Five Per Cent. Loan.

The Pennsylvania State Treasurer gives notice that the Commissioners of the Sinking Fund has authorized the payment of the five per cent. State loan maturing July 1, 1870, and that said bonds will be redeemed in full with interest to date, at the Farmers' and Mechanics' National Bank at Philadelphia, on the first and third Saturdays of each month, by notifying the State Treasurer. The interest on the bonds will cease July 1, 1870.

☞ The following gentlemen have been elected directors of the Southern Maryland Railroad: S. M. Johnson, W. H. Dunkinson, Samuel Fowler, C. E. Rittenhouse, B. G. Harris, Clement Hill, Thomas Young, J. H. Embry, J. T. Mudd, H. C. Christy, Lewis Johnson and John M. Brome.

☞ The city of Petersburg, Va., has voted $250,000 in bonds to deepen the channel of the Appomatox river, from seven to fourteen feet, from City Point to the wharves of Petersburg, a distance of nine miles.

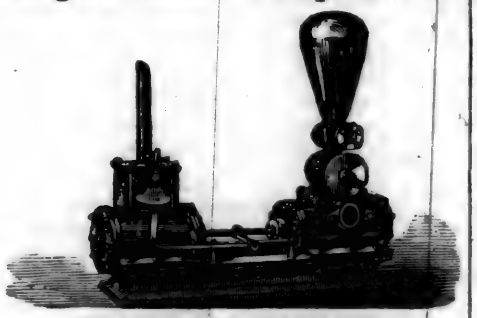
☞ The Virginia City and Truckee Railroad is nearly completed.

THE WHARTON
Safety Railroad Switch.

☞ BOTH RAILS of the main track absolutely immovable, continuous and unmutilated. ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.



Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R.R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

☞ The St. Andrews N. B., *Standard* says that Mr. H. D. M'Leod is to be the manager of the European and North American Railway; and that Mr. Carvell is to manage the Western Extension for the present, but will soon be appointed Superintendent of all the Railways in the Lower Provinces.

☞ The town of Hudson, Mass., has voted to take 550 shares, and the town of Oakham 175 shares, in the Massachusetts Central Railroad, being five per cent. of the valuation of each town.

FIRST & PRYIBIL'S
PATENT IMPROVED
BAND SAW MACHINE,
432, 434 & 436 Tenth Avenue,
NEW YORK CITY.

PRICE - - - - $350.
BOXING AND SHIPPING, $10.

This Machine, with the exception of the table, is made entirely of Iron. Its weight is 1800 lbs.; drums 3 feet 3 inches in diameter; height, 8 feet 5 inches; depth 4 feet 3 inches; width 6 feet; driving pulleys usually 14 inches in diameter, or to suit our customers.

Our machine can be run with a speed of 330 to 350 revolutions per minute, causing the saw to travel 3300 to 3500 feet per minute, and with a belt from 4 to 5 inches in width a block of Rosewood from 10 to 15 inches thick, or wood of any kind, hard or soft, can be cut with ease and facility, the saw being from one-quarter inch to one inch in width. A saw one-eighth of an inch in width, including teeth, can be used for cutting wood of considerable thickness.

The saws are not liable to break owing to our improved slide bearing, which adjusts itself according to the expansion and contraction of the saw. No saw will break except by accident or gross carelessness. The same is used principally by railroad car, chair, and other furniture manufacturers, ship, boat, and wagon builders, and also to saw slate, ivory, bone, &c. Guarantee will be given for all we state above. From three to five times as much work can be done with one of our sawing machines, as with an ordinary up and down saw. The work is cut smooth, the saw being retained by an improved guard.

At the present time, Sept. 1869, 64 of our machines are running in this city, and about twice as many in the country.

We also manufacture a lately patented counterbalance oval turning lathe which can be run with more than twice the speed of the old style of lathes, and much more and better work will be done. Many other wood working machines, and also shafting, pulleys, hangers, &c., &c., constantly on hand. Send for Circulars.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BURLEIGH'S PATENT

Pneumatic Rock Drill

Is now in successful working operation in New York, Chicago, Jersey City; also at the Hoosac Tunnel (Mass.,) Lake Superior, Colorado and Nova Scotia Mines, Union Pacific and Boston and Hartford Railroads; also in deepening the beds of the Illinois and Michigan Canals, and Des Moines Rapids, and numerous other localities.

The Burleigh Drill is adapted to all kinds of rock cutting in open cut Mining, Tunnels, Sewers, Quarries, &c., drilling holes from 1¼ to 5½ inches in diameter. The Drills are worked either by steam or compressed air. For all kinds of work under ground compressed air is used, serving as a perfect ventilator, as it is exhausted from the Drill. At the Hoosac Tunnel the compressed air is carried upwards of a mile and a quarter, and at that distance works eight Drills at the same time. Information in regard to the ownership of the different State rights. Prices of Drills, Air Compressors, &c., can be obtained at the office of

Brady's Railroad Lantern.

In our advertising columns is a cut of "Brady's Railroad Lantern." Please turn to the advertisement and read the list of Railroads on which they are used. They have already become quite celebrated, and yet, a little over a year ago they were unknown, even to the manufacturers of them. They have been accepted and adopted by almost every railroad company that has seen them, and there can be no doubt that in a short time they will supersede every Railroad Lantern that is made in the United States. We say this because it is *so much* superior to anything of the kind we have ever seen, and the price being low, we see nothing in the way of its sweeping out all the rubbish in the way of inferior articles that are necessarily used on even our first class roads. We have heard "Railroad men" so often wishing they could get a Lantern that would not *fall to pieces*, we can say of Brady's: You cannot destroy them unless you choose to put them on the track and let a train of cars pass over them, or subject them to the gentle tap of a trip hammer. We purpose now to give a description of them, and this will be sufficient proof of their strength and durability, unless peradventure our readers prefer to buy and test them, which after all is the surest way.

The Patentee, whose name the Lantern bears, was an employee in a large Lantern Manufacturing Establishment in one of our Western cities about eighteen months ago, and his attention was drawn to the great number of lanterns brought (or sent) back from the railroads for repairs, then the idea found place "why cannot a lantern be made that will not have to be repaired, in any event as often as these," and after many experiments, including much time and not a little expense the following was decided upon. A *frame* of malleable iron with guards and rings; the guards being riveted in the top and bottom rings of iron, and the rings of wire firmly wound where they cross the guards. The frame is then tinned, uniting every part making them as one piece, and this frame will bear a weight upon it of *four or five hundred pounds.*

The *flange* which keeps in place the adjustable globe and the *bottom* are also of malleable iron tinned, and every one who is acquainted with this kind of metal, knows it to be nearly as strong as wrought iron. The globe being adjustable one colored light may be quickly and easily exchanged for another. The lantern is not at all complicated, but may be taken apart in two motions. The lamp is taken out in one motion, and the glass in another.

There have been over *one thousand dozen* sold in the last season, and they are just in their infancy. The company has used but little exertion to introduce them, orders coming in without it, faster than they could fill them.

The Taylor Manufacturing Company, New Britain, Conn., were incorporated June, 1868. Their success thus far has been remarkable, and we predict for them the envy of richer and far older corporations; even if their attention should be turned wholly to the manufacture of *Brady's Railroad Lantern* they cannot fail with good management, of becoming one of the first manufacturers of the Nutmeg State.

☞ The Danville, Hazleton and Wilkesbarre Railroad was formally opened on the 4th inst., between Sunbury and Riverside, opposite Danville, a distance of twelve miles. Thirty-two miles more are graded and bridged, and ready for the rails, and only seven miles more remain to complete the road through to Hazleton. It is expected that the entire road will be opened for business by April 1, 1870. Thomas Woods, Esq., of Philadelphia, is President of the company.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH, BANKERS AND DEALERS IN GOVERNMENT SECURITIES, No. 5 NASSAU ST., N. Y., Nov. 8, 1869.

TO OUR CUSTOMERS AND CORRESPONDENTS.

The surprising development of our national resources and the rapidity with which the Government is now enabled to reduce the National debt, by weekly purchases, render it apparent that the time is approaching when the Five-twenty bonds may be funded at not over four or four and a half per cent. interest.

Meanwhile their high price, as compared with other classes of securities paying an equal rate of interest, is leading to general inquiry for more profitable forms of investment in which money may be safely invested.

During the war the necessities and peril of the Government, and the consequent cheapness of its securities, rendered them so attractive that, from this cause, combined with the patriotic faith of the people in their safety, they absorbed almost the entire floating capital of the country, and diverted attention from other classes of securities which had before been deemed sufficiently conservative and sound to meet the wants of the most cautious investors.

The Government is no longer a borrower. It no longer needs the country's capital, but desires gratefully and honorably to repay it.

The rapid accumulation of capital for investment, and the reduction of the National debt and improvement of the National credit—rendering it certain that hereafter but a comparatively low rate of interest can be derived from investment in Government bonds—is compelling the search for other safe and well-guarded channels into which capital not employed in business may wisely flow.

The enterprises of Peace, no less needful, in their time and place, for the common welfare, than were the waste and cost of war, now call for the capital which the Government no longer needs, and offer for its use a remuneration which the Government need no longer pay, and in some cases, a security as stable and enduring as the faith of the nation itself.

The desire to capitalize the premium which may now be realized upon Five-twenty bonds, and which a natural decline in gold toward par, and the ability of the Government to fund the debt at a lower rate of interest, may at any time extinguish, is felt by many holders who desire some satisfactory assurance as to which of the many low priced securities in the market would afford the necessary safety to justify an exchange.

The applications for information and advice which are addressed to us daily, show how universal is the desire for this assurance, as to what forms of investment, more profitable than Government securities at present market rates, are entitled to the confidence of investors.

The pressure of this want has led us to feel the importance of directing our own attention as bankers, our large experience, and our facilities for obtaining reliable information—to the work of supplying it in some measure, and to offer the results of our inquiries to those who may be disposed to confide in our good faith and judgment.

We are unwilling to offer to our friends and the public anything which, according to our best judgment, is not as secure as the National obligations themselves, with which we have hitherto principally identified ourselves.

Since closing the great CENTRAL PACIFIC RAILROAD LOAN, which meets all these requirements, we have carefully examined many others, but have found no other which would fully do so, until the following was placed in our hands:

FIRST MORTGAGE

SIX PER CENT. GOLD BONDS

OF THE

WESTERN PACIFIC RAILROAD COMPANY OF CALIFORNIA.

The Western Pacific Railroad connecting Sacramento with San Francisco, furnishes the final link in the extraordinary fact of an unbroken line of rail from the shore of the Atlantic to that of the Pacific.

It is 150 miles in length, including a short branch, and it will be the

METROPOLITAN LINE OF THE PACIFIC COAST,

connecting its chief cities, and traversing the garden of the rich and growing State of California; receiving, in addition to an immense and lucrative local traffic, the through business over the Union and Central Pacific Railroads—between the Eastern States and Sacramento.

It is completed, fully equipped, and in successful operation, and its earnings in October, the first full month, amounted to $105,000 in coin. The net earnings will, by a moderate estimate, amount to $600,000 per annum, in coin, while the interest on its Bonds will be but $168,000.

The value of the property and franchises is not less than

TEN MILLIONS OF DOLLARS,

and the mortgage is limited to

$2,800,000.

The bonds are of $1,000 each, have thirty years to run, and will be sold at

NINETY, AND ACCRUED INTEREST,

in currency. They are payable, PRINCIPAL AND INTEREST IN GOLD COIN, in the city of New York. Coupons due January and July 1.

The near approach of the time when the United States can probably re-fund the greater portion of its Six-per cent. debt is naturally causing inquiry for other forms of investment which will afford satisfactory security with the same rate of interest. The WESTERN PACIFIC RAILROAD FIRST MORTGAGE BONDS must have an immense advantage over all other securities based upon merely local or uncompleted railroad and may be held with as much confidence as Government bonds, or as first-class mortgages on New York city property.

The loan is small in amount. Its claims to confidence are apparent. It will be rapidly taken. Bonds will be delivered as the orders are received.

Government bonds received at their full market value in exchange.

FISK & HATCH, BANKERS.

East Tennessee and Georgia Railroad.

The earnings of this road for the fiscal years ending June 30, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$208,754 34	$208,949 16
" freight	251,923 77	271,587 97
" express	15,654 08	10,725 04
" transp. U. S.	4,053 00	511 89
" mail service	16,825 00	13,670 02
" other sources	15,654 32	10,550 48
	$512,864 51	$515,994 56
Expenses, viz:		
Transportation	$63,400 15	$59,813 74
Motive power	115,775 36	82,839 13
Maintenance of way	135,410 08	90,698 35
Maintenance of cars	46,485 30	53,846 55
General expenses	21,512 96	15,979 02
Equipment	9,162 10	.....
Depot buildings	1,841 69	3,379 77
Extraordinary exp	52,279 40	30,259 06
Real estate	240 00	.....
Taxes	5,761 46	5,534 51
	$451,868 50	$347,013 13
Net earnings	$60,996 01	$168,981 43

Compared with the previous year, the gross earnings show an increase of $3,130 05, with a decrease in expenses of $104,855 37—making the increase in net earnings, $107,985 42. The report says:

The gross earnings have been $515,994 56, and the expenses of every description, ordinary as well as extraordinary, $347,013 13, which, deducted from the gross earnings, would leave $168,981 43 nett, to pay interest to the State of Tennessee and on Second Mortgage Bonds, the interest on which amounts to $141,460 64 this, taken from the nett earnings, as above, would leave a balance of $27,520 89; of this sum $14,181 91 has been retained during the year by the Government, and credited upon our Bond, which leaves us on hand for the year's operations $13,338 98. By comparing these figures with those of the Annual Report of the year ending June 30th, 1868, you will find that while the earnings of the present year exceed that of the previous year $3,130 05, that the expenses have been reduced very greatly. Including extraordinary expenses and all, it has taken 67¼ per cent. of the gross earnings to operate the road, and we hope that a further reduction in expense during the next fiscal year may and can be made. The items making up the extraordinary expense account, for this year, as shown above, are principally made by the building of the Round House, at this place, and the weather-boarding, covering and painting of the Loudon Bridge.

In comparing the earnings of the first six months of this fiscal year with the same period of last year, we find that there was a heavy falling off; say of about $32,000—about one-half of this sum is from passengers, and the other half from freights. The falling off from freights is attributed to the small wheat crop of 1868, which is generally moved in the summer and fall, and the low rates at which all through business has to be done, in order to contend with competing lines. And the falling off in passengers for this six months, may be justly attributed to the fact that we have had but one daily passenger train, and thereby could not successfully control the number of passengers that our position entitles us to. But, unless a double daily line shall be established through, it would be ruinous to us to run it. The business, however, of the last six months is an increase over the same period last year; both in passengers and freight, to an amount sufficient to increase the gross earnings of the year. The increase in the freight was caused by the heavy corn crop moved during the year.

Since the last Annual Meeting of this Company, we have succeeded in effecting a settlement with the State of Tennessee, of our Interest and Sinking Fund Account, which has been the cause of so much annoyance and trouble since the war; because, from the Annual Reports of the Comptroler of the State of Tennessee, made to the Legislature, it was made to appear that we were largely in arrears, in our semi-annual payments of interest; which had the effect to damage our credit, from the fact that outside parties did not know but a Receiver might be appointed to take charge of the Road, for non-payment of interest due to the State. This apparent difference of the accounts of the Comptroler and the Company existed, not from a want on the part of the officers of the State to do us damage, but from honest convictions on their part, that they had no right to credit the Company with certain payments that had been made after the 1st of January, 1861. But, under a recent decision of the Supreme Court of this State, all payments made to legally authorized parties upon all contracts were legal and valid, when they were received without protest. And under this decision of the Court a full and complete settlement was made; this Company having made these payments to the Bank of Tennessee, the fiscal agent of the State, before the removal of the Bank from the State; which settlement, as made, is in accordance with our books, and is satisfactory to the State and to the officers of this Company.

The interest due to the State of Tennessee, as well as on our Second Mortgage Bonds, was paid in full on the 1st day of July last.

During the year a very substantial, neat and commodious Engine or Round House has been built, and does credit to Milton Wilds, who had the supervision of the structure. And, in addition, the Bridge at Loudon has been weather-boarded, covered and painted, and is in first rate condition. The building of the Round House, together with an Oil House, 20 by 40 feet, of brick, cost $11,937 20; and the covering of the Bridge, painting, &c., cost $13,352 64.

A side track has been put in at Loudon, from the main track of the road to the river, with all the necessary machinery for taking up freight from the river on an inclined plane to the depot, and delivering the same to boats, which is an improvement that was very much wanted; the Superintendent recommends that a similar improvement be made at the Hiwassee river, and we agree with him, and recommend that it be done.

On account of the great drought in the country, which has almost cut off the corn crop in East Tennessee, we cannot expect our local business to amount to a great deal during the year ending June 30th, 1870, and therefore must look for short receipts; and a strict economy in the management of the road will be required to enable us to pay interest on our debt, in January and July next.

In reference to the double daily passenger train, it is proper to say that we have sufficient power to run the trains and do all the freight business that will be offered.

From the Report of the Superintendent, you will see that we will need, within the next year, ten miles of new iron to take the place of old and worn out rails. This will require one thousand

tons. By the different acts of the Internal Improvement Law, under which we borrowed money from the State of Tennessee, we are required to use iron weighing one hundred tons per mile. The present cost of iron in New York is about seventy-nine dollars per ton, in currency; the freight from New York to this place would make the iron cost us over ninety dollars per ton: this would make the ten miles of iron cost us, delivered here, at least $90,000. From which you will see that all the earnings, and any surplus, of every description, is to be fully taken up, to enable us to keep the road in the condition that will be required for a safe transit of passengers and freight.

The condition of the Company's claim against the Government is in a very unsatisfactory state, and we beg to call your attention to the fact that, on the 23rd of August last, Col. C. W. Folsom called upon the President of this Company with a letter from M. C. Meigs, Quartermaster General, dated the 3rd of August, 1869, in which he informs the Company, through the President, that on account of the failure to pay the indebtedness claimed to be due the Government, that under the terms of the Bond "He has appointed the said C. W. Folsom Receiver of this road, with full power and authority to take possession of and control and operate said railroad," which, being declined, a formal application was made by Col. C. W. Folsom, in the form of a written communication, which is herewith submitted for your consideration and direction, together with the letter of M. C. Meigs, Quartermaster General, and the replies to each.

The company have 19 locomotives, 10 first-class and 4 second class passenger, 4 mail and baggage, 140 box, 38 coal, 25 platform, 1 pay, 1 wrecking and 6 stock cars.

The general condition of the company on the 30th of June, 1869, was as follows:

Capital stock	$1,290,067 25
State scrip	29,929 00
State loan—old	1,037,000 00
" new	430,277 50

Superintendent.—R. C. JACKSON.

Treasurer.—R. M. FISHER.

Pennsylvania and New York Railroad.

By the recent completion of the Pennsylvania and New York Railroad, which is an extension of the Lehigh Valley Railroad from Wilkesbarre to the New York State line, a new route has been opened into Northern Pennsylvania, interior New York, Buffalo, Niagara Falls and the great West, by the way of the North Pennsylvania, Lehigh Valley and Erie Railways. Passengers taking the North Pennsylvania Express Train at 7.45 A. M. reach Waverly the same evening, and can either lay over at Waverley and have choice of several Erie express trains the next day, or go directly on to any point with which the Erie Railway has connections. This route, in carrying out the first conception of the originators of the North Pennsylvania Railroad, passes through a region new to the majority of Philadelphia tourists, abounding in beautiful scenery and thriving towns; and being almost an air-line between its termini, offers to both business and pleasure-travel, speed, comfort and enjoyment. We learn that the volume of passenger and freight traffic that has offered since the opening of the line is such as to warrant the belief that it will be a favorite route for both business and pleasure.—*Phila. Press.*

Permanent Way.

We have several times referred to this important question, and it is gratifying to learn that men of practical minds are discussing the matter with much interest and a good degree of energy.

Up to the present time, however, the arguments and controversy seems to be in relation to rails, ties, subsils, balancing the ties with gravel, &c., &c. Occasionally the modes of fastening the rails to the ties is referred to, but only to condemn the common nail spike, without recommending anything better as a substitute.

It is our purpose at this time to treat upon this subject as, in our judgment, one which forms a vital link in successful railroading; and also a branch of the question of no less interest to the traveling public than to the managers and stockholders of railway companies.

It is a notorious fact that human life is held in less esteem in America than in any other civilized country. Men in all public places seem only to count cost, estimate profits, and count dollars, regardless of human comfort or the lives of their fellowmen; while in Europe, especially in England, safety to life is the first concern, and second the preservation of property entrusted to their care. No expense is spared to make their railroads secure and reliable. It may be that in England there are advantages favoring the railroad interest which cannot be so fully enjoyed in this country. The soil generally may be better adapted to solid, permanent road bed; and it doubtless is a fact that the mild climate favors them in the Winter. These may be advantages which cannot be had in the Northern States of this country; but this makes it the more important that great care should be taken in the construction of our railroads.

There is another disadvantage under which we labor, which seems to be the prolific source of nearly all poor railways, and consequently a large share of accidents on our roads, destruction of life, and loss of property. We refer to the want of sufficient cash capital to use when our roads are being constructed. A large proportion of our roads are burthened with debt from the start, hence economy becomes the necessity, and cheapness the watchword. It is no uncommon occurrence to hear the officers of a new railroad remark that "We will get the road in operation, and build it afterwards," meaning that they will do as little to the structure as possible till it begins to earn something, and then perhaps they can borrow money on the property to improve it. They leave out of sight the fact that the damage to property and loss of life, by the frequent accidents on a rickety road, will make the money they may borrow cost a fearful rate of interest.

It is a fact that cannot be disguised that a large majority of the accidents occurring on our railroads is directly caused by loose and broken rails, proving that they are not properly fastened to the ties. It is also a fact that these accidents are more frequent in the Winter than in Summer. The cause of this is charged to broken rails, and the breaking of the rails is said to be caused by the frosty weather. If the rails are alike, and all well fastened, why don't they all break since they are alike exposed. Obviously they are not properly fastened to the ties.

Perhaps there is not a road bed to be found where the ground over which it passes is solid and dry alike. There are alternate hard and soft spots, and wet and dry places, so that it is next to impossible that the ties should all have the same bearing, or the same dry foundations. In warm weather, by constant watching, the soft and wet spots may be found, and the ties may be kept tolerably level and fair on the top by a system of tamping with gravel; but when the weather is cold, and when the ground is covered with snow, it is impossible to detect these treacherous spots. Therefore the passing heavy trains of cars forms a weight, the rail forms a succession of levers, the ties forming the fulcrum to lift on the bearings beyond; add to this the constant jar that is caused by the frequent passing of trains, and it will be seen that the soft spots in the road bed will yield to the pressure. In this operation the strain upon the *spikes*, or fastenings, becomes very great. On all soft or yielding spots, while there is no frost in the ground and the spike or fastening continues to hold, the spring of the rail may bring the tie up to a level, and thus preserve the side pressure of the track; but experience proves that the common spike will not hold, but becomes loosened with the first lifting or upward strain upon it, and the tie will sink down from the rail thus being rendered unserviceable.

When the weather is cold the ties thus depressed freeze fast, and the alternate ties (as is often the case,) being upon solid ground, it will be seen that they form a fulcrum over which the heavy engine passing with such force that the rail breaks directly over the sunken tie. By the sinking of the tie the spike has been rendered useless, therefore the broken rail spreads, and the whole train is thrown from the track, often resulting in fearful loss of life and destruction of property. *Can such accidents be attributed to any cause but worthless or insecure fastenings.*

The quality of railroad spikes, or the best mode of fastening rails to ties has received much attention in Europe; while in America it seems to have been passed by as a matter of small importance.

In an article lately published in the London *Engineering*, the fastenings for rails has the following reference:

If I wish to fasten a piece of iron to a board, and do so by driving blunt ended nails into the timber, I find that a small force is sufficient to separate them; but if instead of nails, I use wood screws for the purpose, I find it impossible to separate the iron only by tearing away the wood that surrounds the screw. *Now the ordinary spike is nothing but a large blunt ended nail, and consequently most unfitting for the purpose it is applied to. On lines of even light traffic, when driven into new timber, it may be seen by the close observer to have given way within a few days of its being used.*

There are other reasons against the use of the spike, one I will mention; it often happens that from carelessness, or from the tendency many men have of slighting their work, that the spike is driven without first boring the timber, and this results in either splitting the sleeper or knocking a piece out of the bottom of it. In the first place, the sleeper is useless, in the second, it is greatly damaged.

The devices for fastening rails to ties have been numerous; and it is a remarkable fact that inventors (and not practical railroad men,) have done all that has been accomplished in this line. The common nail spike seems to have been in use from the commencement of the railroad era; but as it has always been considered most unfit for the purpose, there seems long to have been some effort made to produce a substitute. The only points which recommend this spike are, first, its cheapness, and second, the simple easy way of putting them down, but it is chiefly the low price. The square spike *twisted* was tried and found valueless. The barbed spike was once used to some extent, but lacerated the wood to such an extent that it proved to be a very poor affair, and was therefore abandoned. The split end spike, with the points of the prongs beveled, was thought to be an improvement, but on trial it was found that it would vary very much in its operation according to the kind of timber used for ties, by which means it was unreliable, and its use abandoned.

The corrugated spike was found to have no holding power beyond that of the common nail, therefore it is not used.

The spike with a notch or stop near the point was tried, and failed because it breaks the grain of the wood badly, thereby becoming loosened.

The spike with a single spiral thread, intended to drive, has been invented, but not used; it would be difficult to make, and it seems to present no advantages over the twisted spike which has been discarded.

A spike with three spiral threads has been invented, but we cannot learn that any have been made.

A spike with a screw thread on two round sides, and two plain flat sides, has been invented; it is intended to be driven nearly down, and then fastened by giving it a half turn, when the screw part would gripe the wood. None of these have yet been introduced. We see no advantage in this spike, as it also would badly crush the wood while being forced in, and the half turn given to it would loosen the point thereby destroy its holding power.

A wooden treenail was at one time used in England, but soon abandoned for want of strength and substance to be serviceable.

A spike with a beveled point, with a jog on the backside designed to clench in the wood, and then be fastened with a key, has been invented, but none have been made.

A spike with a champered point, intended to clench in the wood, was tried and found a failure.

A round blunt end spike, designed to be driven into the tie by first boring for it, has been largely used in England, but discarded on account of the tendency of workmen to put them down badly.

The fang bold, commonly called a screw bold, has been extensively used in England. The operator, to use them, is obliged make an opening under the tie in order to adjust the nut; it has been discovered that this work is often slighted (or scamped as the English call it), that the nuts often work loose and come off, besides being very expensive, they are becoming very unpopular.

A concave sided spike has been invented, but we are unable to learn what advantage the inventor claims for it.

In 1864, a gentleman by the name of MONTIGNANI invented what he termed the *Double Hook Headed Screw Spike.* He placed it before some of the prominent railroad Presidents and scientific men of this country; and while they thought it possessed considerable merit, they seemed unwilling to aid or encourage its introduction—the chief points of objection raised being first the difficulty of putting the screws into the ties, and second their high cost. These difficulties seemed to form a barrier to the use of these screws. Two years later, this screw was brought to the notice of several capitalists in this city, who took a more practical common sense view of it, and believing they saw such qualities in it as would recommend itself to the public, if not to railway managers, they concluded to form a stock company with a view to manufacture and introduce these screws to the railroad companies. Machinery was prepared, and a factory built. When the screws were put upon the market the objections before named were urged with great energy against them. On another page of this week's issue may be seen a cut of this screw, also a double handed tie boring machine, with description of the mode of putting the screws down. If this machinery will do all that is claimed for it (and it seems very simple), namely, to prepare the ties in a mill by machinery, with the screws in, ready to receive the rails, the ties being ready gauged, then the first objection to the use of the screw spike is entirely removed; and it may safely be said that railroad track can be laid more accurately and much more rapidly in this way than it possibly can be with the common spikes.

The second objection, viz., *the price, should have no weight at all.* The only question should be are they safe, will they afford any new security to the lives of railroad passengers, and will they add anything to the safe transit of property? The carelessness of men generally who are employed on public works is very remarkable. Railroad employees, especially become very reckless of danger; they seem to have but slight hold on their positions, therefore they seem unwilling to take the trouble to make any improvements, particularly if any trouble is likely to be attached to the effort.

Others, again, seem very afraid that they may make some mis-step which may cause them the loss of their situation. On these accounts the subordinate railroad officers are slow to act, and the leading officers seem to be so full of business that they cannot find time to attend to any new matter.

This question naturally presents itself to our mind in this form: Suppose this Double Hook Headed Screw Spike had been in use from the time the first railroad track had been put down to the present; it was known to be expensive and difficult to put down, and yet it performed its work perfectly; and then suppose that in order to save trouble and expense some one should introduce the nail spike—it was shown to have no holding power, would give no security, it has nothing but ease of use and cheapness to recommend it—can any one imagine that its use would be tolerated either by railroad officers or the public? We think not.

We are informed that these screws are now in use to more or less extent on more than fifty different railroads, and that in every case they have performed all that is claimed for them.

The New York and Oswego Midland Railroad Company have laid their entire track from Oswego to Sidney a distance of one hundred and fifty miles, and have used these screws to fasten the rails to the ties. Competent judges pronounce this to be the best track yet put down in this country.

In concluding to use these screws, the President shrewdly argued that in his opinion the safety of life and property on the railroads of this country was beginning to occupy a large and growing place in the public mind, and in cases where competition was any way active that the road offering the best assurance of security would have greatly the advantage, therefore he wisely concluded to use none but the best and most approved materials—hence the use of the screw spikes with so much satisfaction.

The inventor of this screw claims that its holding power is five tons, and the lateral strain will bear three tons. That these screws will hold the tie so firmly to the rail that the track forms an easy connected spring. That in ordinary dry soil the spring of the rail will keep the ties up so near the level that the sand and gravel will work under them and cause them at all times to have a firm bearing with very little attention from the road masters; and in cold weather, the ties being held firmly to the rail, they cannot freeze down unevenly, but in soft spots, the tie being lifted up by the spring of the rail, the ground and water will freeze under the tie, and this way form a solid bearing—all of which seems to keep the track level, and prevent the breaking of rails.

The inventor still further claims that these screws will not damage the ties when they are inserted, and by this means the ties will last much longer than when used with the common spike. The inventor claims that a track put down with these screws will be kept in repair at much less expense than any heretofore has been.

In conclusion we will say, whether this screw has all the merit claimed for it or not, it is but well and proper for the managers of railway companies to give it a fair trial, and then if it will do all that is claimed for it it is safe to assume that it will be universally adopted.

HENRY YOUNG, President. AGENCY OF G. B. HUBBELL, Secretary.

THE UNITED STATES RAILROAD SCREW SPIKE CO.,

MONTIGNANI'S PATENT

NO. 45 CLIFF STREET, N. Y.

WORKS AT OSSINING, WESTCHESTER COUNTY, N. Y.

To all persons engaged in the construction and management of railroads.

We respectfully call your attention to the DOUBLE HOOK HEADED SCREW SPIKE for fastening rails and chairs to ties. The above cut represents the size and shape of the Screw. It has been thoroughly tested on several of the most important railroads in the country and in every case it has stood the test in the most admirable manner.

The SCREW SPIKE possesses the following advantages over the common spike.

First. They are made of the best refined iron, the thread being forged (not cut,) refines and toughens them.

Second. The holding power of each SCREW is from four to five tons, and the side pressure, three to four tons.

In three years' experience no SCREW has moved from its place and the rails in every case have been held as firmly to the ties as when first put down. By its use therefore the numerous accidents constantly occurring from loose and broken spikes, and loose and broken rails, and consequent spreading of the track will be obviated.

Third. In order to remove the rails it will only be necessary to reverse the SCREW one-quarter, and when replacing it, turn the SCREW back to its original position (the same as turning a button,) when the rail will be held firmly as before. *The ties* will thus be saved from the injury the splits, and the numerous holes made in them by repeatedly drawing out and replacing spikes. By the use of the SCREW therefore the durability of the ties will be greatly increased.

The saving to railway companies in ties alone, it is estimated (by experienced trackmasters) will more than pay the whole cost of the SCREW.

Fourth. Where the SCREW is in use in addition to the saving of time in relaying rails, a much less number of men are required to watch the track, and keep it in repair, thereby causing a great saving.

In corroboration of the foregoing, we could present the testimony of many of the most experienced trackmasters and engineers in the country, but deem it only necessary to refer to the following railroad companies selected from more than forty who have used these SPIKES in more or less quantities, viz:

Philadelphia and Reading, Hudson River, Philadelphia, Wilmington and Baltimore, New York and New Haven, Chicago and Rock Island, Fond du Lac and Sheboygan, Albany Bridge Company, Quincy Bridge Company. During the year 1869 The New York and Oswego Midland Railroad Company has used more than four hundred Tons of our Screws. We are now prepared to manufacture these SCREWS in any quantity desired.

We call particular attention to the following mode of putting down our Screw Spikes:

Figure 1.—Represents a double handed Machine for boring and guaging Railroad Ties which is done with one operation. The Machine is placed upon the Tie, is easily worked by two men, and bores four holes at once, it may also be used by Steam or Water power and in this way the holes for the Screw Spikes are bored very rapidly.

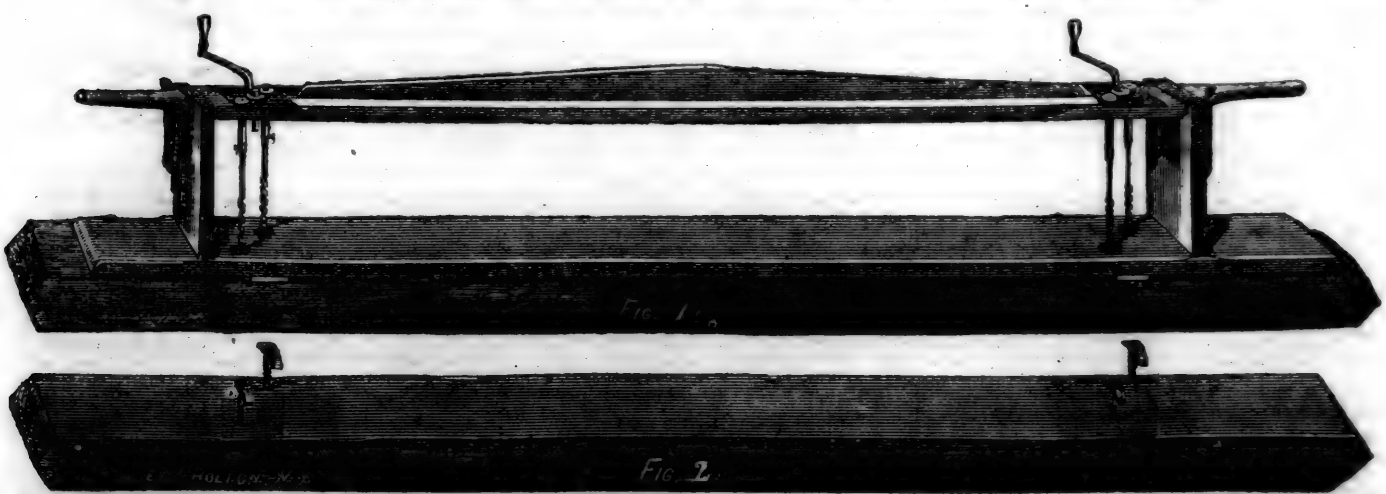

FIG. 1.

FIG. 2.

Figure 2.—Represents a Tie with the Screw Spikes set in it, preparatory to placing the same on the road bed. The Screws may be put in the Tie by hand, in the woods, in a Mill, or any other place where a large number of Ties are collected. The Screws will be set to the proper guage for the track and may be so nearly screwed down that it will only be necessary, after the Ties are properly distributed on the Road Bed to drop the Rail in its place and give the Screw a quarter turn, or at most three-quarter turn when the Rail will be firmly fastened to the Tie. The Screws may be turned into the ties with an upright Power Drill such as is used in any machine shop, or, two such machines could be so placed that one could bore the holes while the other was turning in the Screw; such machines can also be so arranged to bore two holes and turn in two Screws at the same time, the Tie can be moved along on a carriage or endless apron.

It will readily be seen that the work of preparing the Ties with the Screws in, may be done under cover, in cold or stormy weather at a time when no work can be done on the Railroad. With Ties thus prepared the Track can be laid in much less time than it can be with common Spikes, thus giving additional proof of the great value of the SCREW SPIKE.

We are now prepared to furnish the double handed Tie boring Machines and hope bye and bye, to be able to publish cuts of improved Screw driving Machines. We also furnish other Tools for putting down the Screws which are used for repairing or replacing Ties.

For further particulars, addres.

G. B. HUBBELL, Secretary, 45 CLIFF STREET, N. Y.

American Railroad Journal.

Saturday, November 20, 1869.

Stock Exchange and Money Market.

Money has been less freely offered in both forms, of call loans and of discounts. The city banks have not been in a position to make considerable fresh advances to their customers, while private lenders have been less liberal of accommodation. Call loans have been generally quoted up to 6@7 per cent. to the leading street borrowers. Mercantile credits have ranged from 8@10 per cent. per annum for the best names, to 15@18 per cent. for good grades of business paper. The currency drain from this point has not been very heavy, since our last. The main call has been from Cincinnati and Louisville, for means to be used in marketing the hog crop. Northwestern collections have improved a little, more than equalizing the currency movements here, so that the city banks have been enabled, not only to maintain, but to moderately increase their reserve of legal tender notes. The banks added 1⅛ millions to their specie hoard, and made a gain of about ¾ths of a million, in their deposit averages. They reduced their loans, about 1⅝ millions, but added a little to their circulation. The U. S. Sub-Treasury augmented its currency balances nearly 1¾ millions, but cut down its specie reserve about ¾ths of a million. The aggregate of specie in the banks at the close of the week was 26¾ millions, and in the Sub-Treasury 80¼ millions. The legal tender reserve of the banks was about 51⅛ millions, and of the Sub-Treasury nearly 6 millions.

One of the gratifying announcements of the week is that the old and eminently respectable banking firm of Messrs. Legrand Lockwood & Co., forced into suspension, during the Gold and Stock panic in September, is about to resume business.

The specie reserve of the city banks according to the latest return is $26,755,693, against $16,155,608 same time last year. The city bank deposits are now $183,754,306, against $175,150,589 week ending Nov. 14, 1868. The legal tender reserve amounts to $51,095,661, against $51,466,693 same time last year. The circulation now stands at $34,212,867, against $24,249,564 same time last year. The loans are now $251,180,557, against $249,119,539 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $95,143,215 a day, against a daily average of $114,980,180 the preceding week, and $90,075,108 the week ending with Oct. 30, 1869. The current week's exchanges average about $102,441,000 a day. The city banks, last week, reported a gain of $1,536,727 of specie, and of $792,466 of deposits, with a loss of $1,138,062 of legal tender notes. They reduced their loans, $1,618,893; and increased their circulation, $24,204.

National Bank notes to the amount of $153,070 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $319,026,931, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $19,405,218, leaving, with the existing 1,620 banks, (having an aggregate capital of $422,659,260,) an actual circulation at this date, of $299,621,713. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,552,250; and for the public deposits, $19,508 000—making a total of $362,060,250. The Treasury Department last week redeemed and destroyed $309,452 of worn and mutilated fractional currency, and issued $316,000 of new. The outstanding amount of fractional currency on the 1st of Nov., was $37,035,442, against $33,001,299 on the 1st of October, 1869.

The U. S. Sub-Treasury receipts, week ending with Nov. 13, were $4,975,604 in coin, (including $1,952,000 from customs duties,) and $6,184,218 in currency; payments, $5,760,263 in coin, (including $1,795,645 of coin interest,) and $4,439,269 in currency; balance at the close of the week, $87,374,787, (including $80,272 735 of coin, and $5,989,661 of currency,) against $95,412,313 at the close of the preceding week, showing a decrease of $8,037,526. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $439,676 in coin, (including $333,554 from customs,) and $426,462 in currency; payments, $239,458 in coin, (including $217,955 of coin interest,) and $277,351 in currency. On Tuesday, receipts, $498,581 in coin,

(including $446,995 from customs,) and $461,311 in currency; and payments $143,297 in coin, (including $124,230 of coin interest,) and $416,240 in currency. The balance at the close of business on Tuesday stood at $87,128,396, (including $6,183,843 of currency, and $80,828,236 of coin,) against $88,308,276 a week previous; and $90,445,167 on Nov. 2, 1869. The aggregate receipts of the office in Oct. were $58,880,083, including $11,194,159 from customs; aggregate payments, $53,555,362, including $7,715,080 of coin interest.

The outstanding amount of coin certificates on the 1st of Nov. was $28,731,520, against $24,412,720 on the 1st of Oct., 1869. The Sub-Treasurer at this port, last week, retired $1,676,765 of coin certificates through the receipts for customs.

Government revenues have been on a reduced scale, since our last. The excises yielded about 2¾ millions; customs at the port of New York, $1,780,765, and at the outports about $600,000 (in coin) more, making the grand total income for the week equal to about $5,785,775 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 66 millions.

Gold has shown rather more firmness, on a somewhat livelier speculative movement. The range of the week has been from 126½@127⅜, and the closing quotations were 127⅛@127¼. Government marketed a million of Gold on the 12th inst., at from 126.55½@126.64, and another million on the 16th inst., at from 127.02@127.20. The specie exports, last week, were confined to $123,221. On Tuesday, the *Westphalia* took out $33,000. The customs drain has been on a reduced scale, having averaged less than $300,000 a day. The coin interest disbursements through the U. S. Sub-Treasury were nearly up to the daily customs. Government was to have disposed of another million of Gold on Friday, Nov. 19. At a meeting of the Gold Exchange on Monday afternoon, a resolution was adopted by which the clearings at the Gold Exchange Bank were to have been resumed on Wednesday Nov. 17, the ascertained differences between the members to be settled through the Metropolitan Bank.

The coin balances of the Government at this port on Wednesday morning, amounted to nearly 80⅞ millions.

The customs demand for Gold last week, averaged $296,694 a day; thus far, this week, it has averaged $390,279 a day, or equal to a weekly aggregate of $2,341,674. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $60,509, and since Jan. 1, $14,839,087, against $6,404,299 same time in 1868. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1869, has been $117,788,423, against $105,968,433 same time in 1868. At San Francisco, from Jan. 1, to Nov. 6, 1869, $7,268,661, against $7,278,235 same time last year.

The exports of specie, from this port, last week, were $123,221, against $252,050 same week last year; total, since Jan. 1, 1869, $30,012,562, against $68,459,480 same time last year. Government disbursed last week through the U. S. Sub Treasury here, on account of the coin interest on the public debt $1,795,649, and since Jan. 1, 1869 $82,431,495, against $77,245,609 same time in 1868. The specie exports from San Francisco, from Jan. 1, to Nov. 6, 1869, were $32,967,551, against $31,239,951 same time in 1868.

The U. S. Treasury receipts from customs at all ports from July 1, to Nov. 13, were about 69 millions.

The amount of specie sent east by railroad from San Francisco, thus far, this year, has been $5,366,117.

Foreign exchange has been quoted rather stronger in price, on a reduced offering and a moderate call from buyers. Bankers' prime sixty day bills on London closed on Wednesday at 109@109⅛, and on Paris to 5.21¼@5.16¼; sight bills on London to 109½@109¾, and on Paris to 5.15¼c.@5.13¾. The offering of produce bills has been less extensive this week. The week's exports of domestic produce have been to the currency value of $3,890,927, making the total since Jan. 1, 1869, $173,048,188, against $145,340,173 same time last year.

Government securities have been in quite moderate supply most of the week, and with a rather more active demand, especially for the later Five-twenties, and the currency sixes, prices have shown a little more firmness. Government bought in three millions of Five-twenties. On Wednesday at fair average market rates.

U. S. sixes of 1881 closed here more steadily at 117½@117⅝; U. S. Five-twenties of 1862, ex-coupon, 115⅜@115½; U. S. Five twenties of 1864 at 113@113⅛; U. S. Five-twenties of 1865 at 113⅜@113½; U. S. Five-twenties of 1865, consolidated, 115½@115⅝; U. S. Five-twenties of 1867, 115⅝@115⅞; U. S. Five-twenties of 1868, 115½@115¾; U. S. Ten-forties at 107½@107⅝; U. S. Six per cent. currency bonds, 107¾@108.

At. and Gt. West	....	....	....

State and railway bonds have been in fairly active request throughout the week at generally well supported prices, the several Pacific Railway First Mortgage Bonds taking the lead; and of these the favorites were the First Mortgage Bonds of Central Pacific, Western Pacific, Union Pacific, and Kansas Pacific.

The Western Pacific six per cent. First Mortgage Bonds were brought on the market only about a week ago, yet they have been selling at so liberal a rate, that it is confidently believed the whole issue, which amounts to only $2,800,000, will be disposed at an early day. The loan which has thirty years to run from date of issue, constitutes a lien on the entire property of the company, which is estimated as being worth more than three times the aggregate of this First Mortgage, and which is otherwise wholly unencumbered. Interest and principal of the loan have been made payable, expressly in coin, at the city of New York. The interest is at the rate of six per cent. per annum in coin. The bonds are now available at 90 per cent. and accrued interest in currency; through the financial agents of the Western Pacific Company, Messrs. Fisk & Hatch, Bankers, No. 5 Nassau street, who give elsewhere in the JOURNAL more specific information, relative to the nature of the loan, and the magnitude of the property, which forms the very substantial basis of its claims to public confidence. The Western Pacific Road was completed and placed in thorough working order early in September. In October it made a handsome traffic exhibit as regards both passengers and freight. It is the connecting link between the extreme Western terminus of the Great Central National Pacific Railroad route at Sacramento and the city of San Francisco. It runs through the most populous portion of California, traversing, in its course, the three great agricultural valleys of Sacramento, San Joaquin and Contra Costa.

Railway and miscellaneous stocks have been more freely purchased at advanced prices, closing as a rule, quite buoyantly.

There has been a moderate movement in domestic produce, prices of which have been variable, closing generally weak for Breadstuffs and Petroleum, and rather buoyant for Cotton and Provisions. Middling upland cotton closed rather more buoyantly at 25⅜@25½ cts. per lb. The stock of cotton now here is given at about 21,000 bales. The receipts at the port this week, have averaged about 5,100 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 613,000 bales, against 467,500 bales in 1868–'9; exports, same time 258,200 bales, against 173,000 bales same time in 1868–'9; stock on hand at latest dates, 236,500 bales, against 191,100 bales same date 1868. The exports of domestic cotton goods from this port, since Jan. 1, have been 18,483 pkgs., against 21,838 pkgs., same time last year. From Boston, 6,762 pkgs., against 7,583 pkgs. same time in 1868.

At the Live Stock markets, this week, Beeves have been rather more sought after, at from 8½@16c. per lb.; week's receipts, 5,950. Milch cows inactive, at $40@$110 each, receipts, 94. Veal calves in less request at from 4@13½c. per lb.; receipts, 1,568. Sheep and lambs in more demand at from 3½@6½c., and 6@8c. per lb.; receipts, 29,340. Swine in fair request at 9¾@10¾c. per lb., all live weight; receipts, 19,796.

Freights have been more active, rates having been quoted lower, though rather more firmness was apparent toward the close. For Liverpool we quote flour at 2s. 3d. by sail, and 2s. 6d.@3s. 9d. by steamer, per bbl.; grain at 7¼d. by sail, and 7½@7¾d. by steamer, per bushel; cotton at ¼d. by sail, and ⅜d. by steamer per lb.; and heavy goods 20s.@35s. by sail, and 30s.@50s. by steamer, per ton. Total number of vessels in port on Wednesday, 363.

The New York exports, exclusive of specie, for the week ending Nov. 13, and since the beginning of the year, compare as follows:

	1868.	1869.
Dry goods	$1,191,268	$1,164,943
Gen. merchandise	2,403,256	2,988,017
Total for the week	$3,594,524	$4,152,960
Previously reported	215,530,745	256,961,253
Since January 1	$21,9125,269	$261,114,213

The imports for the week ending November 16, and since the beginning of the year, have been as follows:

	1868.	1869.
For the week.....	$3,775,896	$3,890 927
Prev. reported.....	141,564,277	169,157,261
Since January 1.....	$145,340,173	$173,048,188

Illinois Central Railroad.

The statement of this Company for the month ending Oct. 31, 1869, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold.....	4,171.48 for	$37,684 60
Acres Int. Fund Lands sold.....	320.00 for	4,224 40
Acres Free Lands sold..	720.00 for	10,513 80
Total sales during month of Oct., 1869.....	5,211.48 for	$52,422 80
To which add Town Lot Sales.....		.....
Total of all.....	5,211.48 for	$52,422 80
Cash collected in Oct.....		$262,876 09

TRAFFIC DEPARTMENT.

Receipts from Freight.....		$466,057 00
do.	Passengers.....	154,831 21
do.	Mails.....	6,358 33
do.	Rent of Road.....	4,000 00
do.	Other Sources.....	90,000 00
Total Receipts in Oct., 1869.....		$721,246 54
Total Receipts in Oct., 1868.....		$767,222 57
Estimated earnings in the month of Oct., on the D. & S. C. R. R., not included above.....		$173,688 12
Corresponding month of 1868.....		$134,408 63

Sioux City and Columbus Railroad.

This road will be 100 miles in length, extending from Sioux City, Iowa, to Columbus on the Union Pacific Railroad. Ten miles of the line, at the west end, are to be put under contract this fall, to be completed by February, 1870, and ten miles more at the Sioux City terminus. The initiatory point of the road will be opposite the mouth of the Floyd River, which empties into the Missouri just south of the Sioux City limits. The officers of the company are: President, Colonel A. Baird; Vice President, C. F. Drake; Secretary, James Stott; Treasurer, J. Cleghorn; Managing Directors, S. T. Davis, John J. Ogden, Wm. Adair.

☞ A CHOICE SECURITY. SEVEN PER CENT. GOLD, FREE OF GOVERNMENT TAX. NEARLY 10 PER CENT. CURRENCY, FIRST MORTGAGE BONDS OF NEW YORK AND OSWEGO MIDLAND RAILROAD. THESE BONDS CAN BE REGISTERED.

SIX MILLIONS OF DOLLARS PAID-UP STOCK SUBSCRIPTIONS. No bonds issued on road under construction; issue limited to $20,000 per mile of road built and in running order, BEING ONLY ABOUT HALF THE ACTUAL CASH COST. The road is being built with great economy for cash; 100 miles are done, and in the most thorough manner; 50 miles [illegible] ished in November; and the wh[illegible] miles) it is expected will be complete[illegible] ensuing year. It is one of the most [illegible] roads in the State of New York. It shortens the route from New York City to Buffalo 70 miles, and to Oswego 45 miles; it traverses a populous district destitute of other railroad facilities, which must furnish it a large and profitable local business; and it will be completed at an aggregate cost far below that of any competing line. These advantages cannot fail to make it one of the best paying roads leading from the metropolis, and its First Mortgage Bonds one of the safest securities ever issued. All mortgage bonds issued on Railroads running from the City of New York are good, and the interest promptly paid, although some of them are mortgaged for more than double the amount per mile that the Midland is. Among the bonds now offering we know of none equal to these. For the investment of trust or other funds there is nothing better; and in exchange for Government Bonds they give a large increase of income, beside capitalizing the premium. They are meeting with rapid sale, and we have been gratified to find that they are taken chiefly by our most conservative and sagacious capitalists in exchange for Government securities. Price par, and accrued interest in currency. Circulars, pamphlets, &c., on hand for distribution.

GEORGE OPDYKE & CO.,
Bankers, No. 25 Nassau st.

East Saginaw, Ann Harbor and Toledo Railroad.

A meeting of the stockholders of this company was held at Corunna, Mich., on the 28th ult., at which subscriptions were reported to the amount of $87,900. Directors were elected and articles of association adopted, which provide that the road shall run from East Saginaw to or near Chesaning, Corunna, Shiawasseetown, Newburg, Byron, Howell and Ann Arbor. The amount of capital stock shall be $2,000,000, consisting of twenty thousand shares of $100 each. Engineers will pass over the route immediately, and the work be pushed vigorously until completion.

☞ Evansville, Indiana, has voted to subscribe $300,000 toward the building of the Evansville, Carmi and Paducah Railroad. This makes the construction of the road a certainty.

☞ It is proposed to build a railroad bridge across the Sandy River at Farmington and extend the Androscoggin Railroad over it.

☞ The Wilmington and Reading Railroad is progressing quite rapidly; seven miles of it are already laid north of Wilmington.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide water from the commencement of navigation to the 31st of Oct., inclusive, during the years 1868 and 1869, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1868..	339,100	9,913,700	15,959,200	2,316,100
1869..	364,800	12,840,000	5,561,500	197,700
Inc.	25,700	2,926,300	*10,397,700	*2,148,400

* Decrease.

The receipts of the new crop of barley, so far, are 185,700 bushels, against 2,019,200 bushels in 1868.

[illegible] wheat to flour, the quantity of [illegible] at tide-water this year, compared [illegible] corresponding period last year, shows an [illegible] equal to 610,960 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of October in the years indicated:

	1867.	1868.	1869.
Canal opened—	May 6.	April 23.	May 6.
Flour, bbls.....	286,500	339,100	364,800
Wheat, bushels..	5,939,100	9,913,700	12,840,000
Corn, bushels...	14,009,100	15,959,200	5,561,500
Barley, bushels.	2,803,500	2,346,100	197,700
Oats, bushels...	5,819,100	9,189,100	2,679,300
Rye, bushels....	625,100	500,700	234,300
Malt, bushels...	251,200	360,000	206,900
Feed, bushels...	.....	.....	8,526,100

The figures for 1868 cover 45,200 bbls. flour 2,811,500 bush. wheat, 694,500 bush of corn, 321,700 bush. barley, 104,100 bush. rye, 941,900 bush. bush. oats, 54,300 bush. malt, estimated to have been detained on the canal by ice during the winter of 1867 and 1868.

Canadian Railway Returns.

The traffic returns of the Canadian Railways for the month ending September 30, 1868 and 1869, as far as reported, have been as follows:

	1869.	1868.
Great Western.....	$327,622	$355,810
Grand Trunk.....	635,896	624,108
Welland.....	12,164	13,101
Northern	58,890	49,019
Port Hope, Lindsay, & Beaverton, and Peterborough Branch.....	28,228	30,119
Brockville and Ottawa.....	22,276	17,085
St. Lawrence and Ottawa....	9,580	8,732
St. Lawrence and Industry..	961	958
New Brunswick & Canada ..	6,754	8,541
European & N'th American .	16,248	16,108

☞ The Buckingham and Farmville (Va.) R. R. Co. has been organized, with E. W. Hubard, Esq., as President, and H. E. Warren as Treasurer. The corporation proposes to construct a railway from Farmville to a point, on the James River, with Buckingham Courthouse on the line of the road. A corps of engineers have already completed one survey to Buckingham Courthouse from Farmville, and are commencing another between the same points.

☞ A surveying party of the San Diego, El Paso and Memphis Railroad have passed the summit of the range of mountains between San Diego and Fort Yuma. They report the grade to be less than a hundred feet per mile.

Fort Wayne, Muncie and Cincinnati R. R.

This road will be 109 miles in length, all of which is built except a gap of forty-two miles—between Muncie and Bluffton—and this part is nearly ready for the rails. With the proposed aid om Cincinnati, this can be completed in ninety days from the time the first instalment on the bonds will be called for. The committee of the Cincinnati Board of Trade have agreed with the railroad company that four hundred bonds of one thousand dollars each shall be subscribed for, or sold by the company, subscriptions shall not be binding—this sum, it is understood, being sufficient to insure the completion of the whole line from Fort Wayne to Connersville, where it connects with the Junction road, forming a through line to Cincinnati.—*Pittsburg Chronicle.*

Journal of Railroad Law.

RAILWAY CORPORATIONS—THEIR LIABILITY FOR INJURY TO STOCK—STATUTORY REQUIREMENTS.

The facts of the late case of The Toledo, Wabash and Western Railroad *vs.* Furguson (42 Ill., 449,) are clearly and fully stated in the following opinion by

LAWRENCE, J.—This was an action brought by the appellee against the railway company for running over and killing a cow. The plaintiff below recovered a judgment for fifty-five dollars, and the defendant appealed. The cow was killed by the train passing West, just before reaching the station at Harristown. There is a highway crossing just west of the station house. It is in proof that the bell was not rung nor the whistle blown while the train was passing over the eighty rods preceding the crossing. The only defense relied upon is, that the cow was not on the actual intersection of the railway and the highway when struck by the locomotive, but a few feet, or perhaps a few yards one side thereof, and in the direction in which the train was approaching.

It is urged, that the statute was designed to give damages only for injuries done upon the highway crossing, and that this cow, not being there, was a trespasser upon the railway, and that the appellant was liable only for wilful injury or gross negligence. Instructions based upon this view of the law were asked by the defendant below, and refused by the Court, and their refusal is a sign for error.

The counsel for the appellant referred to the case of The Chicago and Mississippi R. R. Co. *vs.* Patchen, 16 Ill., 198, in support of their position, that the cow was a trespasser. That case, while expressly recognizing the authority of the well known case of Seely *vs.* Peters, 5 Gilm., 138, as establishing the right of the owners of stock to permit it to run at large in this State, nevertheless draws a distinction between the right of railway companies and private individuals upon whose land the cattle of a stranger have entered.

Upon that distinction the railway company was held liable only for wilful injury or gross negligence. In the case of The Great Western Railway Company *vs.* Thompson, 17 Ill., 133, the same rule was laid down, but not without a most earnest and vigorous protest by one of the members of the Court, against a principle which established a difference of rights and liabilities between railway corporations and private individuals, in favor of the former. The rule was again propounded in Cent. Mil. Tract R.R. *vs.* Rockafellow, *id*, 541, and Ill. Cent. R. R. *vs.* Reedy, *id.* 580.

In disposing of the case, it is not necessary to re-examine the ground on which these cases proceed, as the one at bar is not within their authority. In the case before us the liability rests upon a violation of an express statutary requirement, the observance of which might have prevented the accident. The 38th section of the act of 1849 requires the bell to be rung or the whistle to be sounded for the distance of eighty rods before reaching a highway crossing, and not only provides a penalty for failure to do this, but expressly provides that the road shall "be liable for all damages which shall be sustained by any person by reason of such neglect." The theory of appellant's counsel, that this only applies to injuries done upon the actual intersection of the two roads where the land belongs equally to both roads, finds no support in the language of the act, and we are not at liberty to interpolate so material a restriction. There is always a highway crossing near a station, and it often happens that in the small villages which grow up around the stations, there are vacant lots in the immediate neighborhood of the crossing, forming a sort of commons, and both persons and cattle are in the habit of crossing the railway track, as it passes over such uninclosed lots without lengthening there route by seeking the line of the highway. The law does not require the railway companies to fence in cities, towns or villages, and if a person, through failure to sound a whistle, is killed in crossing a railway track within a few feet of the highway, without fault upon his part, other than that he has diverged from the line of the highway, can it be said that damages are not recoverable, because the decease was a trespasser? Admit that he was, he has come to his death from a cause which the Legislature has said shall make the railway company responsible. As the statute does not confine the liability to accidents occurring on the crossing, we cannot say the Legislature did not have in view the fact that accidents would be very liable to occur in the open spaces adjacent to crossings near the stations, and that they did not intend to guard against accidents there as well as those occurring upon the actual crossings. Even in the case in 16th Ill., it is admitted that the railway would be liable in cases of gross negligence. Whether the failure to sound the whistle or ring the bell is to be considered gross negligence it is not necessary to inquire. It is sufficient that the statute has said such failure shall give a right of action for all injuries attributable to such neglect.

This case differs from Illinois Central Railroad *vs.* Phelps, 29 Ill., 448, and same *vs.* Gardiner, 30 *id.*, 118, in this, that the accidents in those cases did not occur at a road crossing, and the evidence showed no connection between the injury and the failure to give the signal. The statute did not apply. The principle we here lay down is this: that, where a railway company has neglected to comply with the statutory requirement, and an injury to an animal is fairly attributable to such neglect, the mere fact that the animal was at large, if so at large in violation of no general or local law, would not relieve the company of its liability even though the animal had gone upon the road from uninclosed lots adjacent to the crossing, and was standing when injured, on the actual intersection of the railway and the highway. In the present case the evidence shows that the jury might fairly attribute the accident to the neglect to give the signal, and no question is made by counsel on that point.

The instructions asked by the appellant and refused by the Court are inconsistent with the views here expressed, and were properly refused.

Judgment affirmed.

New York and Oswego Midland R. R.

This line, when completed, will shorten the distance to Buffalo and the West by seventy miles, and the route to Canada by somewhat more than forty five miles, besides offering a new highway for the through trade between the States. In addition, the Midland road is closely linked with the interests of our own State and its Metropolis. Penetrating one of the richest and most picturesque portions of New Jersey, it affords a fresh outlet for our overflowing population, and helps materially the solution of a problem every year becoming more urgent; while to the interior of New York it opens up immense possibilities. Orange, Ulster, Delaware, Sullivan, and other midland counties, have always, even when almost destitute of facilities for transporting products, furnished a large part of the food of the Metropolis. With this road traversing them from the State line of New Jersey to the northern borders of western New York, and its branches and connections ramifying the whole interior of the State, the difficulty of feeding our city population (which once assumed threatening proportions) may be said to be finally removed.

The financial auspices under which the Midland Railroad was commenced were probably more favorable than those of any similar enterprise ever undertaken in this country. The towns and cities along its route have subscribed to its capital stock to the amount of $6,000,000; and these subscriptions being made not by individuals, but by the towns in their corporate capacity, are fully equivalent to cash. This sum, large as it is, is of course insufficient to construct and equip a road upward of 400 miles in length. In order, therefore, to obtain the requisite amount, the Company have issued first mortgage bonds, payable in gold and bearing interest (in gold) at seven per cent. These bonds are secured by a first mortgage upon the road, its various branches and the entire property of the Company. In order if possible to give additional security to the investment, it is also provided that the issue of bonds shall be strictly limited to $20,000 per mile of the road actually built and in running order. It is further provided in the mortgage that default in payment of interest for the space of four months shall bring the road and its entire property into the hands of the trustees, without the possibility of litigation, to be sold for the benefit of the bondholders. A peculiar and admirable feature of the stock of this Company is that the large portion held by the towns and cities can never be disposed of without the consent of a majority of the taxpayers. This may be considered an absolute prohibition of the usual "manipulations" at the Exchange. The London *Spectator* predicted recently that Government will ultimately be compelled to abolish, by absorbing into itself, all industrial corporations. If a measure similar to the above were adopted by every railway enterprise, they, at least, might surely avoid such a consummation.—*N. Y. Tribune.*

☞ Messrs. Cantwell & Knapp have contracted to grade, bridge, and lay the track on the Leavenworth and Chicago road (formerly Chicago and Southwestern,) from Platte City to Cameron, and have put a force of hands on every mile of road between these points.

☞ The survey for the new railroad to run from White Bear Lake, at the junction with the Superior road, by way of Minneapolis, to the Minnesota River, and thence to Albert Lea and the State Line, has been completed.

☞ The Little Rock and Fort Smith Railroad is going forward with all possible despatch; a force of one thousand men are now being employed at work along the line.

☞ Track laying on the Midland Pacific Railroad has been commenced west of Nebraska City.

☞ CHICAGO, DANVILLE AND VINCENNES RAILROAD COMPANY'S 7 PER CENT. GOLD BONDS pay annually, on an investment of $10,000 in currency, $698 25 IN GOLD, while only $475 are derived from $10,000 invested in Government Sixes.

$2,500,000 First Mortgage Sinking Fund Bonds, forty years to run, on 140 miles of road, or LESS THAN $18,000 PER MILE.

Starting at Chicago, the Road runs through the richest lands of Illinois, along the line of Indiana, and from which the local business, bound to this road, is estimated to net $733,000, or nearly THREE TIMES THE SUM required for interest and sinking fund on the WHOLE ISSUE OF ITS BONDS.

It forms part of the SHORTEST LINE FROM CHICAGO *via* Terre Haute, Vincennes, Evansville and Nashville to New Orleans, &c., and opens to the Chicago market rich ORE AND COAL BEDS, sufficient of themselves to insure large earnings.

It also brings the BRAZIL COAL MINES nearer to Chicago by 90 MILES THAN ANY other line.

Total cost of construction and equipment estimated at $4,500,000.

$2,100,000 of stock subscribed, which pays for right of way, grading, bridging, &c.

WHOLE AMOUNT OF IRON ALREADY OBTAINED.

From Chicago to Momence, 55 MILES, NOW OPEN TO BUSINESS, and a considerable part will be finished this autumn.

Pamphlets in more complete detail, with maps, can be had of us on application.

Purchasers may obtain Bonds through our advertised local agents, who will be responsible for their safe delivery, or directly of us, express charges prepaid, the buyer remitting $950 and 7 per cent. in currency interest from October 1, to date, funds current in New York. Any of the Eight Hundred Banks in correspondence with the National Park Bank of New York, will receive and transmit purchase money for these Bonds, and in return receive the Bonds direct from the bank and deliver to the purchaser.

Having personally examined this entire line of road, finished and projected, as well as the country through which it runs, we offer these bonds with entire confidence in their value and soundness.

W. BAILEY LANG & CO., Merchants,
No. 54 Cliff st., New York,
Agents for the sale of the Bonds.

☞ The Little Rock *Gazette* says there is a promising prospect of the revival and speedy completion of the Cairo and Fulton Railroad. Negotiations have been made with English capitalists which secure the means for building the road beyond any contingency. The company are contracting for the first twenty miles, beginning at Jacksonport, and running north towards the Missouri border, and expect to have the entire road finished in three years.

THE WHARTON
Safety Railroad Switch.

☞ **BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.** ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

FIRST & PRYIBIL'S
PATENT IMPROVED
BAND SAW MACHINE,
452, 454 & 456 Tenth Avenue,
NEW YORK CITY.

PRICE - - - - - $350.
BOXING AND SHIPPING, &c.

This Machine, with the exception of the table, is made entirely of Iron. Its weight is 1800 lbs.; drums 3 feet 3 inches in diameter; height, 8 feet 5 inches; depth 4 feet 3 inches; width 6 feet; driving pulleys usually 14 inches in diameter, or to suit our customers.

Our machine can be run with a speed of 330 to 350 revolutions per minute, causing the saw to travel 3300 to 3500 feet per minute, and with a belt from 4 to 5 inches in width a block of Rosewood from 10 to 15 inches thick, or wood of any kind, hard or soft, can be cut with ease and facility, the saw being from one-quarter inch to one inch in width. A saw one-eighth of an inch in width, including teeth, can be used for cutting wood of considerable thickness.

The saws are not liable to break owing to our improved slide bearing, which adjusts itself according to the expansion and contraction of the saw. No saw will break except by accident or gross carelessness. The same is used principally by railroad car, chair, and other furniture manufacturers, ship, boat, and wagon builders, and also to saw slate, ivory, bone, &c. Guarantee will be given for all we state above. From three to five times as much work can be done with one of our sawing machines, as with an ordinary up and down saw. The work is cut smooth, the saw being retained by an improved guard.

At the present time, Sept. 1869, 64 of our machines are running in this city, and about twice as many in the country.

We also manufacture a lately patented counterbalance oval turning lathe which can be run with more than twice the speed of the old style of lathes, and much more and better work will be done. Many other wood working machines, and also shafting, pulleys, hangers, &c., &c., constantly on hand. Send for Circulars.

Jonathan T. Hobby,
MATHEMATICAL Instrument Maker, Greenwich Street, Hempstead, Long Island N. Y

NEW YORK CITY STEEL WORKS,

Manufacture every description of Steel—PERFECTLY UNIFORM IN QUALITY—and of very great tensile and compressible strength.

Plates of Cast Steel may be bent COLD to any angle, yet remain capable of being TEMPERED.

Guaranteed EQUAL TO ANY OTHER STEEL manufactured in Europe or the United States.

TOOL STEEL of very superior quality.

LOCOMOTIVE AND CAR SPRING STEEL A SPECIALTY.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

New York Saturday, November 27, 1869.

Grand Trunk Railway of Canada.

The President of this company, Hon. Richard Potter, having in company with the Managing Director, Mr. C. J. Brydges, made a thorough inspection of the road and also visited our chief Western cities for the purpose of making himself acquainted with the general condition of our railways, has resolved to adopt the policy which Mr. Brydges has so long urged on the stockholders as necessary, in order to secure an equitable share of the through traffic in the face of the sagacious and liberal policy of competing lines. Fortunately the road is already in a condition approximating adequate preparation for the change. The track has been improved by the addition of 14,000 tons of new rails; 5,000 tons of steel rails are to be laid in the spring at points where the traffic is heaviest; and hereafter all portions of the track requiring to be relaid will be furnished with steel rails. Corresponding improvements are to be made in the rolling stock. Early in 1870 six hundred new freight cars are to be placed on the road, and three hundred cars are to be added at once to the Changeable Gauge Freight Equipment. By these cars, shippers at Chicago, St. Louis, and points West can consign freight to Boston and all points in New Hampshire, Vermont and Massachusetts without breaking bulk, in the certainty that it will be delivered without delay in good condition. The locomotive equipment of the road, which now numbers about three hundred and twenty-five engines, will receive substantial additions. The present inferior passenger cars will be superseded in the spring by a full complement of palace drawing-room and sleeping-cars, second to none in the country. Doubtless for all these improvements the shareholders of the Grand Trunk will find ample remuneration in the increased patronage and popularity of their road.—*Boston Journal.*

Suez Canal.

One of the great achievements of the age, and second, probably, in cost and commercial importance, only to our trans-continental railway, is the Suez Canal, which connects the Red Sea with the Mediterranean, the ceremony of opening which is just now exciting enthusiasm with all the crowned heads of Europe. This canal is one hundred miles long, without locks or other artificial appliances, and is open to all the world on uniform terms. Its surface width is 328 feet, its bottom width 246, and its depth 26 feet. Few vessels now draw more than 22 feet. The canal had cost up to June last $55,000,000. The rates that have been fixed upon by the managers of the canal for all vessels, equally, passing through its waters, amount to $2,300 in gold for an ordinary Indiaman. To a French Civil Engineer and to France belong the credit of its execution. It has already given a wonderful interest to trade questions, and an impetus to population on the Isthmus, almost unknown in the old world. Within the last twenty years it has increased from 150 souls to 50,000. Some important changes in the trade of the world are expected as the result of the completion of this canal, and as distance and time have much to do in determining routes, the following table showing the comparative distance of New York *via* Gibraltar and the Suez Canal, and New York *via* San Francisco—from commercial points in Australia and Asia—will be read with much interest:

	From N. Y. *via* Gibraltar and Suez Canal.	From N. Y. *via* San Francisco & U. Pacific R.
To Melbourne	13,200	10,300
To Shanghae	12,500	8,850
To Hong Kong	11,700	9,300
To Manila	11,600	9,600
To Singapore	10,300	10,600
To Batavia	10,500	11,000
To Penang	9,950	11,100
To Calcutta	9,700	12,150
To Ceylon, Pt. de Galle	8,750	12,200

The distance from the English Channel to Calcutta, *via* the Cape of Good Hope, by the route taken by the best sailing vessels, is about 13,000 miles; *via* the Mediterranean and Suez Canal, it is about 8,000 miles; gain in distance by the latter to or from Calcutta, 5,000 miles. By the Cape route to Bombay, the distance is 11,500 miles; by the Red Sea route, 6,200 miles; gain in distance to or from Bombay, 5,300 miles. Our trade with the following countries for the fiscal year ending June, 1867, was as follows:

	Exports.	Imports.
Dutch East Indies	$204,895	.....
British East Indies	381,141	$8,932,485
Australia	5,102,355	262,401
Phillippine Islands	45,636	3,473,371
Other Pacific Islands	85,137	.....
China	8,788,145	12,112,440
	$14,606,809	$24,780,697

The total exports to Southern Europe, Mediterranean, and East Indies in the same year were $71,780,203, and the imports from the same, $65,394,796, making a total of $137,174,999, from which it appears that one-sixth of the entire commerce of the United States was transacted with these places. When the population of India, China, and Japan are contrasted with that of Europe, the immense commercial interests affected by the new route and other new competing routes are apparent. The imports and exports of China, which were in 1856 $56,000,000, had increased $220,000,000 in 1858. The first step towards the construction of the present canal was made nearly a quarter of a century ago. In 1846 a commission was issued to Robert Stephenson, a son of the famous inventor of the locomotive, on the part of Great Britain, and two other engineers, representing Austria and France respectively to examine the feasibility of the undertaking. They reported it practicable to construct a canal but they believed that the shifting sands of the desert would be likely to fill it up. The project was consequently laid aside until M. Ferdinand de Lesseps, who had been French Consul-General in Egypt, revived it in 1854, procured authority to make a survey, which he finished the same year. After four years of energetic canvassing he succeeded in organizing the Suez Canal Company, with a capital of $400,000,000. For many of the earlier years of the enterprise English diplomacy threw all the obstacles its ingenuity could devise in the way of the execution of this work, fearing to allow France to construct a short cut to her East India possessions. It is now, however, an accomplished fact, and suspicion is already awakened that the canal has been so constructed as to favor French shipping, and so made that the heavier class of English tonnage cannot pass through. This, however, may have no better foundation than national jealousy, which successful accomplishment is so well calculated to invite. —*Phila. Ledger.*

Erie Railway.

The holders of the preferred stock of the Erie Railway Company are notified that a dividend of seven per cent. has been declared on said stock;

such dividend will be represented by interest-bearing scrip certificates having five years to run, which will be ready for delivery at the treasurer's office, No. 269 Eighth-ave., on and after December 15th next, to the registered holders of stock at the closing of the books. The transfer-books of the preferred stock will close on Wednesday, the 1st of December, and reopen December 16th next.

Louisville and Nashville Railroad.

The following is a condensed statement of the earnings of the Main Stem and Branches for the year ending June 30, 1869:

	Memphis Branch.	Knoxville Branch.	Main Stem.
Passengers	$94,481 57	$95,376 94	$673,221 38
Freight	99,643 57	120,606 76	1,110,483 81
Express	8,540 45	10,844 79	74,879 38
Mail	5,100 00	7,051 27	28,545 00
Miscell'neous	399 96	541 97	2,193 68

Total Main Stem		$1,891,328 25
" Knoxville Branch		284,821 78

" Richmond Branch		21,750 71
Total Main Stem and Branches, viz		
From passengers	$884,288 51	
" freight	1,353,795 28	
" express	96,070 10	
" mail	42,660 51	
" miscellaneous	4,324 15	
		2,381,138 55
Running expenses, viz:		
Repairs of road	$242,700 99	
" bridges	8,837 29	
" depots, etc	18,330 77	
" cars	84,806 64	
" engines	98,109 99	
Transportation	394,305 77	
Motive power	98,040 90	
Fuel account	121,810 80	
Oil and waste	16,838 19	
Water supply	14,074 10	
General expense	39,756 81	
Improvement	121,204 20	
Salary account	22,632 10	
Watchmen account	8,004 37	
Stationery	1,129 04	
Insurance	1,320 00	
Internal revenue tax	57,000 33	
Revenue stamps	565 00	
		1,349,461 79
Net earnings (43.33 per cent.)		$1,031,676 76
Interest account	$280,820 48	
Discount on Consolidated Mortgage bonds	25,011 01	
		305,831 49
Balance		$725,845 27

The following is a comparative statement of the earnings, expenses, etc., during the past and preceding years:

	1867–'68.	1868–'69.
Gross earnings	$2,228,609 44	$2,381,138 55
Operating expenses	1,309,514 83	1,349,461 79
Net earnings	$919,094 61	$1,031,676 76
Interest, etc	227,203 21	305,831 49
Balance	$691,891 40	$725,845 27

This shows an increase in gross earnings over the previous year of $152,529 11; with an increase in expenses of $39,946 96—making the increase in net earnings, $112,582 15.

The construction account being closed, the expenditures made which were properly chargeable to this account, $121,204 20, are included in the operating expenses. Had the $121,204 20, which now stands charged to the improvement account as a part of the operating expenses, been charged to construction account, the net earnings would have been $1,152,880 96 or 48.42 per cent. of the gross earnings. Last year the net earnings of the road were 43.64 per cent. of the gross earnings after excluding from the operating expenses the amount of $53,604 88, which was then charged to improvement and reconstruction accounts.

The bonded debt of the company, exclusive of Lebanon Branch Extension, June 30, 1869, was: $2,888,500
Lebanon Branch Extension: 1,200,000
Consolidated mortgage bonds executed during this fiscal year: 2,000,000
$6,088,500

Main Stem Mortgage Bonds redeemed during this fiscal year: $91,000
City of Louisville Mortgage bonds account Lebanon Br. Extension canceled and destroyed: 267,000
Mortgage bonds on Lebanon Branch Extension destroyed: 512,000
870,000

Total bonded debt: $5,218,500

The above amount includes—
City of Louisville Bonds without mortgage: $849,000
Consolidated Mortgage bonds unsold: 1,736,000
2,585,000

Making the total mortgage debt out at this date: $2,628,500

Seven per cent. cash dividends for the fiscal year ending 30th June, 1869, have been declared upon the stock of the company.

There has been redeemed during the year of the mortgage bonds	$91,000 00
Expended on Lebanon Branch Extension south of Lebanon	421,803 72
Expended on Richmond Branch	136,645 44
Interest paid during same period	280,820 48
	$930,269 64

Work was suspended upon the Knoxville and Kentucky Railway in Tennessee in March last, and we are not advised of any arrangements having been made to resume work upon this road. They exhibit an indebtedness of over $2,500,000, and have thirty-one miles of imperfectly constructed road, with ninety feet grade.

Your Directors have been governed in the extension of the Knoxville Branch by the following resolution, passed at the stockholders' meeting October 1, 1866:

"Resolved by the stockholders, with the expectation that the city of Louisville will give aid to the extension of the Lebanon Branch from Crab Orchard to the Tennessee line, that the President and Directors be authorized to have said road extended from time to time to that point, and also to exercise their discretion as to other connections mentioned in A. Fink's report, so as not to involve improvident expenditure."

The Richmond Branch was opened for traffic and travel in November, 1868. The business has been small up to this time, but must yearly increase, as it passes through one of the richest agricultural districts in this State.

We continue to run under lease the Memphis and Ohio Railroad, leading from Memphis to Paris, Tenn. This road is in good order, and we look for a continued growing business over it.

The Memphis, Clarksville and Louisville Railroad remains in the hands of a receiver of the State of Tennessee, and this company is running it under and as the agent of the receiver of the State of Tennessee, by which arrangement, and by our lease of the Memphis and Ohio road, we operate the line from Louisville to Memphis as one line. The total length of road now operated by this company is 594.3 miles, and 11 miles will be added December next by the extension of the Knoxville Branch from Mount Vernon to Big Rockcastle River, through a coal district, which it is expected will give us a good local coal traffic. We have much pleasure in stating that the affairs of the company are in a healthy and prosperous condition.

Our connections with New Orleans and other southern and southwestern points, over the Mississippi Central, New Orleans, Jackson and Great Northern, and Mobile and Ohio Railroads, have been much improved, thereby adding daily to our business. Mississippi Central trains connect with ours at Humboldt, Tennessee, and sleeping cars run through from here to New Orleans daily. Freight is also transported to and from New Orleans, Mobile, Charleston, S. C., Wilmington, and all intermediate points without break of bulk.

The Elizabethtown and Paducah Railroad is under contract for 130 miles, leaving 55 miles of light work to be put under contract. Tracklaying upon this road will commence October, 1869, and it is expected that 31 miles from Elizabethtown to Litchfield, Grayson County, will be open for business in June, 1870. It is believed that the road to Greenville, Muhlenberg County (93 miles,) will be opened for business by January, 1871. This road will traverse a good agricultural, mineral, coal, and lumber district. Tobacco, coal, and lumber will find a ready market in this city; and the transportation of these articles from Elizabethtown to Louisville should add largely to the business of our road.

The Cincinnati Branch of the Louisville, Cincinnati and Lexington Railroad has been completed, and was opened for business July 1st of the present year. We may reasonably expect an increase to our business from this source.

It is much to be regretted that we are unable to announce the settlement of right of way through Louisville, so as to give us a satisfactory connection with this new and important road. When this shall have been accomplished, and the bridge over the Ohio River at Newport, Ky., now under contract, completed, we may look forward to a large increase of traffic from this source.

The work on the railroad bridge at Louisville over the Ohio River is progressing favorably, and the entire structure will probably be completed within this year, unless unexpectedly prevented by high water. This will afford us direct and uninterrupted connection with all points north, northeast, and northwest of Louisville. The completion of this noble structure will add very largely to our facilities for business, and greatly increase our income. The rolling stock and entire property of the company is in a better condition than at any former period. The increase of business, however, will necessarily require a large addition to our rolling stock during the ensuing year. Our depot accommodations and offices are inadequate to our wants, and will call for a considerable expenditure during the coming year to provide for the increasing business of the company. With new and improved connections in almost every direction, now completed and soon to be completed, by judicious, faithful, and able management on our part, the revenues of the company will continue to increase; aid will be given to the development of the country, and building of villages and cities, which will make the Louisville and Nashville Railroad all that its stockholders should desire. The road is just entering into business life. It was opened through to Nashville for traffic in November, 1859, and is therefore less than ten years old (dating from its first through train.)

A second track to Bowling Green will be required in a few years. This end of the road is already crowded with trains, and will be uncomfortably so when the Elizabethtown and Paducah road shall be open for business. We therefore would recommend the laying of a second track to Lebanon Junction as soon as the finances of the company will justify the outlay.

The total length of the Main Line, (Louisville,

Ky., to Nashville, Tenn.,) is 185 miles; sidings, 19.81 miles—total, 204.81 miles. Length of Bardstown Branch (Junction to Bardstown) 17.30 miles; sidings, 0.82 mile—total, 18.12 miles. Knoxville Branch (Lebanon Junction to Lebanon,) 37.30 miles; Extension, (Lebanon to Mount Vernon,) 62.16 miles; sidings, 9.70 miles—total, 109.16 miles. Richmond Branch, (Junction with Knoxville Branch to Richmond,) 33.46 miles; sidings, 2.51 miles—total, 35.97 miles. Memphis Branch, (Junction to Tennessee State Line,) 46 miles; sidings, 3.61 miles—total, 49.61 miles. Total length of road and branches, 381.22 miles. Total length of sidings, 36.45 miles. Total miles of iron, 417.67.

Including the Memphis, Clarksville and Louisville Railroad (operated for the receiver) 82.6 miles, and the Memphis and Ohio Railroad (leased) 130.3 miles, the total length of road operated by the company is 594.3 miles. A comparison with the report of the previous year shows that the length of the road has been increased 32.8 miles. The Richmond Branch has been completed, and the Knoxville Branch has been extended from Brodhead to Mount Vernon. Including the above roads, the following is the result of last year's operations:

Gross earnings of Louisville and Nashville Railroad and branches.	$2,381,138 55
Gross earnings of Memphis, Clarksville and Louisville Railroad	307,987 26
Gross earnings of Memphis & Ohio Railroad	610,275 55
Tot. earnings of 594.3 miles of road.	$3,299,401 36
And total expenditures—	
Louisville and Nashville Railroad and branches..	$1,349,461 79
Memphis, Clarksville & Louisville Railroad.	313,940 81
Memphis and Ohio Railroad, exclusive of interest paid to State of Tennessee.	456,816 25
	2,120,218 85
Total net earnings	$1,179,182 51

or 35.74 per cent. of gross earnings.

The following statement contains in a condensed form the general results of the operations of the Main Line and Branches during the years ending June 30, 1868 and 1869:

	1867–'68.	1868–'69.
Gross earnings	$2,228,609 44	$2,381,138 55
Operating expenses.	1,309,514 83	1,349,461 79
Net earnings	$919,094 61	$1,031,676 76
Proportion of expenses to earnings	58.76 per ct.	56.67 per ct.
No. of miles run by trains	772,867	887,965
Earnings per mile of train	$2.88	$2.68
Expenses " "	1.69	1.51
Net earn'ngs " "	$1.19	$1.16
Av. length of road in use.	336.3m.	367.92m.
Earn'gs per mile of road.	$6,626 84	$6,471 89
Expenses " "	5,893 88	3,667 81
Net earnings " "	$2,732 96	$2,804 08
Mileage of freight cars..	6,182,132	7,243,969
" passenger cars	2,130,712	2,207,044
Number of tons carried..	243,918	317,208
Do. carried one mile	29,321,009	40,813,718
No. of passengers carried	365,646	391,827
Do. carried one mile	21,420,247	22,561,417

The results of the operations of the Main Stem and Branches are shown separately in the annexed statement:

	Main Stem.	Bardstown Branch.	Knoxville Branch.	Memphis Branch.	Richmond Branch.
Gross earnings	$1,891,523 25	$25,677 31	$284,321 73	$208,066 55	$21,750 71
Operating expenses	1,013,574 71	31,058 72	146,658 47	135,521 09	22,648 80
Net earnings....	$877,748 54	....	$87,663 26	$72,544 46	....
Loss....	....	$5,381 41	....	....	$898 09
Proportion of exp. to earnings.	53.59 per ct.	120.96 per ct.	52.59 per ct.	65.13 per ct.	104.13 per ct.
Number of miles run by trains.	641,493	12,402	97,959	112,760	23,851
Earnings per mile of train....	$2.94	$2.07	$2.89	$1.84	$0.98
Expenses per mile of train....	1.58	2.05	1.49	1.20	.97
Net earnings per mile of train..	$1.36	Loss $0.43	$0.90	$0.64	Loss $0.04
Length of road in operation	185 miles.	17.3 miles.	94 miles.	46 miles.	25.62 miles.
Earnings per mile of road.....	$10,223 36	$1,484 24	$2,492 77	$4,523 16	$848 97
Expenses per mile of road.....	5,478 78	1,795 30	1,560 19	2,946 11	884 02
Net earnings per mile of road..	$4,744 58	L'ss $311 06	$932 58	$1,577 05	Loss $35 05
No. of passen. carried one mile.	17,257,866	283,636	2,369,886	2,381,003	269,056
Tons of freight carried one mile	38,809,419	227,160	2,635,046	3,900,757	241,331

In 1867–'68 the gross earnings of the Main Stem were $1,823,763 33, the expenses, $1,008,592 24, and the net earnings, $815,171 09; showing an increase in earnings of $67,559 92, with an increase in expenses of $4,982 47—making the increase in net earnings, $62,577 45.

The earnings of the Bardstown Branch in 1867–'68, were $23,051 52, the expenses, $22,554 49, and the net earnings, $497 03. This year the loss in operating is $5,381 41—a difference of $5,878 44.

Only 88.3 miles of the Knoxville Branch was in operation in 1867–'68, the earnings upon which were $186,109 33, the expenses, $132,279 97, and the net earnings, $53,829 36. In 1868–'69 an average of 94 miles were operated. A comparison of the earnings of this branch during the past and preceding years shows an increase in earnings of $48,212 40, with an increase in expenses of $14,378 50—making the increase in net earnings, $33,833 90.

The earnings of the Memphis Branch in 1867–'68, were $195,685 26, the expenses, $146,088 18, and the net earnings, $49,597 13—showing an increase in earnings of $12,380 29, with a decrease in expenses of $10,567 04, making the increase in net earnings, $22,947 33.

At the commencement of the fiscal year the Richmond Branch was operated as far as Lancaster, 7.8 miles from Richmond Junction. On the 22d of August following the road was opened to Hyattsville Station, 11.1 miles; on the 30th of September to Paint Lick, 18.4 miles; on the 2d of November to Silver Creek Station, 23.6 miles; and on the 18th of November to Richmond, 33.46 miles from Richmond Junction, and 138.26 miles from Louisville. The loss in operating this branch has been $898 09.

Statements are given showing the profits accruing to the Main Line from the operations of the several branches thus: the freight business transacted at the stations of the Bardstown Branch amounted to $43,352 65; the proportion due the branch was only $12,704 60—leaving for the Main Line $20,648 05. The total earnings from passenger business which originated on the same branch was $25,900 67; $11,242 14 of which was due to the branch, and $14,658 53 to the Main Line—making the gross revenue from business brought to the Main Line from the Bardstown Branch, $45,306 58, and the net revenue derived therefrom, $21,313 31. Deducting net loss in operating, as above, $5,381 41, will leave a balance of $15,931 90.

The total earnings from freight received at and forwarded from all stations on the Knoxville Branch, were $171,707 72, of which only $120,506 76 were due the branch—leaving for the Main Stem and other branches, $51,200 96. The earnings derived from the passenger business were $127,999 30; the proportion due the branch was $95,376 94—making the gross earnings of the Main Stem and other branches, $32,622 36. The total gross earnings were therefore $83,823 32, and the net revenue, $38,994 41. To which add net revenue of the branch, $87,663 26—making a total net revenue derived from the branch directly and indirectly, $126,657 67. In which amount is included the sum of $15,459 54 net revenue contributed in the same manner by the Richmond Branch.

The estimated value of the Memphis Branch as a feeder to the Main Stem and other branches is as follows: earnings from freight received at and forwarded from stations on the branch, $394,508 70; proportion due the branch, $99,543 57. Earnings from passenger business which originated on the branch, $226,256 49; proportion due the branch, $94,481 57. The amount due the Main Line and other branches from both passenger and freight business being $426,740 05, and the net revenue therefrom $200,096 46. The net revenue of the branch was $72,544 46. Total net earnings, $272,640 92.

The freight business of the Richmond Branch amounted to $52,235 03, and the passenger business to $19,267 05—together, $71,502 08; $20,523 02 of which is due the Branch, leaving for the Main Stem and other branches, $50,979 06, which distributed according to distance on the Main Stem and Knoxville Branch, will give to the former, $14,447 32, and to the latter, $36,531 74—the net earnings of the Main Stem being $6,858 25, and of the Branch, as above, $15,459 54. The total net earnings derived from the Richmond Branch, after deducting loss in operating, is $21,419 70.

The company have 66 locomotives, 45 passenger, 15 baggage, 3 postal, 8 express, 402 box, 110 rack, 44 gondola, 148 flat, 83 stone, 12 boarding and 1 wrecking cars. Miles run by locomotives with passenger trains, 481,741; with freight trains, 505,181; distributing trains, $71,581—total, 1,058,503.

Number of local passengers carried north, 166,767; do., south, 163,882—total, 330,649. Number of through passengers carried north, 30,573;

do., south, 30,605—total, 61,178. Total local and through, 391,827. Total mileage of through passengers, 10,711,177; do., local, 11,850,240—total, local and through, 22,561,417. Miles traveled by each passenger, 57.58; do., by each local passenger, 35.83. Revenue from through passengers per mile, 3.85 cents; do., local, do., 3.97 cents. Number of tons of freight carried, 317,208; do., carried one mile south, 23,380,857; do., north, 17,432,856—total tons carried one mile, 40,813,713.

Statement showing cost, resources, and liabilities of Main Stem and Branches, exclusive of Lebanon Branch Extension:

North Carolina Bonds.

The following extract from a letter to Messrs. Wm. Fisher & Sons, of Baltimore, relative to North Carolina bonds, may be of interest to parties holding these securities:

The Legislature of North Carolina is now in session, and it is proposed, we learn, to pass laws requiring insurance companies doing business in the State to deposit State bonds as security, also requiring railroad companies to take up their own securities and deposit State bonds instead. This will, we think, put the bonds up. We give the information as we receive it, but we believe it to be trustworthy.

☞ The Delaware Breakwater, which was commenced about fifty years ago, has recently been completed. Most of the stone for this great national work was shipped from the Leiper quarries, in Chester county. From the year 1833, when the breakwater was raised above the surface of the water, to the close of 1867, the following vessels were sheltered behind the works; 2,660 steamers, 4,536 ships, 2,981 barks, 24,217 brigs, 130,242 schooners, 11,725 sloops, and 11,149 pilot boats—making a total of 187,510 vessels.

Movements of Produce.

☞ The payment of the £300,000 by Canada to the Hudson Bay Company will be made on or before the 1st of December next, as on that day the Northwest territory will be included by proclamation as part of the Dominion.

Journal of Railroad Law.

RAILROAD COMPANIES—PRESUMPTION OF OWNERSHIP—ESCAPE OF FIRE FROM LOCOMOTIVES—CONDITION OF TRACK.

The case of Mills *vs.* The Illinois Central R. R. Co. (42 Ill. 407) was one for trespass. The first count of the declaration averred that the company owned a railroad, and right of way one hundred feet wide adjoining a meadow in which plaintiff had a large quantity of hay. That the company suffered their right of way to be covered with dry grass and weeds; and in operating their road with an engine and train of cars, through their negligence, carelessness, and want of proper caution, fire was suffered to escape from the engine to the grass, weeds and other combustible material, and thence to plaintiff's hay, which was thus destroyed.

The second count was substantially the same, except it averred that it was the duty of the company to keep their right of way clear and free from dry grass, weeds, and other combustible material, but that they had failed to perform that duty.

The third count avers that it was the duty of the company to so operate their engines as to prevent the escape of fire to the injury of other persons; and, if it should escape, that it was the duty of the company to extinguish the same. But that they permitted fire to escape, and failed to extinguish it, whereby plaintiff's hay was burned.

Defendant filed a plea of not guilty. And a trial was subsequently had by a jury, who found a verdict for the plaintiff for $150 damages. Defendant entered a motion for a new trial, which was overruled by the court, and judgment was rendered on the verdict. To reverse which, defendant prosecutes this writ of error.

The following able opinion was rendered by

WALKER, C. J.—The first error assigned is not well taken. It asks for a reversal for want of proof that the plaintiffs in error were the owners of the road. It was proved that they had used and operated the road for a number of years and the possession of the property is *prima facie* evidence of ownership. It is true, that mere possession is not a high grade of evidence, but until rebutted it is proof of ownership. In this case, when the company were found to be using the road, and had been for years, and had been and still were exercising the rights and franchises of a corporation it may be doubted whether they could be heard to deny that they were the owners.

They, however, made no effort to disprove their ownership.

The second assignment of error questions the correctness of the second instruction given for defendant in error. That instruction asserts that the escape of fire from a railroad engine raises a presumption of negligence on the part of the road, and, that the fire, having been shown to have thus escaped, the onus then devolved upon defendants to rebut the presumption of negligence, by proving that they had the engine, from which the fire escaped, equipped with the most improved mechanical contrivances employed to prevent the escape of fire. Observation and experience teach, that engines, unprovided with such contrivances, are liable, in a high degree, to communicate fire to adjoining property.

And when the legislature chartered these companies, they knew that they were licensing them to employ a highly dangerous element in the exercise of their franchises and chartered privileges. Yet, dangerous as it is and was known to be, it is indispensable to the exercise of their privileges and the enjoyment of their franchises. And the legislature having omitted to make any provision on the subject, it must be presumed that they designed these bodies should employ all reasonable precautions to prevent injury to the public or to individuals, in the use of fire to propel their trains.

And experience proves, that by the use of modern inventions for the purpose, the escape of fire may ordinarily be prevented. And when it does escape we may safely infer that such machinery has been omitted, and require the company to show that it was employed and in proper condition.

In this there is no hardship, as the engine is under the control of the employees of the road, and they know, or at least are bound to know that the engine is properly equipped to prevent fire from escaping. They know whether any machanical contrivances were employed, and, if so, their character. On the other hand, persons not connected with this road, have no such means of information. Trains passing at a high rate of speed are not accessible to examination by persons not connected with the train, and who are thereby denied all means of ascertaining whether the necessary equipments are employed by the company. Hence, the necessity of requiring the company to show their use at the time, to rebut the presumption of negligence.

It is insisted that the third instruction given for the defendant in error was not the law. It asserts that it is negligence for a railroad company to permit weeds and grass to remain on their right of way, after they have become dry and combustible; and the escape of fire from their engines, and communicating with such weeds and grass, is negligence, for the result of which the company are liable. It is not an indisputible conclusion of law, that a railway company is guilty of negligence, to be inferred from the fact that fire ignites in dry weeds or grass on the land of the railway. It is a question of fact to be determined by the jury in view of the extent to which dead grass and weeds have been allowed to accumulate in the locality, the season of the year and all other circumstances affecting liability to fire. The court, instead of directing as a matter of law, that the presence of dry grass or weeds was conclusive evidence of negligence, should have told the jury that the company was bound to use the same diligence in removing dry weeds and grass, and all other combustible materials, from exposure to ignition by the locomotive, that a cautious and prudent man would use in reference to combustible materials upon his own premises, if exposed to the same hazard from fire as dry grass upon the side of a railway. This instruction went beyond this, and for that reason it was erroneous.

The jury returned into court after they had retired to consider of their verdict, and asked further instructions. The court thereupon gave this: "that if you believe from the proof in the case that the fire from the locomotive of the defendant set the fire out, by which the plaintiff's hay was burnt, that is sufficient proof on this point to make the defendants liable." There is no error in giving proper instructions after the jury have retired, when they shall request it. It may be discretionary, but it cannot be erroneous, for the court to give the jury proper instructions as to the law applicable to the case, when asked to do so by the jury.

This instruction, however, was manifestly wrong, and should not therefore have been given. If the rule it announces was correct, a railroad company should be insurers against fire escaping from their engines, no matter how high a degree of diligence they may have employed, or in what manner the fire may have escaped. Under such a rule no degree of diligence, even the utmost of which human capacity is capable, would relieve them, if it were shown that the fire escaped from an engine of the company. Such a rule cannot be found to have ever been announced by the courts of this country or Great Britain; and the instruction is manifestly erroneous.

No objection is perceived to the third instruction given for defendants below. As modified, we are of the opinion that it fairly presents the law applicable to the case. In discussing plaintiff's third instruction, and that given at the request of the jury, we have disposed of the sixth assignment of errors.

The judgment of the court below must be reversed and the cause remanded.

Judgment reversed.

A Railroad Arrangement.

Thos. D. Messler, Esq., of this city, representing the Pennsylvania Central, and Pittsburg, Fort Wayne and Chicago Railway Companies, met the directors of the Pittsburg, Mount Vernon and Columbus Railroad, at the Doncaster House, in Orville, Ohio, on the 19th inst., and delivered to them a deed of the Cleveland, Zanesville and Cincinnati Railroad, from Hudson to Millersburg, Ohio, as one million five hundred thousand dollars worth of stock in the new company, in consideration of one hundred and sixty-five thousand dollars in stock subscribed by Knox, Holmes and Wayne counties, for the completion of the road from Millersburg to Mount Vernon and Columbus. —*Pittsburg Chronicle.*

Pittsburg and Connellsville Railroad.

According to the monthly estimate of the work to be done on the Pittsburg and Connellsville Railroad, east of Connellsville, it appears, the work of construction is being pushed forward with all possible speed. The difficulty arising from the scarcity of labor has in a great measure been overcome by the importation of negroes from Kentucky and laborers from Canada by two of the heaviest contractors on the line.

The President states that within a year from this date the road will be completed and stocked, and trains running through to Baltimore.

We are informed that plans have been completed for a most advantageous western connection.—*Pittsburg Chronicle.*

☞ The Chesapeake and Ohio Canal will be closed on the 5th of December. In 1842, when this canal was first opened, only 1,700 tons of coal were mined at Cumberland: at the close of business last year over 1,300,000 tons were shipped, and the trade this year, at the same period will have reached from 1,600,000 to 1,800,000.

☞ The contract between the National Junction Railway Company and the lessees of the Alexandria canal, for the building of a railroad bridge upon the piers of the canal aqueduct at Georgetown, has been confirmed by the board of directors of the Alexandria canal, at a recent meeting in Alexandria, Va.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

The asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

Years ending	Railroad: Main Line.	Railroad: Branch Line.	Railroad: 2d Track and Sidings.	Railroad in progress.	Rolling Stock: Cars: Engines.	Cars: Pass.	Cars: B. M. E.	Cars: Freight.	Companies. RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, November 27, 1869.

Stock Exchange and Money Market.

The Money Market has been fairly active since our last. The offerings of capital have been less extensive, and more firmness has been noted in rates, particularly on call. The demand for accommodation has been quite general, and from speculative sources rather more urgent, chiefly for use at the Stock Boards. Call loans have been quoted at from 5@7, mainly at 6@7 per cent; and choice to very good discounts at from 10@18 per cent. per annum. The city banks, in their last weekly return, showed a loss of over 2⅝ millions of legal tender notes, with a gain of $1,173,378 of specie and a reduction of $20,116 of deposits. They added $1,887,541 to their loan averages, and $19,055 to their circulation. The banks have been making more liberal shipments of currency to the West, and South West. The U. S. Sub-Treasury reduced its currency balances about 1⅛ millions during the week, and to about five millions at the close of business on Tuesday. Its coin balances were slightly increased.

The specie reserve of the city banks according to the latest return is $27,929,071, against $17,333,153 same time last year. The city bank deposits are now $183,734,190, against $184,110,340 week ending Nov. 21, 1868. The legal tender reserve amounts to $48,455,121, against $63,599,544 same time last year. The circulation now stands at $34,231,925, against $24,195,068 same time last year. The loans are now $253,068,008, against $251 091,063 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $80,291,759 a day, against a daily average of $95,143,215 the preceding week, and $114,980,180 the week ending with Nov. 6, 1869. The current week's exchanges average about $94,150,000 a day. The city banks, last week, reported a gain of $1,173,378 of specie, with a loss of $20,116 of deposits, and $2,640,540 of legal tender notes. They increased their loans, $1,887,451; and their circulation, $19,055.

National Bank notes to the amount of $264,730 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $319,291,661, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $19,514,118, leaving, with the existing 1,618 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,777,543. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,501,750; and for the public deposits, $19,408 000—making a total of $361,909,750. The Treasury Department last week redeemed and destroyed $350,990 of worn and mutilated fractional currency, and issued $643,000 of new. The outstanding amount of fractional currency on the 1st of Nov., was $37,035,442, against $33,001,299 on the 1st of October, 1869.

The U. S. Sub-Treasury receipts, week ending with Nov. 20, were $3,692,972 in coin, (including $2,008,000 from customs duties,) and $4,241,893 in currency; payments, $3,370,859 in coin, (including $2,099,442 of coin interest,) and $4 883,059 in currency; balance at the close of the week, $90,419,483, (including $80,595,348 of coin, and $5,348,494 of currency,) against $87,874,787 at the close of the preceding week, showing an increase of $3 044,696. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $460,560 in coin, (including $414,458 from customs,) and $480,042 in currency; payments, $243,563 in coin, (including $224,180 of coin interest,) and $288,893 in currency. On Tuesday, receipts, $779,064 in coin, (including $361,624 from customs,) and $300,800 in currency; and payments $325,800 in coin, (including $300,645 of coin interest,) and $416,240 in currency. The balance at the close of business on Tuesday stood at $88,454,638, (including $5,008,506 of currency, and $81,269,040 of coin,) against $87,128,396 a week previous; and $88,308,276 on Nov. 9, 1869. The aggregate receipts of the office in Oct. were $58,880,033, including $11,194,159 from customs; aggregate payments, $53,555,362, including $7,715,080 of coin interest.

The outstanding amount of coin certificates on the 1st of Nov. was $28,731,520, against $24,412,720 on the 1st of Oct., 1869. The Sub-Treasurer at this port, last week, retired $1,821,983 of coin certificates through the receipts for customs.

Government revenues have been on a comparatively moderate scale. The excises yielded about three millions; customs at the port of New York, $1,924,983, and at the outports about $650,000 (in coin) more, making the grand total income for the week equal to about $6,283,103 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 69 millions.

Gold has been in rather more active request at from 125¼@127, closing heavily on Wednesday at 125¼@125⅞. The demand has been mainly speculative. The customs and export inquiry has been light. Government marketed a million of Gold on Friday, Nov. 19th, and another on Tuesday, the 23d inst., at equal to the average market rates. The specie shipments hence, last week, were only $172,074. On Tuesday of the current week, the exports were $22,000. The business of clearing Gold dealings, through the Gold Exchange Bank has been formally resumed. On Saturday, the clearances were about $6,386,000; and on Monday, $5,322,000.

The coin balances of the Government at this port on Wednesday morning, amounted to a little 81¼ millions.

The coin interest disbursements on Wednesday were $165,613.

The customs demand for Gold last week, averaged $320,831 a day; thus far, this week, it has averaged $388,041 a day, or equal to a weekly aggregate of $2,328,246. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $6,752, and since Jan. 1, $14,845,789, against $6,471,053 same time in 1868. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1869, has been $119,798,156, against $107,809,433 same time in 1868. At San Francisco, from Jan. 1, to Nov. 12, 1869, $7,388,155, against $7,450,891 same time last year.

The exports of specie, from this port, last week, were $172,074, against $22,100 same week last year; total, since Jan. 1, 1869, $30,184,636, against $68,481,580 same time last year. Government disbursed last week through the U. S. Sub Treasury here, on account of the coin interest on the public debt $2,099,442, and since Jan. 1, 1869 $85,530,937, against $78,622,609 same time in 1868. The specie exports from San Francisco, from Jan. 1, to Nov. 12, 1869, were $34,687,659, against $32,526,034 same time in 1868.

The U. S. Treasury receipts from customs at all ports from July 1, to Nov. 20, were about 71½ millions.

The amount of specie sent east by railroad from San Francisco, thus far, this year, has been $6,385,799.

Foreign exchange has been in better supply and less request, since our last, at slightly reduced price. Bankers' prime sixty day bills on London closed heavily on Wednesday at 108¾@108⅞, and on Paris to 5.21¼@5.16¾; sight bills on London to 109⅜@109⅝, and on Paris to 5.16¼c.@5.12½. The offering of produce bills has been fair this week. The week's exports of domestic produce have been to the currency value of $4,088,188, making the total since Jan. 1, 1869, $177,136,376, against $148,602,157 same time last year.

Government securities have been in moderate demand, most of the week, and, with lighter offerings of nearly all issues, prices have shown more firmness. The inquiry has been mainly for the 1867 Five Twenties, and the currency six per cents issued in aid of the several Pacific Railroad enterprises, under the authorizing Acts of Congress. Government bought in three millions of U. S. Five Twenties on Wednesday at from 112.50 @112.95 nett, out of an aggregate offering of $4,695,250.

U. S. sixes of 1881 closed here more steadily at 117¾@118; U. S. Five-twenties of 1862, ex coupon, 115⅛@115¼; U. S. Five twenties of 1864 at 112⅞@113⅛; U. S. Five-twenties of 1865 at 113⅝@113⅞; U. S. Five-twenties of 1865, consolidated, 115⅝@115¾; U. S. Five-twenties of 1867, 115¾@115⅞; U. S. Five-twenties of 1868, 115⅝@115⅞; U. S. Ten-forties at 107⅝@107⅞; U. S. Six per cent. currency bonds, 107⅝@107⅞.

The latest quotations at the London Stock Exchange compare as follows with former returns:

At. and Gt. West	....	....	....

State bonds have been in more liberal supply and easier in price, on a moderate movement.

Railway bonds and mortgages have been more sought after at well supported rates. The Central Pacific Railway First Mortgage Bonds have been more freely dealt in at from 92½@92¾ nett, and Western Pacific do, at 90 per cent. and accrued interest in currency, Messrs. Fisk & Hatch, the financial agents of the latter company, report very encouraging progress in the marketing of this new loan, of the nature and guarantees of which we gave particulars in the preceding issue of the JOURNAL.

Washington advices report that the controversy between the Union Pacific and Central Pacific Railroad Companies, concerning the possession of the road between Ogden and Promontory Point, the settlement of which was initiated by the act of Congress of last Spring, which fixed the point of junction at Ogden, has been finally arranged by an agreement between the two companies as to the price to be paid to the Union Company for that portion of the road constructed by it between Ogden and Promontory, eighty miles. By this arrangement the Central pays to the Union a sum understood to be somewhat in excess of $3,000,000, and comes into the proprietory possession of that portion of the road in dispute. These essentials being now settled, both companies will proceed to erect permanent and commodious buildings at Ogden, and the Treasury Department will issue to the companies the remainder of the subsidy bonds due to them, except such sum as may be retained to guarantee the final completion and equipment of the roads, in accordance with the recommendation of the Government Commissioners. Henceforth the two companies will be as one line.

Railway and miscellaneous stocks have been fairly active at rather more buoyant prices, as a rule, though there have been frequent fluctuations.

At the auction sale of Scranton Coal on Wednesday, 70,000 tons were disposed of at reduced prices, ranging from $4.05@$7.35, as against the October range of from $5.25@$8.35 per ton of 2240 lbs., deliverable at Elizabethport, N. J.

The earnings of the Union Pacific Railroad Company for the first sixteen days of November are $407,494 47.

General business has been on a moderate scale. In the line of domestic produce, Breadstuffs and Cotton have been quoted easier; Provisions firmer. Middling upland cotton closed heavily on Wednesday at 25@25⅛ cts. per lb. The stock of cotton now here is given at about 28,500 bales. The receipts at the port this week, have averaged about 3,850 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 692,836 bales, against 540,242 bales in 1868-'9; exports, same time 305,000 bales, against 221,500 bales same time in 1868-'9; stock on hand at latest dates, 261,000 bales, against 195,250 bales same date 1868. The exports of domestic cotton goods from this port, since Jan. 1, have been 18,516 pkgs., against 21,937 pkgs., same time last year. From Boston, 6,826 pkgs., against 7,741 pkgs. same time in 1868.

At the Live Stock markets, this week, Beeves have been in fair demand, at from 8@16½c., per lb.; week's receipts, 6,078. Milch cows inactive, at $40@$110 each, receipts, 103. Veal calves in limited request at from 4@13c. per lb.; receipts, 1,173. Sheep and lambs dull and heavy at from 3½@7c., and 6@8c. per lb.; receipts, 36,128. Swine in moderate request at 10¼@11½c. per lb., all live weight; receipts, 14,700.

Foreign merchandise has been less active, closing less buoyantly as to price. The week's imports of dry goods have been to the specie value of $885,582, and of general merchandise, $2,263,269, making a total of $3,148,851.

Ocean Freights have been less active, and rates have been quoted lower. For Liverpool we quote flour at 2s. by sail, and 2s. 6d.@2s. 7½d. by steamer, per bbl.; grain at 5⅛d.@6d. by sail, and 6d.@6½d. by steamer, per bushel; cotton at $\frac{3}{16}$d. by sail, and $\frac{5}{16}$d. by steamer per lb.; and heavy goods 20s.@35s. by sail, and 22s. 6d.@55s. by steamer, per ton. Total number of vessels in port on Wednesday, 472.

The New York exports, exclusive of specie, for the week ending Nov. 20, and since the beginning of the year, compare as follows:

	1868.	1869.
Dry goods	$959,692	$885,582
Gen. merchandise	2,697,663	2,263,269
Total for the week	$3,657,355	$3,148,851
Previously reported	219,125,269	261,114,213
Since January 1	$222,782,624	$264,263,064

The imports for the week ending November 23, and since the beginning of the year, have been as follows:

	1868.	1869.
For the week	$3,261,984	$4,088.188
Prev. reported	145,340,173	173,048,188
Since January 1	$148,602,157	$177,136,376

The balance in the Sub-Treasury on Wednesday was $89,326,640 16.

New Route from Pittsburg to Toledo.

The Toledo *Blade* says that the President of the Pittsburg and Connellsville Railroad Company is at the head of an organization for building a road from Pittsburg along down the east bank of the Ohio river, and crossing at the mouth of the Beaver to the Ohio state line. An Ohio company is vigorously canvassing for the extension of this route up the Little Beaver to New Lisbon, from New Lisbon to Bayard, thence by a branch road already built to Zoar, thirty miles, thence down Salt Creek along the south side of Wayne county and crossing Kilbuck at Holmesville, thence up Paint Creek by way of Nashville in Holmes county, thence up the valley of the Clear Fork of the Mohican to Lexington, six miles south of Mansfield. From Lexington across to Crestline ten miles, and from thence to Toledo by the route now located and in the hands of the right men to build it. The advantages of this route are the singular circumstances of valleys leading directly west through the very hilly portions of Ohio from the Ohio river to Lexington, furnishing a direct line, with easy grades and light work. It also lies in the region of coal and iron ore, which embraces all the route from the Ohio river to the mouth of the Clear Fork of the Mohican, one hundred and twenty miles of mineral lands.

☞ A dispatch dated Richmond, Va., November 23, says that arrangements have been closed with several prominent New York capitalists, by which the Chesapeake and Ohio Railroad will be completed at once. Among the capitalists are W. H. Aspinwall, A. A. Low, C. P. Huntington, Fisk & Hatch, and others.

☞ Four hundred and twenty-one tons of railroad iron for the Wellington, Grey and Bruce Railway, have arrived at Hamilton.

☞ A CHOICE SECURITY. SEVEN PER CENT. GOLD, FREE OF GOVERNMENT TAX. NEARLY 10 PER CENT. CURRENCY, FIRST MORTGAGE BONDS OF NEW YORK AND OSWEGO MIDLAND RAILROAD. THESE BONDS CAN BE REGISTERED.

SIX MILLIONS OF DOLLARS PAID-UP STOCK SUBSCRIPTIONS. No bonds issued on road under construction; issue limited to $20,000 per mile of road built and in running order, BEING ONLY ABOUT HALF THE ACTUAL CASH COST. The road is being built with great economy for cash; 100 miles are done, and in the most thorough manner; 50 miles additional will be finished in November; and the whole line (over 400 miles) it is expected will be completed within the ensuing year. It is one of the most important roads in the State of New York. It shortens the route from New York City to Buffalo 70 miles, and to Oswego 45 miles; it traverses a populous district destitute of other railroad facilities, which must furnish it a large and profitable local business; and it will be completed at an aggregate cost far below that of any competing line. These advantages cannot fail to make it one of the best paying roads leading from the metropolis, and its First Mortgage Bonds one of the safest securities ever issued. All mortgage bonds issued on Railroads running from the City of New York are good, and the interest promptly paid, although some of them are mortgaged for more than double the amount per mile that the Midland is. Among the bonds now offering we know of none equal to these. For the investment of trust or other funds there is nothing better; and in exchange for Government Bonds they give a large increase of income, beside capitalizing the premium. They are meeting with rapid sale, and we have been gratified to find that they are taken chiefly by our most conservative and sagacious capitalists in exchange for Government securities. Price par, and accrued interest in currency. Circulars, pamphlets, &c., on hand for distribution.

GEORGE OPDYKE & CO.,
Bankers, No. 25 Nassau st.

Baltimore and Ohio Railroad.

The annual meeting of the stockholders of this company was held in Baltimore on the 15th inst.

John W. Garrett, Esq., president of the company, presented the forty-first and forty-second annual reports of the president and directors to the stockholders, being for the fiscal years terminated 30th September, 1867, and 30th September, 1868.

Mr. Garrett stated that these reports completed all except for the last year. The latter was being prepared, and would probably at an early date be published for the information of the stockholders.

The following gentlemen were unanimously re-elected directors for the ensuing year: Johns Hopkins, Samuel W. Smith, Francis Burns, John Spear Nicholas, John Gregg, C. Oliver O'Donnell, James Harvey, Galloway Cheston, William W. Taylor, Samuel Kirby, Allen A. Chapman and Albert Schumacher.

☞ The Western Pacific and San Francisco Bay Railroad Companies have consolidated under the name of the Western Pacific Railroad.

☞ The distance between Wilton and Keene, N. H., for the proposed new railroad is 35 miles.

Great Western Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING JULY 31, 1869.

The receipts on capital account during the half year amount to £258,050 16s. 1d., and mainly arise from the first instalment of the issue of 5 per cent. preference stock. This includes the proportion of discount thereon, which has been charged against the remission of interest allowed by the Government, on the final settlement of the loan. The aggregate expenditure to the same date amounted to £5,392,593 5s. 3d., leaving a balance to the credit of capital account of £126,284 19s. In accordance with the resolution of the shareholders at the special general meeting held on April 28, the Directors have to announce that the whole of the 5 per cent. preferred stock, amounting to £1,018,000, has been issued at the agreed rate of 80 per cent., the first call of 25 per cent. was payable on the 17th May, 1869, and carries dividend from that date. The remaining instalments are payable, viz:

£16 on each £100 of stock on			1st December, 1869.
16	"	"	1st December, 1870.
16	"	"	1st December, 1871.
12	"	"	1st December, 1872.

An act of the Canadian Parliament (32 Vic., cap. 62) has confirmed this issue of preference stock with option of conversion into ordinary shares until January 1, 1880. The outlay on capital account during the half year, after deducting sales of surplus lands, has been £4,490 6s. 9d., as follows: Cost of extending sidings rendered necessary in consequence of the increased through tonnage and number of trains; additions to Detroit freight shed; petroleum oil platform at London; proportion chargeable to capital for new windmill tank at Port Credit, and 20 new 8-wheel flat or platform cars. The receipts and expenditure on revenue account were as follows:

Gross receipts	£385,068
Working expenses, including renewals	232,768
	£152,300

From which there has to be deducted—

Interest on bonds, loan, &c	£46,871	
Loss on conversion of American funds	53,782	
Loss on working Erie & Niagara Railway	924	
Amount set aside for renewal of ferry steamers	2,000	
		103,577
		£48,723
Add surplus from last half year	£2,578	
Less special vote to deputation of board	1,575	
		1,003
Proportion of half year's dividend on Detroit and Milwaukee preference shares.		7,952
Profit on working Galt. & Guelph railway		40
Available for dividend		£57,718

The dividend to July 31st, on the first instalment of the 5 per cent preference stock amounts to £2,608 2s. 8d., leaving a balance of £55,110 1s. 8d. From this balance the Directors recommend a dividend on the ordinary shares at the rate of 8 per cent. per annum, free of income tax, payable in London on 9th November, which will absorb £53,259 9s. 8d., and leave a surplus of £1,850 12s. to be carried to the credit of next half year. The renewal fund for the ferry steamers now amounts, with interest, to £12,560 13s. 10d. The loss on conversion of American currency for the half year amounts to £53,781 15s., as compared with £54,748 12s. 5d. for the corresponding period in 1868. The average rate of conversions during the half year was 135¼, the average price of gold for the same period being 137⅛. The amount of assets in American funds in hand at 31st July, 1869, amounted to $218,635 41, against $215,485 72 at the commencement of the half year. The following table exhibits the receipts and expenses for six corresponding half years:

RECEIPTS.

Half year ending	Passengers, mails, and sundries. £	Freight and live stock. £	Rents. £	Total. £
July, 1864	125,282	189,081	577	314,940
July, 1865	139,821	144,028	716	284,565
July, 1866	172,731	169,577	854	343,162
July, 1867	165,367	199,221	1,116	365,704
July, 1868	155,082	200,619	948	356,649
July, 1869	157,930	226,200	937	385,068

EXPENSES.

	Including renewals. £	Per cent. of gross receipts.
July, 1864	171,452	54.44
July, 1865	158,804	55.81
July, 1866	175,747	51.21
July, 1867	182,768	49.98
July, 1868	208,462	58.45
July, 1869	232,768	60.45

The total traffic receipts show an increase of £28,429 9s. 3d. as compared with the corresponding half year:

Increase in local passenger traffic		£4,719
" through "		895
" local freight & live stock traffic		12,038
" through " "		13,543
		£31,195
Decrease in emigrant traffic	£173	
" express freight & sundries	2,592	
		2,766
Total increase		£28,429

The low tariff of rates referred to in the last report as arising from competition has been continued throughout the half year by rival American Railroads, and the North Shore route (of which the Great Western forms the middle link) has been obliged to adopt the same rates. This has considerably affected the ratio of working expenses to earnings, which this half year amounts to 60.45 per cent., against 58.45 per cent. in the corresponding half year. The cost of ordinary working expenses per train mile for the last five corresponding half years is as follows:

	Sterling.
July 31, 1865	5 0¾
July 31, 1866	4 9
July 31, 1867	4 2¾
July 31, 1868	4 8¾
July 31, 1869	4 8

The opening of the Pacific Railroad will bring to the Great Western line a considerable traffic between the Atlantic and Pacific coasts, which was formerly conveyed by water by the Panama route. Passengers can now travel through in the same car from New York to Chicago, where direct connections are made with the Pacific Railroad. The Great Western will participate in the advantages of 2,000 miles of additional railway communication west of the Missouri River. The development of this traffic will, doubtless, lead to a closer alliance with some of the lines between Chicago and New York; indeed the Erie, Lake Shore, and Michigan Southern Railroads are already said to be consolidated. Should any definite and acceptable proposals be made to this company, they will be submitted to the shareholders for their consideration. The unbroken guage established between the east and west by the third rail over this line, has developed a large grain business never before conveyed by railway. From this traffic important results may be expected in the future. Millers in New England States formerly obtained cargoes of grain during the period of navigation only; they now receive their supplies in car loads all through the winter. The lumber trade has also been promoted by the same means. It is satisfactory to be able to state that on all the sections of country in the neighborhood of the line, the crops have been more abundant than for some years past. A special freight line has been established in connection with the Detroit and Milwaukee road by which freight is transported between Grand Haven and the Atlantic seaboard without transfer. The last half year's report referred to an agreement with the Wellington Grey and Bruce Railway Company to work the traffic (under certain conditions) of the first section (16 miles) of that line as far as the town of Fergus, and which portion is now approaching completion. The same arrangement has since been made with regard to the entire main line of the Wellington Grey and Bruce Railway, intended to be constructed from Guelph to some point on Lake Huron, making altogether about 90 miles, but not to any future branches or extensions. The agreement can be seen at the offices. The Directors have to announce that the surplus revenue of the Detroit and Milwaukee Railroad Company on 30th June, 1869, admits of a dividend at the rate of seven per cent. per annum to this company on the $2,095,000 preference shares. One fourth of this sum of £10,602 11s. has been applied in part liquidation of the Detroit and Milwaukee old interest account, which now stands in the balance sheet at £6,944 19s. 3d. The gross earnings of the Detroit and Milwaukee Railroad for the half year to 30th June, 1869, were £154,786 17s. 11d., working expenses, taxes, and insurance £99,621 18s. 1d., net revenue, £55,164 19s. 10d.

DIRECTORS.—Mr. Alderman Dakin, Creechurch-lane, London, President. Thomas Faulconer, Esq., 12, Copthall Court, London; John Fildes, Esq., Manchester; Francis Somerville Head, Esq., 24, Manchester Square, London; Alexander Hoyes, Esq., Bitterne-grove, Southampton; Charles Hunt, Esq., London, Ontario and Canada; Donald MacInnes, Esq., Hamilton, Ontario, Canada; Hon. William McMaster, Senator, Toronto, Ontario, Canada; Paul Margetson, Esq., Clapham-common; George Smith, Esq., 57, Conduit street, London; Hon. John Carling, M. P., London, Ontario, Canada. Auditors.—John Young, Esq., 16, Tokenhouse-yard, London; Sidney Smith, Esq., 31, Bush-lane, London. General Manager.—Thomas Swinyard, Esq., Hamilton, Ontario, Canada. Treasurer.—Joseph Price, Esq., Hamilton, Ontario, Canada. London offices.—126, Gresham house, Old Broad street, E. C. Mr. Brackstone Baker, Secretary; Mr. Walter Lindley, Registrar.

The following is the report of Mr. G. L. Reid, the engineer:

To Thos. Swinyard, Esq., General Manager.

DEAR SIR.—I beg to submit to you the following report upon the working of my department during the half-year ended 31st July last:

Charges to Revenue.

The total expenditure of this department during the half-year chargeable to revenue amounts to £58,603, as compared with the corresponding half of 1868, which amounted to £51,028.

Charges to Capital.

During the past half-year the undermentioned new works were executed, forming a charge to capital account.

Superstructure.—Labor and materials laying down a through siding with a third rail at Copetown; extension of sidings at London, and laying down a third rail in the oil, coal and pork sidings at Hamilton	£358
100½ tons of rails laid down in same	929
Making switches and crossings and preparing materials for additional narrow gauge sidings to be laid down at various points along the main line	1,027
	£2,314
Buildings.—Proportion chargeable to capital of the cost of building a tank and erecting a windmill pump at Port Credit, charge from mechanical department	92
Cost of making additions to freight shed on the Michigan Central railroad grounds at Detroit	85
Cost of building an oil platform at London.	17
	£2,509

Nearly the whole of the above amount charged

to construction account is for several new narrow gauge sidings, which were absolutely necessary for the adequate accommodation of the traffic. More narrow gauge sidings are still urgently needed, and an additional number, extending in the aggregate to 3¼ miles of new sidings, are at present under construction. These will obviate many of the difficulties experienced during the past winter in the prompt despatch of the trains at a time when the freight business of the main line fully taxed the capacity of our single track railway.

Revenue Account.

Repairs & renewals of bridges and culverts	£2,983
" sidings	1,753
" fences	1,637
" buildings and wharves	1,778
" signals	345
" approaches	178
Platelayers' wages and extra work for maintenance and renewals of permanent way	21,775
† 3,184½ tons re-rolled rails	15,040
407,095 lbs. fish plates, bolts and nuts, and chairs for switches, and small stores	6,312
90,705 sleepers laid in track	5,591
Cost of labor and materials used in laying down a branch track to new gravel pit at Stamford, near Suspension Bridge	329
Engineering superintendence	880
	£58,603

The above expenditure exceeds that of the corresponding half-year in 1868 by a sum of £7,574, but the freight tonnage and engine mileage having increased in very nearly the same proportion, the additional outlay on maintenance and renewals is thus to a large extent accounted for. The following tabular statement shows the relative proportion of the cost of maintenance and renewals to the traffic engine mileage and tonnage of freight passing over the line since the completion of the extraordinary renewals in 1867:

Half-year ended	Cost of maintenance and renewals.	Traffic engine mileage.	Cost per engine mile.	Total freight tonnage carried over line and branches.	Total freight tonnage carried whole length of main line.
July 31, 1867.	42,773 8 9	1,141,901	8.99	296,787	136,693
Jan. 31, 1868.	43,589 11 8	1,151,533	9.08	284,9?5	147,064
July 31, 1868.	51,028 8 4	1,202,915	10.18	286,733	140,643
Jan. 31, 1869.	48,536 17 4	1,317,863	8.84	338,911	203,656
July 31, 1869.	58,602 13 11	1,358,530	10.35	375,576	208,773

The above proportion of cost of maintenance and renewals to the engine mileage and freight tonnage compares very favorably with that of the leading railways of the northern states. The increase during the past half-year is in re-rolled rails, trackmen's wages, sleepers and ballasting, whilst on the other hand there is a large reduction in the cost of repairs of bridges and buildings, arising from the recent heavy renewals of these works. The weight of re-rolled rails laid in the track during the last six months was 3,184½ tons, being 1,054½ tons (or nearly fifty per cent.) in excess of that of the corresponding half-year of 1868, owing to the unusual breakage and lamination of both rails and joint fastenings which took place during the severe weather of last February and March, following suddenly as it did upon an exceptionally mild and spring-like season, which prevailed throughout January and the first half of February. The rails which suffered most severely were those which had been earliest re-rolled, viz., in 1861 and 1862, and those imported from Wales in 1866 for the narrow gauge track, a large proportion of which latter have proved to be very ill adapted to withstand the severe stress of our heavy freight traffic during the winter months. The gross weight now passing over our main line (embracing all classes of trains), exceeds two and one quarter millions tons per annum on the central division on a single line of rails, a load which in this climate wears out the best quality of 66 lbs. rails in a very few years. All the leading railways of the Northern states are now rapidly relaying their main tracks with Bessemer steel rails (with most successful results), and I beg strongly to recommend that we should lose no time in commencing to relay the heavy gradients of our Central and Eastern divisions between Suspension bridge and London with Bessemer steel rails as fast as the iron rails are worn out. Bessemer rails are now considerably less than twice the cost of iron rails, and it is established beyond all doubt that their duration is at least five times that of an iron track. The wages of the trackmen throughout the line have been increased during the past half-year from 80 cents to 90 cents and one dollar a day, in order to check the wholesale emigration which was taking place to the Western states, where the demand for railway laborers is very great. This increase adds a sum of £2,054 15s. 11d. a year to the wages of the permanent force employed on the line.

The stock of surplus rails is 2,542 tons, valued at £23,762 15 10

Galt and Guelph Branch 15½ miles.

Cost of maintenance, renewals and watching for the half year	£702 15 5
The cost of the corresponding half-year was	845 15 11

Erie and Niagara Railway 31½ miles.

Cost of maintenance for the half year.	£475 11 5
The cost for the corresponding half-year was	170 1 9

The above is the cost of maintenance for a period of four months as compared with three months in the corresponding half-year of 1868, and it includes the cost of working a ballast train for repairing the track during a period of three weeks.

† This sum is in mixed currency, being increased by a sum of £1,265, arising from the purchase of coal and firebrick, &c., in the United States, and charged in American currency in the accounts.

Railroads in Vermont.

The following railroads were chartered at the last session of the Vermont Legislature, viz: The Northern Vermont and Lake Champlain, from Cambridge, Vt., to Essex Junction; the Missisquoi and Clyde River; the Barre Railroad; the Manchester and Jamaica; the Brattleboro' and Pawlet River; the Wantastiquet Valley; the Runaway Pond Railroad; the Rutland and Bethel; the Brattleboro' and Bennington; extension of Lamoille Valley road to McQuam Bay, in Swanton.

☞ At a special meeting the directors of the Knox and Lincoln Railroad, at Bath, Me., on the 16th inst., measures were taken to complete the road and have it running in one year from this time. Action was also taken for the construction of bridges for the entire route. Measures were also taken for the procuring of a steam ferry-boat to ply between Bath and Woolwich, and also for procuring freight cars.

☞ The Detroit, Logansport and St. Louis Railroad Company has been organized with a capital of $1,200,000. This road will be about 113 miles long, commencing at the State line, either in De Kalb or Steuben Co., Ind., and running thence through the counties of Steuben, De Kalb, Noble, Allen, Whitely, Kosciusko, Wabash, Miami and Cass, terminating at Logansport.

☞ The matter of leasing the North Carolina Railroad to the Raleigh and Gaston Railroad Company has been indefinitely postponed.

☞ Trains are now running regularly on the Southern Branch Union Pacific Railroad, from Junction City to Council Grove, about 36 miles.

☞ The consolidated Cleveland, Zanesville and Cincinnati, and Pittsburg, Mount Vernon and Columbus Railroad companies will be known as the Cleveland, Mount Vernon and Delaware railroad after December 1st., with General Jones, of Mount Vernon, Superintendent. The principal offices will be in Akron, Ohio.

THE WHARTON
Safety Railroad Switch.

☞ BOTH RAILS of the main track absolutely immovable, continuous and unmutilated. ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

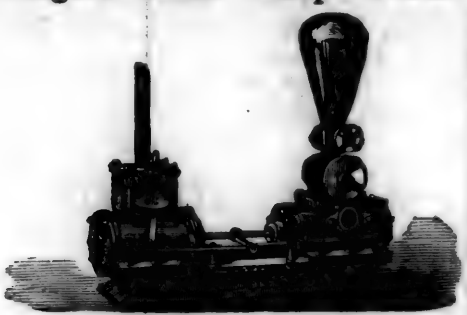
☞ The St. Mary's *Beacon* says that work is soon to be commenced on the Southern Maryland Railroad; that beginnings are to be made at Brandywine, Charlotte Hall, and at Schofield's in a few days; and that competent engineers of the company are now inspecting the road with a view of making a survey of location.

☞ Ground has been broken for a new railroad to run from the New Jersey Railroad at some point in Newark, *via* Woodside, Bloomfield, Montclair, Verona and Morristown, to the Delaware River.

☞ The grading of the road bed of the Tennessee and Pacific Railroad, between Nashville and Lebanon, will be completed by the 1st of December.

☞ The tunnel on the Chesapeake and Ohio Railroad, between White Sulphur Springs and Covington, will be completed in a few days.

☞ The directors of the Bangor and Piscataquis Railroad have ordered an immediate survey of a railroad route between Dover and Abbott.



☞ D. W. Clark, of Portland, Me., has been chosen treasurer of the Leeds and Farmington R. R. Co.

☞ The Hecla Mining Company have declared a dividend of $5 per share, payable Dec. 1 to holders of stock of that date.

☞ Wm. B. Strong has been appointed General Superintendent of the Rockford, Rock Island and St. Louis Railroad.

☞ J. L. Paddi has been elected Chief Engineer of the Lansing, St. Johns and Mackinaw Railroad.

FIRST & PRYIBIL'S
PATENT IMPROVED
BAND SAW MACHINE,
452, 454 & 456 Tenth Avenue,
NEW YORK CITY.

PRICE - - - - - $350.
BOXING AND SHIPPING, $10.

This Machine, with the exception of the table, is made entirely of Iron. Its weight is 1800 lbs.; drums 3 feet 3 inches in diameter; height, 8 feet 5 inches; depth 4 feet 3 inches; width 6 feet; driving pulleys usually 14 inches in diameter, or to suit our customers.

Our machine can be run with a speed of 330 to 350 revolutions per minute, causing the saw to travel 3300 to 3500 feet per minute, and with a belt from 4 to 5 inches in width a block of Rosewood from 10 to 15 inches thick, or wood of any kind, hard or soft, can be cut with ease and facility, the saw being from one-quarter inch to one inch in width. A saw one-eighth of an inch in width, including teeth, can be used for cutting wood of considerable thickness.

The saws are not liable to break owing to our improved slide bearing, which adjusts itself according to the expansion and contraction of the saw. No saw will break except by accident or gross carelessness. The same is used principally by railroad car, chair, and other furniture manufacturers, ship, boat, and wagon builders, and also to saw slate, ivory, bone, &c. Guarantee will be given for all we state above. From three to five times as much work can be done with one of our sawing machines, as with an ordinary up and down saw. The work is cut smooth, the saw being retained by an improved guard.

At the present time, Sept. 1869, 64 of our machines are running in this city, and about twice as many in the country.

We also manufacture a lately patented counterbalance oval turning lathe which can be run with more than twice the speed of the old style of lathes, and much more and better work will be done. Many other wood working machines, and also shafting, pulleys, hangers, &c., &c., constantly on hand. Send for Circulars.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

New York Saturday, December 4, 1869.

St. Joseph and Denver City Railroad.

FROM ST. JOSEPH TO FORT KEARNEY.

The undersigned, as representatives of the St. Joseph and Denver City Railroad Company, have the honor to offer for sale a limited number of the First Mortgage Bonds of the above-mentioned company, and invite the attention of investors, capitalists, and others, to the subject-matter herein set forth.

These bonds are dated August 14th, 1869, have thirty years to run, and are payable at maturity in the city of New York, in United States gold coin equal to the present standard.

They are in denominations of $1,000 and $500. They bear interest at the rate of eight per cent. per annum, payable on the 15th days of February and August in each year, free of Government taxes, in like gold coin as specified in the semi-annual coupons attached to the bonds, to wit:

ON THE $1,000 DOLLAR BONDS.

In the City of New York	$40.00
" London	£8 4s. 4d.
" Frankfort-on-the-Main	100fl.

And on the $500 bonds, one-half these amounts respectively.

The presentation of the coupons for payment at any of the three mentioned places, is at the option of the holders of the bonds without notice.—

The bonds can be converted at the request of the holder from *coupon* to *registered* bonds, and interest made payable also at any of the three mentioned places at the pleasure of the holder.

The total amount of bonds, and all that can be issued under the mortgage, is $1,500,000, which is upon 111.08 miles of road, and is at the rate of $13,503.79 per mile.

They are secured by a first and only mortgage, executed to the Farmers' Loan and Trust Company, as trustee for the bond-holders, on 111.08 miles of the company's line, from the city of Elwood (opposite the city of St. Joseph, Mo.) to Marysville, Kansas, their franchises, rights of way, property of all kinds, equipments, rolling stock, depots, machine-shops, and lands in Doniphan, Brown, Nemaha, and Marshall Counties, in the State of Kansas.

These bonds are further secured by the terms of the trust deed, which requires the Farmers' Loan and Trust Company (*to whom the proceeds of the bonds must be paid*) not to pay over to the railroad company any of the funds received from sales of the bonds, until they are furnished with proper evidence that the road is completed, ironed, and ready for the rolling stock, which is arranged in sections of five miles, and then only at the rate of $12,000 per mile.

By the same terms the Farmers' Loan and Trust Company are the sole and absolute custodians of all the bonds issued under this trust deed, and countersigns them when issued. *By this the holder of any of these bonds has a sure guarantee that the money which he has contributed finds an equivalent in a completed railroad.*

The security is undoubted, and will command at once the confidence of all.

Forty miles of road are in successful operation; the remaining portion is being rapidly completed.

Over one million ($1,000,000) of dollars has been expended on the road, from stock subscriptions and donations, and the work now completed, with all the equipments and rolling stock, is entirely paid for.

The company have a grant of land from the United States Government of 1,600,000 acres, at the value, at the present market standard, of the sum of $1,000,000. This land is in alternate sections, ten miles in width from either side of their line (with the privilege of claiming twenty miles), and was granted to the company to aid them in building the line to Fort Kearney. Though not mortgaged in this trust deed, the lands form an asset of great value to the company, with which to meet its liabilities. The Government granted also to the company the right of way through its property.

The company, free from debt, ask this loan of $1,500,000 to aid in completing the line.

They are coupon bonds, but may be registered in the owner's name at the Farmers' Loan and Trust Company, who are the Company's Registry and Transfer Agent.

They can be converted into a registered bond by the surrender of the coupons, and the interest paid to the registered owner.

The receipts of the company from all sources are sufficient to pay the interest.

They are offered at 97½ and accrued interest in currency, with the reserved right to advance the price without notice.

Government and all kinds of marketable securities will be received at their current market price, without commission, in payment of these bonds.

Bonds sent by express or packages received in payment will be free of charge.

Having had all the papers and documents relating to the loan examined by competent counsel, and pronounced complete and sufficient, and having personally examined the same, which we find in every respect perfect and regular, and having had the property examined by our agents, whose reports are entirely satisfactory, we do, with the utmost satisfaction, recommend the First Mortgage Eight per Cent. Gold Bonds of the St. Joseph and Denver City Railroad Company as an entirely safe, secure, and profitable investment, in all respects worthy the attention of investors, capitalists, and others.

Fiscal Agents,
49 Wall Street, New York.

Chesapeake and Ohio Railroad.

The second annual meeting of the stockholders of this company was held in Richmond on the 25th ult. From the report of the President it appears that the gross earnings of the road for the fiscal year ending September 30, 1869, were $662,674 55, and the expenses, $477,581 63, making the net earnings, $185,092 92. The increase of receipts over the previous year, was $63,320 49, and the increase of expenditures, $40,933 14, making the increase of net earnings, $22,387 35. From the expenditures are to be deducted the amounts paid for relaying with new iron a portion of the road and the increased amount of wood on hand.

The indebtedness of the company is increased by the sum of $953,136 63, and now stands at $3,087,847 30. The whole of this increase is chargeable to the construction and equipment of the road west of Covington.

It is supposed that the receipts for the year ending September 30th, 1870, will reach $700,000, and that these receipts will provide means to pay the running expenses of the road, the interest on the whole of the present indebtedness of the company, and leave a balance sufficient to pay for such new iron as may be necessary for repairs.

The capital stock of the company is $3,383,809 47, viz:

Amount paid by Board of Public Works	$2,013,987 52
Amount paid by subscribers other than State	1,339,983 87
Paid by subscribers to 8 per cent. preferred stock	29,838 08
Total	$3,383,809 47

The general condition of the roadway is good, and the rolling stock and motive power of the company is in first rate condition.

At the instance of Col. John B. Baldwin, a select committee of 13 was appointed to consider so much of the President's report as related to the arrangements made with New York capitalists for the prosecution and completion of the road to the Ohio River, who subsequently reported the following resolutions, which were adopted by a vote of 51,000, against 5,000 shares:

"1. *Resolved*, That the stockholders of the Chesapeake and Ohio Railroad Company, assembled in general meeting, do approve of the action of the President and Directors of the company in negotiating, accepting and ratifying the proposition and agreement of Messrs. C. P. Huntington and others, dated New York, Nov. 16th, 1869, and do hereby authorize and empower the President and Directors to do whatever may be necessary to carry the same into full effect.

"2. That the stockholders will proceed to elect eleven Directors, who shall have authority to choose from their own number a President and a Vice President of the company.

"3. That the Directory so organized shall have full power and authority to organize the company in all its departments, to provide for the selection and employment of all officers and agents of the company, to prescribe their duties and define their authority, to ascertain and fix their compensation, and generally to make for the Government of the company such rules as they may deem necessary, so that the same be not inconsistent with the charter of the company or the law of the land, and that they be at all times subject to the authority of the stockholders in general meeting."

On motion of Col. Baldwin the following persons were elected directors for the ensuing year: C. P. Huntington, A. A. Lowe, Wm. H. Aspinwall, Pliny Fisk, David Stewart, Jonas G. Clark, William B. Hatch, H. Chester Parsons, John Echols, Williams C. Wickham and Joseph R. Anderson. All but the three last named are citizens of New York, and the appointments were made in accordance with the contract just ratified. It is stated that Mr. Huntington will be President, to reside in New York, and General Wickham, the present President, will be Vice President, to reside on the line of the road.

The amount of money already expended in the construction of the road is $10,000,000. The contract entered into is to complete and equip the road to the Ohio River at the mouth of the Big Sandy at a cost of $15,000,000—$10,000,000 for construction and $5,000,000 for equipment; distance to be built, 200 miles.

New York, Flushing and North Side R. R.

The completion of the extension of this road from College Point to Whitestone, on Long Island Sound, was formally celebrated on the 27th ult. This road commences at Hunter's Point, in the new depot now being erected immediately adjoining the James Slip and Thirty-fourth street ferries, and passes through Dutch Kills, Woodside, Winfield, Newtown, and West Flushing, to the western side of Flushing, a distance of seven miles. At this point it divides into two branches—one running to College Point, and thence to Whitestone, eleven miles from Hunter's Point; the other extends on through Flushing, Bayside and Little Neck, to Brookdale Station (Great Neck) near Manhasset Village, 14 miles from Hunter's Point. The present easterly terminus is at Brookdale, although the route is located still further eastward.

The track has been constructed in the most thorough manner, with excellent grades, heavy ties, first-class cattle guards, etc. The rails are of the best quality. All new rails laid, embracing most of the route from Hunter's Point to Whitestone, are puddled steel on all curves, and the rest are quality iron rails—that is, a heavy base of very tenacious iron with hard granular heads, which thus secures great strength, and a hard wearing surface. These rails are from the noted works of Funke & Elbers in Prussia. The rails are strongly bound together at the joints in a superior manner with puddled steel "Fish bars." The nuts on the four strong bolts at each joint are kept from working loose, by a simple and ingenious arrangement. A continuous rail is thus, in effect, secured, which adds very greatly to safety, and carries the cars with an easy gliding motion. No better or safer track has yet been devised. The Drawbridge is provided with Self-acting Electric Signals, which operate at a distance.

The rolling stock is new, and has all the latest improvements. The Locomotives, built for and exactly adapted to the wants of the road, are from the celebrated Rogers Locomotive Works at Paterson, and are equal in quality to any produced. All the locomotives are entirely alike, so that the parts most subject to wear can be quickly replaced from duplicates. The passenger cars, are strongly built, in tasteful style, and with good upholstering. They are warmed by Baker & Smith's new process—an iron pipe containing a warm liquid, coils under each seat, thus distributing the heat uniformly through the whole car, and good ventilation is also secured.

Miller's new Platforms and Couplings are used, which require no bolts or links. The cars couple themselves on coming together, and are released with a simple lever, by the brakeman upon the platform. The ends of the cars come so closely together as to form a continuous floor from one to another. The Loughrigde Steam Brake gives the engineer complete and instant control of the whole train by simply opening a valve. Both passenger cars and engines are supplied with Grigg's patent wood-packed wheels and steel tires. These prevent the usual "metallic jar" and not only add to the comfort of riding, but also greatly diminish the wear of both cars and track, and the danger of fracture. In short, every valuable improvement possible has been combined in the locomotives and passenger cars.

North Carolina Railroad.

The gross earnings of this road for the years ending May 31, 1868 and 1869, compare as follows:

	1868.	1869.
From passengers	$172,774 83	$196,187 95
" freight	344,359 28	364,140 90
" mails	16,725 00	16,725 00
	$533,859 11	$577,053 85
Expenses, viz:		
Old	$97,130 79	$68,972 99
New	411,395 64	401,110 87
	$508,526 43	$470,083 86
Excess of earnings	$25,322 68	$106,969 99

In expenses, the word "old" means interest on old debts, and debts made and not entered on the books previous to each fiscal year. The word "new" means actual current expenses. Of the above "old" in the fiscal year 1867–'68, $44,694 42 is for interest, and $52,436 37 for other debts; and in 1868–'69, $41,145 29 is for interest, and $27,827 70 for other debts. Excluding the "old" entries, the net earnings for 1867–'68 would be $122,463 47, and for 1868–'69, $175,942 98.

Of the current expenditures for 1868–'69, ($401,110 87,) the following are regarded as extraordinary:

New railroad iron, chairs and spikes	$72,655 34
Buildings and bridges	10,901 28
Interest and discounts	30,244 83
Incidentals	6,681 58
Rebuilding engines	7,099 75
New cars	12,345 00
	$139,877 78

—leaving the actual current expenses for the year, $261,233 09, and the actual net earnings over operating expenses, $315,820 76, an increase over the previous year of $50,585 01.

The general income accounts for the two years under review compare as follows:

Receipts:	1868.	1869.
Earnings, as above	$585,859 11	$577,053 85
Old iron sold	32,562 82	58,338 60
Other property	1,423 87	1,525 99
Rents	5,711 78	5,481 51
Shop account	3,227 14	2,623 85
Interest	1,153 98	7,202 67
Mileage of cars	4,080 92	4,843 64
Miscellaneous	3,391 52	987 81
Total receipts	$585,411 09	$658,117 42

Expenditures:		
Transportation	$117,308 32	$119,067 46
Motive power	37,639 47	25,928 02
Cars	37,654 15	39,612 52
Maintenance of road	118,165 76	94,040 07
Subsistence	8,507 19	17,716 95
Maintenance of build'gs	5,395 48	9,662 07
Maintenance of bridges	13,451 08	8,269 43
Stock killed	1,769 67	1,588 25
Interest	49,059 40	71,390 12
Incidentals	5,674 77	7,289 49
New rails, chairs and spikes	113,522 29	72,655 34
Taxes	378 85	2,869 14
Total expenditures	$508,526 43	$470,083 86
Excess of receipts	$76,884 66	$188,033 56
Included in the expenditures are "old" as follows	97,130 79	68,972 92
Excess of receipts over "new" or current expenses	$174,015 45	$257,006 55

The following is a condensed exhibit of the business of the company for the fiscal years ending May 31, 1868 and 1869:

Assets on hand at commencement of year	1868. $69,834 94	1869. $62,264 11
Old debt collected	476 47	.....
Real estate sold	150 00	1,791 50
Claims passed to profit and loss	28,624 86	2,740 00
Receipts, as above	585,411 09	658,117 42
Increased liabilities	.....	97,724 12
Total	$684,497 36	$822,637 15
Expenses, as above	$508,526 43	$470,083 86
Right of way, real estate, etc	.....	2,030 36
Dividend No. 9, declared July 8, 1868, payable in 8 per cent. mort. bonds	.....	240,000 00
Assets as per ledger	62,274 11	110,522 93
Decrease of liabilities	113,696 82	.....
Total	$684,497 36	$822,637 15

The financial condition of the company now and one year ago is thus explained in the Report of the Treasurer:

The debt of the company reported and entered on the books of the company on the 31st of May, 1868, was $580,134 92, to which add $68,972 99 of old debts not reported and entered on the books of the company, but which have been paid during the past year, and also dividend No. 9, of $240,000, declared on the 8th July, 1868, which properly belongs to the fiscal year ending 31st May, 1868, we have the total debt of the company on the 31st May, 1868, of $889,107 91, of which amount there has been paid during the year the sum of $211,248 87, leaving the debt of the company as shown by the books of the Secretary to be on the 31st of May, 1869, $677,859 04, which debt may be decreased $144,179 32, as follows: Assets on hand, $110,522 93, and the deduction on negro bonds, $33,656 39, leaving actual balance to be paid, $533,679 72.

The general exhibit of the business of the company for the fiscal year shows an increase of the debt of the company of $97,724 12, the cause of which will be readily seen is by the dividend of $240,000 declared on the 8th July, 1868, and the old debts of $68,972 99 not reported and entered on the books of the company and the difference in the assets now and one year ago, all of which is necessary to show up in the fiscal year closing with 31st May, 1869.

The receipts for the fiscal year ending 31st of May, 1869, from passengers, freights, mails, mileage of cars and minor sources, have been $658,117 42, while the current expenses for the same time have been $401,110 87, of which amount $261,233 09 have been applied to the *ordinary repairs and operating expenses* of the road, and $139,877 78 have been applied to the *extraordinary expenses and repairs of the road*, leaving net income over and above the ordinary and extraordinary operating expenses and repairs of the road $257,006 55, an amount more than sufficient to pay a dividend of 6 per cent. on the capital stock of the company.

The road is 223 miles in length, with 17 miles of sidings. The equipment consists of 24 engines, 20 passenger, 5 mail, 9 baggage and express, 142 box, 105 flat, 5 bridge, 15 gravel, and 42 pole cars. Miles run by engines, 344,068. Number of through passengers carried, 10,259; do., local do., 68,691—total, 78,950. Tons of through freight, 45,351; do., local do., 37,932—total, 83,283.

The financial condition of the company as of May 31, 1868 and 1869, is thus stated in the general ledger balances:

	1868.	1869.
Capital stock	$4,000,000 00	$4,000,000 00
Loan 8 per cent. due March 1, 1867	144,000 00	95,000 00
Interest due on same	4,860 00	1,880 00
Mort. loan 8 per ct., due Nov. 1, 1872	142,500 00	153,000 00
Interest due on same	40 00	1,020 00
Mort. loan 8 per ct., due Nov. 1, 1877	146,500 00	166,000 00
Interest due on same	20 00	1,640 00
Mort. loan 8 per ct., due Nov. 1, 1888	.....	146,000 00
Interest due on same	.....	520 00
Dividend certificates fundable in 20 yrs' 8 per cent. mort. bonds	.....	6,980 00
Dividend No. 9, balance payable in 20 years' 8 per cent. mort. bonds	.....	8,250 00
Due on dividends	898 00	867 00
Temporary loans	12,676 53	18,530 00
Bills payable	20,992 12	5,170 06
Due other companies	9,209 80	3,669 47
Due on individual accounts	40,078 69	12,068 17
Due on pay rolls	14,432 78	15,237 34
Due on negro bonds	43,927 00	41,927 00
Profit and loss	732,834 87	682,708 43
Total	$5,312,969 79	$5,360,567 47
Road, equipment and real estate	$4,950,605 68	$4,949,844 54
Sinking fund	204,000 00	204,000 00
Stock of Chatham R. R. Co	74,700 00	74,700 00
Stock of North Carolina R. R. Co	21,400 00	21,500 00
Due from station agents	5,226 52	16,879 96
Due from other companies	5,195 99	8,898 64
Due from individuals	13,796 69	16,015 29
Due from freight exchanges	2,106 44	1,670 31
Due from U. States	14,371 09	3,636 64
Due from P. O. Dept.	2,787 50	2,786 58
Bills receivable	5,610 55	6,405 40
Due from Southern Express Co	600 10	1,000 00
Cash	12,569 28	58,500 11
Total	$5,312,969 79	$5,360,567 47

President.—W. A. SMITH.

Directors.—T. M. Holt, D. A. Davis, John I. Shaver, and R. B. Haywood.

Superintendent.—ALBERT JOHNSON.

Treasurer.—G. M. LEA.

Secretary.—F. A. STAGG.

☞ The Lexington and Arlington Railroad, hitherto a branch of the Fitchburg Railroad, has been sold to the Boston and Lowell R. R. Co.

Louisville Commercial Convention.

REPORT OF THE MEMPHIS CONVENTION COMMITTEE ON SOUTHERN PACIFIC RAILROAD.

Your Committee were appointed by the late convention at Memphis, and by a resolution of that body were instructed to make a report to this convention.

We present the resolutions, which were unanimously submitted by our Committee and with such unanimity adopted by that convention, not a dissenting voice from one thousand one hundred delegates, representing twenty-two States, being heard.

[Here the resolutions adopted by the Memphis Convention were read.]

We ask leave further to submit additional reasons for the action there taken.

In the United States Senate report of Feb. 19, 1869, from the Committee on Pacific Railroad, the following truth was uttered:

"The highways of nations are the measure of their civilization. Without roads there cannot be society, Government, commerce or intelligence. In exact proportion to the abundance and excellence of highways are the exchange of services between men, the communication of thought, the economy of labor, the augmentation of wealth, the growth of comfort, the development and consolidation of the civilized State."

The able Commissioner of the land office, in his last (unpublished) report, also says:

"Indispensable to the success and growth of commerce is a well adjusted system of thoroughfares by which a regular and speedy intercommunication may be maintained. The prosperity of ancient Italy may be measured to some extent by the increase of the wonderful highways, which in the zenith of that State, stretched from the capital to grasp and unite the provinces, which from time to time were added to the State. These stupendous lines reached from the wall of Agricola to the distant waters of the Tigris, and an aggregate of 14,000 miles had been constructed."

A distinguished English historian remarked: "Of all inventions, the alphabet and printing press alone excepted, those which abridge distances have done most for the civilization of our species, every improvement of the means of locomotion benefitting mankind, morally and intellectually as well as materially.

Mr. President, the Roman Empire undoubtedly gained vast strength from its then unequaled roads, which so wonderfully increased its commerce and afforded facilities for the rapid concentration of military power.

The American republic is the equal of that Roman empire in its vast expanse of territory, its wonderful resources, and its commanding power. What Rome would have been with the aid of steam and electricity *we* shall demonstrate as cycles succeed each other and the whole continent becomes peopled with myriads of energetic, cultivated and progressive Americans. We have railroads to develop our unknown riches; the constantly increasing foreign immigration steadily fills up the far West, and towns and cities are the creation of a day; pioneers unlock the new treasure houses of nature in remote mountain districts, and yearly increase the resources of the country; railroads pierce the wilderness, and, where a few short months ago beasts of prey held undisputed sway, the evidences of civilization spring up as if a potent magician had stretched forth his wand.

Whilst this has been done for other sections the South has been crushed by disasters. But now it is essential that the Southern States should have a Pacific Railroad, the outlet for their commerce, and a future highway for the world. Nature itself has spoken in behalf of that route, which, passing through the broad domain of Texas upon a natural road bed, encounters no difficulties of engineering and has no mountains to overcome. The snow, which blocks up other routes for months and makes transit difficult as well as dangerous to human life, never falls upon this southern line. Winding around the solitary mountains which dot the table lands of Arizona the terminus

in San Diego gives one of the most magnificent harbors of the world. For miles a frigate can sail up the placid waters of the bay, whose natural bulwarks protect it from gales, so that any vessel might be beached and floated off without damage by the ensuing tide. Upon the bar at low tide there are 22 feet.

In reference to the line *via* El Paso, every one will plainly perceive by glancing at the map that it is the shortest as well as the most serviceable for every section of the country. And we can effect more rapidly the enrichment and prosperity of every Southern State by the construction of this highway than by any other possible method; and by natural reaction the commercial circles of the entire country will be affected in a signal manner, causing that content and accord and national happiness which affluence always commands. The Northern States, with accumulated capital, can extend their Briarean arms to seek new fields of countless wealth, whilst colonization along the broad belt of fertile lands will build up an immense local traffic. The vitalizing influence of intellect, energy and capital combined will soon throw open an outlet to the markets of the world.

For two hundred miles there is already a population growing every day, which will give sufficient patronage to insure handsome dividends upon its stock to any road. The entire route through Texas along the 32d parallel opens up a country unequaled in the production of cereals in unlimited and profuse abundance, and cotton of the finest quality. The transportation of cattle and sheep would almost of itself support a road.

We wish to call attention specially to the advantages which will accrue to the whole South, and in a marked degree to certain localities. Little Rock will be the first recipient of that tide of wealth, which will sweep over these iron channels. The connecting link which is unfinished between Memphis and Little Rock will soon be closed, and the impetus of fresh trade will send Memphis with giant strides into metropolitan dimensions. Louisville will invite a portion of the custom which Little Rock and Memphis cannot accommodate, and even Cincinnati will feel the current; for a great portion of the through travel must necessarily pass through Memphis, Louisville and Cincinnati to reach the Eastern cities.

Between Shreveport and Vicksburg there is a gap of ninety miles, which will soon be built when this trunk road shows progress. Then there will be an air line from San Diego to Savannah, and all the intermediate cities must increase and prosper upon the steady flow of commerce which that route will carry to all the Southern States. From New Orleans a branch is projected *via* Richmond, Brashear and Austin up the Colorado river to intersect the main trunk at or near Phantom Hill, on the 100th degree of longitude. A great portion of this line is already in active operation. This will place the metropolis of the South within easy access of the Pacific and its foreign commerce. Southern Alabama, Southern Georgia and Florida will make use of this branch to supply their wants. The Little Rock and Cairo road will be one route by which St. Louis, Illinois and the Northwest generally can obtain their portion of the trade, which this main trunk must open up. The franchises of the Cairo road have lately been sold to an English house of great wealth, which will proceed without delay in its construction. The Kansas Pacific road will be another feeder of the main trunk line from the rich Northwestern States, and has the right reserved to make a connection either by a deflection through the Indian Territory or by going to Albuquerque and thence down the rich valleys and easy gradients of the Rio del Norte.

It is scarcely necessary to portray the agricultural resources of Texas and Southwestern Arkansas. Everybody knows them. But the mineral wealth is yet undeveloped. In Texas crude masses of iron ore crop out, indicating a supply sufficient for the globe when transportation is afforded; and large copper regions, richer and more extensive than those of Lake Superior, offer greater facilities for mining, as the ore lies in pure formations by the ton upon the surface of the earth. Great coal beds abound to furnish fuel for the road, for the various uses of the population, and to smelt the abundant ores. When we go further, and come within easy access of the Northern Mexican Provinces, we not only secure the traffic of that section, but we open up the great silver region, the real Eldorado of the Continent. The ordinary commerce of those provinces has already been important, as one item alone will demonstrate. During the year 1860, goods to the value of $10,000,000 were sent from San Antonia, Texas, to Chihuahua, in wagons, a journey of several weeks. What would be the amount required when those provinces are placed within six days of our markets? With the resources of machinery, capital and American energy diverted to that region what might we not expect from the mine? The statistics of the Mexican Government, as compared by Ward and Humboldt from actual official returns, show that the Northern provinces which would be tapped by this road produced, up to the year 1803, $2,027,855,000 in silver, a sum more than sufficient to pay our national debt. Ward says:

"We are aware that many of the statements in this and the preceding books, respecting the mineral region of the North of New Spain, (Sonora, including the Gadsden purchase, Chihuahua and Durango) will be thought exaggerated. They are not so. They will be confirmed by every future report, and in after years the public, familiarized with facts, which are only questions because they are new, will wonder at its incredulity, and regret the loss of advantages, which may not always be within its reach." Ward also says:

"A piece of virgin silver was found in the Arazuma mine, which weighed 2,700 pounds, nearly a ton and a half."

These regions are to be rich inheritances for our children. Hon. R. A. Wilson, of California, wrote:

"An hundred years have passed since the once formidable Apaches swept over Northern Sonora like a deluge, blotting out forever the hopes which the Spanish Court had conceived of retrieving the fallen finances of their empire from this Eldorado. But Providence had ordered it otherwise. The Spaniards had done enough to demonstrate its inexhaustible wealth, and they were driven away from this "creation of silver," and the whole deposit held for an hundred years in reserve for the uses of another race, who were destined to overrun the continent."

In January last President Juarez reluctantly granted the concession of a railway from Guaymas, in Sonora, to El Paso. He regarded the construction of that Pacific Railroad, and any junction with it, as the surest method of producing the acquisition by the United States of these Mexican mineral provinces. And deeming it a foregone conclusion, he has offered, within the past few months, to sell Sonora and Sinaloa.

In Western Arizona there are spots from which sufficient copper can be taken from the surface of the earth to load all the ships in existence. This is verified by official reports. Arizona is richer in minerals than California ever was, but no opportunity has yet been afforded to develop those riches, because they are inaccessible, and the cost of transporting machinery and other necessary articles is too great.

Throughout the Messilla Valley there are millions of acres of the finest land uncultivated, upon which 50 bushels of wheat to the acre can readily be raised, and for fruit it is said to have no equal. The lands about El Paso produce 500 gallons of wine to the acre, twice the amount produced on the best grape lands around Los Angelos, California. The best wine made in America comes from El Paso. In 1868 a beet was grown near El Paso which weighed 64 pounds, an onion weighing 5½, a turnip 4½, and a carrot 45 inches in length. The yield per acre is enormous.

The Commissioner of the Land Office, speaking of Arizona, says:

"There are many beautiful valleys, containing millions of acres of extraordinary fertility, producing wheat, barley, oats, tobacco, fruits and vegetables. In the South cotton and sugar crops are remunerative, and on the hills and mountain sides is found a rich and abundant pasturage. Indeed, here are some of the finest sugar lands in the Union. * * * The Colorado on the American continent will probably serve the historic purpose of the Nile in Egypt. It is subject to annual overflow from the melting of the snows on the mountain ranges flanking its valley to the height of several thousand feet above the ordinary level of the country. Thus the valleys of this river and its affluents are thoroughly fertilized. A system of artificial irrigation may be made to utilize these surplus waters, thus rescuing millions of acres and making them the scene of productive agricultural industry. * * * The system of irrigation, which once transformed the barren valley of the Nile into the granary of the East, supporting a population of twenty millions, besides exporting corn to all the surrounding nations, applied to the Colorado will fertilize a wider expanse of country than that reached by the waters of the Nile, with a finer climate and soil of equal productiveness.

"American settlements are being formed, introducing a higher and more energetic tone of social life, and overpowering the feeble efforts of the Mexicans to occupy these inviting regions. The depredations of the Apaches have restrained the settlement of large portions of this territory, regions possessing a delightful climate and containing large tracts of the finest arable and grazing land. The climate of the entire territory is represented as delightful, exempt from extreme heat, with nights of refreshing coolness. Snow rarely falls; fruit trees bloom in February and March; cotton, corn, wheat, tobacco, melons, with a great variety of temperate and semi-tropical fruits, are raised in abundance. The grasses are green and growing at all seasons.

"Irrigated lands in Arizona may be safely estimated as of double the productiveness of the unirrigated in the Atlantic States."

We have quoted thus to show what this road can rely upon to support their traffic, and to give increasing wealth from year to year to the cities of the Atlantic slope, which will receive the vast internal commerce from those distant regions. There are 72,000,000 acres of public land in Arizona, and the territory is as large as Kentucky, Indiana, and Tennessee combined.

There is another point which must not be overlooked. White labor can be used everywhere upon this route from the eastern boundary of Texas to the Pacific coast. We will have a homogenous population, not requiring the importation of labor, and therefore independent of every embarrassment. The reports of all the United States engineers who have surveyed this route indicate that water can always be readily reached by sinking wells, generally seventy or eighty feet. When the mountain ranges are near, artesian wells throw up never-ending streams. The paucity of large rivers makes the construction of the road cheaper and also less dangerous.

Cheapness of construction is the first element of success, and the easy gradients of the 32d parallel are not the only recommendation. The Secretary of War, in his report Feb. 27, 1855, said:

"From the eastern edge of the Llano Estacado to the Pass of San Gorgonio, one thousand and fifty-two miles, the route crosses three rivers—the Pecos, the Rio Grande, and the Great Colorado of the West. The peculiar features of the arid region over which the route lies from the eastern edge of the Llano Estacado prove, when closely examined, to be most favorable to the construction of a railroad, since they obviate in a great degree the necessity of the most costly item of railroad construction—the preparation of the roadbed for the superstructure; this preparation, with few and limited exceptions, throughout the distance of about one thousand miles, having been already made by nature. This item amounts to from one-half to three-fourths of the whole cost of a railroad. Draining and ballasting are also dispensed with at the same time. Over the re-

maining portions of this route the ground is generally favorable to the construction of the road-bed. The mountain passes are, of their kind, highly favorable, those west of the Rio Grande requiring no difficult engineering for location through them, and but little rock excavation or expensive embankment and side cutting." The estimate made for constructing the road over the thirty-second parallel by Government engineers, as quoted by Jefferson Davis in 1859, was $72,000,000; over the thirty fifth parallel, $118,000,000; altitude to be surmounted on thirty-second 5,717 feet; on the thirty-fifth, 7,550 feet. The greater cost of the thirty-fifth is attributable to its construction through over 1,200 miles of mountains.

A road cannot succeed without local traffic. It cannot bring wealth or commerce to the cities which are its termini, unless there is an actual population and the chances of adding thereto. So far as Texas is concerned, it is no news to this convention that emigration is pouring into that State with a rapidity which astonishes the oldest settlers.

Let us see what railroads do for States. The statistics of every country prove that in proportion to the extension of railroads the internal and external commerce of each nation is more than proportionately increased.

We find from the report of the Senate committee (Feb. 19, 1869,) that "the railroads have increased the commerce of the country two thousand fold more than the increase of its population."

The merchandise transported over the American railways in 1868 amounted to 50,000,000 of tons of the estimated value of $7,500,000,000.

We quote from the report:

"In 1851 the freight moved upon all of our railroads equaled 417 pounds per head of population, and was worth $31 per head. In 1868 the tonnage equaled 2,777 pounds per head, and had a value of $210 per head. In 1851 the cost of the 10,000 miles of railway in operation in the United States was two hundred million dollars. In 1861 the cost of 39,000 miles in operation was equal to sixteen hundred million dollars. Consequently, the investment since 1851 of fourteen hundred million dollars has been the means of creating annually a commerce five times greater amounting to six thousand seven hundred and fifty million dollars. *Every dollar invested in American railways creates $5 yearly.*" We quote again, because it is official:

"Many members of this Congress saw the infancy of the grain trade of Chicago, when there was not a railroad in Illinois, and when the wheat sold in her lake port was hauled in wagons by ox teams over the prairies, which were traveled by compasses, and on which the teamsters camped with their cattle at night—a wasteful transportation which consumed from one to two weeks of time to get to market, and in which corn in the ear was burned as fuel to cook and warm by. Illinois, now developed by the magic power of steam, is a splendid and unanswerable argument in behalf of the power of national railway building. The State in 1851 had only 250 miles of railroad, which cost $7,500,000, and the freight over which did not exceed 100,000 tons, which was not worth over $15,000,000. At the end of the year 1867 Illinois had 3,250 miles of railroad, whose traffic was 5,000,000 tons, the value of which was $750,000,000. It cost $130,000,000 to build these roads. The worth of the property transported over them in one year equaled very nearly six times their cost. In 1851 the products transported by these roads was at the rate of 200 pounds per head of the population. In 1867 the tonnage transported exceeded 4,000 pounds per head. The value of the tonnage per head in 1851 was only $15. In 1867 its value per head was $330. The result is astounding. To be fully appreciated it must be borne in mind that the railway traffic of Illinois is unlike that of Pennsylvania and New York, a mixed one of the products of the soil, the forest, the mine, the loom, the forge, and the shop. Her products as yet are almost exclusively wheat, corn, and cattle. Her railroad tonnage has consisted principally of those agricultural products, which bear transportation but short distances over earth roads. It is the locomotive which has enabled that great State to market her wheat, corn, beef and pork 1,200 miles away from home. It is the locomotive and the iron rail above her garden soil which have given her one fifteenth of the population of the United States; which give her the power to bear one-fifteenth of the burdens of the General Government; which enable her to pay annually $24,000,000 of national taxes, besides sustaining in the most liberal manner the cost of her own enlightened and progressive government."

We have selected, sir, this quotation to prove what the near future has in store for us. The soil and climate of Texas equal that of Illinois, and minerals abound. Her vast territory, 275,000 square miles, will make five States equal to Illinois. Her progress is onward and upward in the scale of wealth, population and influence. She is the future New York of the South.

What the Senate Committee said of Illinois applies most forcibly to Texas. Many of us will live to see the day when this railroad will be the thoroughfare of millions upon millions of inhabitants, and its groaning trains will come burdened with the fruits of labor exceeding in vastness and value the conception of any living man to day. Why, sir, in England before the railways were invented the rates of freight were 26 cents per ton per mile in wagons. The railways came and goods were carried at 2⅔ cents per ton per mile at the speed of twenty-five miles per hour.

Parliamentary returns of the English railway traffic from 1843 to 1865 furnish evidence that transportation has been six times greater than it was before the introduction of railways, and that the saving effected by cheapening fares and freights in a single year, 1865, was $360,000,000, a sum larger than our entire national taxation.

This does not include the value of time saved to 252,000,000 passengers, which is almost incalculable.

And correlatively the foreign commerce seems to keep pace with the increase of internal trade and the extension of railways.

In 1833 England had 4,000 miles of railroad. Her exports and imports were $425,000,000. In 1865 she had 17,289 miles of railroad, and her commerce had expanded to the wondrous figure of $2,450,000,000.

France, in 1837, had but 85 miles of railroad in operation. In 1857 she had 4,475 miles, and her imports and exports had increased from $250,000,000 to $850,000,000. In 1865 her railroads had increased to 8,134 miles, and her foreign commerce to $1,500,000,000.

But Belgium is pre-eminent. Her trade, external and internal, has increased more rapidiy than that of any other nation. In 1835 she had no railroads, and her foreign commerce was $50,000,000. In 1864 she had 1,350 miles of railroad, and, though only one tenth the size of Tennessee in territory, her foreign commerce had increased to $500,000,000. Little Belgium has become the workshop of Europe, not only underselling every nation, but excelling in the excellence of her wares; and this is the result of railroads.

The Senate committee deduced the fact that "the imports and exports of a nation are precisely in proportiou to the development of its railway system."

Mr. President, we have dwelt hitherto upon the domestic commerce of our country in its relation to this railroad. Let us look to another point in connection therewith.

The Land Commissioner in his report says; "The trade of the East from the earliest ages has been regarded by western nations as a source of wealth and power. The advance of Alexander the Great more than three centuries before the Christian era, to the Indus, had in contemplation higher objects than mere conquest, as his line of march became a line of civilized settlements—in facts centers of trade. The Eygptian commerce by the Red Sea was secured by that great Captain, and enlarged by the established of his western capital. The Greek settlements which had been made along the Hellespont and Euxine were the bases for opening the northern route by the Caspian and Aral, by which in caravans were brought the products of northern and eastern Asia to European markets. The routes thus marked out became the channels of trade under the Roman dominion, when the fleets of Augustus passed through a canal then existing from the Nile to the Red Sea and thence to India. * *

The increasing desire of European powers for ascendancy in the East has given in this age of steam, to the Suez Canal Isthmean route most important relations to the commerce of Asia."

This Republic, sir, is now a candidate for a full share of the Eastern trade. The aggregate British imports and exports from India and China for the five years ending with 1864 was nearly $1,900,000,000. (£378,587,122.) The Pacific railroad and lines of steamers from San Francisco make us the market for five hundred millions of people. In time and distance San Francisco and New York will be far nearer to many of the chief Asiatic ports than London even with the advantage of the abbreviated Suez route. It must eventually produce a monopoly of the carrying trade in the Pacific by American ships. The point of equalization, comparing New York and London, is somewhere between Manilla and Singapore. Therefore in all points eastward New York would have the advantage. How much greater would be the advantage to San Francisco and San Diego, which are 3,000 miles nearer!

The Pacific Mail Steamship Company now runs steamers from San Francisco to Shanghai and Hong Kong *via* Yokohoma, in Japan. Over the Pacific railroad, Japan is now within 26 days of New York and 35 from Liverpool. From London, *via* Marseilles and Suez, the shortest travel is 58 days, and *via* Gibraltar and Suez 60 days. Therefore, the travel from Japan, Russian, Asia, Philippine Islands, Eastern India, and Indian Archipelago, and Australia must come by way of New York to Europe, because it is quicker and cheaper. From Shanghai to San Francisco is 5,555 miles; to London *via* Suez, 10,469 miles. From Yokohoma, in Japan, it is 4,520 miles to San Francisco, and 11,504 *via* Suez to London. The rapidity of transit will compel the shipment of all light and costly goods by way of America. The teas and silks of China will reach England and France after transit over our railways, and their higher priced exports will reach Asia by the same route. The teas and silks imported into England during the five years ending in 1864 amounted to 541,428,329 pounds, valued at over $206,000,000. Our foreign trade with Japan is in its infancy, but it will grow with gigantic strides. The Colorado, on her first return trip, brought to San Francisco a freight nearly three times the value of the entire trade between that place and Japan for the first quarter of the year 1866. In 1866 our direct trade with China was more than three times that of the previous year. In 1866 the foreign goods brought to San Francisco were 765,000 tons; in 1867, 900,000 tons. For 1868 we have no data. In 1866 the passengers were 33,871; for 1867, upwards of 60,000.

And whilst we have shown the great advantage of the San Francisco and New York route, the superiority is still more signal *via* San Diego. Over this route it is 900 miles shorter from San Diego to Savannah than it is from San Francisco to New York.

Both the passenger and goods traffic between Asia and Europe will be abbreviated by passing over the El Paso route, economising freights and fares and lessening the duration of the trips.

Direct lines of steamers will sail from New Orleans, Mobile, Savannah, Charleston and Norfolk to European ports, and we shall all grow rich upon the custom which seeks Southern cities. And there need not be rivalry or jealousy between the railroads or cities of either section, as there will be ample work for all, and the increasing commerce will pour its auriferous streams into Southern and Northern laps alike.

BLANTON DUNCAN,
For the Southern Pacific Railroad Committee of the Memphis Convention.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, December 4, 1869.

Stock Exchange and Money Market.

Money has been in more general and more urgent request, since our last, and has been quoted up to 7 per cent. on call, to the best class of street borrowers, and 9@8 per cent. per annum in the discount form. The country drain of currency has been moderate. The city banks report a loss of $273,231 of legal tender notes, and $136,795 of deposits. They have reduced their loans, $389,534, and their circulation, $76,084. They, however, show a gain of $1,758,825 in their specie reserve. The U. S. Sub-Treasury reduced its coin balance, about ⅝ of a million, and added over half a million to its reserve of currency. It closed the month of November with an aggregate cash balance of $87,231,751, against $94,689,062 at the close of October. Washington advices report the coin reserve in the ownership of the Treasury Department at the close of the week at $74,033,517; currency balance, $10,142,800; private deposits of coin, $35,655,440.

Washington telegrams state that between the 11th of May and the 25th of November there was paid for United States six per cent. bonds, on account of the Sinking Fund and for the fund held subject to order of Congress, interest and premium paid thereon, $89,282,270 13. The Treasurer now holds on account of the fund named $75,478,800 in United States six per cent. stocks. The dividends on the stocks so held will net an income to the Treasury of $4,528,728 per annum. There has already been received on these bonds, $704,304 in gold, which has been invested in United States bonds, representing $787,000 held as above.

The Public Debt statement for Dec. 1, according to the Washington dispatches, showed a further liquidation of about 7⅛ millions in November, leaving 105 millions of coin (including 36 millions on private account,) and 11 millions of currency in the Treasury.

The specie reserve of the city banks according to the latest return is $29,687,896, against $15,786,277 same time last year. The city bank deposits are now $183,597,895, against $187,418,835 week ending Nov. 28, 1868. The legal tender reserve amounts to $48,181,890, against $62,440,206 same time last year. The circulation now stands at $34,155,838, against $24,284,568 same time last year. The loans are now $252,678,474, against $254,386,057 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $93,530,644 a day, against a daily average of $80,291,759 the preceding week, and $95,143,215 the week ending with Nov. 13, 1869. The current week's exchanges average about $100,712,000 a day. The city banks, last week, reported a gain of $1,758,825 of specie, with a loss of $136,795 of deposits, and $273,231 of legal tender notes. They reduced their loans, $339,534; and their circulation, $76,084.

The city bank exchanges on Wednesday were up to $113,815,081.

National Bank notes to the amount of $112,140 were issued last week by the Treasury Department, making the total issue to 1,685 banks thus far, amount to $319,403,801, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $19,666,188, leaving, with the existing 1,618 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,737,613. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,502,650; and for the public deposits, $19,358,000—making a total of $359,860,650. The Treasury Department last week redeemed and destroyed $424,000 of worn and mutilated fractional currency, and issued $316,204 of new. The outstanding amount of fractional currency on the 1st of Nov., was $37,035,442, against $33,001,299 on the 1st of October, 1869.

The U. S. Sub-Treasury receipts, week ending with Nov. 27, were $5,228,052 in coin, (including $2,088,000 from customs duties,) and $5,996,541 in currency; payments, $5,910,367 in coin, (including $1,894,458 of coin interest,) and $5,406,530 in currency; balance at the close of the week, $86,181,305, (including $79,913,031 of coin, and $5,938,506 of currency,) against $90,419,483 at the close of the preceding week, showing a decrease of $4,238,178. The business of the Office on the first two days of the current week, was as follow

On Monday, receipts, $729,698 in coin, (including $302,726 from customs,) and $390,945 in currency; payments, $162,554 in coin, (including $153,788 of coin interest,) and $573,175 in currency. On Tuesday, receipts, $687,423 in coin, (including $354,074 from customs,) and $312,283 in currency; and payments $114,297 in coin, (including $102,550 of coin interest,) and $416,240 in currency. The balance at the close of business on Tuesday stood at $87,231,751, (including $5,615,835 of currency, and $81,053,296 of coin,) against $88,454,638 a week previous; and $87,128,396 on Nov. 16, 1869. The aggregate receipts of the office in Nov. were $67,322,747, including $9,190,801 from customs; aggregate payments, $74,780,059, including $15,992,989 of coin interest.

The outstanding amount of coin certificates on the 1st of Nov. was $28,731,520, against $24,412,720 on the 1st of Oct., 1869. The Sub-Treasurer at this port, last week, retired $1,784,698 of coin certificates through the receipts for customs.

Government revenues have been rather less prolific, since our last. The excises yielded about 3¼ millions; customs at the port of New York, $1,924,698, and at the outports about $640,000 (in coin) more, making the grand total income for the week equal to abont $6,391,750 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 77 millions. In November, they reached $13,145,570 75, an increase over the corresponding month last year of $3,504,266 12.

Gold has been more freely offered in the open market, and has been quoted down to 121@121⅛, which figures were made early on Tuesday. Subsequently, there was a rally to 123@123⅛, on official announcement that Government would make no award of gold on that day, notwithstanding the fact that it had invited proposals, without making for itself the usual reservation of the right to reject any or all bids, which might be made. There were bids, made to the amount of $1,435,000 at from 120.63@121.20 the latter having been bid for $600,000 by Messrs. Trevor & Colgate, who claim that their bid should be accepted, in view of the omission, in the official advertisement of the customary reservation in the interest of the Government. The Sub-Treasurer, however, acting on instructions from Washington, declined to make any award at less than 122, which price was not bid. Government had announced, as part of its programme for December, that it would sell eleven millions of gold, during the current month, as follows: Dec. 3, $1,000,000; Dec. 7, $1,000,000; Dec. 9, $1,000,000; Dec. 10, $1,000,000; Dec. 16, $1,000,000; Dec. 17, $1,000,000; Dec. 21, $1,000,000; Dec. 23, $1,000,000; Dec. 24, $1,000,000; Dec. 28, $1,000,000; Dec. 31, $1,000,000. Since this announcement was made it has been stated that some of our leading merchants had urged the Secretary of the Treasury to either stop or materially reduce his gold sales during December, upon the ground that the decline which, in the present condition of the market, would naturally follow the large sales advertised, would be likely to check exports of produce, and force prices so low as to bring about embarrassment in credits. On Wednesday, the range of the price was from 121⅝@122¼, and the closing quotation was 122. The speculation has shown more activity through the week, though the custom and export calls have been on a restricted scale.

The coin balances of the Government at this port on Wednesday morning, amounted to a little over 81 millions.

The coin interest disbursements on Wednesday were $170,453.

The customs demand for Gold last week, averaged $320,782 a day; thus far, this week, it has averaged $372,509 a day, or equal to a weekly aggregate of $2,235,054. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $24,963, and since Jan. 1, $14,870,752, against $6,528,237 same time in 1868. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1869, has been $119,798,156, against $107,809,438 same time in 1868. At San Francisco, from Jan. 1, to Nov. 19, 1869, $7,501,000, against $7,530,150 same time last year.

The exports of specie, from this port, last week, were $161,704, against $642,105 same week last year; total, since Jan. 1, 1869, $30,346,340, against $69,123,685 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,894,453, and since Jan. 1, 1869, $87,425,387, against $80,134,609 same time in 1868. The specie exports from San Francisco, from Jan. 1, to Nov. 19, 1869, were $34,708,886, against $32,526,034 same time in 1868.

The U. S. Treasury receipts from customs at all ports from July 1, to Nov. 27, were about 73¼ millions.

Foreign exchange has been quoted stronger in price, and rather brisker. Bankers' prime sixty day bills on London closed heavily on Wednesday at 109@109¼, and on Paris to 5.21¼@5.16¼; sight bills on London to 109⅛@109¾, and on Paris to 5.15c.@5.13¾. The offering of produce bills has been rather liberal this week. The week's exports of domestic produce have been to the currency value of $4,078,197, making the total since Jan. 1, 1869, $181,214,573, against $152,871,364 same time last year.

Government securities have been more abundant and have declined sharply, influenced by the fall in gold, but the demand has been rather more active at the reduced figures. Government has decided to buy in thirteen millions of Five-twenties in the current month of December, as follows: Dec. 1, $2,000,000; Dec. 2, $1,000,000; Dec. 8, $2,000,000; Dec. 15, $2,000,000; Dec. 16, $1,000,000; Dec. 22, $1,000,000; Dec. 29, $2,000,000; Dec. 30, $1,000,000. Of these amounts, the purchases of Dec. 2d, 16th, and 30th, will be on account of the Sinking Fund. The Government purchase of two millions of Five-twenties on Wednesday was made at 110.14@110.40 net, out of an aggregate offering of about 5¼ millions.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 17.	Nov. 24.	Dec. 1.
Consols	93¾	93	93¾
U. S. 5-20's of 1862	83⅜	83⅛	84⅝
U. S. 5-20s, 1865	82	82½	83⅛
" 1867	83½	83⅞	85⅜
" 10-40s	77¾	78¼	80¼
Erie	20	20½	21
Ill. Central	98½	99	99
At. and Gt. West	....	....	....

State bonds have been moderately active, but generally easier in price.

U. S. sixes of 1881 closed here more steadily at 115⅛@115⅝; U. S. Five-twenties of 1862, ex-coupon, 112½@112¾; U. S. Five-twenties of 1864 at 110¼@110¾; U. S. Five-twenties of 1865 at 110⅛@110¾; U. S. Five-twenties of 1865, consolidated, 113@113¼; U. S. Five-twenties of 1867, 113¼@113⅜; U. S. Five-twenties of 1868, 112¾@113¼; U. S. Ten-forties at 106⅜@106⅝; U. S. Six per cent. currency bonds, 107@107½.

A good inquiry has been noted for all substantial Railway Mortgage, at generally well supported prices. The Western Pacific Loan, offered by Messrs. Fisk & Hatch, meets with a free sale at the ruling price of 90 per cent. and accrued interest, the latter calculated at the rate of six per cent. in currency. The probability is that the loan will be closed at an early day.

Railway and miscellaneous share property has been fairly active, but has fluctuated widely. At the close more steadiness was apparent, notwithstanding the increasing activity in money.

There has been less animation in general business, and considerable irregularity in prices. Middling upland cotton closed rather buoyantly on Wednesday at 25¼@25½ cts. per lb. The stock of cotton now here is given at about 26,500 bales. The receipts at the port this week, have averaged about 5,000 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 778,000 bales, against 615,000 bales in 1868-'9; exports, same time 374,750 bales, against 272,750 bales same time in 1868-'9; stock on hand at latest dates, 261,500 bales, against 213,800 bales same date 1868. The exports of domestic cotton goods from this port, since Jan. 1, have been 20,040 pkgs., against 22,042 pkgs., same time last year. From Boston, 6,878 pkgs., against 7,753 pkgs. same time in 1868.

At the Live Stock markets, this week, Beeves have been in more demand, at from 8@16½c., per lb.; week's receipts, 5,823. Milch cows inactive, at $40@$110 each, receipts, 100. Veal calves in slack request at from 4@12½c. per lb.; receipts, 1,081. Sheep and lambs in moderate demand at from 4@7c., and 5@7½c. per lb.; receipts, 35,662. Swine in less request at 9¾@10¾c. per lb., all live weight; receipts, 17,104.

Foreign goods have been in less request and depressed in price.

Ocean Freights have been less active, lower, and irregular. For Liverpool we quote flour at 1s. 9d.@2s. by sail, and 2s.@2s. 3d. by steamer, per bbl.; grain at 4½d.@5d. by sail, and 5d.@6d. by steamer, per bushel; cotton at ⅛d.@$\frac{3}{16}$d. by sail, and ¼d.@$\frac{5}{16}$d. by steamer per lb.; and heavy goods 20s.@35s. by sail, and 20s.@50s. by steamer, per ton. Total number of vessels in port on Wednesday, 465.

The balance in the Sub-Treasury on Wednesday was $87,219,799 25.

The New York exports, exclusive of specie, for the week ending Nov. 30, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$4,269,207	$4,078,197
Prev. reported	148,602,157	177,136,376
Since January 1	$152,871,364	$181,214,573

The imports for the week ending November 27, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$1,244,543	$1,168,847
Gen. merchandise	4,075,950	3,013,850
Total for the week	$5,320,493	$4,182,697
Previously reported	222,782,624	264,263,064
Since January 1	$228,103,117	$268,445,761

St. Joseph and Denver City Railroad.

This company offer for sale $1,500,000 of their First Mortgage Bonds having 30 years to run, and bearing Eight per cent. interest, payable in gold coin, free of government taxes, in New York, London, or Frankfort on the Main. These bonds are secured by a mortgage upon 111.08 miles of road, extending from Elwood, Mo., to Marysville, Kansas, 40 miles of which are now in successful operation, and the remaining portion is being rapidly completed. This road is a continuation, or extension, of the Hannibal and St. Joseph, and St. Louis and St. Joseph Railroads, to Fort Kearney, on the Union Pacific main line. The whole road when completed will be 271 miles in length, commencing at Elwood, Kansas, on the west bank of the Missouri River, opposite St. Joseph, Missouri, and terminating at Fort Kearney, Nebraska, thus intersecting the Union Pacific. The central point on the line of the road between St. Joseph and Fort Kearney is Marysville, 111.08 miles from Elwood, to which place the line is now being pushed with great rapidity. The agents in this city for the sale of these bonds are Messrs. W. P. Converse & Co., 54 Pine St., and Messrs. Tanner & Co., 49 Wall St.

☞ Messrs. Lockwood & Co., 94 Broadway, New York, continue the Banking and Commission business in Government, Railway, and other Securities.

☞ A CHOICE SECURITY. SEVEN PER CENT. GOLD, FREE OF GOVERNMENT TAX. NEARLY 10 PER CENT. CURRENCY, FIRST MORTGAGE BONDS OF NEW YORK AND OSWEGO MIDLAND RAILROAD. THESE BONDS CAN BE REGISTERED.

SIX MILLIONS OF DOLLARS PAID-UP STOCK SUBSCRIPTIONS. No bonds issued on road under construction; issue limited to $20,000 per mile of road built and in running order, BEING ONLY ABOUT HALF THE ACTUAL CASH COST. The road is being built with great economy for cash; 100 miles are done, and in the most thorough manner; 50 miles additional will be finished in November; and the whole line (over 400 miles) it is expected will be completed within the ensuing year. It is one of the most important roads in the State of New York. It shortens the route from New York City to Buffalo 70 miles, and to Oswego 45 miles; it traverses a populous district destitute of other railroad facilities, which must furnish it a large and profitable local business; and it will be completed at an aggregate cost far below that of any competing line. These advantages cannot fail to make it one of the best paying roads leading from the metropolis, and its First Mortgage Bonds one of the safest securities ever issued. All mortgage bonds issued on Railroads running from the City of New York are good, and the interest promptly paid, although some of them are mortgaged for more than double the amount per mile that the Midland is. Among the bonds now offering we know of none equal to these. For the investment of trust or other funds there is nothing better; and in exchange for Government Bonds they give a large increase of income, beside capitalizing the premium. They are meeting with rapid sale, and we have been gratified to find that they are taken chiefly by our most conservative and sagacious capitalists in exchange for Government securities. Price par, and accrued interest in currency. Circulars, pamphlets, &c., on hand for distribution.

GEORGE OPDYKE & CO.,
Bankers, No. 25 Nassau st.

Norfolk and Great Western Railroad.

The surveys of the eastern division of this road, between Norfolk and Bristol, have been completed, the engineer corps, under charge of Capt. Fitzhugh, having arrived at Bristol, its Western terminus, after surveying every foot of the line from Norfolk. Their report of the route is of the most favorable character. The Iron mountain was crossed at Fox Gap, about eight miles north of White Top mountain, and the survey passes down Widener's Valley and crosses the Middle Fork of Holston about one mile above its confluence with the South Fork.

☞ The Newark and Elizabeth Railroad is progressing rapidly towards completion, the track being now laid a considerable distance inside the city line. Mr. E. G. Brown has charge of the road.

Commerce of New York.

The foreign imports at New York for the month of October, 1868 and 1869, are officially stated as follows:

	1868.	1869.
Entered for consumpt'n.	$11,294,439	$10,288,541
Do. for warehousing	6,850,498	5,841,349
Free goods	1,294,991	879,329
Specie and bullion	554,862	3,580,817
Total entered at port...	$19,994,790	$20,590,036
Withdrawn fr. wareh'use	8,892,665	10,704,752

The foreign imports at New York for the ten months from January 1, were:

	1868.	1869.
Entered for consumpt'n.	$110,570,527	$132,338,648
Do. for warehousing...	92,231,894	108,505,972
Free goods	9,598,423	12,489,960
Specie and bullion	6,473,583	15,319,395
Total entered at port..	$218,869,427	$268,653,975
Withdrawn fr. wareh'se	88,256,992	94,670,950

The revenue from customs at New York:

	1868.	1869.
1st quarter.	$28,026,042 14	$34,640,194 91
2d quarter.....	27,424,706 51	28,827,215 03
3d quarter.....	34,150,298 97	35,865,913 58
In October.....	10,059,277 34	10,554,660 92
Total from Jan. 1.	$99,660,324 96	109,887,984 44

The exports from New York to foreign ports in the month of October, were:

	1868.	1869.
Domestic produce..... ..	$18,964,602	$18,419,645
Foreign free goods.....	10,822	71,862

Do. exclusive of specie	134,670,021	159,274,837

Journal of Railroad Law.

COMMON CARRIERS—EXTENT TO WHICH THEY MAY CONTRACT AGAINST THEIR OWN NEGLIGENCE—WHAT QUESTIONS SHOULD BE LEFT TO THE JURY.

The facts of the recent case of Illinois Central R. R. Co. *vs.* Adams (42 Ill., 474,) are fully and clearly stated in the following opinion by

BREESE, J.—This was an action on the case, brought in the De Witt Circuit Court by Parker S. Adams against the Illinois Central Railroad Company, for negligence in transporting certain car loads of live hogs from Clinton to Chicago, by reason whereof a number of the hogs died.

The cause was tried by a jury, and a verdict for the plaintiff for $505 12. A motion for a new trial was made and overruled, and exception taken. Exceptions were also taken to the judgment of the Court refusing certain instructions asked by the defendant, in modifying others and in giving instructions in behalf of the plaintiff. The case is brought here by appeal. The declaration, as filed, contained four counts, to the first three a demurrer was sustained, and the trial was had upon the fourth count, in which the averment was, that the defendants were guilty of gross carelessness in not watering the hogs, by means whereof they were injured to the amount of $1,000. Various errors are assigned, but the controversy depends principally on the instructions and the nature of the contract entered into by the parties.

It is insisted by the appellants, that by the contract of shipping, the company was not liable for any loss except such as might result from a collision of the train, or when the cars were thrown from the track in course of transportation, and that the hogs were to be fed and watered by the owner, and to be at his risk in all respects except as specified to in the form of the contract or receipt in the hands of the agent.

The phrase, "feeding and watering," as used in the contract, has reference alone, as we understand the contract, to the ordinary sustenance such animals require in the course of transportation, while the negligence complained of, and for which the railroad company is sought to be charged, is the application of water externally to hogs confined in cars, causing them to become much heated, and from which speedy death ensues if they are not promptly relieved by this application.

The whole case turns upon the fact of the liability of the company to apply this water, and failing to do so on request, does it amount to such gross negligence against which it is not in the power of the company to stipulate?

The proof is clear that it is the custom of the railroad agents to make this application of water, and it is most reasonable and just that it should be their duty, for their employers own the trains, the tanks and the water within them, and have entire and exclusive control of all the movements and stoppages of the trains, with which no shipper can, in the slightest degree interfere. Were it not so, who can estimate the derangement to which trains would be subjected, did every shipper control its movements—did he have the power to stop it for any purpose, or appropriate water at an inconvenient or improper station where there might be but a scanty supply not in excess of the necessities of the boilers? Good policy and a due regard to the operations of the trains, require that this duty of watering live hogs in the manner described in the evidence should devolve upon those who manage the trains, and not upon the shippers of such stock. The contract referred to in the declaration had no reference to this matter, but to their ordinary feeding and watering, which duty properly belonged to the owner.

If, then, it was gross negligence in the conductor of the train carrying these hogs, in refusing to apply water to them when requested at Bloomington or at Normal, at which latter place water was convenient and abundant, the company could not contract against that. This Court said, in the case of Ill. Central R. R. Co. *vs.* Crabtree & Morrison, 19 Ill., 139, that although a railroad company might protect itself by contract against certain risks assumed by common carriers and belonging to their vocation, it was contrary to good morals and public policy that they should be allowed to stipulate against their own gross negligence, or that of their employees, or their wilful default.

The jury have found there was gross negligence in this case. It is true, the testimony was contradictory on this point, but the jury have given the most credit to Shaw, the witness for plaintiff, who testified to his own interference with Perigo, the conductor when the train was at rest at Bloomington, and also when it was on the switch at Normal, and at both places distinctly informed the conductor of the suffering condition of the hogs for the want of water, and of the personal appeal of the owner to the same conductor to apply the water. Perigo, the conductor, denied all this, and it was exclusively for the jury to weigh the testimony of both, and give the credit where they thought it most properly belonged, and with their decision in this regard this Court is not permitted to interfere. The testimony of Shaw fully establishes gross negligence of a wilful character, and inexcusable in any light in which it can be regarded. If excusable at Bloomington, on account of a scarcity of water, or a total want of a supply there, it was not so at Normal, where the train rested long enough to have performed the operation more than once if needed. But the appellant's counsel insists, that it was the gross neglect of appellee in not watering the hogs at Clinton, after driving them more than four miles, and suffering them to remain in the stock yard there without water, from ten o'clock in the forenoon until four or five o'clock in the afternoon, when they were placed on the cars. Most of the witnesses say it would have been a good thing to have watered the hogs at Clinton, but no one attributes the deaths and injuries to this omission, nor does there seem to have been any necessity for watering them there before placing them on the cars. It was not water internally the animals needed, and, as it was a wet time at which they were driven to Clinton, and several branches of water crossed on the route thither, it is reasonable to suppose they had their fill of that element, and it was only when confined in the cars that they suffered for the want of it, and the conductor was deaf to every appeal made to him to supply water until the train had reached El Paso, a distance of more than forty miles from Clinton, and then denied water, until the station agent at that place directed the conductor to do his duty by supplying water. At this point the hogs were transferred to the cars going to Chicago, and Perigo's train proceeded on the main track. The counsel for appellant's insists, it was not the duty of this train to engage in switching, or anything else, but to coal and water, and hitch on such cars as were to go north by his train.

This being so, then, most imperative and overwhelming was the duty of this conductor to apply the water at Normal, when he was requested by the owner to do it, and the animals then in a suffering and dying condition. He knew he could not take the time at El Paso. He knew he had other duties there which would engage his train, and when he arrived there, it was only by the interference of the station agent he made any movement in the direction desired. If the jury believed the statement of Shaw, a case of recklessness, of gross negligence, by conductor Perigo, was fully established.

The views here presented fully dispose of all the objections taken to the instructions.

Those which were refused, as asked by appellant, were substantially embraced in those given.

Perceiving no error in the record, the judgment must be affirmed.

Judgment affirmed.

Louisville and Nashville Railroad.

We gave, last week, an abstract of the reports of the officers of this company for the fiscal year ending June 30, 1869. The following extract from the report of ALBERT FINK, Esq., General Superintendent, has reference to the connections and extension of the road:

In my annual report for the year 1866, I referred to various connections and extensions that would, as soon as completed, add greatly to the prosperity of the road and the city, and which at no distant day might become absolutely necessary in order to establish the Louisville and Nashville Railroad upon a firm and enduring basis. It is satisfactory to be able to record, after the lapse of only three years, that the works then mentioned have not only all been commenced, but that some have already been completed.

The Louisville and Cincinnati Railroad, begun in 1867, was opened for business in June last. However, we can not expect to reap the full benefit from this important improvement until the connection with the Louisville and Nashville Railroad at Louisville has been established, as originally contemplated when the Louisville and Nashville Railroad Company agreed to aid in the construction of the Cincinnati road.

The bridge over the Ohio River commenced in the summer of 1867, will be finished by about the first of December. Perhaps no other improvement will exercise so great and beneficial an influence upon the prosperity of the Louisville and Nashville Railroad as this one. At present the amount of through freight business which this company and its southern connecting lines could transact is measured by the capacity of the Transfer Company to haul by wagons from Jeffersonville to our depot. On account of the delays caused by this transfer, and the limited quantity of freight that can be handled, our through business has been greatly checked. With the completion of the Ohio River bridge all these difficulties will be overcome, and we will be enabled to establish the quickest and most satisfactory through line between the Southwest and the Northeast for both passengers and freight.

The extension of the Mississippi Central Railroad to Humboldt has been virtually accomplished by means of a contract made by that road with the Mobile and Ohio Railroad, according to the terms of which the trains of the Mississippi Central Railroad are permitted to run as far as Humboldt, where they now make direct connection with our trains. The great obstacle in the way of transacting a satisfactory through passenger and freight business with the Mississippi Central Railroad is thus removed, and the beneficial effects of this arrangement are already apparent.

The Montgomery and Decatur Railroad (North and South Alabama Road) is now under contract, and from the character of the gentlemen who have undertaken the construction of the road, its completion in the shortest practicable time may be confidently expected. This road will give us a valuable connection, *via* Nashville and Decatur, with a section of country the centers of which are Selma, Montgomery, and Pensacola, now accessible only by circuitous routes.

The extension of the Lebanon Branch in the direction of Knoxville has not progressed during the year as rapidly as is desirable, owing in a great measure to the fact that the prospects of forming a connection with the Knoxville and Kentucky Railroad at State Line have not been of a nature to justify a more energetic prosecution of the work on our part. The road is now operated as far as Mount Vernon, 129 miles distant from Louisville; and by January 1, 1870, the track will have reached Rockcastle River, 140 miles from Louisville, beyond which point all work has been suspended for the present. With a view of urging the early completion of this road, which has become a matter of vital importance to this company, the following considerations are submitted.

The large capital already invested in the Lebanon Branch cannot be expected to yield proper returns as long as that Branch is operated as a local road, which must necessarily continue to be the case until a connection is made with the roads in East Tennessee, whereby through business would be secured. The estimated cost of completing the road to State Line is $1,800,000; and in case the Knoxville and Kentucky Railroad Company should be unable to finish their portion of the line, the entire additional capital required to finish the road to Knoxville would be about $3,000,000. There can be no doubt that the increased revenue derived from the through business over the 140 miles of finished road, which we could command when the road is completed to Knoxville, would pay the interest on the additional capital required, while before long the whole investment must become profitable. The completion of the road would place us in condition to demand of our connecting lines south of Nashville, which now discriminate against the Louisville and Nashville Railroad, such terms as would enable us to compete with other lines for the great business carried on between the Southeast and Northwest. On the other hand, if we fail to complete the road, it may be with certainty assumed that a large portion of this business which now passes over the Main Stem, yielding a revenue of about $300,000 per annum, will be entirely lost to us in the course of a few years.

The business between the Northwest and Southeast is constantly on the increase, and as we now occupy the vantage-ground in the way of forming the shortest connection between these two great sections—a connection which has almost become a public necessity—we have it in our power to secure and control the largest share of it before any rival interests could seriously interfere. In fact, the speedy establishment of this thoroughfare would make the construction of a rival road exceedingly improbable.

The city of Cincinnati is willing to expend $10,000,000 for the purpose of securing a connection with the railroad system of East Tennessee, which Louisville can obtain at one fourth the cost, and in almost less time than it would take Cincinnati to properly locate a route.

With the completion of the Knoxville Branch to Knoxville, the main railroad system centering in Louisville may be considered as completed, and it will only be necessary to construct branches to feed the main lines. The location of the Louisville and Nashville Railroad with its Branches is one of great strength and is peculiar to itself. By means of it the best connecting links between the different sections of country are formed in all directions. Thus the Main Stem occupies almost the direct line between Pensacola and Chicago, furnishing for all the country directly south of Louisville an excellent route to the North, Northwest, and the Northeast. The Memphis Branch forms part of the quickest through line between Memphis, Mobile, New Orleans, and the North Atlantic States, connecting us also with the railroad systems of Arkansas and Texas. The Knoxville Branch will give the shortest line of communication between all the South Atlantic States and the Northwest, connecting Norfolk, Wilmington, Charleston, and Savannah with Chicago and St. Louis, and through their roads with the Pacific.

With all these great advantages of location, the Louisville and Nashville Railroad will always be in a position to command a fair share of business, no matter what rival lines may spring up in the the future; and as the population and commerce of the country are rapidly increasing, it is safe to conclude that after the completion of the works above mentioned, with proper management, the prosperity of the company can be secured for all time to come.

THE WHARTON
Safety Railroad Switch.

BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,
ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

FIRST & PRYIBIL'S
PATENT IMPROVED
BAND SAW MACHINE,
452, 454 & 456 Tenth Avenue,
NEW YORK CITY.

PRICE - - - - $350.
BOXING AND SHIPPING, $10.

This Machine, with the exception of the table, is made entirely of Iron. Its weight is 1800 lbs.; drums 3 feet 3 inches in diameter; height, 8 feet 5 inches; depth 4 feet 3 inches; width 6 feet; driving pulleys usually 14 inches in diameter, or to suit our customers.

Our machine can be run with a speed of 330 to 350 revolutions per minute, causing the saw to travel 3300 to 3500 feet per minute, and with a belt from 4 to 5 inches in width a block of Rosewood from 10 to 15 inches thick, or wood of any kind, hard or soft, can be cut with ease and facility, the saw being from one-quarter inch to one inch in width. A saw one-eighth of an inch in width, including teeth, can be used for cutting wood of considerable thickness.

The saws are not liable to break owing to our improved slide bearing, which adjusts itself according to the expansion and contraction of the saw. No saw will break except by accident or gross carelessness. The same is used principally by railroad car, chair, and other furniture manufacturers, ship, boat, and wagon builders, and also to saw slate, ivory, bone, &c. Guarantee will be given for all we state above. From three to five times as much work can be done with one of our sawing machines, as with an ordinary up and down saw. The work is cut smooth, the saw being retained by an improved guard.

At the present time, Sept. 1869, 64 of our machines are running in this city, and about twice as many in the country.

We also manufacture a lately patented counterbalance oval turning lathe which can be run with more than twice the speed of the old style of lathes, and much more and better work will be done. Many other wood working machines, and also shafting, pulleys, hangers, &c., &c., constantly on hand. Send for Circulars.

Jonathan T. Hobby,
MATHEMATICAL Instrument Maker, Greenwich Street, Hempstead, Long Island N. Y.

NEW YORK CITY STEEL WORKS,

Manufacture every description of Steel—PERFECTLY UNIFORM IN QUALITY—and of very great tensile and compressible strength.

Plates of Cast Steel may be bent COLD to any angle, yet remain capable of being TEMPERED.

Guaranteed EQUAL TO ANY OTHER STEEL manufactured in Europe or the United States.

TOOL STEEL of very superior quality.

LOCOMOTIVE AND CAR SPRING STEEL A SPECIALTY.

VAN ZANDT BRO.'S, General Agents, 38 John-St., New York.

STAR RUBBER CO.,

Late Mead Rubber Co.,

12 VESEY-STREET, New York,

MANUFACTURERS OF

INDIA RUBBER CAR SPRINGS,

STEAM PACKING, &C.

The Springs manufactured by this Company, and stamped with their trade mark, are fully warranted; and any proving defective will be replaced at their own cost. Orders solicited, and samples forwarded on application.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivjted through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

New York Saturday, December 11, 1869.

Portland, Rutland, Oswego and Chicago Railroad.

From inquiries made on the part of those interested in the prosperity of Portland, we are inclined to believe that many of our readers are but imperfectly informed as to the magnitude, nature and present condition of the project of an independent line of railway from Portland to Chicago. With the aid of a good railroad map one can easily follow out the details hereafter given, needful to a thorough comprehension of the entire scheme. Commencing at Chicago, the Michigan Air Line Railway as it is called, a company organized in the three States of Illinois, Indiana and Michigan, runs an air line after rounding the Lake, to Jackson, Michigan, on the line of the Michigan Central R. R., a city of 14,000 people, half way between the head of Lake Michigan and the town of St. Clair lying upon St. Clair River, between Sarnia and Lake St. Clair, touching Ridgway ten miles west of St. Clair; from which place to Lake Michigan, the distance exceeds but 2½ miles from that of an air line.

The line in question touches the Michigan Central at Niles, and crosses it again on an air line at Jackson, the Central making a circular sweep or bow between Jackson and Niles running as far north as Kalamazoo and Augusta. The Central line having been built many years ago by local subscriptions, running to the different villages to reach such subscriptions, is now some 40 miles longer than an air line between Ypsilanti and Niles. This company proposes, at no distant day to build a straight road from Niles to Ypsilanti.

From the St. Clair River to the Niagara River, a charter is held from the Parliament of Canada, by Wm. A. Thompson, Esq., of Queenstown, and his associates, owners of the Erie and Niagara Railway, a line of railway on the west bank of the Niagara River between Lake Erie and Lake Ontario. This company was authorized by Act of Feb. 28, 1868, to construct a line of railway, from the Village of Fort Erie at the mouth of the Niagara River through the town of St. Thomas, and to the St. Clair River. The company is allowed two years in which to organize.

The plan of running an air line, or the direct route from Ridgway to the Niagara River, leaves Detroit some 20 miles to the south, which city shows it but little favor.

From letters recently received, there seems no reason to doubt that this Canadian Company will be able to secure the needed subscriptions, and be prepared to enter into the agreement of consolidation, provided for in resolution of Mr. Thompson, adopted at the Oswego Convention. The distance between St. Clair River at the town of St. Clair and the Niagara River at the town of Erie is 160 miles as against 230 miles on the line of the Great Western between Detroit and the suspension bridge. It is 516 miles from Chicago to the bridge by the Michigan Central and Great Western lines against 450 miles by the Michigan Air Line and the Erie and Niagara Extension Railway Company. From the Niagara to Oswego the distance is 145 miles by the line of the Lake Ontario Shore Railroad, of which company the Hon. Gerrit Smith, the wealthiest citizen of northern New York, is President, being largely interested in property at Oswego from which he receives an annual net rent of over $50,000. The work upon this line will be vigorously prosecuted the coming year; the line following the level shore of Lake Ontario over a most favorable route through thriving villages and over a most productive soil. Hon. Gerrit Smith alluding to the through line, speaks of "the straight and level route from Chicago to Oswego." From Oswego east, the line runs to Richland over an existing railroad thirty miles in length, to a point eleven miles north of Oswego upon the same parallel as Portland 48 deg. 39m.

From Richland east, the line of the New England and Oswego Railroad as agreed upon at the Oswego Convention, proposes to run to the line of the Rensselaer and Saratoga Railroad over a route to be hereafter decided on after careful surveys. One line, passing from Richland through Boonville, has been examined and found practicable, with no grades exceeding 30 feet to the mile. The friends of this line from Richland east, propose to complete the line through, in connection with the other lines west, within three years. And they ask New England to meet them on the line of the Rensselaer and Saratoga road with a connected line from Portland within the same period. Over that section of the Rensselaer and Saratoga Railroad which may be called in requisition, an additional track will be laid by the latter company as soon as required, for the uses of business.

Between Rutland, the eastern terminus of the Rensselaer and Saratoga Railroad and Portland, the distance is 136 miles on an air line. The located line of the railroad will considerably increase the distance, probably 30 miles, the principal deflection being from Rutland to Woodstock to cross the ridge of the Green Mountains. Between Rutland and Woodstock the distance is but 20 miles, but, to secure favorable grades, it will probably be thought advisable to swing the line as far north as Chittenden to reach the head of the Queechy River running to Woodstock. Favorable grades are easily secured by the lengthening of the line, in the manner proposed. From Woodstock to White River Junction to a point of connection with the Northern Railroad of New Hampshire, a distance of 14 miles, the line is well nigh constructed.

From White River Junction the line runs 31

miles east, along the route of the Northern Railroad of New Hampshire. The Legislature of that State, having provided that, in case the companies cannot agree upon terms, an impartial tribunal shall fix them, so that an independent line can, if necessary, be constructed to Danbury; at which point the New Hampshire Central Railroad is to run east through Bristol and onward north of Winnepisaukee Lake to the boundary of Maine, where it can connect with the line already chartered through the Ossipee Valley to Portland. Running down the Ossipee to Cornish Village, the line can be easily and cheaply run through Limington and Standish to the line of the Portland and Rochester road at Buxton Centre 15 miles from Portland.

Of this distance of 956 miles from Portland to Chicago, 361 are required to reach Oswego. The difficult portions of the line are found in crossing the lower spurs of the Adirondack Mountains; and overcoming the Green Mountain summit. The 595 miles from Oswego to Chicago encounter no engineering difficulties whatever, except expensive bridges across the St. Clair, Niagara, and Oswego Rivers. Of the line to Oswego, 125 miles are already built; 15 in Maine, 31 in New Hampshire, 38 in Vermont, 41 in New York; leaving 236 miles to be built to reach Oswego. The line of railway from Buxton to Danbury can be built at prices varying from $15,000 to $25,000 per mile; not exceeding $20,000 per mile for a completed road without equipment. No heavy grades occur on any portion of the route. The summit between the Ossipee waters, and those of Lake Winnepisaukee are only 89 feet above the level of the lake, which is 501 feet above tide water. At Bristol, the line is 610 feet above tide water, and rises, by a moderate ascent to the line of the Northern R. R. at Danbury 810 feet above tide water. A new track from Danbury to White River Junction can be laid down on the Northern R. R. for $12,000 per mile. From White River Junction to Woodstock the line will cost, not exceeding $25,000 per mile. From Woodstock to Rutland, the cost of building the line will be somewhat greater, over the crest of the mountains, but not expensive for a large portion of the distance, according to the reports of the Engineers. From Rutland to Fort Anne, over the Rensselaer and Saratoga R. R. is 34 miles, along which a double track can be very cheaply built. From Fort Anne to Richland it is fair to expect that an expensive route will be encountered, compared with the other portions of the route except about 10 miles over the Green Mountain summit. As to the means for building this line there can be no doubt that its friends in Maine, New Hampshire and Vermont can easily build the remaining links between Portland and Rutland within the next three years, which insures the completion of the line through to Chicago. If built as a consolidated line, as agreed upon at the Oswego convention, the entire cost of the 956 miles between Chicago and Portland can be built at one-half the cost of any existing line of railway between Buffalo and New York. We have estimates in detail of the various sections of this line, compiled from various reports and estimates which establish the fact that the line of the Transcontinental Railway can be built as a first class road, with a single track including permanent way, with iron bridges, ready for equipment with suitable depots, engine houses, &c., inside of $30,000,000, or, for a little over $30,000 per mile. The great feature in the line of the proposed railway from Portland to Chicago is that it combines all the advantages of a through railway line and of a line running in connection with water navigation upon the Lake basin. It touches Whitehall, at the head of Lake Champlain; Oswego, at the lower end of Lake Ontario; Buffalo, at the foot of Lake Erie; the navigable waters of Lake Huron at St. Clair; and the head of Lake Michigan at Chicago, having advantages over any line that can ever be proposed upon this continent; bringing lake trade to the open sea by the cheapest route, and reaching Chicago by a cheaper line than any other possible railway from Chicago to the ocean.—*Portland Argus*, Nov. 9, 1869.

Evansville and Crawfordsville Railroad.

The earnings of this road for the years ending August 31, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$193,981 28	$185,283 68
" freight	230,481 70	245,775 82
" express	19 011 36	12,488 48
" mail service	9,400 00	9,400 00
" rents	312 00	295 00
" use of engines and cars	.....	3,735 62
	$453,186 34	$456,978 10
Expenses, viz:		
Running road	$74,057 34	$75,474 28
Maintenance of way	86,488 77	74,638 84
Maintenance of bridges	34,591 47	11,740 78
Repairs of engines & cars	70 058 17	59,061 80
General expenses	70,095 50	64,535 59
	$385,266 25	$285,451 29
Net earnings	$117,920 09	$171,526 81
Interest and taxes	108,946 28	106,633 72
Balance	$8,973 81	$64,893 09

The receipts from all sources during the year were $467,771 33; and the expenditures, $425,494 37—showing an excess of receipts of $42,277 06.

The expenditures embrace—

Transportation expenses, as above	$235,451 29
Interest paid	93 035 03
Internal revenue tax	5,188 12
State, county and city taxes	8,410 57
Redemption of 27 bonds for sinking fund	22,766 00
Construction and equipment	10,643 36
Total	$425,494 37

The assets and liabilities of the company at the close of the past and preceding year, were as follows:

Assets:	1868.	1869.
Cash on hand	$11,264 99	$40,946 22
Due from agents	14,405 42	16,750 42
Open account	3,079 50	9,767 42
	$28,739 91	$67,464 06
Liabilities:		
Due other lines	$20,996 46	$10,793 55
Other liabilities	31,368 84	38,018 84
	$52,365 30	$48,812 39
Excess of assets	.....	$18,651 67
Excess of liabilities	$23,625 39	.....

The capital account of the company has been increased during the year $10,643 36. There has been expended in construction and equipment during the same time the sum of $10,643 36, making the total cost at the date of the last financial year as follows:

Construction of road	$2,410,284 33
Equipment	361,413 81
Total	$2,771,698 14
Which is represented by—	
Common stock	$1,044,030 47
Preferred stock	100,000 00
First mortgage bonds	1,213,000 09
Earnings expended	414,667 67
Total, as above	$2,771,698 14

There has been no extension of the main track. One thousand feet have been added to the sidings. The roadway, structures and rolling stock are all in good order. Twenty-three thousand new cross-ties have been put in the track. Three and a-half miles of re-rolled rails of the fish bar pattern have been laid, and 495 old rails repaired. Portions of the track most needing it have been ballasted, and considerable progress made in fencing. One box, 2 freight caboose, 1 platform, 3 hand and 6 push cars have been added to the equipment. The gross earnings show an increase of $3,791 76, and the expenses a reduction of $49,814 96. The train service for the year is 281,743 miles, being 20,046 miles in excess of the previous year. The report says:

The work of extending our bonds has progressed fairly during the year, and comparatively few remain yet to be extended.

In accordance with the proposition made to our bondholders for a twenty years' extension of their bonds, we have begun the redemption of the two several issues, by redeeming upon advertisement from the lowest bidders, in January and May last, twenty-seven bonds of $1,000 each, for the sum of $22,766. This redemption will be continued on the 1st days of January and May of each year, till all bonds of these issues are paid.

The Evansville, Henderson and Nashville Railroad, to whose completion we anxiously look forward for Southern connections, has, for financial reasons, progressed slowly for the past year, and its completion will probably be delayed another year.

A direct Northern connection of this road, under the name of the Evansville, Terre Haute and Chicago Railway Company, has been organized to construct a road from Terre Haute to the State Line, in the direction of Danville, there to unite with the Chicago, Danville and Vincennes Railroad, and has so far progressed with its surveys and stock subscriptions as to justify the hope of its completion within about a year from this date. It northern connection, the C. D. & V. Railroad, is being rapidly completed. About thirty-three miles of the track is laid, and its builders contemplate its completion to the Indiana State Line during the coming year at farthest.

General Balance Sheet, Aug. 31, 1869.

Construction of road		$2,410,284 33

Pacific Railroad.

EXTRACT FROM THE REPORT OF THE SECRETARY OF THE INTERIOR.

The Union Pacific Railroad Company, during the last fiscal year, completed 165 88 100 miles of railroad and telegraph, terminating at Promontory Summit. The distance therefrom to Omaha is 1,085 88-100 miles. The joint resolution of 10th April, 1869, provides: "That the common terminus of the Union Pacific and the Central Pacific Railroads shall be at or near Ogden; and the Union Pacific Railroad Company shall build, and the Central Pacific Railroad Company pay for and own, the railroad from the terminus aforesaid to Promontory Summit, at which point the rails shall meet and connect and form one continuous line." The connection was formed on the 10th of May last. This department has not, however, been advised of any agreement by the companies respecting the location of their "common terminus." The company report that, since the connection, trains have been run with a regularity not surpassed on the oldest roads in the country, and that an adequate force has been constantly engaged in making such improvements as would render their road in all respects equal to the standard prescribed. They furnish the following statement: Amount of stock subscribed, $24,777,300; actually paid in, $24,762,300; received from passengers from 1st July, 1868, to 30th June, 1869, $2,453,672 45; from freight, $4,423,463 39, and from telegraph, &c., $465,135 32. The average number of miles of road operated during the year was 854 65-73; the gross earnings were $8,342,271 16; and the operating expenses, $5,894,268 63; leaving as net earnings, $1,448,002 53. The entire cost of the road to 30th June, 1869, not including unadjusted balances with engineers and contractors, was $92,748,762 14, and the indebtedness of the company at that date, $67,986,462 14.

On the 14th August last, the Commissioners appointed under the joint resolution approved 10th April, 1869, were instructed to examine the roads built by this and the Central Pacific Railroad Company, of California, and to report touching their location, construction, and equipment, and the sums, if any, that would be required to complete each of them for its entire length as a first class railroad, in compliance with the requirements of Congress. The Commissioners have submitted their report. They are of opinion that there are no material errors in the general location of this road, but that the deviations from the accepted line at Promontory and Uintah Mountains should be corrected, and the bridge line at Omaha built so as to avoid the present heavy grade. The road bed, the larger part of the way, is of proper width, though there are some places where the embankments should be widened. The bridges, culverts and trestles are generally good structures. Some of the former should be strengthened and some of the latter filled up. The track is generally very good. The cottonwood cross ties should be replaced by others of more durable material. The sidings are ample, amounting to fully nine per cent. of the length of the line. The road needs ballasting between Promontory and Ogden, and in the Platte Valley. A machine shop at the junction of the two roads, and engine houses at three points, will be required. Freight cars are in excess of the wants of the road. The estimate for supplying deficiencies between Promontory and Ogden is $206,000, and between the latter place and Omaha, $1,380,100, making an aggregate of $1,586,100. The company have on hand a surplus of material and supplies amounting to about $1,800,000 in value. While the location of the Central Pacific Railroad is, in several places open, to criticism, there are no errors the immediate correction of which, in the opinion of the Commissioners, should be required by the Government. At a few points the embankments need widening. There are fifteen tunnels on the road, and those which require it are arched with wood. The bridges and trestles are in the same condition as those on the other road. In a distance of forty miles there are thirty-two miles of snow sheds. The track is well adapted to high rates of speed. Some additional ballasting is required. The sidings are about five per cent. of the length of the road. The machine shops are considered sufficient, except at the junction of the two roads. Additional engine houses are needed. The equipment is in excess of the wants of the road.

The Commissioners estimate the sum required to supply deficiencies at $576,650, and the value of the surplus material at more than $1,000,000.

The original act required the completion of a continuous line of railway from the Missouri River to the navigable waters of the Sacramento "by the 1st day of July, 1876." The energy with which the work was prosecuted has been crowned with signal and unexpected success, as this great national thoroughfare was in use more than seven years before that date. It is not surprising, in view of the unprecedented rapidity with which it was constructed, that deficiencies, most of which are incidental to all new roads, should have existed. Each successive report of the special commissioners who were from time to time appointed, shows that these deficiencies have been gradually and in a very great degree supplied. The aggregate material and equipment on hand exceed by $637,250 the amount necessary to make the whole line conform in every respect to the demands of the law and the just expectations of the country. No patents have been issued to the first company, and the subsidy of $1,670,400, on account of the fifty-two and one-fifth miles of road which were last constructed, has been withheld. The other company have received patents covering only 144,386 63-100 acres. It will thus be perceived that the Government has ample means to secure from the companies the faithful performance of their respective engagements.

Three hundred and three-tenths miles of the Central Pacific Railroad of California have been constructed since the date of the last annual report of this department. The distance from Promontory Summit to Sacramento is six hundred and ninety and three-tenths miles. The President of the company has not submitted a report, as required by law.

Stock of the Kansas Pacific Railway Company, to the amount of $5,072,500, has been subscribed and paid in. The receipts for transportation of passengers and freight from 1st September, 1868, to 31st August, 1869, were $2,141,198 47, and the net earnings, $946,635 11. The cost of construction, surveys, right of way, and of real estate purchased, to the latter date, was $23,705,757 58, and the then indebtedness of the company, $18,263,504 58. Including the Leavenworth Branch, 438 miles of road have been constructed, and it is expected that the line to Denver will be finished and in successful operation during the next Summer.

Stock of the Central Branch Union Pacific Railroad Company to the amount of $1,000,000 has been subscribed, and $980,600 paid. The receipts for the transportation of passengers and freight from 1st August, 1868, to 1st August, 1869, were $109,064 31. The actual cost of the road, fixtures, rolling stock, &c., is $3,723,700; and the indebtedness of the company for borrowed money, railroad iron, and freights, $98,834 29.

The Sioux City and Pacific Railroad has been completed and accepted. Its length is 101 27 100 miles. The amount of capital stock of the company subscribed is $4,271,000, of which $1,677,900 has been paid. The receipts from the transportation of passengers and freight from 1st October, 1868, to 30th September, 1869, were $233,724 25, and the operating expenses, $151,920 20. The cost of the construction and equipment of the road is $4,236,503 49, and the indebtedness, $4,934,220.

The amount of stock of the Western Pacific Railroad Company subscribed, all of which has actually been paid in, is $881,100. During the year ending 30th June, 1869, the receipts from passengers and freight, were $6,173 37, and the running expenses, $260 87. The indebtedness at that date, unsettled accounts with contractors not included, was $851,000. Since the last annual report of the department, eighty-three miles of their road have been built and accepted.

The foregoing statement of the business and financial condition of the companies has been compiled from the reports which they respectively filed in the department pursuant to the act of 25th June, 1868. Neither the Northern Pacific, the Atlantic and Pacific, nor the Southern Pacific Railroad Company have complied with the act.

Pursuant to the authority conferred by the act of 3d March, 1869, the Kansas Pacific Railroad Company entered into a contract with the Denver and Pacific Railway and Telegraph Company for the construction, operation and maintenance by the latter of that part of the road of the former company which extends from Denver to Cheyenne. A copy of the contract and a map of the route between those points have been filed in this department, and the granted lands withdrawn from market. One thousand dollars appropriated by an act of 3d March, 1869, have been expended in completing the bridge over the Dakota River, and in locating and surveying the wagon road between it and the Vermilion River. There is a balance of $15 53 of the appropriation for the bridge across the Big Sioux River, and for the wagon road between Sioux City and the mouth of the Big Cheyenne River. No further work has been done on the road from Virginia City, Montana, to Lewiston, Idaho.

Peninsular Railroad.

Regular trains commenced running on this road between Battle Creek and Bellevue, Michigan, on the 1st inst. On that day an excursion train, consisting of six cars, was run, all loaded to their fullest capacity. The cars were similar to those used by the Michigan Central Company, and one of them fully equal to the celebrated palace car No. 56, that was built and used by the Michigan Central. The road is as well built and ballasted as any new road in the State. Their T rail is of the best English iron, fifty-six pounds to the yard, of the latest improved pattern, with fish plate connections. The company has 1,200 tons of iron in Detroit and 1,800 tons on the way. This amount with what they have on hand, will iron the road to Lansing. It is expected, weather permitting, that the company will run regular trains from Battle Creek to Lansing in January next. Two first class locomotives, equal to the one they now have, are on the way from Philadelphia. A large amount of cars are building in Detroit for this company, in addition to the forty-five they now have. This company has some of the most energetic men in the State, who are putting it in operation as fast as men and money can do it, and all the cash capital is on hand that is required for that purpose. It is expected to be in operation from Chicago to Port Huron before the close of the year 1870.

☞ About seventy miles of the Michigan Air Line Railroad are graded, and the work is being pushed rapidly. From Ridgeway to Romeo the iron is laid, and trains will be running on that section this month.

☞ The earnings of the Dubuque and Sioux City Railroad in November, 1869, were $140,000, and for the five months ending November 30th, $701,032, a gain over the corresponding five months of 1868 of $188,692.

☞ The Columbus, Washington and Maysville Railroad Company has been organized with a capital of $3,000,000.

Movements of Produce.

Receipts of certain articles of domestic produce at the port of New York during the first eleven months of the year:

	1868.	1869.
Ashes, bbls.	6,183	8,571
Breadstuffs—		
Wheat flour, bbls.	2,664,497	3,166,776
Cornmeal, bbls.	251,173	188,040
Wheat, bush.	12,700,198	22,984,880
Rye, bush	760,915	820,873
Oats, bush.	9,905,916	8,119,528
Barley, bush.	2,749,354	2,675,094
Peas, bush	368,491	70,038
Corn, bush	18,672,678	11,585,223
Cotton, bales	584,630	594,451
Naval Stores—		
Crude turp., bbls.	10,175	13,893
Spirits turp., bbls	62,144	61,591
Rosin, bbls	423,504	526,297

☞ Rochester (N. H.) has voted to subscribe for $15,000 stock in the Nashua and Rochester and Concord and Rochester Railroad Companies.

☞ The Wilmington and Reading Railroad will be opened to Coatesville by the 18th inst.

Internal Revenue.

From the Report of the Commissioner of Internal Revenue we learn that the total receipts from internal revenue sources, exclusive of the direct tax upon lands and the duty upon the circulation and deposits of national banks were, for the fiscal year 1869, $160,080,344 29, collected from the following sources, viz:

Spirits	$45,062,402
Tobacco	23,480,708
Fermented liquors	6,099,879
Incomes and salaries	34,791,356
Stamps	16,420,710
Banks and bankers	3,385,517
Legacies and successions	2,434,593
Schedule A, and passports	912,314
Gas companies	2,116,006
From other sources	25,471,859
Total	$160,039,344

The amount from other sources was collected from the gross receipts of railroads, insurance and express companies, from the sales of brokers, dealers and manufacturers, from special taxes and from penalties and miscellaneous sources.

This includes the sums refunded for taxes illegally assessed and collected, amounting to $360,-235 12, nearly all of which was for taxes assessed and collected in previous years.

For the fiscal year 1868 there were refunded $1,018,334 81.

Drawbacks were also allowed to the amount of $1,379,980 01.

No drawbacks were allowed during the fiscal year 1869 by this bureau, excepting on general merchandise, under section 171 of the act of June 30, 1864, limited under the act of March 31, 1868, to ale and patent medicines, amounting to $377,-411 31. The drawback on rum and alcohol is not allowed by this bureau.

The receipts for the current year are estimated at $173,000,000, viz:

Spirits	$60,000,000
Tobacco	35,000,000
Fermented liquors	8,000,000
Incomes, salaries and schedule A.	40,000,000
Stamps	20,000,000
Banks and bankers	3,500,000
Legacies and successions	4,000,000
Gas companies	2,500,000
Total	$173,000,000

The total amount collected on the annual incomes from individuals up to November, 1869, is $25,293,680. This sum will be increased to an amount over $26,000,000. The Secretary says:

As this tax expires with the assessment for 1870 it will be for Congress to determine whether we can part entirely with the receipts from this source of revenue; and if not, whether any substitute can be devised more just and equitable and less burdensome to taxpayers.

If the income from this source cannot be spared from the general receipts, and other objects cannot be found more acceptable as a substitute, it is for Congress to determine whether or not the tax shall be renewed.

In considering this question, after determining the total amount which ought to be realized from internal revenue sources, and considering carefully what will be realized by the present system, without resorting to incomes, the question will present itself whether the entire income tax, as now assessed, shall be revived, or whether it shall be renewed at a less rate of taxation. My opinion is, that so long as a large internal revenue is required by the financial necessities of the Government, a portion of that revenue should be collected from incomes. The reasons for this seem apparent and forcible. This tax reaches simply the profits of trade and business, and the increased wealth of individuals from investments. If the tax were paid as these profits and accumulations accrue it is not believed that it would be thought objectionable; but, being required to be paid all at one time, and often after the income has been reduced by the expenses of the taxpayer or reinvested in business, it seems more onerous is more seriously complained against.

The objection most frequently and earnestly made against this tax is that it leads to a system of espionage into private affairs that is not only offensive, but sometimes injurious to individuals.

I do not see why this objection may not, with equal force, be urged against all taxes upon personal property. Such taxes cannot be collected without ascertaining the amount of taxable property possessed by the taxpayer. The law imposing a tax upon incomes does nothing more than this, if so much. It simply requires a truthful and honest statement of the actual income of the taxpayer during the preceding year, which can be complied with as easily and with as little exposure of private affairs as any other law—National, State or municipal—which seeks to raise revenue from the personal estate of taxpayers.

After all, it is but a tax upon the increased wealth of the nation, and when it is understood that Government securities are exempted from taxation, and that the interest on these securities produces a large amount of the incomes of taxpayers, I submit if it will be wise to abolish the income tax so long as the labor, industry and business of the country are directly or indirectly subjected to any considerable taxation. These observations are intended to apply to the questions whether the income tax shall be retained or abolished, and not to the rate of the tax or the manner of its assessment and collection.

Another Canadian Railroad Era.

Canada can now be said to have fairly embarked in its second era of railway improvement. Our first was when the Great Western and Grand Trunk lines were constructed and several of the branch lines which now serve as feeders to these two great arteries of traffic. Within a few years somewhere about $100,000,000 of money must have been spent on public works! The greater portion of this large sum was foreign capital—principally English—which was either invested by the possessors themselves or borrowed by our Government and municipalities in the London money market. The effect of this large influx of capital into Canada was soon made evident. Montreal awakened to new life and activity and, with the opening of the Grand Trunk, received an impetus whose fruits are to be seen in its present size, wealth, and commercial activity. Toronto also felt the prosperous wave and, indeed, all sections of Upper and Lower Canada, and particularly those districts close to the two great lines of railway felt that we had emerged into a new and brighter era. Since the completion of these roads and their branches we have not made very rapid progress in railway building. The fact is the other parts of the country were hardly prepared for them, either as regards furnishing traffic or aiding in their construction. But during the present decade, as the census of 1871 will abundantly prove, our country has made great progress and the spirit of railway enterprise seems again to have taken possession of almost every nook and corner of the land. The number and importance of the different railways at present projected and certain to be built within a few years indicate very plainly that we have begun our second era of railway building, whatever its result may be. We have first the great Intercolonial Line, which is to unite Quebec and Ontario with New Brunswick and Nova Scotia. This is, like the Grand Trunk and Great Western, a trunk line, and from its great length and the money which will be spent for years along its route, must do much to open up and settle all the tracts of country through which it will pass that are fit for settlement. Without referring to the question of route,

which does not properly come into view here, this road must largely benefit the eastern portions of Quebec and the northern parts of New Brunswick. In the province of Quebec the experiment of wooden railways seems about to be made; and, coming westwards, we find that active steps are being taken at Kingston and Bellville to construct a road into the Madoc mineral regions. This line will most probably have a chief terminus at Kingston, and although it will not be very long, its construction must beneficially affect the whole tract of country lying back of Kingston and Belleville. We believe this railway must soon go on. It is needed and no delay should take place in beginning it. Near the thriving town of Whitby, on the Grand Trunk, below Toronto, his Royal Highness Prince Arthur recently turned the first sod on a short road from that place to Port Perry, a thriving village on Lake Scugog. It is understood this undertaking will be proceeded with promptly. From the capital of Ontario, Toronto, two large lines are about to be commenced. These are to be constructed on the narrow-gauge principle and the one line, the Toronto, Grey, and Bruce, will run a little north-by-west through the most fertile parts of the country to Lake Huron; the other line, the Toronto and Nipissing, will run through a vast extent of back country in a north-eastern direction from the city, its ultimate terminus being expected to be Lake Nipissing. Both of these undertakings are Toronto enterprises; and very spirited, indeed, have been the efforts put forth by the merchants and business men generally to render them successful. These projects show Toronto to be very ambitious and manifests a strong desire to drain the whole trade of Ontario into its lap. The city has contributed $400,000 towards the two railways and bonuses have been obtained from many municipalities through which the roads are expected to pass; but, probably not yet sufficient has been contributed to insure either of the projects being carried out in its entirety. They will, in all probability, shortly be begun and, as the work proceeds, it is quite possible means may be found to carry both undertakings to completion. If both projects prove successful, they must inevitably add to the importance and prosperity of Toronto and tend to give the city that complete supremacy in Ontario which its public men are so ambitious to achieve. Next in order we come to the Wellington, Grey, and Bruce line. This project may be justly denominated a Hamilton enterprise and is the great rival of the Toronto, Grey, and Bruce—both of which at the time we write are engaged in a deadly struggle in the county of Bruce for the large subsidy offered by that county. A by-law has been passed by that corporation granting the subsidy to the Wellington, Grey, and Bruce line (Hamilton enterprise) and the ratepayers are to vote upon it on the 2nd prox. The Wellington, Grey, and Bruce line starts from the enterprising town of Guelph and is intended to run in a north-westerly direction to Lake Huron. Part of the road—a distance of thirteen miles between Guelph and Elora—is already in process of construction and is expected to be finished and running by Christmas. We feel pretty confident the whole of this railway will ultimately be made. It certainly ought to be. On reaching Guelph the inhabitants of the splendid country on the shores of Lake Huron would be brought into connection with the whole railway system of the country, and that, too, by a comparatively short line. We regard this line as a very important one not only to the people of Grey and Bruce, but also the whole of Western Ontario, and we view the benefits to flow from its construction to be such as must insure the success of the undertaking at an early day. The people of Hamilton have largely assisted the line and have exhibited unusual enterprise in advocating and pushing it forward.

Another large line of railway in Ontario may soon be proceeded with. We refer to the long projected line for many years known under the name of the "Southern" road. A charter is now held for that line between Windsor and Fort Erie, and at the next session of the Ontario Legislature two new applications are to be made for charters for a line from the St. Clair River to Fort Erie. Applications are to be made in the interests of certain Americans who want this new road to be part of a grand trans-continental line, and are understood to be prepared to find capital to build it if a charter can be obtained. We might speak of other projected railways (the proposed line from the Northern Railway into the Muskako district, for instance), but we think we have said sufficient to show that we are entering upon our second railroad era and that railway enterprise has become the order of the day. The question naturally arises—What effect will these enterprises have upon the public welfare? There can be but one answer; they must develope our resources, stimulate our business energies, and increase the general prosperity. The capital expended may not probably equal that spent during our first railway era. But as the Intercolonial itself will certainly not cost less than $25,000,000 before it is in running order, we may safely assume that there will be spent at least $50,000,000 on new railways in Canada before five years, and if we undertake a line to Red River—as many believe we must—the estimated outlay of the whole will not fall much or any short of $100,000,000.—*Trade Review Nov.*, 1869.

Louisville Commercial Convention.

MAJORITY REPORT OF THE COMMITTEE ON SOUTHERN PACIFIC RAILROAD.

The undersigned, a Committee on a Southern Pacific Railroad, beg leave to report:

That they have bestowed upon the subject referred to them that attention and investigation which its paramount importance demands—having carefully considered the various resolutions and papers referred to them, and elicited information from various other sources within their reach; and they have found their labors greatly abridged by the very able and exhaustive report of Col. Blanton Duncan, as acting chairman of the Committee on Southern Pacific Railroad, appointed by the late Memphis Convention, with instructions to prepare and submit a report to this convention; which report, so submitted and referred to them, your committee desire and recommend be published among the proceedings of this convention in connection with the report of the present committee, and as a part thereof.

Your committee believe that they cannot better perform the duty assigned them and subserve the interests of the Southern and southwestern States, and of the whole country, than by recommending for the adoption of this Convention the action upon the same subject of the Commercial Convention which assembled at Memphis on the 18th of May last, and the succeeding one that convened at New Orleans in the same month.

It may well be presumed that these two bodies, each composed of a very large number of delegates, representing all the great interests involved, and harmoniously reaching the same conclusions, gave a full and fair expression to the public sentiment upon this subject.

Other routes have been presented for the consideration of the committee; but, while it may be true that great centers of trade and population may spring up in the future, requiring other and different lines of communication with the Pacific coast, for all the practical purposes of the present the route designated by the former conventions referred to is the one unhesitatingly recommended by your committee. And we therefore beg leave to submit the following resolutions:

Resolved, That this convention memorialize Congress to grant the right-of-way and such subsidies as may seem just to a Southern Pacific Railroad from San Diego, Cal., *via* the junction of the rivers Colorado and Gila, along the valley of the Gila and south of the same to El Paso, on the Rio Grande, and thence to a convenient point near the 32d parallel of north latitude east of the Brazos or near that river in the State of Texas; to which main trunk feeder roads may be built from Leavenworth, St. Louis, Kansas City, Cairo, Vicksburg, Memphis, New Orleans, and Galveston on the east, and Guaymas, Mazatlan, and San Francisco on the west, and such other roads on the east or west as may be desired, with equal right of connection to all.

Resolved, That the President of this convention be requested to forward a copy of this resolution to the President of the United States, the Vice President and the Speaker of the House of Representatives, and request them to present the same to their respective houses of Congress. That the chairman of each State delegation be requested to appoint two gentlemen from their respective States to visit Washington at the next setting of Congress in the interests of the Southern Pacific railroad, as recommended by this convention.

[Signed]

Vermont Central Railroad.

The annual meeting of the First Mortgage Bondholders of this road was held in Boston on the 30th ult. Ex-Gov. Smith, President of the road, submitted his annual report, which gave the total receipts from traffic during the year as $1,949,430 43; total expenditures, $1,358,097 46; balance in favor of the road, $591,332 97. From all sources the receipts have amounted to $2,829,926 50; aggregate expenditures, $2,425,091 88; balance in favor of the road, $404,834 62. The total assets of the company are $552,600 44.

A statement of the comparative earnings of the road for four months of the years 1868 and 1869 was given and was in favor of the latter year, but the late severe rainstorm decreased the subsequent receipts. So that comparing this year with last there was a falling off of $3,000 in the receipts. The road has now 70 engines, 68 of which are in good condition; 12 have been built during the year and 4 are building. There have been built 279 new box and platform cars, 524 freight cars built and rebuilt, 5 passenger cars and 2 drawing room cars built, 5 rebuilt, 40 miles of new iron made and 90,000 cross ties cut. An account was given of the great damage done to the road by the storm, and Gov. Smith estimated that it would cost about $75,000 to replace it suitably.

The report was accepted and ordered to be printed, after which J. M. Pinkerton and Otis Drury, the Committee of the 1st mortgage bondholders of last year, were re-elected, and the meeting adjourned.

A meeting of the Second Mortgage bondholders was then held, Mr. George Merrill of Boston, presiding, and Mr. Lansing Mills, secretary. Mr. M. Hall Stanton of Philadelphia was unanimously re-elected Committee of the 2d mortgage bondholders, after which the meeting adjourned.

☞ The following gentlemen have been elected directors of the Indianapolis, Cincinnati and Lafayette Railroad: Gen. T. A. Morris, Indianapolis; A. R. Forsyth, Greensburg, Ind.; L. B. Lewis, Lawrenceburg, Ind.; H. C. Lord, W. W. Smith, Cincinnati; Wm. A. Booth, John S. Kennedy, Geo. Bliss, of New York; J. S. Fay, of Boston.

RAILROAD AND CANAL DIVIDEND STATEMENT.

Showing the amount of Stock Outstanding, the Dividend Periods and the date of last Dividend.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

Years ending.	Railroad: Main Line.	Branch Line.	2d Track and Sidings.	Railroad in progress.	Rolling Stock: Engines.	Cars: Pass.	Cars: B. M. E.	Cars: Freight.	Companies. American Railroad Journal

Saturday, December 11, 1869.

Stock Exchange and Money Market.

Money has been offered more freely, during the week, especially on call, and rates have been working in favor of borrowers, the ruling figures most of the week having been from 5@7 per cent. to the Government and Stock Exchange firms, and from 8@15 per cent. per annum to mercantile house. At the close, call loans were somewhat brisker on the basis of 7 per cent. A few failures have been announced during the week, the more important ones having been in the dry goods jobbing line. The announcements occasioned but little surprise, and no appreciable disturbance of the discount market. The financial and commercial classes in the main, received with favor the message of President Grant, and the accompanying reports, particularly those of the Secretary of the Treasury, the Commissioner of Internal Revenue, and the Treasurer of the United States. The outflow of currency to the West, South, and Southwest has been on a materially reduced scale. The disbursements of the Sub Treasury have been more liberal. The currency balance of the Government office was down to about 8½ millions at the close of the week, showing a reduction of about 2¾ millions from the preceding week. A million was added to the coin balance, which stood at nearly 81 millions as against about 80 millions a week previously. The city banks reported a gain of nearly a million of specie, with a reduction of about 2⅛ millions of legal tender notes, nearly a million of deposits as the result of the week's business. They added about half a million to their loan averages. The coin balance in the National Treasury on Monday was $107,950,003 09, including the outstanding gold certificates, which amounted to $37,281 840. The currency balance was $11,325,579 11.

The specie reserve of the city banks according to the latest return is $30,633,539, against $17,644,264 same time last year. The city bank deposits are now $182,690,140, against $189,843,816 week ending Dec. 5, 1868. The legal tender reserve amounts to $45,989,274, against $59,492,476 same time last year. The circulation now stands at $24,140,468, against $24,254,759 same time last year. The loans are now $253,235,996, against $259 491,905 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $112,668,564 a day, against a daily average of $93,530,644 the preceding week, and $80,291,759 the week ending with Nov. 20, 1869. The current week's exchanges average about $96,333,918 a day. The city banks, last week, reported a gain of $945,643 of specie, with a loss of $907,255 of deposits, and of $2,192,616 of legal tender notes. They increased their loans, $557,522; and reduced their circulation $15,370.

The city bank exchanges on Wednesday were up to $91,252,624.

National Bank notes to the amount of $112,140 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $319,403,801, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $19,666,188, leaving, with the existing 1,620 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,737,613. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,506,350; and for the public deposits, $19,858 000—making a total of $361,864,350. The Treasury Department last week redeemed and destroyed $446,300 of worn and mutilated fractional currency, and issued $261,321 of new. The outstanding amount of fractional currency on the 1st of Dec., was $38,885,565, against $37,035,442 on the 1st of November, 1869.

The U. S. Sub-Treasury receipts, week ending with Dec. 4, were $3,565,915 in coin, (including $1,866,000 from customs duties,) and $3,382 276 in currency; payments, $2,521,998 in coin, (including $981,747 of coin interest,) and $6,140,848 in currency; balance at the close of the week, $86,050,874, (including $80,956,849 of coin, and $3,179,934 of currency,) against $86,181,305 at the close of the preceding week, showing a decrease of $130,431. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $270,038 in coin, (including $245,587 from customs,) and $385,295 in currency; payments, $76,093 in coin, (including

$66,635 of coin interest,) and $342,852 in currency. On Tuesday, receipts, $342,831 in coin, (including $302,621 from customs,) and $5,139,325 in currency; and payments $6,959 in coin, (including $5,813 of coin interest,) and $416,240 in currency. The balance at the close of business on Tuesday stood at $89,816,439, (including $8,239,921 of currency, and $81,486,796 of coin,) against $87,231,751 a week previous; and $88,454,638 on Nov. 23, 1869. The aggregate receipts of the office in Nov. were $67,322,747, including $9,190,801 from customs; aggregate payments, $74,780,059, including $15,992,989 of coin interest.

The outstanding amount of coin certificates on the 1st of Dec. was $36,862,940, against $28,731,520 on the 1st of Oct., 1869. The Sub-Treasurer at this port, last week, retired $1,572,206 of coin certificates through the receipts for customs.

Government revenues have been yielding rather moderately, since our last. The excises yielded about 3¾ millions; customs at the port of New York, $1,706,207, and at the outports about $580,000 (in coin) more, making the grand total income for the week equal to about $6,607,759 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 77 millions.

Gold has been decidedly more active, the speculative demand having been quite animated, and the price has been quoted stronger, the range having been from 122@123⅞, and the closing quotation on Wednesday 123¾@123⅞. The customs demand has been on a very moderate scale. There has been scarcely any inquiry for export Government marketed on Friday, Dec. 3, a million of Gold; and on Tuesday, Dec. 7, another million, at fair average rates.

The customs revenue of the port of Wednesday was $253,200.

The coin balances of the Government at this port on Wednesday morning, amounted to about 81½ millions.

The coin interest disbursements on Wednesday were $28,642 50.

The customs demand for Gold last week, averaged $284,334 a day; thus far, this week, it has averaged $274,104 a day, or equal to a weekly aggregate of $1,644,624. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $6,100, and since Jan. 1, $14,876,852, against $6,701,115 same time in 1868. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1869, has been $123,735 833, against $111,220,821 same time in 1868. At San Francisco, from Jan. 1, to Nov. 27, 1869, $7,674,874, against $7,837,016 same time last year.

The exports of specie, from this port, last week, were $190,489, against $280,432 same week last year; total, since Jan. 1, 1869, $30,536,829, against $69,854,117 same time last year. Government disbursed last week through the U. S. Sub Treasury here, on account of the coin interest on the public debt $981,747, and since Jan. 1, 1869, $88,407,134, against $81,165,517 same time in 1868. The specie exports from San Francisco, from Jan. 1, to Nov. 27, 1869, were $34,708,886, against $32,526,034 same time in 1868.

The U. S. Treasury receipts from customs at all ports from July 1, to Dec. 4, were about 76 millions.

Foreign exchange has been in much better supply and quoted decidedly lower, on a limited business. The renewed export movement in U. S. bonds has added largely to the available offering of bills. Bankers' prime sixty day bills on London closed tamely on Wednesday at 108⅜@108⅜¼, and on Paris to 5.23¾@5.18¼; sight bills on London to 109@109¼, and on Paris to 5.17½c.@5.16¼. The offering of produce bills has been a gain quite liberal this week. The week's exports of domestic produce have been to the currency value of $4,413,422, making the total since Jan. 1, 1869, $185,627,995, against $156,892,265 same time last year.

Government securities have advanced materially, on an improved inquiry, for the coin-bearing bonds, chiefly from buyers for the London and Frankfort markets, where speculation in American bonds has been unusually brisk and buoyant. The offerings of bonds have been fair in the home market at the going rates. Domestic holders have been very generally sellers. The home call from investment buyers has been on a very moderate scale, Government bought in two millions of U. S. Five-Twenties on Thursday of last week at from 110.14@110.40 nett. On Wednesday of the current week $2,000,000 of Five-Twenties were also bought in at from 112.16@112.45 nett, out of an aggregate offering of $5,630,000. The later dealings in the open market showed less firmness in prices, partly due to the increased activity of money at the close.

U. S. sixes of 1881 closed here heavily at 118¼@118⅛; U. S. Five-twenties of 1862, ex coupon, 115@115⅛; U. S. Five twenties of 1864 at 112⅝@113; U. S. Five-twenties of 1865 at 113@113⅛; U. S. Five-twenties of 1865, consolidated, 115⅛@115⅝; U. S. Five-twenties of 1867, 115¾@115⅞; U. S. Five-twenties of 1868, 115⅜@115⅞; U. S. Ten-forties at 108⅝@108⅞; U. S. Six per cent. currency bonds, 107⅞@108.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov 24.	Dec. 1.	Dec. 8.

U. S. 5-20s, 1865	82½	83½	84¼
" 1867	83⅞	85⅜	85⅞
" 10 40s	78¼	80¼	81
Erie	20½	21	20¼
Ill. Central	99	99	99¾
At. and Gt. West	....	....	....

State bonds have been in much better demand and generally stronger in price. Railway bonds have also attracted more attention and have been quoted higher. Central Pacific sixes have advanced to 94¾@95 with considerable purchases reported on account of foreign buyers, chiefly for the Frankfort market, with no considerable offerings, Union Pacific to 84⅜@84½. Western Pacifics have been readily taken at 90 per cent., and accrued interest, since July 1, at the rate of six per cent. per annum in currency.

Railway and miscellaneous share property has been more freely purchased and has been generally quoted strong and buoyant in price.

Negotiations, which have been pending for some time past, with a view to pushing forward the work of completing the Chesapeake and Ohio Railroad to the Ohio River, (an enterprise of great national importance, as it will open up a much needed additional, short and favorable trunk line between the great producing regions of the West and the Atlantic coast) have been brought to a successful issue. At a stockholders' meeting, held at Richmond, Nov. 25, 26 and 27, the following Board of Directors was elected, viz,: A. A. Low, William H. Aspinwall, C. P. Huntington, Jonas G. Clark, David Stewart and William B. Hatch, of New York; Pliny Fisk, of Philadelphia; William C. Wickham and Joseph R. Anderson, of Virginia, and John Echols and H. Chester Parsons, of West Virginia. At a meeting of the directors, held in this City for organization, Dec. 1, C. P. Huntington, (the well known Vice President of the Central Pacific) was chosen President, and Wm. C. Wickham Vice President. The fact that such prominent New York capitalists and business men have given their aid to this enterprise and assumed the management, is a sufficient guarantee not only of its intrinsic value and importance, but of a vigorous, honorable and successful administration and a prosperous result.

General business has been less active in the produce line, and prices have been more variable. Middling upland cotton closed firmly on Wednesday at 25⅛ cts. per lb. The stock of cotton now here is given at about 27,000 bales. The receipts at the port this week, have averaged about 4,800 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 877,850 bales, against 705,000 bales in 1868-'9; exports, same time 439,500 bales against 336,750 bales same time in 1868-'9; stock on hand at latest dates, 277,750 bales, against 226,850 bales same date 1868. The exports of domestic cotton goods from this port, since Jan. 1, have been 20,080 pkgs., against 22,590 pkgs., same time last year. From Boston, 6,989 pkgs., against 7,793 pkgs. same time in 1868.

At the Live Stock markets, this week, Beeves have been in moderate demand, at from 8@17c., per lb.; week's receipts, 5,083. Milch cows inactive, at $40@$110 each, receipts, 154. Veal calves in less request at from 4@12½c. per lb.; receipts, 1,858. Sheep and lambs in less demand at from 4@7c., and 5@7c. per lb.; receipts, 24,425. Swine in moderate request at 10@11c. per lb., all live weight; receipts, 20,133.

The week's business in foreign merchandise has been on a restricted scale at easier and irregular figures.

Ocean Freights have been dull and heavy. For Liverpool we quote flour at 1s. 9d.@2s. by sail, and 2s.@2s. 3d. by steamer, per bbl.; grain at 4½d.@5d. by sail, and 5d.@5½d. by steamer, per bushel; cotton at ⅛d.@$\frac{3}{16}$d. by sail, and ¼d.@$\frac{5}{16}$d. by steamer per lb.; and heavy goods 20s.@35s. by sail, and 20s.@50s. by steamer, per ton. Total number of vessels in port on Wednesday, 447.

The balance in the Sub-Treasury on Wednesday was $90,311,744 47.

The New York exports, exclusive of specie, for the week ending Dec. 7, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$4,020,901	$4,413,422
Prev. reported	152,871,364	181,214,573
Since January 1	$156,892,265	$185,627,995

The imports for the week ending December 4,

and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$981,508	$1,287,657
Gen. merchandise	3,917,729	4,233,872
Total for the week	$4,899,237	$5,521,529
Previously reported	228,103,117	268,445,761
Since January 1	$233,002,354	$273,967,290

East Tennessee and Virginia Railroad.

The annual meeting of the stockholders of this company was held in Knoxville on the 26th ult. The gross earnings of the road for the year ending June 30, 1869, were $537,737 84, and the expenses $342,481 68, leaving a balance of $195,255 66, to pay interest, etc. Resolutions favorable to the consolidation of the East Tennessee and Virginia and East Tennessee and Georgia Railroads were unanimously adopted.

☞ At a meeting of the Pittsburg Board of Trade on the 3d inst., a committee was appointed to take measures toward the construction of a railroad *via* the Connellsville Road, to Uniontown; thence to Fairmount, West Virginia; thence to Grafton, thence to Staunton, opening a communication with the South Atlantic and Gulf States.

☞ The earnings of the Lake Shore and Michigan Southern Railroad, in November, 1869, were $1,124,745; in November, 1868, $1,063,482—a gain of $81,313.

☞ FIRST MORTGAGE 6 PER CENT. GOLD BONDS OF THE WESTERN PACIFIC R. R. CO. OF CALIFORNIA.

The Western Pacific Railroad connecting Sacramento with San Francisco, furnishes the final link in the extraordinary fact of an unbroken line of rail from the shore of the Atlantic to that of the Pacific.

It is 150 miles in length, including a short branch, and it will be the METROPOLITAN LINE OF THE PACIFIC COAST, connecting its chief cities, and traversing the garden of the rich and growing State of California, receiving, in addition to an immense and lucrative local traffic, the through business over the Union and Central Pacific Railroads—between the Eastern States and Sacramento.

It is completed, fully equipped, and in successful operation, and its earnings in October, the first full month, amounted to $105,000 in coin. The net earnings will, by a moderate estimate, amount to $600,000 per annum, in coin, while the interest on its bonds will be but $168,000.

The value of the property and franchises is not less than TEN MILLIONS OF DOLLARS, and the amount of the mortgage is $2,800,000.

The bonds are of $1,000 each, have thirty years to run and will be sold at NINETY, AND ACCRUED INTEREST, in currency. They are made payable, PRINCIPAL AND INTEREST, IN GOLD COIN, in the City of New York. Coupons due January and July 1.

The near approach of the time when the United States can probably fund the greater portion of the six per cent. debt, as indicated in the late Message of the President and the Report of the Secretary of the Treasury, is naturally causing inquiry for other forms of investment, which will afford satisfactory security with the same rate of interest. THE WESTERN PACIFIC RAILROAD FIRST MORTGAGE BONDS must have an immense advantage over all other securities based upon merely local or uncompleted railroad, and may be held with as much confidence as Government bonds, or as first class mortgages on New York City property.

The loan is small in amount. Its claims to confidence are apparent. Is will be rapidly taken. Bonds will be delivered as the orders are received.

Government Bonds received at their full market value in exchange.

FISK & HATCH,
Bankers,

We buy and sell Government Bonds and receive the accounts of Banks, Bankers, Corporations, and others, subject to check at sight, and allow interest on daily balances.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of November, were:

☞ The last rail of the Bangor and Piscataquis Railroad was laid the 26th ult. The road will be open to regular traffic about December 15th. A movement will be made the coming winter to extend the road beyond the present terminus.

☞ According to a decree of court, the Wilmington and Manchester Railroad is to be sold at public auction in Wilmington on the 5th of January.

Journal of Railroad Law.

WHEN RAILROAD CORPORATIONS AND INDIVIDUALS ARE IN PARI DELICTO NO RECOVERY—DUTY OF COMPANY TO RING BELL—WILLFUL DISREGARD OF IT GROSS NEGLIGENCE.

The facts in the recent case of The Ohio and Mississippi Railway Co. *vs.* Eaves (42 Ill. 288.) are fully and clearly stated in the following opinion by

LAWRENCE, J.—This was an action brought by the appellee against the appellant to recover damages for injury to the plaintiff's cattle. It appears from the record that the plaintiff and his son were driving about twenty cattle along the highway being themselves on horseback, and when the head of the drove had arrived within about thirty yards of the crossing a passenger train passed which frightened and scattered the cattle. The plaintiff and his son had just collected them again together, and got them at about the same point on the highway when his son said to the plaintiff that he thought he heard another train. Plaintiff replied "I guess not so soon after the other train: but let us rush them over as soon as we can for fear another train may be coming." They had got them on to the crossing, when the coal train came along, and killed three of the cattle. There is timber bordering the road, and it was impossible for persons traveling the highway, in the direction plaintiff was going, to see an approaching train until on the crossing. There was no bell rung or whistle sounded until just before the train struck the cattle, when the engineer whistled for the brakes. This appears not only by the witnesses for the plaintiff, but by those for the defendant, its employees in charge of the train. The jury found a verdict for plaintiff for the value of the cattle, and the court gave judgment.

It is now urged in behalf of the appellant, that the parties were *in pari delicto*. That question was submitted to the jury by the instructions, and they found otherwise, but we think, their finding was clearly against the evidence.

We are by no means disposed to relax, in any degree, the requirements of the statute, as to the duty of railway companies to give warning of their approach by a continuous ringing of a bell, or the sounding of a whistle, for the distance of eighty rods before arriving at a crossing. The obligation is plain, imperative, of great importance and easy of performance. The willful disregard of it is gross negligence. But in the present case the plaintiff himself was guilty of as great negligence as the company. He was warned by his son of the approaching train, but preferred to act upon his opinion, that one train would not so closely follow another, rather than take the slightest trouble to ascertain whether the quicker senses of his son had not told him truly. But he was, nevertheless, in doubt, as is evident from his direction to rush the cattle over for fear another train might be approaching. The slightest care, not merely for the safety of his cattle, but for the human lives upon the train, that would be placed in deadly peril by such a collision, should have prompted him to ride forward and examine the road after having been warned by his son. In cases of this character a jury should not apply the same reasoning that might be proper when the highway traveler is himself killed or injured by a passing train. A jury may well be slow to believe, that a person, who has lost life or limb from such a collision, exposed himself wantonly to the danger, and with knowledge, or even with reasonable cause for believing that a train was at hand. Men are not often so out of love with life, and railway companies cannot often successfully depend upon such a hypothesis. But here the plaintiff did not place his own life or limb in jeopardy. He was exposing merely his cattle, retaining a chance for damages in case of injury. They had just been frightened and scattered by one train, and, to save a repetition of this annoyance, he proposes to "rush them over before the coming train arrives, regardless of the injuries he may cause to others. The warning which the law sought to give him by requiring the bell or whistle to be sounded, was really given him by his son. He heeded it not, and must bear the consequences of his own rashness. But for the warning from his son he would have good grounds for recovery. As it is, he and the defendant stand *in pari delicto*, and there can, therefore be no recovery on the evidence presented by this record.

The motion for a new trial should have been allowed. The judgment must be reversed and the cause remanded.

Judgment reversed.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide water from the commencement of navigation to the 30th of Nov., inclusive, during the years 1868 and 1869, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1868..	440,900	13,754,900	16,810,500	3,537,600
1869..	521,300	18,028,800	7,038,800	3,159,300
Inc	80,400	4,263,900	*9,771,700	*378,300

* Decrease.

The receipts of the new crop of barley, so far, are 3,147,300 bushels, against 3,210,800 bushels in 1868. The receipts by canal from Dec. 1, 1868, to the close of navigation were 90,600 bushels.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows an increase equal to 934.180 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of November in the years indicated:

	1867.	1868.	1869.
Canal opened—	May 6.	April 28.	May 6.
Flour, bbls.	394,800	440,900	521,300
Wheat, bushels..	8,853,400	13,759,900	18,028,800
Corn, bushels...	15,369,500	16,810,500	7,038,800
Barley, bushels.	3,560,700	3,537,600	3,159,300
Oats, bushels...	8,331,800	11,646,600	4,831,300
Rye, bushels....	862,900	848,900	251,400
Malt, bushels...	272,100	436,400	238,400
Feed, lbs.....	.....	.....	13,066,200

☞ The Henderson *Reporter* says only five miles of the work of graduation on the Owensboro and Russellville Railroad, between Owensboro and Livermore, remains to be completed. The entire work will be completed and ready for the rails in the course of a few weeks.

☞ Three and a-half miles of snow sheds on the Union Pacific Railroad have been completed. The company expect to finish seven miles by the 1st of February, covering all the deep cuts, and placing the road out of all danger of interruptions by drifting snow.

Baltimore and Potomac R. R.

We learn from Governor Bowie, President of the Baltimore and Potomac Railroad, that he has made all his financial arrangements to commence the grading at Marlboro' immediately and to extend it rapidly down through Charles county. The whole will be under contract, and the work along the entire line to the point in Charles county where the common route diverges, will be commenced in less than thirty days.

He has also procured from wealthy Northern capitalists sufficient funds to accomplish the grading where it was left off at the Patapsco river to Baltimore, and at the District line to Washington; and these contracts will be immediately let. All the grading from the Patapsco to the District line, and to Upper Marlboro', has been, or will shortly be, completed, and as the Charles county internal improvement fund, which has been secured by Governor Bowie to the Baltimore and Potomac Road, will more than pay for the grading in Charles county from the common point to the river, and that grading is so light as to be done in three months from the time the company decides by its surveys in Virginia what route to take, it is very safe to assure our readers interested in the success of the road that the entire grading of the whole road from Baltimroe to the Potomac river and to Washington will be completed by July or August next.

The cross-ties are provided for the road from Baltimore to Washington and to Marlboro'; and Governor Bowie's earnest effort now will be to procure the iron and get this part of the road complete and running by January, 1871. The contractors having completed the grading spoken of north of this place to Baltimore, are ready to commence operations south of the Potomac river as soon as the right-of way is secured, which will be at once done.

Charles S. Emack, Esq., Chief Engineer of the Baltimore and Potomac Railroad, was in town yesterday, in company with other officers of the road, and gives us hopeful news of this important work.—*Marlboro' Gazette, Dec.* 1.

Receipts and Expenditures of the United States.

The following statement, from the Report of the Secretary of the Treasury, exhibits the receipts and expenditures of the United States for the fiscal year ending June 30, 1869:

RECEIPTS.

From customs	$180 048,427
Internal revenue	158,356,461
Lands	4,020,344
Direct tax	765,685
Miscellaneous sources	27,752,830
Total, exclusive of loans	$370,943,747

EXPENDITURES.

Civil service	$56,474.061
Pensions and Indians	35,519,545
War Department	78,501,991
Navy Department	20,000,758
Interest on the public debt	130,694,243
Preminm on 7.30 United States Treasury notes	300,000
Total, exclusive of loans	$321,490,598
Receipts in excess of expenditures	$49,453,149

The following statement exhibits the receipts and expenditures for the quarter ending September 30, 1869:

RECEIPTS.

From customs	$52 598,922
Internal revenue	47,926,852
Lands	893,864
Miscellaneous	7,412,484
Total, exclusive of loans	$108,831,622

EXPENDITURES, AFTER DEDUCTING THE AMOUNT OF RE PAYMENTS BY DISBURSING OFFICERS AND OTHERS.

Civil service	$15,102.202
Indians and pensions	13,547,943
War Department	13 595,468
Navy Department	5,782 681
Interest on the public debt	37,452 270
Total, exclusive of loans	$85,480,514
Receipts in excess of expenditures	$23,351,107

The estimated receipts and expenditures for the three remaining quarters of the fiscal year ending June 30, 1870, are as follows:

RECEIPTS.

Customs	$135,000,000
Internal revenue	127,000.000
Lands	4.000.000
Miscellaneous sources	20,000,000
Total	$286,000,000

EXPENDITURES.

Civil service	$40,000,000
Pensions and Indians	21.000 000
War Department	40,600,000
Navy Department	14 000 000
Interest on the public debt	93,750,000
Total	$209,250,000
Estimated receipts in excess of expenditures	$76,750,000

Estimated Receipts and Expenditures based upon existing laws, for the fiscal year ending June 30, 1871.

RECEIPTS.

Customs	$185,000,000
Internal revenue	175 000.000
Lands	5,000,000
Miscellaneous services	28,000,000
Total	$393,000,000

EXPENDITURES.

Civil, foreign and miscellaneous	$60,000,000
Interior, Indians and pensions	36,000,000
War Department	50,000,000
Navy Department	18,000,000
Interest on the public debt	127,000,000
Total	$291,000,000
Estimated receipts in excess of expenditures	$102,000,000

The foregoing estimates of receipts are made upon the assumption that the laws now in force relating to customs and internal revenue will be so changed as to materially affect the revenues, and the estimates of the expenditures are based upon the expectation that no extraordinary appropriations will be made.

Cincinnati, Wilmington & Zanesville R. R.

This road was sold on the 1st inst., under a foreclosure of the mortgage for $1,004,000. The road extends from Morrow to Zanesville, Ohio, a distance of 131 miles. Included in the sale were 16 locomotives, 16 passenger, 171 box and cattle, and 72 coal cars, also, $200,000 worth of real estate. The bonded debt is $1,300,000, and the stock $1,700,000. The latter is wiped out, and the price realized will not pay the bonded debt by about $325,000. The price paid is less than $8,000 per mile, and the iron on the road is worth all this. The Pan Handle Railroad Company are the purchasers, or, in other words, the Pennsylvania Central. A branch will be built, about twenty-two miles in length, to Zanesville, and the Pan Handle trains will run over that route instead of *via* Columbus. The distance is about the same, but the grades are in favor of the Zanesville route. It is not intended to continue the road to Cincinnati on a new track.

☞ A CHOICE SECURITY. SEVEN PER CENT. GOLD, FREE OF GOVERNMENT TAX. NEARLY 10 PER CENT. CURRENCY, FIRST MORTGAGE BONDS OF NEW YORK AND OSWEGO MIDLAND RAILROAD. THESE BONDS CAN BE REGISTERED.

SIX MILLIONS OF DOLLARS PAID-UP STOCK SUBSCRIPTIONS. No bonds issued on road under construction; issue limited to $20 000 per mile of road built and in running order, BEING ONLY ABOUT HALF THE ACTUAL CASH COST. The road is being built with great economy for cash; 100 miles are done, and in the most thorough manner; 50 miles additional will be finished in November; and the whole line (over 400 miles) it is expected will be completed within the ensuing year. It is one of the most important roads in the State of New York. It shortens the route from New York City to Buffalo 70 miles, and to Oswego 45 miles; it traverses a populous district destitute of other railroad facilities, which must furnish it a large and profitable local business; and it will be completed at an aggregate cost far below that of any competing line. These advantages cannot fail to make it one of the best paying roads leading from the metropolis, and its First Mortgage Bonds one of the safest securities ever issued. All mortgage bonds issued on Railroads running from the City of New York are good, and the interest promptly paid, although some of them are mortgaged for more than double the amount per mile that the Midland is. Among the bonds now offering we know of none equal to these. For the investment of trust or other funds there is nothing better; and in exchange for Government Bonds they give a large increase of income, beside capitalizing the premium. They are meeting with rapid sale, and we have been gratified to find that they are taken chiefly by our most conservative and sagacious capitalists in exchange for Government securities. Price par, and accrued interest in currency. Circulars, pamphlets, &c., on hand for distribution.

GEORGE OPDYKE & CO.,
Bankers, No. 25 Nassau st.

Fredericksburg and Gordonville Railroad.

The Baltimore *Sun* says that arrangements have been made for the completion of the entire road to Charlottesville, Virginia, in 1870. This, by the expected completion of the Chesapeake and Ohio road, through the action of Northern capitalists, will make the Fredericksburg and Gordonsville road amongst the valuable improvements of the country. The operations of the work are under the management of Mr. H. H. Wainwright, its President, formerly of Baltimore, and Col. W. W. Taylor, also of Baltimore, chief engineer.

☞ The Raleigh (N. C.) *Sentinel* says that the grading of the Williamston and Tarboro' Railroad began the first day of June last, and is now completed except about two miles. The iron for the whole track, from England, is lying at Portsmouth awaiting transportation.

☞ The last rail of the Burlington and Missouri River Railroad was laid at Glenwood, Iowa, last week, in the presence of a large assembly. Trains will at once begin running over the entire length of the road from Burlington on the Mississippi to Council Bluffs on the Missouri.

Bridge over the Ohio at Louisville, Ky.

The work on the great railroad bridge over the Ohio is so far advanced that the engineers are confident of being able to open it for the passage of regular trains by the 15th December. Construction trains, however, will be able to pass several days sooner.

The 400 feet span now rests on its permanent bearings, and is in every respect satisfactory to its engineers. This, by the way, is the longest span ever erected in America, the next less being the main span of the Victoria Bridge, at Montreal, Canada, which is 330 feet long, and the channel span of the Steubenville Bridge, which is 320 feet long. The plan of truss is that known as the "triangular," one which has been extensively and successfully used by Mr. Fink, and has been in the present case specially arranged for this long span. The clear space above low water line, under this span is 96½ feet, and above high water line 45½ feet; the total height from the rock bed of the river to the top of the upper chord of this span is 160 feet.

The last pier, No. 19, was finished a week ago, and in two days from now the last stone of the bridge masonry will have been laid in the Indiana abutment, which is all that remains of 31,000 cubic yards of masonry commenced Aug. 1, 1867.

The total length of the iron superstructure is 5,280 feet, of which two spans are respectively 370 and 400 feet long. The middle and Indiana channels are "over grade" or "through" the others, varying in length from 50 to 250 feet, are "under grade" or deck. The under grade portion is of the same plan known as Fink's Patent Suspension Truss—a plan that has been well and favorably known for over twenty years.

The total quantity of iron, wrought and cast, used in the construction of this great bridge, is 8,700,000 pounds, and the amount of timber, including rail, joist, cross ties and railway, will be 640 000 feet board measure. This magnificent structure was designed and the work carried out under the superintendence of Messrs. Albert Fink, Chief Engineer, and F. W. Vaughan, Principal Assistant Engineer.—*Louisville Courier Journal Nov.* 30.

Richmond and Petersburg Railroad.

The annual meeting of the stockholders of this company was held in Richmond on the 30th ult. The Report which was presented shows that the gross earnings for the year ending September 30, 1869, were $160,945 86, and ordinary operating expenses $94,575 15—leaving a net balance of $63,870 71. The income from through travel exceeds that of last year by $4,127 72; that from local travel is greater than that of last year by $5,676 65. The whole funded debt of the company is $319,000. The road is reported to be in fine condition, and many improvements have been made during the past year. W. H. Haxall, Esq., offered the following resolution, which was adopted:

Resolved, That the Richmond and Petersburg Railroad Company agrees to lease to the Richmond, Fredericksburg and Potomac Railroad Company and the Richmond and Danville Railroad Company, jointly, for a term of not less than ten nor more than twenty years from the 1st of January, 1870, the use of its railroad bridge and track over James river, from its terminus in Richmond to a point near the tunnel under its road, as also the right of way through the land of the Richmond and Petersburg Railroad Company near to said company's shops, for the construction and maintenance of steam railway connection between the Richmond, Fredericksburg and Potomac, and the Richmond and Danville Railroads for the conveyance of passengers, mails and express freights between their railroads, upon such terms as shall be decided to be equitable and proper by the arbitration of competent and disinterested experts, one to be selected by the president of the Richmond and Petersburg Railroad Company and another by the presidents of the said two other companies, with power to said arbitrators to choose an umpire for the decision of any question upon which they fail to agree touching the matters referred to them, the decision of said umpire to be final and conclusive. The resolution was adopted by a vote of 1,340 ayes to 861 noes.

THE WHARTON
Safety Railroad Switch.

☞ BOTH RAILS of the main track absolutely immovable, continuous and unmutilated. ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,
ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R.R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

RAILROAD CAR MANUFACTORY FOR SALE.

THE SUBSCRIBERS, EXECUTORS OF WM. CUMMINGS, deceased, will expose to sale at public vendue, on Thursday, the 20th day of January, 1870, at two o'clock in the afternoon, at Taylor's Hotel in Jersey City, (if not previously disposed of at private sale,) all of the following described lots of land and premises at Jersey City, in the County of Hudson and State of New Jersey, consisting of the RAILROAD CAR MANUFACTORY of the deceased, viz:

Lots Nos. 121, 123, 125, 127, 129, 131, 133, and 135, fronting on Washington street.
Lots Nos. 42, 44, 46, and 48 Steuben street: and
Lots Nos. 45 and 47 on Morgan street.
Together with the buildings, factories, shops, and improvements thereon erected.
Dated Jersey City, November 6th, 1869.
THOMAS W. JAMES
ISAAC L. VANDERBEEK,
Executors.

N. B.—The executors will consider any offer to dispose of the above at private sale, made before the vendue.

CHANGEABLE GAUGE
FREIGHT CAR TRUCKS.
A line of upwards of 200 Freight Cars, with *Changeable Gauge Trucks*, are in successful operation
BETWEEN BOSTON, CHICAGO AND ST. LOUIS,
Running over Different Gauges of Tracks.
These Trucks are adaptable
To any and all Gauges of Track.
The Lobdell Car Wheel, Tire and Machine Co., Wilmington, Del., have been appointed Sole Agents, South and South-West of New York, for the Manufacture and Sale of the above Patent Adjustable Gauge Cars, and are prepared to furnish Cars constructed under these Patents: Trucks complete, or Wheels and Axles only.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

TAYLOR MFG. CO.,
Exclusive Manufacturers, 73 Beekman St., N. Y.

PACIFIC MAIL
Steamship Company's
THROUGH LINE TO
California and China.
FREIGHT AND PASSAGE GREATLY REDUCED.

Through rates, New York to San Francisco:

First Class.	Steerage.
$140 to $180.	**$65.**

according to location of berth.

These rates include berths, board and all necessaries for the trip.

Steamers of the above line leave Pier No. 42 North River, foot of Canal street, at 12 o'clock noon,

ON 5TH AND 21ST OF EACH MONTH,

except when those days fall on Sunday, then the day previous.

One hundred pounds baggage free to each adult. Medicine and attendance free.

Dec. 21, ALASKA, CAPT. GRAY, connecting with COLORADO, CAPT. FARNSWORTH.

Steamer CHINA, will leave San Francisco Jan. 1, 1870, for China and Japan.

NOTICE TO SHIPPERS.

For reduced rates of freight apply on wharf. Freight for steamer ALASKA, received until 4 P. M. on MONDAY, Dec. 20. All usual facilities afforded shippers in collecting inland charges, &c.

For freight or passage tickets and all further information apply at the Company's ticket office on the wharf, foot of Canal street. F. R. BABY, Agent.

New York Saturday, December 18, 1869.

Chesapeake and Ohio Railroad.

This is the name of a combination of roads, of which the object is to make a complete and efficient trunk line of road from Richmond and Norfolk, in Virginia, to the Ohio River, at the mouth of Big Sandy. This combination consists of the road from Norfolk to Petersburg, the Virginia Central, and the Covington and Ohio roads, the last being almost untouched. The separate charters were combined by an Act of the Virginia Legislature, in a charter for the entire line from tide water to the Ohio, called the "CHESAPEAKE AND OHIO RAILROAD." By the same Act the Legislature gave, we believe, the stock of the State in the road, and all legal facilities and privileges for raising money. Under this charter, we understand that Messrs. FISK & HATCH, bankers of New York, with other capitalists, have taken hold of the work, and there is now a good prospect of completing it. Perhaps no road planned for Cincinnati will be more useful, *provided* Cincinnati is willing to do something for herself. We have already said that if a great line were made through Virginia to the mouth of Big Sandy, there must be a road from the Big Sandy to Cincinnati. The time for making that road is near at hand, and on that we may hereafter say something. In the meanwhile, let us take a look at the *Chesapeake and Ohio* in its relations to Cincinnati.

1. We observe the *Air Line* distance from Cincinnati to Norfolk is but 450 miles nearer than to any point on the ocean side—and nearer than the ocean can be reached, either by the Baltimore or Richmond route.

2. The harbor of Norfolk and shelter for shipping on the ocean coast.

3. Supposing the Southern road to be made—still there will be one entire *quarter of a circle*, in which Cincinnati will have no railroad, viz.: from the Marietta and Cincinnati to the Southern road. In this quarter of a circle the Chesapeake and Ohio Railroad will come in and reach the Southeastern Atlantic at points which cannot be reached, as nearly, or as well, as through this road. Hence it is that this subject presents itself with great force to Cincinnati, as well as to the whole interior country.

Let us see now what has been done, and remains to be done. We have already said that FISK & HATCH, of New York, with other bankers, have taken up the matter, and we confidently believe, will carry it through to completion.

We have received in a letter from New York the following information:

"The Chesapeake and Ohio line is now halted at the White Sulphur Springs, a little west of the boundary of Virginia, having successfully bored through the several ridges of the Allegheny chain. From that point to the Ohio river is a gradually descending grade of less than 30 feet to the mile, and it is believed can be built for $50,000 per mile. By the time it reaches the mouth of the Big Sandy, Cincinnati should be there with a road of her own, so as to form another direct line to Washington City and the ocean."

It will be seen that this grand trunk line is coming near to completion, and it is said that the $12,000,000 necessary have already been contracted for. It is about 120 miles, we believe, from the White Sulphur Springs to the Big Sandy. The distances, as seen by the old Virginia Central, will be rather circuitous as it regards Norfolk, but may be much shortened by a cut off. The distances from Richmond to Norfolk by the Central will be as follows, viz:

	Miles.
Richmond to Covington	205
Covington to White Sulphur	22
White Sulphur to Big Sandy	120
Richmond to Big Sandy	347
Norfolk to Petersburg	81
Petersburg to Richmond	22
Richmond to Big Sandy	347
Norfolk to Big Sandy	450

But this is, as to Norfolk, a very circuitous route, and if this route for Norfolk is to make a *cut off* from Lynchburg to Covington, then the Norfolk route will be:

	Miles.
Norfolk to Petersburg	81
Petersburg to Lynchburg	123
Lynchburg to Covington	50
Covington to Big Sandy	142
Norfolk to Big Sandy	396

We may call it, therefore, 400 miles from Norfolk to Big Sandy. To reach Cincinnati there must be a road made, bridging the Ohio directly to Cincinnati. It is possible the bridge may be at the mouth of the Guyandotte or Big Sandy, but it will make little difference in the distance or cost. The road will go direct to Portsmouth, and thence through Adams, Brown and Clermont counties to Cincinnati. The whole distance would be about 120 miles, and would be through counties that have no railroads. No doubt those counties would contribute enough to make a large part of the road, probably enough to grade it. The whole distance from Cincinnati to Norfolk would be nearly thus, viz:

	Miles.
Norfolk to Lynchburg	204
Lynchburg to Covington	50
Covington to Big Sandy	142
Big Sandy to Cincinnati	120
Total	516

Now let us tell the reader that *no road can be made from the Ohio river to a Southern Atlantic port as short as that.* This is a material and all important fact in the consideration of roads leading from Cincinnati to the South. It has no rivalry with

the "Southern road" as such; because the Southern road will be nearer to all the South, which is west of the middle of North Carolina. But from Baltimore to Raleigh all Virginia and a part of North Carolina will be reached nearer and better by the Chesapeake and Ohio road. It will be the great South-eastern route from Cincinnati. Whether NORFOLK will find capital or enterprise to establish a Southern steamship line to Europe, we do not know. But beyond doubt *that* is what ought to be done, the moment it is ascertained that the great line from the Ohio will be made. If the Chesapeake and Ohio road is finished, and the steamship line from Norfolk established, we hazard nothing in saying that the line from Cincinnati through Norfolk *will carry the products of the Ohio Valley over the Atlantic cheaper than can be done in any other way.* Competition by New York, Boston or Philadelphia for that trade would be in vain. All other things, however, require capital and time. The first element in the general scheme is undoubtedly to *make the Chesapeake and Ohio to the Ohio.* We doubt not but, when the main line is made, Cincinnati and the counties will make the road on the Ohio side, and Norfolk will find means to secure a steamship line. We trust that they may all be made at an early day, for we are anxious to see Cincinnati possess all the artificial avenues, which are necessary to take advantage of the great natural advantages which she posses sses. Central to the great Ohio Valley, and having abundant lines to all the North and East, it yet remains for her to complete her communication with the South, South-east and South-west. Let her accomplish them and she will be indeed a Queen City—a Metropolis of the Central West.—*Railroad Record.*

Wooden Railways.

A meeting of the Ontario Legislative Committee on Wooden Railways was held in Toronto on the 1st inst. The Chairman called on Mr. Foster, the projector of the Industry and Lanoraie Wooden Railway near Montreal. This gentleman gave his evidence at some length. He was in favor of using short blocks of wood placed end-ways, instead of a rail laid longitudinally as is the case with iron rails. He produced plans, showing his proposed scheme, the estimated cost of which would be $1 per yard or $1,760 per mile. He stated that the blocks might be made of any hard-wood, but he preferred maple, oak or rock elm. These would last five or six years. The cost of iron straps placed on longitudinal rail alone would cost $1 per yard, without spikes, &c.

Mr. Hulburt, the contractor for the construction of the Gosford and Quebec wooden railway, being called upon by the chairman, submitted his models for the inspection of the Committee. He stated that $1,000 would find and lay material for this and the longitudinal rails which are 8½ inches by 4 inches. The gauge proposed is 4 feet 8½ inches. The road would last from four to five years; one man a mile would be sufficient to do all the necessary repairs, and twenty per cent. of all the original cost annually expended would renew the line. The usual rate of speed maintained is from eight to ten miles an hour. The ties are placed about sixteen inches apart. The additional cost of a double rail would be about $200 a mile. The cars used have only four wheels and can carry five tons. Timber, of course, could be loaded on two cars. The Gosford Railway cost $4,000 per mile, including everything except stations and rolling stock. The largest engines used on these lines cost about $9,500, American currency; platform cars, 18 feet long $225, and box cars $600.

Vermont Railroads.

The Legislature of the State of Vermont which has just closed its session, chartered two railway corporations which effect us somewhat on this side of the boundary line. The Missisquoi and Clyde River Railroad Company has power to construct a road from Island Pond to Richford, Vt., to connect with a road to be hereafter constructed in the township of Sutton, or the Parish of St. Armand East. This charter does away with the Orleans portion of the Missisquoi Valley road, if constructed within three years, otherwise the Missisquoi Valley charter holds good. The other is the Lamoille Valley Junction Railroad Company, which has power to construct a road from the Province line at or near East Franklin, to connect with the Lamoille Valley road to Sheldon, or the Missisquoi Valley road, or both. At the Province line it will connect with the Missisquoi Junction road leading north through St. Armand and Dunham to connect with the S. E. C. Junction road. This charter completes the link from Montreal to Portland and without doubt one of the most important of the many charters granted in Northern Vermont. The survey of the South Eastern Counties road has been progressing slowly, but the road is now located from West Farnham to Cowansville. Ground has been secured for station and other buildings on the south side of the river opposite Cowansville, and we have reason to believe that the cars will be running to this point sometime during next season.—*St. John News.*

Jeffersonville, Madison and Indianapolis Railroad.

The earnings of this road for the years ending December 31, 1867 and 1868, were as follows:

	1867.	1868.
From passengers	$458,134 84	$434,546 65
" freight	610,667 60	552,596 18

Deduct from the above interest on funded debt		202,070 00
Net income carried to profit and loss		$162,885 38

Compared with 1867, the gross earnings of 1868 show a decrease of $101,276 19, with a decrease in expenses of $38,405 05—making the decrease in net earnings $62,871 14. The president in his report says:

The falling off of gross receipts was caused, in a great measure, by the sharp competition for business that was waged, during a large portion of the year, between the four principal roads known as "trunk lines"—a contest which affected not only the revenues of those particular roads, but of all others, including our own, doing business in connection with them. It is to be hoped that these "trunk lines," recognizing the folly of working for less than reasonable compensation, may, before long, agree upon rates that will afford a fair margin for profit, without being, in any sense, oppressive to the public.

Our local business continues good, and will doubtless keep pace, as it has done in the past, with the development of the fine agricultural region through which the road passes, and the growth of the cities and towns upon its line.

The work on the Louisville Bridge is now so far advanced that it is quite safe to say that our trains will begin to pass over it by end of October next. The importance of this bridge to our road, in securing a close connection with the entire system of Southern railroads, has been so fully dwelt upon in previous reports that a reiteration here is deemed to be superfluous. The new track connecting our road with the bridge, consisting of about one mile of embankment, will be finished in ample season.

Having paid up the full amount of our subscription to the stock of the Bridge Company, completed the "Cambridge Extension," put the roads between Columbus and Rushville in fine order, and made a more convenient connection of our lines at Columbus by constructing a new track upwards of a mile in length, the current earnings of the road, which these enterprises, during their progress, entirely absorbed, have become available for the reduction of the floating debt; and since the close of the year it has accordingly been cut down about twenty per cent. It is intended that this reduction shall go on as rapidly as possible, until the entire floating debt shall be extinguished.

By the terms of a written contract between the City of Louisville and the Jeffersonville Railroad Company, dated November 10, 1863, the debt due by the railroad company to the city, then amounting to $200,000, was to be discharged by the delivery within five years of a like amount of any of the outstanding bonds of said city. Pursuant to this agreement, the Jeffersonville Railroad Company delivered $50,000 of such bonds in December, 1863, thereby reducing the debt to $150,000. Sometime before the expiration of the five years mentioned in the contract, this company made a purchase of Louisville city bonds to the extent of $75,000, and tendered them to the proper authorities of that city in further liquidation of the debt. This tender was unconditionally declined, under advice of the City Attorney, who held the opinion that the contract between the city and the Jeffersonville Railroad Company was illegal and void in so far as it permitted any bonds to be received except the particular issue upon which the debt was based. After this refusal, of course no further steps in the case was taken by the company.

If the decision of the City Attorney is to be regarded as conclusive, it is not believed that our position has been affected unfavorably, since it will only remain for this company to discharge her liability in the premises by redeeming $150,000 of the bonds originally issued by the City of Louisville to the Jeffersonville Railroad Company, when the same mature, viz: May 1, 1882, or earlier, should it be deemed desirable and found practicable to do so—meanwhile anticipating events by exchanging for those bonds the securities we now hold, whenever the turn can be made on favorable terms.

The means needed for purchasing the Louisville city bonds, as well as any other portion of our old funded debt that can be had at reasonable prices, were to have been derived from the sale of a corresponding amount of the first mortgage bonds of this company, as authorized by the articles of consolidation. Sales of the last mentioned bonds, however, have so far been effected to the extent of $60,000 only. A special account of the bonds thus sold has been opened, and appears on the balance sheet under the title of "Temporary Bond Account." Ultimately this account will be merged into that of "Jeffersonville, Madison and In-

dianapolis Railroad Bonds"—an equal amount of the old bonds being at the same time retired and cancelled, so that there will be no increase of the funded debt.

In the early part of May of the present year a line of first-class "Day and Night Silver Palace Cars" was established between Jeffersonville and New York, running through, without change, in thirty-six hours, and passing over our branch roads from Columbus to Cambridge City. This being the speediest, and, in every sense, the most desirable route between New York and the Southwest, connecting as it does at Louisville, with another equally fast and desirable line to Memphis and New Orleans, it is not unreasonable to count upon its commanding a large share of public patronage.

The late period at which this report goes to press permits a close estimate to be made of the company's business for the first six months of 1869. The receipts indicate a steady and handsome increase over those for the corresponding months of 1868—sufficient to warrant the belief that the earnings of the present year will considerably exceed those of 1868, if indeed they do not equal those of 1867.

The company have 88 locomotives, 15 first-class passenger cars, 2 sleeping cars, 5 light cars with side seats, 6 second-class cars, 3 passenger and baggage (way) cars, 12 baggage, mail and express cars, 114 box cars, with compromise wheels, 119 box cars with narrow tread wheels, 39 stock, 63 coal, 119 platform, and 95 "Madison" box, coal and dumping cars. Number of miles run by passenger trains, 299,749; by freight trains, 260,795; by all other trains, 135,275—total, 695,819. Total cost of engine repairs, $43,456 95, an average per mile run of 6.24 cents. Av. miles run to one quart of oil, 28.3. Av. cost per mile for oil, 0.52 cents. Av. cost of oil per gallon, 59 cents. Av. cost of lubricating oil for cars, 38 cents. per gallon. Number of tons of freight carried, 264,669; do., carried one mile, 19,541,622. Number of passengers carried, 317,929; do., carried one mile, 10,828,896.

The gross receipts of the Cambridge Extension for the year 1868 were $23,046 44, and the operating expenses, $13,105 32.

The gross receipts of the Shelby and Rush Railroad for the year 1868 were $28,009 17. The operating expenses were $23,247 61; interest on funded debt, $2,268; expended for relaying track, ballasting, etc., $31,151 81—total expenses, $56,667 42.

President.—D. RICKETTS.

Directors.—D. Ricketts, Samuel H. Patterson, James L. Bradley, M. Fitzgibbon, Richard J. Bright, Wm. B. Caldwell, S. A. Hartwell, Wm. B. Hamilton, Wm. D. Thompson, Lucius Tuckerman, Lawrason Riggs, W. C. DePauw.

Gen'l Superintendent.—HORACE SCOTT.

Treasurer.—JAMES H. MCCAMPBELL.

Secretary.—GEO. S. MCKIERNAN.

Illinois Central Railroad.

The statement of this Company for the month ending November 30, 1869, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	3,335.72 for	$30,910 50
Acres Int. Fund Lands sold	40.00 for	459 80
Acres Free Lands sold	797.88 for	11,713 39
Total sales during month of Nov., 1869	4,173.50 for	$43,083 69
To which add Town Lot Sales		245 00
Total of all	4,173.60 for	$43,328 69
Cash collected in Nov.		$226,661 47

TRAFFIC DEPARTMENT.

Receipts from Freight		$433,853 00
do. Passengers		184,713 65
do. Mails		6,858 33
do. Rent of Road		4,000 00
do. Other Sources		105,000 00
Total Receipts in Nov., 1869		$683,924 98
Total Receipts in Nov., 1868		$583,788 39
Estimated earnings in the month of Nov., on the D. & S. C. R. R., not included above		$141,130 80
Corresponding month of 1868		$98,175 19

☞ The Atchison, Topeka and Santa Fe Railroad has been completed as far as Emporia. It now extends from Topeka to Emporia about 60 miles. There it will cross the Southern Branch Union Pacific which will soon be completed from Junction City to Emporia.

☞ The Des Moines Valley Railroad is completed for 24 miles north of its junction with the Northwestern and within twelve miles of the Iowa Falls and Sioux City road, which it is to cross six miles west of Fort Dodge.

☞ The Burlington and Carthage Railroad is completed from Carthage to Ellison Creek, three miles below Burlington.

Chesapeake and Ohio Canal.

The shipments of coal (bituminous) by the Chesapeake and Ohio Canal for the current year were 663,491 tons, against 485,070 tons in 1868—an increase of 178,421 tons, or about 25 per cent. Of the shipment of coal for the year 1869, 637,614 tons were dispatched to Georgetown and Alexandria; 5,071 tons to Williamsport; 8,936 tons to Antietam; 7,391 tons to Knoxville, and 4,476 tons to other points. The tolls levied on the boats and cargoes dispatched from Cumberland were $318,714. The ascending trade to Cumberland, embracing flour, grain, fruits, hides, salt, groceries, &c., is also steadily increasing. The tolls upon this up trade collected for the past year amounted to $2,978.

Little Rock and Fort Smith Railroad.

The Little Rock (Ark.) *Gazette* says that this road is in process of construction in earnest. Hands have been put on the second and third division of ten miles each, the first division being well nigh graded ready for the track. One hundred and fifty additional hands have been engaged; and are looked for daily. There are two hundred tons of iron for the road at the mouth of White river, and two thousand tons are *in transitu* for the first twenty miles. A locomotive, two passenger cars, built at Albany, and a number of platform cars for the road are also on the way. On their arrival the company will be ready for track laying.

Kalamazoo and South Haven Railroad.

Seven miles of this road, extending from Kalamazoo to Alamo Centre, have been completed. The road bed of the next seven miles is graded and ready for the iron. The Kalamazoo *Telegraph* says:

"It seems that this road is not only to connect us with the splendid country and the smart and growing villages between here and South Haven, but with others north and south of that point as well. It is currently reported that this road will, with the Chicago and Lake Shore Railroad, make connection near Bangor, by which St. Joseph will have an eastern outlet, *via* Bangor and Kalamazoo, and the two roads making the main line with a spur or 'plug' to South Haven."

☞ The Ottumwa and St. Paul Railroad Company has been organized at Ottumwa, Iowa, by the election of the following officers: J. D. Ladd, President; J. H. Merrill, Vice President; W. B. Bonnifield, Treasurer; and J. W. Dixon, Secretary. The company propose to build a railroad from Ottumwa to Cedar Falls, there connecting with the Cedar Valley Railroad. The distance to be built is about 100 miles, of which 30 miles are graded.

☞ Five miles of the work of graduation on the Owensboro and Russellville Railroad, between Owensboro and Livermore, remains to be completed. The entire work will be completed and ready for the rails in the course of a few weeks.

☞ The Selma and Gulf Railroad (Selma to Pensacola) is graded for 20 miles south of Selma. Twenty-five miles are to be in running order by the end of the year.

☞ The earnings of the European and North American Railway in November, 1869 were $18,515 34, against $17,254 18 in November, 1868, a increase of $1,261 16.

Finances of the United States.

EXTRACT FROM THE REPORT OF THE SECRETARY OF THE TREASURY.

Including interest earned and not paid and deducting cash on hand, the debt of the United States on the first of March last, was $2,525,463,260, and subject to the same conditions, it was $2,453,559,735 on the first of the present month, showing a decrease $71,903,524. This apparent decrease of the public debt is less than the actual decrease. Considerable sums have been paid on account of war and other old claims not previously ascertained, and therefore not included in any debt statement. The account of March 1, from the necessity of the case, included only the interest accrued and not then payable; but as a matter of fact there were outstanding and overdue interest coupons, and these, several millions, have since been paid out of the ordinary revenue. Previous to March 1, no interest account had ever been kept with the several loans. Such measures as were found practicable have since been taken to ascertain the exact condition of these amounts. The bonds issued by the United States in aid of railways, amounting to $62,625,320, being in the nature of a loan, are not included in the foregoing statement.

During the fiscal year ending June 30, 1869, there was an excess of receipts over expenditures, including the interest on the public debt, of $49,453,149; of this excess $12,992,370, as nearly as can now be ascertained, arose previous to March 1, and the remainder, $36,460,779, between that time and the 1st day of July. This excess was applied from time to time to the purchase of five-twenty bonds, and the excess of receipts since July 1, has been used in the same manner. The purchases amounted in the aggregate, on the 30th day of November, to $75,476,800. As a large part of the excess of receipts was realized in coin, sales of gold have been made from time to time, and the proceeds applied to the purchase of bonds. With the exception of the sale of moderate amounts of coin in Chicago, New Orleans, St. Louis and Baltimore for the payment of duties, the sale of gold and the purchases of bonds have been made uniformly through the agency of the United States Treasurer in New York, and without any expense to the Government except the comparatively small amount paid for advertising the proposals. The average premium on gold sold since March 1, has been thirty-two and eight-tenths per cent., and the average premium paid for bonds has been 16 98-100 per cent. Upon this basis of the sales of gold and the purchase of bonds, the average price paid for bonds in coin has been eighty-eight and fifty-five one-hundredths per cent. The act of February 25, 1862, provided that the coin received for duties upon imported goods should be annually set apart as a sinking fund to the extent of one per cent. of the entire debt of the United States. In conformity with this requirement I have purchased bonds to the amount of $20,044,800, and designated them as belonging to the sinking fund. These purchases are a substantial compliance with the statute. From the 4th of March last I have not felt myself authorized or required to make any provision for the time that elapsed after the passage of the act, and previous to the commencement of the administration. With the excess of means at my command I have purchased bonds in addition to those purchased for the sinking fund to the amount of $55,432,000. These are held as a special fund, subject to the action of Congress, and I respectfully recommend that they be added to the sinking fund, and that any further purchases that may be made be so added until the gross amount shall constitute a fund equal to that which would have been created if there had been no delay in the execution of the law.

The depreciation of currency is due to two causes:—First, an excessive issue, and secondly, to the want of faith in the Government, and the extent of the influence of the first named cause cannot be ascertained until the second is removed substantially. Whenever our credit shall be so much improved at home and abroad that holders of our bonds are disposed to retain them, even when the public mind is excited upon financial subjects, we shall be able to judge more accurately the extent of the overissue of paper money. It is also true that the quantity of currency necessary for the transaction of the business of the country cannot now be fixed accurately. Since the close of the war the wants of the States of the South have increased, and consequently a large amount of currency has been withdrawn from other sections to supply the demand there created. The amount necessary for the purposes of the South will steadily increase for the next two years.

The construction of the Pacific Railroad is likely to result in the substitution of paper for coin by the people on the Pacific coast. It is probable that the demand for paper for that purpose will not be less than $30,000,000. As a consequence a very large quantity of coin will be withdrawn from circulation, and thus, practically, the coin will be increased upon the Atlantic coast, and the paper in circulation in the States, east of the Rocky Mountains, will be materially reduced. These changes will tend to diminish the difference between paper and coin.

The ability of the country to resume specie payments will not be due to any special legislation upon that subject, but to the condition of its industries and to its financial relations to other countries. These, of course, will be more or less dependent upon the general policy of the Government. The war exhausted the country of its material wealth, and the States of the South were literally impoverished. A necessary condition for the resumption of specie payments was the development of the industry of the nation, both South and North, and the consequent accumulation of movable products of industry to such an extent that our exports of those products should be equal substantially to our imports. So long as it is necessary to pay for merchandise imported by the transfer of Government bonds or other evidences of indebtedness to other countries, so long it will be impracticable to resume and maintain specie payments. When the products of industry exported shall be equal substantially to the products of other countries imported there will be no demand for specie for export except what may arise from the circumstances that our bonds held abroad are sent home, sold in our markets and the proceeds exported in coin. When the credit of the country shall be fully established in Europe, and there shall be no doubt either of our ability or disposition to meet all our obligations, bonds, heretofore and now to a large extent held by merchants and bankers, will be transferred to capitalists for permanent investment—when this change shall have taken place the probability of our securities being sent home under the influence of political or financial disturbances in England will be very slight, and when, as a concurring fact, our exports, exclusive of public securities, shall be equal to our imports, specie payments may be resumed without even a temporary embarrassment to the business of the country.

One of the most efficient means of strengthening the country in its financial relations with other countries is the development of our commercial marine. The returns show that a very large amount of the foreign trade is in English hands. We are not only thus dependent upon a rival country for the performance of the business which should be in the hands of our own people, but our ability to maintain specie payments is materially diminished. If the entire foreign trade of the country, both of exports and imports, were carried on in American ships, the earnings would not be less than $75,000,000 a year. At present the freights of the foreign trade in American ships do not exceed $28,000,000. Were the trade exclusively in American hands a large part of this difference of $47,000,000 would be due to citizens of the United States, and payable in other countries. This amount would be thus added to our ability to pay for goods imported from those countries. If, for example, an American citizen purchase in New York a thousand barrels of flour for six thousand dollars, and export it to Liverpool in an American vessel and it is there sold for seven thousand dollars, a bill of exchange may be drawn against the proceeds and an invoice of goods of the value of seven thousand dollars purchased in England entirely liquidated, although at the Custom House at New York there would be an apparent balance against the country of one thousand dollars. But if, on the other hand, the thousand barrels of flour are exported in a British vessel the proceeds of the flour realized in New York and which can be applied to the payment of goods bought in England will be only six thousand dollars, and there will remain an actual balance against the country of a thousand dollars. This familiar example shows the importance of re-establishing our commercial supremacy upon the ocean; and I deem it, therefore, essential to our prosperity that the shipping interest of the country be fostered, not only as a nursery for seamen, but also as an essential agency in enabling the Government to institute and maintain specie payments. It is an interest also which in its development is as important to the States and people remote from the seacoast as it is to the maritime sections. Every addition to our facilities for the export of the products of the interior is as advantageous to the producers as to the merchants and shipbuilders of the coast.

While I do not anticipate that it will be necessary to delay resumption until our proper commercial position is regained, I am satisfied that the development of the navigation and shipbuilding interest will improve the credit and rapidly augment the wealth of the country.

The suggestions that I have made indicate my opinion that it will not be wise to resume specie payments while so large a part of the interest bearing debt of the country is represented by five-twenty bonds and held by European merchants, bankers and manufacturers. Questions that have been raised in regard to the nature of the obligation assumed by the Government in the issue of these bonds have undoubtedly deterred many persons from purchasing them as a permanent investment, and consequently they are largely held in this country and in Europe for speculative purposes, by persons who design to put them upon the market whenever the advance shall furnish a sufficient inducement, or whenever political or financial disturbances may create a demand for money for other purposes. It is probable that from $700,000,000 to $900,000,000 of these bonds are now held in Europe, and to a considerable extent by persons who will dispose of them under the influence to which I have referred. Such a panic as existed in Europe in 1866 at the opening of the Austrian and Prussian war would be likely to induce the return of a sufficient amount to this country for sale to embarrass business, and, in case of resumption, to cause the suspension of the banks. It is, therefore, in my judgment, essential that the large part of the five-twenty bonds be withdrawn and that other bonds be substituted in their place, issued upon terms and conditions which admit of no doubt. In fine, the practical question is not merely the resumption of specie payment as a measure by itself—that is not difficult—but the problem is to resume under such circumstances that the position can be maintained, not only in times of tranquility, but also in periods of excitement and peril. Our course, it seems to me, is plain. Every measure of the Government bearing upon the subject should tend to appreciate the value of our paper currency. It is probable that some decrease in the volume of paper will ultimately be necessary, and I therefore respectfully suggest that the Secretary of the Treasury be clothed with authority to reduce the circulation of United States notes in an amount not exceeding two millions of dollars in any one month. Thus will the country be brought gradually (it may be and yet without disaster) into a condition when the resumption of specie payments will be easy, if not unavoidable.

On the 1st of December, 1869, the principal of the public debt of the United States, not deduct-

ing bonds and cash on hand, amounted to $2,605,286,789. Of this amount the sum of $356,113,258 is represented by United States notes not bearing interest. The larger part of this is needed for circulation, but the amount can be reduced from the ordinary revenue of the country if Congress shall consider it expedient to make provision for such reduction. The fractional currency in circulation was $38,885,564 68, and there is no occasion for any legislation in reference to this item of the public debt. There were outstanding, also, certificates for gold deposited in the Treasury to the amount of $36,862,940. These certificates are redeemable on presentation. These three items amount in the aggregate to $431,861,763; and in making provision for the public debt they are not necessary to be considered. Of the loan of January 1, 1861, the sum of $7,022,000 is outstanding, and payable on the 1st of January, 1871. The loan of 1868 of $20,000,000 is payable in 1873. The bonds known as ten-forty bonds, amounting to $194,667,300, are not payable until 1874. The six per cent. bonds, payable in 1881, amount to $283,677,000. As the bonds known as '81's and ten-forties, amounting in the aggregate to $478,244,900, are not due and cannot be paid previous to 1874 and 1881, it is unnecessary to consider them in making provision for a new loan. The five-twenty bonds, amounting in the aggregate to $1,602,671,100, are either due or will soon become due, and it is to this class of the public debt, and to this class alone, that attention should be directed. Of this amount the sum of $75,477,800 has been purchased since March last, and the bonds are now held by the government. Before any measure for funding the five-twenty bonds can be consummated the government will be able to purchase at least $75,000,000 more. There will then remain on the first of July next about $1,450,000,000 of the five-twenty bonds in the hands of the public creditors. Of the entire indebtedness of the United States only the unimportant sum of $27,000,000 will be due and payable previous to 1874.

Under these circumstances it does not seem to me to be wise to authorize the funding of the whole amount of the five-twenty bonds, which, as is now anticipated, will be outstanding on the 1st of July next; but that $250,000,000 at least should be suffered to remain either for purchase or redemption previous to 1874. Should the sum of $250,000,000 be left for that purpose the entire public debt would be in a condition to be easily redeemed. Between 1874 and 1881 the ten-forty bonds could be paid and provision also made for the redemption of the bonds which will become due in the year 1881. It may be wise to reduce the proposed loan to $1,000,000,000, which would then leave for payment previous to 1881 the sum of about $670,000,000, or hardly more than $60,000,000 a year. Assuming that the proposed loan will be for an amount not exceeding $1,200,000,000, I recommend that it be offered in three classes, of $400,000,000 each; the first class of $400,000,000 to be payable in fifteen years, and to be paid in twenty years; the second class of $400,000,000 to be payable in twenty years and to be paid in twenty-five years, and the third class of $400,000,000 to be payable in twenty-five years, and to be paid in thirty years. The essential conditions of the new loan appear to me to be these:—First, that the principal and interest shall be made payable in coin: second, that the bonds known as five-twenty bonds shall be received in exchange for the new bonds; third, that the principal be payable in this country, and the interest payable either in the United States or in Europe, as the subscribers to the loan may desire; fourth, that the rate of interest shall not exceed four and a half per cent. per annum; fifth, that the subscribers in Europe shall receive their interests at London, Paris, Berlin or Frankfort as they may elect; sixth, that the bonds, both principal and interest, shall be free from all taxes, deductions or abatments of any sort, unless it shall be thought wise to subject citizens of the United States to such tax upon income from the bonds as is imposed by the laws of the United States upon income derived from other money investments.

There are two reasons, and each seems to me to be a controlling reason, why the bonds of the United States should be exempt from State and local taxes. If not so exempt, the amount of taxes imposed by the local authorities will be added to the interest the government will be required to pay, and thus the national government will be compelled to provide for taxes imposed by the local authorities, secondly, inasmuch as the ability to borrow may under some circumstances be essential to the preservation of the government, the power should not, even in times of peace and prosperity, be qualified by any concession to the States of the right to tax the means by which the national government is maintained. The right to use its lawful powers, free of any condition, restriction or claim of another, is an essential condition of sovereignty, and the national government should never surrender or equalify its power in this particular.

In offering the new loan citizens and subjects of other governments should receive the strongest assurances that the interest and principal are to be paid in coin, according to the terms of the bonds issued, without any deduction or abatement whatsoever. In order to avoid the necessity of employing agents for the negotiation of the loan, I respectfully recommend that a liberal commission be allowed to subscribers, and that those who first subscribe shall be permitted to select the class of bonds in which their subscriptions respectively shall be made. I further recommend, in connection with the proposed loan, that the banks established under the act to provide a national currency be required to substitute the bonds that may be issued under the proposed loan act for those now deposited as security for the redemption of their bills. Should any bank be unwilling to accept the new condition, provision should be made for the surrender of its charter and authority given for the organization of new banks to supply the deficiency thus created.

An essential condition to the success of the proposed new loan is the continuance of the present revenue system. A chief means by which the present holders of the five-twenty bonds can be induced to surrender them and receive a bond upon longer time and at a lower rate of interest is the certainty furnished by the magnitude of the national revenue that these bonds are soon to be redeemed. We must be prepared to offer them the alternative either of accepting the new bonds at a lower rate of interest or payment of the principal of the existing bonds.

When the five-twenty bonds shall have been funded to the amount of $1,000,000,000 or $1,200,000,000, the revenues can be reduced materially, and yet sufficient sums be raised to meet the ordinary expenses of the government, to pay the interest on the public debt and also pay $25,000,000 to $50,000,000 of the principal annually. Should our success in negotiating a loan be equal to my expectations, based upon the fact that the ability and disposition of the people of the United States to pay the public debt are sufficient to justify me in assuming that the bonds of the United States will command the highest rates in the markets of the world, we shall then be in a condition to enter upon the work of reducing taxation at the commencement of the next session of Congress.

On the 30th of June, 1868, the amount of outstanding three per cent. certificates and compound interest notes convertible into three per cent. certificates was $71,604,890; on the 30th of June, 1869, the amount outstanding was $54,991,410, showing a reduction of $16,613,480 in that form of indebtedness. On the 1st of December, 1869, the amount outstanding was still further reduced to $49,716,150, showing a total reduction in seventeen months of $21,888,740. The three per cent. certificates are a substitute to a considerable extent for the United States notes, being largely held by the banks as a portion of their reserves, and thus indirectly, though not to their full nominal value, they swell the volume of the currency. I recommend that a provision be made for the redemption of the three per cent. certificates within a reasonable time, and, as a compensating measure for the reduction in the amount of currency which would thus be caused, that authority be given to grant charters for banks in the States where the banking capital is less than the share to which they would be entitled to, an amount not exceeding $35,000,000 in the aggregate. The redemption of the three per cent. certificates and the additions to the banking capital might be so arranged as not to produce a serious disturbance in the finances or business of the county, while additional banking capital would be supplied to the sections now in need of it, and this without any increase of the volume of circulation.

Ship Canal across Cape Cod.

The Boston *Journal* says that a party of capitalists of ample means have organized their resources for the purpose of constructing a ship canal across Cape Cod, a project that has been much discussed, but which has never before assumed a practical shape. It is contemplated to build the canal in nearly a direct line from Buzzard's Bay to Cape Cod Bay, through a narrow neck of land separating those waters, which shall afford a sufficient depth of water to float the largest class of vessels. The canal will be 300 feet wide and deep enough to insure 24 feet of water at low tide. A company has been formed to carry out the enterprise, the land surveyed, and other preliminary measures taken, and they now only await a charter from the Legislature for requisite authority to commence the undertaking. It is stated that the persons who propose to achieve this important work are fully prepared to carry it out, and ask for no pecuniary aid from the State in furtherance of the object.

Massawippi Valley Railroad.

The Stanstead *Journal* says that the grading of the Massawippi Valley Railroad is nearly completed from North Derby to Ayer's Flat, and a part of the iron is laid. There are several fills to complete which are now trestled. In Hatley there are about two miles of grading to do on the contract of T. McGovern. From the outlet of Massawippi to Lennoxville the work is nearly completed.

☞ The official year of the Philadelphia and Reading Railroad closed on the 30th of November. The quantity of anthracite coal transported from Schuylkill county in 1869 was 3,688,904 tons; in 1868, it was 3,087,052 tons—an increase of 601,852 tons.

☞ The European and North American Railway, (between the St. John and St. Croix rivers, New Brunswick,) and the Fredericton Railway, between the junction at Hartt's Mills and Fredericton, were formally opened for traffic on the 1st inst.

☞ The piece of railway between Dorchester and Sackville, New Brunswick, was opened for traffic on the 13th inst. This road forms part of the "Inter-colonial Railway," having passed into the hands of the Dominion Government.

☞ The report of the Atlantic and Great Western Railroad for the year ending June 30, 1869, shows the earnings to have been $5,097,867, and the operating expenses $3,459,298 leaving a balance of $1,638,069.

☞ Owasso has voted $6,000, Big Rapids $45,000, and Sumner $15,000, in aid of the Owasso and Big Rapids (Michigan) Railroad.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, December 18, 1869.

Stock Exchange and Money Market.

Money has been in more general and more urgent request, and quoted firmer in price, call loans closing at from 7 per cent. currency to the same rate in coin, and strictly choice to good discounts at from 8@15 per cent. per annum. The main inquiry has been from speculative sources, chiefly for use at the Stock Exchange, and the Gold Board. The offerings of capital have been on a reduced scale, especially on bank account. The city banks have diminished their loan and discount averages, about half a million. They report a gain of $895,155 of legal tender notes, with a loss of $917,177 of specie, and $510,342 of deposits. The United Sub-Treasury had nearly 6¾ millions added to its currency reserve, last week. Its specie hoard, however, was cut down nearly 2⅜ millions. The currency reserve of the Treasury Department at the close of the week was $13,066,833, and the coin balance, $108,065,-868, including $37,983,840 on deposit on private account. Of these amounts, there were $9,943,-275 of currency, and $78,643,219 in coin, in the New York office. Much excitement and discussion were occasioned at the beginning of the current week, by the discovery of extensive alterations of $1,000 certificates of the New York State Bounty Loan, to the denomination of $10,000, and the imposition of the altered certificates, as collaterals, for loans, obtained from a number of banking institutions and private banking houses. Some talk has likewise been occasioned by discoveries of alterations of names, &c., on the face of registered U. S. Bonds, which had been stolen from the real owners, and the names, &c., changed to facilitate the sale of the bonds.

The specie reserve of the city banks according to the latest return is $29,716,362, against $19,-140,778 same time last year. The city bank deposits are now $182,179,798, against $189,-337,415 week ending Dec. 12 1868. The legal tender reserve amounts to $46,884,429, against $54,015,865 same time last year. The circulation now stands at $34,128,117, against $34,205,906 same time last year. The loans are now $252,-729,955, against $263,360,144 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $90,076,-553 a day, against a daily average of $112,668,564 the preceding week, and $93,530,644 the week ending with Nov. 27, 1869. The current week's exchanges average about $79,000,000 a day. The city banks, last week, reported a loss of $917,-177 of specie, and $510,342 of deposits, with a gain of $895,155 of legal tender notes. They reduced their loans, $506,041; and their circulation, $12,-351.

The city bank exchanges on Wednesday were $87,797,380.

National Bank notes to the amount of $155,100 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $319,558,901, against $282,-555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $19,814,629, leaving, with the existing 1,620 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,744,272. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,499,-050; and for the public deposits, $19,291,000—making a total of $361,790,050. The Treasury Department last week redeemed and destroyed $450,700 of worn and mutilated fractional currency, and issued $545,500 of new. The outstanding amount of fractional currency on the 1st of Dec., was $38,885,565, against $37,035,442 on the 1st of November, 1869.

The U. S. Sub-Treasury receipts, week ending with Dec. 11, were $2,659,329 in coin, (including $1,566,000 from customs duties,) and $10,915,002 in currency; payments, $4,973,659 in coin, (including $678,212 of coin interest,) and $4,151,661 in currency; balance at the close of the week, $91,-442,462, (including $78,643,219 of coin, and $9,-943,275 of currency,) against $86,050,874 at the close of the preceding week, showing an increase of $5,391,568. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $373,478 in coin, (including $317,323 from customs,) and $510,678 in currency; payments, $1,117,356 in coin, (including $65,000 of coin interest,) and $521,090 in currency. On Tuesday, receipts, $336,541 in coin,

(including $305,227 from customs,) and $206,472 in currency; and payments $180,617 in coin, (including $168,567 of coin interest,) and $416,240 in currency. The balance at the close of business on Tuesday stood at $87,974,694, (including $9,826,782 of currency, and $78,055,264 of coin,) against $89,816,439 a week previous; and $87,231,751 on Nov. 30, 1869. The aggregate receipts of the office in Nov. were $67,322,747, including $9,190,801 from customs; aggregate payments, $74,780,059, including $15,952,989 of coin interest.

The outstanding amount of coin certificates on the 1st of Dec. was $36,862,940, against $28,731,520 on the 1st of Oct., 1869. The Sub-Treasurer at this port, last week, retired $1,385,542 of coin certificates through the receipts for customs.

Government revenues have yielded very moderately, since our last, in both forms of customs and excises. The excises yielded about three millions; customs at the port of New York, $1,500,543, and at the outports about $500,000 (in coin) more, making the grand total income for the week equal to about $5,500,000 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 80 millions.

Gold has been less confidently dealt in, and with freer offerings, the price has declined, the range of the week having been from 121½@124, and the closing quotation on Wednesday 121⅛, as against 123⅞ the preceding Wednesday. The speculative demand has been on a reduced scale. The Gold Exchange Bank clearances have averaged about 30 millions a day. The customs inquiry has been light, having been less than $300,000 a day. The export drain did not reach $400,000 last week. The *Allemania* on Tuesday of the current week took out $76,000 in specie. Government marketed a million of gold on the 10th inst., at from 122.76@122.92, and another million on the 14th inst., at from 122.13@122.28.

The customs revenue of the port of Wednesday was $237,300.

The coin balances of the Government at this port on Wednesday morning, amounted a little over 78 millions.

The coin interest disbursements on Wednesday were $147,901.

The customs demand for Gold last week, averaged $261,000 a day; thus far, this week, it has averaged $311,275 a day, or equal to a weekly aggregate of $1,867,650. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $51,764, and since Jan. 1, $14,928,616, against $6,706,582 same time in 1868. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1869, has been $125,408,841, against $112,710,321 same time in 1868. At San Francisco, from Jan. 1, to Dec. 6, 1869, $7,869,089, against $8,016,643 same time last year.

The U. S. Treasury receipts from customs at all ports from July 1, to Dec. 11, were about 78½ millions.

The exports of specie, from this port, last week, were $380,415, against $483,320 same week last year; total, since Jan. 1, 1869, $30,917,244, against $69,837,446 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $678,212, and since Jan. 1, 1869, $89,085,346, against $81,674,517 same time in 1868. The specie exports from San Francisco, from Jan. 1, to Dec. 6, 1869, were $35,173,280, against $34,240,959 same time in 1868.

Foreign exchange has been less freely offered, and quoted firmer, though the demand has not been active. Bankers' prime sixty day bills on London closed buoyantly on Wednesday at 108⅝@108¾, and on Paris to 5.21¼@5.17½; sight bills on London to 109¼@109⅜, and on Paris to 5.17c.@5.13¾. The offering of produce bills has been up to a fair average this week. The week's exports of domestic produce have been to the currency value of $3,646,286, making the total since Jan. 1, 1869, $189,274,281, against $160,094,442 same time last year.

Government securities have been in pretty fair supply and less request at easier prices, influenced in part, by the decline in Gold. There has been scarcely any home investment demand. Most of the dealings of the week, apart from the Treasury purchases, have been on foreign and speculative account. Government bought in on Wednesday two millions of Five-twenties at from 111.50@112.19 net.

U. S. sixes of 1881 closed here heavily at 119@119⅛; U. S. Five-twenties of 1862, ex-coupon, 114@114⅛; U. S. Five twenties of 1864 at 112¼@112½; U. S. Five-twenties of 1865 at 112½@112¾; U. S. Five-twenties of 1865, consolidated, 115⅛@115¼; U. S. Five-twenties of 1867, 115⅜@115½; U. S. Five-twenties of 1868, 115½@115¾; U. S. Ten-forties at 109⅜@109⅝; U. S. Six per cent. currency bonds, 108½@108¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 1.	Dec. 8.	Dec. 15.

State bonds have been less sought after at lower and irregular prices.

Railway bonds have been in fair demand, and have held their own well, as to price. Messrs. Fisk & Hatch, the financial agents of the Western Pacific R. R. Co., have already marketed about two-thirds of the First Mortgage Bonds of the company (the aggregate issue of which was only $2,800,000,) and as the inquiry for these bonds is good, the balance of the loan will doubtless be speedily placed on the uniform basis of 90 per cent., and accrued interest, calculated in currency.

Railway and miscellaneous stocks have been moderately active and firmer, but close unsettled in price.

General business has shown less animation. Cotton has been quoted stronger, on a reduced offering. Breadstuffs and provisions heavy and irregular. Middling upland cotton closed strong and buoyant on Wednesday at 25½ cts. per lb. The stock of cotton now here is given at about 25,000 bales. The receipts at the port this week, have averaged about 6,500 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 976,300 bales, against 791,750 bales in 1868-'9; exports, same time 510,500 bales, against 384,500 bales same time in 1868-'9; stock on hand at latest dates, 800,000 bales, against 253,000 bales same date 1868. The exports of domestic cotton goods from this port, since Jan. 1, have been 20,268 pkgs., against 22,945 pkgs., same time last year. From Boston, 7,002 pkgs., against 7,846 pkgs. same time in 1868.

At the Live Stock markets, this week, Beeves have been in fairly active demand, at from 9@17c., per lb.; week's receipts, 6,702. Milch cows inactive, at $40@$110 each, receipts, 131. Veal calves in limited request at from 4@12c. per lb.; receipts, 1,029. Sheep and lambs in more demand at from 4@6c., and 5@7c. per lb.; receipts, 39,329. Swine in less request at 10@11c. per lb., all live weight; receipts, 12,327.

Foreign merchandise has attracted less attention at easier and irregular prices. The week's imports reached a specie value of $4,881,683.

Freights have been quiet and unsettled. For Liverpool we quote flour at 1s. 9d.@2s. by sail, and 1s. 10½d.@2s. by steamer, per bbl.; grain at 4½d.@5d. by sail, and 5d.@5¼d. by steamer, per bushel; cotton at $\frac{3}{16}$d.@¼d. by sail, and $\frac{5}{16}$d.@$\frac{7}{16}$d. by steamer per lb.; and heavy goods 15s. 0d.@30s. by sail, and 17s. 6d.@50s. by steamer, per ton. Total number of vessels in port on Wednesday, 481.

The balance in the Sub-Treasury on Wednesday was $88,570,850 99.

The New York exports, exclusive of specie, for the week ending Dec. 14, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$3,202,177	$3,646 286
Prev. reported	156,892,265	185,627,995
Since January 1	$160,084,442	$189,274,281

The imports for the week ending December 11, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$834,765	$1,041,720
Gen. merchandise	2,171,735	3,839,963
Total for the week	$3,006,500	$4,881,683
Previously reported	233,002,854	273,967,290
Since January 1	$236,098,854	$278,848,973

Stafford and Springfield Railroad.

At a meeting of the stockholders of this company at New London, Ct., on the 13th inst., the following gentlemen were elected directors: A. N. Ramsdell, H. P. Haven, W. W. Billings, William H. Borus, Benjamin Stark, A. Brandagee and Robert Coit, jr., of New London, and George M. Ives and E. H. Hyde of Stafford. At a meeting of the directors, held subsequently, A. N. Ramsdell was chosen president of the company, and Robert Coit, jr., treasurer and secretary.

☞ The first meeting of the Exeter and Salisbury Railroad Company was recently held at Exeter, and the following persons chosen as its directors: Eben F. Stone and Robert Couch of Newburyport; Thomas J. Clark of Salisbury; James H. Butler of Nottingham; Nathaniel G. Gilman, W. A. Currier, and Nathaniel Gordon of Exeter. The building of the road will be begun early in the spring.

☞ Sixty miles of the Vermont division of the Portland and Ogdensburg Railroad have been let at a price less than the estimates of the engineers. The contractors are equipped for work this winter and will begin within the next fortnight. Surveys are now being made for this road at White Mountain Notch.

☞ The New York and New Haven Railroad Company have declared a dividend of five dollars on each old share and one dollar and twenty-five cents on each scrip share of stock (free of Government tax) payable on and after Jan. 3, 1870.

☞ The Macon *Telegraph & Messenger* announces the completion of the Macon and Brunswick Railroad, and that the first through freight train arrived there from Brunswick on the 14th inst.

☞ The Portland, Saco and Portsmouth Railroad Company has declared a dividend of 3 per cent. in gold, payable 20th inst., to stockholders of record 11th inst.

☞ The rails are now being laid on the extension of the Portland and Oxford Central Railroad, from Buckfield to Canton.

☞ L. H. Eaton, Esq., of Bangor, has been appointed Superintendent of the Bangor and Piscataquis Railroad.

☞ The contract for the construction of the Lamoille Valley Railroad has been awarded to King, Puller & Co., of New York.

☞ The first train passed over the Suncook Valley Railroad on the 13th inst.

Selma, Rome and Dalton Railroad.

The Rome (Ga.) *Courier* says there are now 2,055 hands at work between Rome and Dalton, on the above named road. The grading will be commenced in the next thirty days. They have commenced laying the track on the Rome end, and will commence on the Dalton end in a few days. It is the purpose of Capt. Barney to have the cars running through to Dalton by the first of January, but the chief engineer, Col. Le Hardy, states that at latest the road will be completed by the first of March.

☞ The work on the Parkton and Manchester (Md.) Railroad is progressing finely. The contractors, Messrs. McGuken, Shower & Co., have a force of about eighty men at work on the eastern or Parkton terminus of the road. The first pick was struck about the middle of October, and about one mile of the most difficult part of the road has been graded. Mr. Gitt's engineer corps is engaged in surveying and leveling the line of the road. The contractors desire to complete the grading before next August.

☞ A meeting of the stockholders of the Lake Shore and Michigan Southern Railway Company will be held at the office of the company in Cleveland, Ohio, on the 29th inst., for the purpose of taking into consideration, and adopting or rejecting an agreement for the consolidation of this company with the Toledo, Wabash and Western Railway Company, which was entered into by the respective Boards of Directors of said companies on the 23d of October.

☞ The Michigan Air Line Railroad is completed and in operation from Ridgeway to Romeo. This road is to pass through Rochester, Pontiac, Pinkney, Jackson, Concord, Homer, Tekonsha, Union City, Colon, Three Rivers, Cassopolis, Vandalia and Niles. Its whole length will be about 280 miles. The distance from Chicago to Buffalo by this road will be about 482 miles.

☞ At the annual meeting of the stockholders of the Maryland and Delaware Railroad Company, at Easton, Md., on the 8th inst., the following officers were elected: President, General Tench Tilghman; Treasurer, Dr. G. W. Goldsborough; Directors, Wm. Slaughter, Dr. A. Hardcastle, J. P. Manlove, David Knotts, J. A. W. Powell, C. W. Huntington and N. Murray.

☞ The California and Oregon Railroad is being laid at the rate of a mile a day. After crossing the completed Feather River Bridge it will run forty miles in a direct line towards Chico over an almost level plain covered with grain fields. Twenty miles of this part of the road is graded, and the iron is being laid. Thirty miles of the road will be finished by the new year.

☞ The 43d Annual Report of the Baltimore and Ohio Railroad Company, being for the year ending September 30, 1869, was submitted at the recent monthly meeting of the directors, and adopted. This report will be published at an early day in pamphlet form.

☞ The St. Louis, Vandalia and Terre Haute Railroad is completed within five miles of Greenum, Cumberland county, and will probably reach Marshall by the 1st of January.

Journal of Railroad Law.

COMMON CARRIERS—LIMITATION OF COMMON LAW LIABILITY—CONTRADICTION OF BILL OF LADING.

The facts of the late case of Baker *vs.* The Michigan Southern and Northern Indiana Railroad Co., (42 Ill., 73,) are clearly and fully stated in the following opinion by

WALKER CH., J.—This was an action on the case brought against all of these companies for damages alleged to have occurred to eighty tierces of hams, the property of appellant, by delay in transporting the same between Chicago and Wheeling. The declaration is in the usual form for the violation of the common law duty of common carriers. It is alleged that the hams were shipped at Chicago, with a general undertaking to carry and deliver the same, in some of the counts, at Bridgeport, in Ohio, and in others at Wheeling, Virginia, within a reasonable time, and neglect and failure to so deliver the hams is averred, whereby they became and were injured and suffered damage. A summons was served on Charles M. Gray as freight agent of the several companies. The Michigan Southern and Northern Indiana Railroad Company appeared and filed the plea of the general issue. The other companies failing to defend, their default was entered. Afterward a trial was had by the Court and jury, resulting in a verdict in favor of the company, upon which the Court rendered a judgment, from which plaintiff below appeals to this Court.

It appears from the evidence, that on the 20th day of February, 1864, appellant, by Brown, his agent saw the general freight agent of the Michigan Southern and Northern Indiana Railroad, in reference to shipping these hams. Being assured by the agent that they would be shipped through in not exceeding seven days, the hams were sent on that understanding to the freight depot of the company for shipment on the 22d of the same month. The agent was informed of the danger of the heating of the hams, and the importance of dispatch in their transportation. The evidence shows that the hams were well packed, and not liable to heat in twenty days, at that season of the year. On the 24th a freight bill was made out, and whether inclosed to appellant by mail, or was delivered to some one else, does not appear. Brown who shipped the hams, says he has no recollection of having ever seen it before the time of the trial.

Brown testifies, that on the twentieth, when he made the contract for the shipment of the hams, there was no limitation in the agreement to ship the hams to Wheeling. But in the freight bill, dated on the 24th, the company limits their liability to their own line, and provide against liability for delays growing out of over accumulation of freights on the road. It appears that the hams did not reach Wheeling until as late as the 4th of May, 1864; and when received they were in a damaged condition, having heated and spoiled, so as to be worth some seven cents less per pound. After all of the evidence was heard, the Court directed the jury to find a verdict for the railroad company, to which appellant excepted.

This presents the question whether the testimony of Brown was admissible, as tending to contradict the freight bill, as that seems to be the only ground upon which the jury were directed to find for the company. We think this evidence was admissible, and should have gone to the jury, and they should have been left to say whether the hams were shipped under the verbal contract of the 20th of February, which contained no limitations or conditions, or under the written freight bill of the 24th, which did contain limitations on their liability. If the shipment was made under the verbal agreement, the company would have been bound to deliver within the specified time, or been liable for all damages occasioned by failing to perform their agreement. On the other hand, they would only be liable according to the terms of the freight bill. And inasmuch as appellant did not sign that agreement, either in person or by agent, and as it does not appear to have been delivered to appellant or his agent, we think it was a question proper to be left to the jury to say under which contract the hams were shipped. The agreement seems to have been made four days, and the hams were delivered two days before the date of the freight bill. In such a case it is a question for the determination of the jury, whether the contract of the freight bill was accepted by appellant.

If the hams were shipped under the verbal contract, the making and signing of the freight bill, with conditions and limitations, would not alter their liability under the verbal agreement, unless it was accepted as the contract of the parties. And it would be for the jury, as it bears date subsequent to the first agreement and the delivery of the freight, from all of the circumstances of the case, to say whether the freight bill was accepted as the agreement. It would have been an easy manner for the company, after making the contract, to have filled out and forwarded by mail, to the consignee, this freight bill, entirely different from the original contract, and the company could not by that means change their liability, unless such a change was accepted or ratified by the other party. These were questions for the determination of the jury and not of the Court. Nor does our practice warrant the Court in finding the facts and directing the jury how to find their verdict. In this the Court below erred.

It was urged in affirmance, that these companies were improperly joined as defendants. This is an action in tort, and no reason is perceived why the general rule should not apply to this as well as other cases of that character, that on the trial a verdict may be found against those found guilty, and an acquittal of those not guilty of the wrong. Such is believed to be the well established practice of the Courts of Great Britain as well as those of this country.

The judgment of the Court below is reversed and the cause remanded.

Judgment reversed.

☞ The Dubuque and Sioux City Railroad Company has declared a semi-annual dividend of 4 per cent. on the common stock, and a dividend of 1 per cent. out of the surplus assets, free, payable January 15.

Import Statement for 1868-'69 by Customs Districts.

The following statement issued by General Walker, Chief of the Bureau of Statistics, shows the aggregate value of imports into each customs district of the United States during the fiscal year ended June 30, 1869:

Gold value at foreign places of export.	
Alexandria, Va.	$8,532
Aroostook, Me	18,736
Alaska	21,709

Wiscasset, Me	88
Total imports by districts	$437,309,868

☞ John W. Mott is surveying for a railroad from Troy to Whitehall through Schuylerville, and has reached Saratoga with his survey.

Richmond and Danville Railroad.

The annual meeting of the stockholders of this company was held in Richmond on the 8th inst. From the Report of the President we learn that the receipts of the road for the year ending September 30, 1869, were $609,402 80; working expenses, $352,333 95; net earnings, $257,068 85—an increase of net receipts over 1868 of $37,978 15.

The entire bond debt of the company is $2,080,700, creating an annual interest of $124,842. This with the annuity to the State of $42,000, makes up the regular annual interest liability of the company.

Arrangements have been made with the South Side Railroad Company for a suitable connection depot and passenger shed at Burkeville, to be constructed at once, and the proposed connections at Richmond with the York River and Fredericksburg Railroads are progressing satisfactorily. The Piedmont Railroad, as heretofore, is operated under lease of this company.

The completion of sundry Southern railroads has tended much to augment the business and resources of the company.

The Georgia air line connection projected and under construction between Charlotte, N. C., and Atlanta, promises at no distant day to open a rich tribute to its northern connections, of which this line is naturally the chief. Other lines of more or less value, starting from Greensboro' and other points in North Carolina, are under way.

Since 1865, 2,352 tons of new rail have been laid, and during the same time there has been put down between Richmond and Danville 317,462 cross ties. At present the general condition of the road, bed and track is very good, and the same may be said of the rolling stock. In consequence of General Canby's order no election of officers was gone into.

Lease of the Great Western Railway of Canada.

The Chicago *Republican* of 11th inst., says that a party of distinguished capitalists and railroad men, comprising the President and three of the directors of the Great Western Railway of Canada, were in Chicago on the 9th inst., looking after railroad interests. They were accompanied by the engineer of the Great Western, and Assistant Superintendent of the Michigan Central. They left Chicago on the 10th inst., for Boston, there to meet the directors of the Michigan Central, for the purpose of completing arrangements for the lease of the former to the latter for a term of years, thus making an unbroken line from Chicago to Niagara Falls, under one management.

☞ The proposition to build a railroad from San Francisco to Los Angeles and San Diego is meeting with success. The people of the southern counties have signed a memorial to the Legislature to allow those counties to subscribe towards the construction of the road. The route as designated will pass through the San Joaquin and Yulare Valleys and through Los Angeles, San Bernardino and San Diego Counties.

☞ The *Evening Post* says that the directors of the Indiana and Illinois Central Railroad, from Indianapolis to Decatur, have just closed a contract with a firm in New York for the construction of the entire line within two years.

A New Route Between the Seaboard and the West.

There is, we perceive, a movement begun on the part of some eminent New York capitalists to extend the line of railroad, formerly known as the Virginia Central, (and which has been halted since the beginning of the war at the West Virginia boundary,) to the Ohio River at the confluence with the Big Sandy Branch, so as to constitute another Grand Trunk Line connecting the tidal waters of the Atlantic with the inland river system of the Mississippi Valley. The affairs of the old corporation have recently been put upon a new footing, and under the title of the Chesapeake and Ohio Railroad Co., the enterprise is to be pushed to completion with vigor.

The new line possesses several advantages of location peculiarly its own; and will be in a position to compete on most favorable terms with the four great consolidated tiers of lines upon which the East and West traffic is at present confined. In the first place it is centrally situated. Its eastern terminus will be at Richmond where it will connect with vessels drawing 14 feet water, and within easy reach of West Point and Newport News, where there is a depth of 21 and 22 feet, or of Norfolk, which is the best and deepest harbor on the Atlantic coast. From Richmond or Washington City the line, as now built, will have a length of 350 miles to the navigable waters of the Kanawha River; and a length of 438 miles to the mouth of the Big Sandy, distant by a proposed line 140 miles from Cincinnati. By a new survey of the eastern portion of the line, the line can be shortened 40 miles, which will thus render the Virginia route the shortest one between the great cities of the West and the tide water navigation of the Chesapeake Bay. Taking Cincinnati and Chicago as prominent points, the comparison of distances would be as follows:

	Richmond *via* Ches. & Ohio.	Washington *via* C. & O.	Washington *via* B. & O. R.	Balt. *via* Balt. & Ohio.
Cincinnati to.	564 m.	584	613	589
Chicago to...	860	880	852	830

Deducting 40 miles from the distances by the Chesapeake and Ohio, for abbreviations hereafter to be made, it will be seen that this advantage of distance will be in favor of the new route by from 40 to 150 miles between these great points of travel. The advantage in grades is even greater; the maximum grades on the Chesapeake and Ohio being 75 feet to the mile, against 90 feet on the Pennsylvania Central, and 116 feet on the Baltimore and Ohio. The line following the valleys of the James and Kanawha Rivers is remarkably direct between the inland and coast navigations. The Ohio is navigable at all seasons of the year to the mouth of the Big Sandy, which is about 350 miles below Pittsburg, and 250 miles below Wheeling. From the Big Sandy lines are being constructed on the South side of the Ohio to Lexington, Ky., and to Cincinnati.

☞ The Chesapeake and Delaware Canal Company have declared a cash dividend of 3 per cent., and an extra dividend of 30 per cent. in stock at par, the former payable on the 15th instant, and the latter deliverable on the 20th inst.

☞ John W. Garrett, Esq., has been unanimously re-elected President of the Baltimore and Ohio Railroad Company.

Baltimore and Potomac Railroad.

The grading of this road is progressing finely, and is approaching completion between the Patapsco and Patuxent Rivers. Its distance from the Washington Branch of the Baltimore and Ohio Railroad in a direct line is less than two miles easterly from Hanover switch. The line from the Patapsco to the Annapolis Railroad is remarkably straight, there being but few slight curves and no heavy grading. The line follows Stony Run Valley to near the head waters of that stream, in some places the channel of the same being diverted and its place occupied by the bed of the road.

Chesapeake and Ohio Canal.

The President of this company gives notice to the holders of its Preferred Debt, that all the overdue coupons maturing on or before the first day of July, 1854, (except coupons redeemed by the State of Virginia, as guarantor of the Preferred and Repair Bonds,) will be paid on presentation at the Banking House of Alexander Brown & Sons, in the city of Baltimore, on and after the third day of January, 1870.

The holders of the certificates of the company for coupons funded under the resolution of the President and Directors, passed July 29, 1853, are also notified that the interest in arrear upon their respective certificates to the first of October, 1869, will be paid at the same time and place.

Southern Pacific Railroad.

We have seen a map of the line of the Southern Pacific Railroad. From Norfolk to Bristol it is a straight line; from Bristol it goes to Nashville; thence *via* Jackson, Tennessee, to this city. From this city it is to go to Little Rock. From Little Rock the extension (called the Memphis and El Paso road) will run in a southwestern direction to Texarcana, thence to Dallas on the Trinity River, thence by El Paso and Fort Yuma to San Diego. One section of this line, from Jefferson to Paris, in Texas, one hundred and fifty miles in length, is now in process of construction, and a part of it will be open for business next spring. At the western end surveys are being made from San Diego and Fort Yuma.—*Memphis Sun.*

☞ A dividend of 11.39 per cent. has been declared on the First Preferred Stock of the Toledo, Peoria and Warsaw Railway Company. Such dividend will be represented by seven per cent. interest bearing scrip Certificates, having five years to run, which will be ready for delivery at the office of the company, 26 Exchange Place, on and after Jan. 1, 1870, to the stockholders at the closing of the books. The transfer books of the First Preferred Stock will close on 20th December, and re open after Jan. 1.

☞ The following gentlemen have been elected directors of the Mississippi, Ouachita and Red River Railroad Company: Jas. T. Elliott, W. W. Wilshire, Thos. P. Dockery, B. W. Martin, Thos. M. Bowen, J. E. Sickles, J. M. Lewis, S. W. Mallory, J. E. Bennett, Wm. M. Harrison, O. P. Snyder and Samuel H. Southerland. The new directors promise to go to work on the road immediately.

☞ The Pine Bluff *Republican* says it will not be long before work will be commenced at or near that place on the Little Rock, Pine Bluff and New Orleans Railroad. All the arrangements have been made, and the first ten miles of the road is now ready to let, to be made ready for the iron

☞ The grading and track laying of the Delaware, Lackawanna and Western Railroad is partially completed west of the Passaic River to Singack, and a locomotive will soon be placed upon the road to assist in the completion. Track laying is also progressing around Garret Mountains.

☞ The Eastern Shore Railroad, which runs from Crisfield to Delmar, and there connects with the Delaware Railroad, is now managed entirely by its own President and Board of Directors, instead of by the Philadelphia and Baltimore Railroad Company.

☞ The link of railroad been Winchester, Va., and Strasburg is being rapidly pushed to completion. Early in the coming year it will be finished and the cars running.

☞ Books of subscription to the capital stock of the Barnegat Railroad Company are now open. Within the next three years the road, it is promised, will be completed.

☞ P. H. Early, Esq., has been elected Superintendent, Col. John Severance, Chief Engineer, and W. D. Wells, Secretary, of the St. Joseph and Denver Railroad.

☞ The Taunton Branch Railroad Company has had its capital increased $200,000 to meet the expense of building and equipping the new road, the Attleborough and Providence.

☞ Montpelier, Vt., has voted to aid the Montpelier and Wells River Railroad Company in the sum of $200,000.

☞ Charles Delano has been elected President of the Amherst Branch Railroad Company.

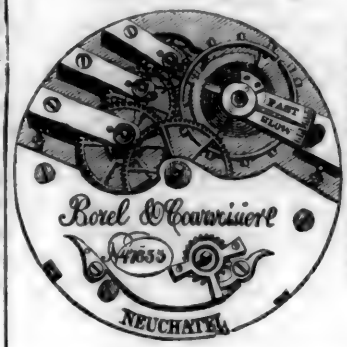
☞ About 1,000 men are at work on the railroad at the Pass of Del Mocha, near Orizaba.

Beebe's Button for Railroads.

This Button is cast weighs about a pound, through which is placed a screw or his flat fastener, with about six shoulders on each side for the button to revolve on; some buttons with straight shoulder across with screw, others with half shoulder to revolve on spike, it will require for a 30 ft. rail about 8 of these to secure the rail permanently. Of the hook spike or screw it will require 30 to a rail, so that the ties are perforated about 4 to 1. The cost between the two, including labor and loss of ties, is in favor of Beebe's button as 1 to 4. The strength about the same proportion. For sale at 78 Cedar street,

A. BEEBE.

RAILROAD CAR MANUFACTORY FOR SALE.



THE SUBSCRIBERS, EXECUTORS OF WM. CUMMINGS, deceased, will expose to sale at public vendue, on Thursday, the 20th day of January, 1870, at two o'clock in the afternoon, at Taylor's Hotel in Jersey City, (if not previously disposed of at private sale,) all of the following described lots of land and premises at Jersey City, in the County of Hudson and State of New Jersey, consisting of the RAILROAD CAR MANUFACTORY of the deceased, viz:

Lots Nos. 121, 123, 125, 127, 129, 131, 133, and 135, fronting on Washington street.
Lots Nos. 42, 44, 46, and 48 Steuben street: and
Lots Nos. 45 and 47 on Morgan street.
Together with the buildings, factories, shops, and improvements thereon erected.
Dated Jersey City, November 6th, 1869.

THOMAS W. JAMES
ISAAC I. VANDERBEEK,
Executors.

N. B.—The executors will consider any offer to dispose of the above at private sale, made before the vendue.

GENTS' SIZE.

NICKEL WATCHES.

The undersigned, agents for the celebrated Borel and Courvoisier's Nickel Equilibrium Escapement Lever Watch, most respectfully call the attention of officers and directors of Railroads to their superiority over any other Watch used for Railroad purposes. These movements are so constructed that they can be adjusted to heat, cold and position at a comparative small cost, and commend themselves to Conductors, Engineers and all Railroad employees that are required to have accurate time. Call and examine before purchasing of other makers. We can refer to parties who have had them in use eight years. For sale by watchmakers and jewelers throughout the country, and by

QUINCHE & KRUGLER, 8 & 10 John-st.,
Only Wholesale Agents for the U. S.

LADIES' SIZE.

THE WHARTON
Safety Railroad Switch.

☞ BOTH RAILS of the main track absolutely immovable, continuous and unmutilated. ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R.R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

Railroad Progress of the Country.

In reviewing the history of our National development during the year now drawing to a close, no one element of our material progress is more noticeable than the rapid extension of our railroad system throughout all parts of the country. At the beginning of 1869 there were 42,272 miles of railroad in operation in the United States, and at the present time there are at least 50,000 miles finished, or in an advanced stage of construction. In every State and territory we find the people busily engaged in the important work of laying the foundations of future railroads, some of local and others of National importance. The number of these enterprises now under way is not far from three hundred. Each State in the Union has, on an average, seven or eight separate railroads now in the course of construction. Maine has 8; New Hampshire, 4; Vermont, 6; Massachusetts, 5; Rhode Island, 5; Connecticut, 7; New York, 11; New Jersey, 7; Pennsylvania, 32; Delaware, 5; Maryland, 7; West Virginia 1, (the Chesapeake and Ohio,) and probably others; Ohio, 12; Indiana, 12; Illinois, 12; Michigan, 13; Wisconsin, 5; Minnesota, 7; Iowa, 13; Missouri, 12; Nebraska, 3; Kansas, 9; Arkansas, 3; Texas, 4; Louisiana, 4; Mississippi, 8; Alabama, 6; and in the Southern Atlantic States at least twenty great works are reported in various stages of progress—some lately undertaken and others in a forward state of completion. Many of these roads are hundreds of miles in length, tapping richly fertile and hitherto undeveloped agricultural districts, and drawing within the busy circle of the world's activities and industries sections before inaccessible, that, at no distant day, will add many millions annually to the material wealth of the nation. A very moderate estimate gives the aggregate length of the roads now in progress at not less than 15,000 miles, the greater part of which will be opened to business within the next two or three years.

So rapid is the extension of our railroad system throughout certain sections of the West and South, as yet but partially developed and thinly settled, that it has been feared by some that these great enterprises were being pushed to completion in advance of the commercial requirements of the country; and that to the withdrawal from the uses of commerce of the many millions needed for purposes of construction and equipment might be attributed in a great degree, the spasms to which the money market has been subjected from time to time during the past year.

We do not consider this fear well grounded, however. The purchase of Government bonds for the sinking fund is constantly throwing large sums of money on the market to seek investment, and the inducements offered by the railroad companies for the purchase of their interest-bearing bonds, is attracting a considerable share of this unemployed capital. There is more reason to fear that the active competition among the agents of rival enterprises has led, in some instances, to unwarranted statements and extravagant promises concerning the prospective business and earnings of certain roads now in contemplation or already building; but the purchaser finds his best guaranty in the character and reputation of the agent, as no house of good standing would lend its name and influence in support of any false or exaggerated statement made in the name of the company whose bonds it is negotiating.

To those who have carefully and intelligently studied the progress of railroad construction during the past five years, it is evident that our capitalists are fully impressed with the necessity for building better and more substantial roads than were formerly deemed necessary. The foolish policy adopted in former years, of using only the cheapest materials and performing the work of construction in a hasty and imperfect manner and at the smallest possible cost, has led to evils which have gradually, but surely, worked out their own cure. Steel rails are now being manufactured at home and imported from abroad in large quantities, and are rapidly superseding iron rails, notwithstanding their greater cost; improved joints of various patterns, nearly all possessing merits peculiar to themselves, are replacing the old fashioned chairs which afford but little security against breakage, and a marked improvement is noticeable in the quality of the rolling stock with which all of the new and many of the old roads are being equipped. The accommodations now offered for passenger travel on our principal through roads to the West are of the most superior order; and instead of the hard riding and uncomfortable cars formerly employed, we have coaches fitted up in a style of unrivalled elegance and provided with every convenience essential to the comfort of the travelling public. All these are gratifying evidences of the substantial progress of the nation toward a higher and more perfect civilization, and in them we also find a bright promise for the future of the railroad interests of the country.

Boston, Hartford and Erie Railroad.

Messrs. George M. Barnard, A. H. Rice, Oakes Ames, T. G. Cooledge and Lyman Nichols have been elected to fill vacancies in the Board of Directors of this company. The Boston *Advertiser* says that the choice of these gentlemen appears to have been received with great favor by all interested in the success of that important enterprise. It is understood that they were only willing to assume that relation provided that arrangements were consummated which should insure the speedy completion of the road, and their election indicates, what is now generally understood, that these conditions have been complied with. The character of the gentlemen elected gives assurance that the finances will be prudently and successfully managed, while the carry-

ing out of the preliminary conditions inspires confidence that they will be able to prosecute the work on the road so that it shall be opened in the shortest time.

Cincinnati, Sandusky and Cleveland R. R.

The gross earnings of this road for the fiscal years ending June 30, 1867, 1868 and 1869, have been as follows:

On the 18th of October, 1866, the Sandusky and Cincinnati Railroad, with its Equipment, was leased, for a period of 99 years, and renewable forever, to the Cincinnati, Dayton and Eastern Railroad Company, which Company at once assumed the direction and management of the said property. The Railroad at that time was in a greatly dilapidated and unsafe condition; and unless a large amount of money could be expended upon its superstructure, in re-laying the Road with new iron—indeed, unless the Road could be *re-built*—it could not have been much longer operated. Culverts, bridges, shops, station-houses ware-houses had been repaired so often, that rebuilding was the only way of securing the further use of the Road. The property, in its then condition, even under the capitalization scheme, was so heavily mortgaged that no more money could be obtained upon its security; but one course seemed open, which was the lease of the Road and Equipment, which was effected as stated above.

The new Company soon effected arrangements by which means were provided for reconstructing the Road, and improving and increasing its Equipment. And as this work had progressed satisfactorily, and as it was deemed very important to have the benefit of the old Mad River Railroad Charter, on the 9th of January, 1868, the lease of the Road, made in October, 1866, was surrendered, and by proper legal proceedings, in the Court of Common Pleas of Erie County, Ohio, the name of the old corporation was changed to the "Cincinnati, Sandusky and Cleveland Railroad Company," under which name the Road is now known and operated.

The condition of the Road-bed, and of the entire property of the Company, is such as to give satisfaction to the Stockholders. The Equipment has been largely increased in quantity, as well as improved in quality.

New offices of brick, with material improvements in the Passenger Depot and grounds, have been made in Sandusky. The Warehouse and Wheat Elevator have been extensively repaired and otherwise improved.

The workshops have been materially repaired; the passenger car house has been enlarged and rebuilt; new boiler and copper, and large and commodious paint shops have been erected, and the general condition of the property materially improved.

A large and valuable addition to the real estate and water front of the Company at Sandusky, has been purchased.

Seven miles from Sandusky, on the line of the Road, an extensive and valuable lime-stone quarry has been purchased, and extensive and valuable beds of ballasting have been acquired at different places along the line of the Road.

At Green Springs, a new and substantial station-house has been built.

One and a half miles south of Green Springs, a new and substantial bridge, with fine sand stone abutments, has been completed. At Tiffin, over Sandusky River, a large and valuable bridge, with new and substantial sand-stone abutments, has been built; and at this place, the station and warehouse, water-house and side tracks, have been materially improved and enlarged. At Carey, extensive mason work and planking over the stream running across and by the side of our tracks, has been done, and the water-house rebuilt.

At Forest, in connection with the Pittsburgh, Fort Wayne and Chicago Railroad, a large and substantial brick warehouse, with slate roof, has been completed, and the side tracks re-built.

At Patterson, a new-water house has been completed, and a new bridge, with substantial stone abutments, erected.

At Kenton, a large and valuable warehouse and lot adjoining the other property of the Company, have been purchased; a new water-house built, extensive filling been made for side tracks, and facilities for business greatly increased.

At Bellefontaine, a new side track has been put in, and improvements made upon the station-house.

At Tucker's Run, new abutments have been built, and a new bridge constructed.

At Urbana the station house has been improved.

At Tremont, a new warehouse and station-house and side track have been built.

At Springfield, a new brick station-house is in course of erection; a new bridge has been constructed over High Street, and the abutments to Buck Creek Bridge, and to both the Mad River bridges have been re-built with large blocks of sand-stone, the bridges repaired, and decks newly covered with iron roofing.

At Enon, a new station house, in place of one destroyed by fire, and a new warehouse and side track have been built.

At Dayton, the side tracks have been improved and enlarged, and the warehouse improved and repaired.

On the Road, about 90 miles of new and re-rolled iron has been laid, and about the same number of miles newly ballasted.

The Findlay Branch is being re-laid with new T rail of the 45 lb. pattern. This was absolutely necessary, or the operation of the Branch must have been abandoned. As an inducement to this work, the County of Hancock donated $12,000. This work is nearly completed, and will greatly contribute to the value of the business of the main line.

At Findlay, a new station-house has been completed, and the warehouse repaired and painted.

New cattle yards have been erected at many points upon the main line, and the whole property has been, and is being, placed in good condition, so as to enable the Company to economically operate the Road, and increase and develope the business upon its line.

The business of the road exhibits a most gratifying increase, although almost wholly of a local character; yet when we consider that a large portion of our Road and its Branch run through an undeveloped section of the State; and that while Massachusetts has about 240 persons to the square mile, and Ohio only about 60; that Ohio is capable of sustaining a larger population to the square mile than any of the New England States, we can form some anticipation of the probable increase of the local business of this Road within the next few years. This is more apparent when by reference to the statistics of the Counties through which our Road runs, we see that they are increasing in population and business at the rate of nearly nine per cent per annum.

The passenger summer travel to Sandusky, and the excursion parties from the line of the Road to the Lakes, are rapidly developing into a large and important business.

When it is considered that less than three years ago this line was avoided by all travelers on account of its unsafe condition, the present results are most encouraging.

Our relations with the Cincinnati, Hamilton and Dayton Railroad Company are of the most pleasant character, and we are now doing business together, under an arrangement made last Spring, which promises to be beneficial to both Companies. We now run our passenger, express and sleeping cars through from Cincinnati to Sandusky, and with the best results.

While we have an interchange of business with the Lake Shore Railway Company, yet we have not been able to secure such co-operation with that Company as our connection requires, and as the amount of business which we furnish that Road would in justice demand. The business from that line is given at Cleveland to the C., C., C. and I. R. R., when it could earn sixty miles more haul by carrying it to Sandusky or Clyde, and giving it to this road. The justice and policy of their doing so is apparent, and it is hoped it will not be long before we shall receive our fair proportion of business from the East for Cincinnati and other Southern points. We have the assurance of the co-operation of that Company in securing a fast freight line over our road between Cincinnati and the East, which, if effected, must add to our earnings.

The improvement in the channel of Sandusky Bay, by deepening it, so that at all times it can be entered by the largest class of vessels, is assisting our business; and the development of the mineral regions of Lake Superior, in connection with the large increase of smelting furnaces and rolling furnaces in Ohio, and the rapid development of the States lately in rebellion south of us, between which and us for so long a time there has been absolutely no intercourse, must add materially to the business of the north and south Roads, of which increase our line will receive its full share.

This Company has been operating the line of Road between Springfield and London, Ohio, with advantage to this Road. No compensation has been paid to its owners, except by way of repairs upon it. I regard it a subject of the greatest importance to our line that this piece of Road be extended to Columbus, and a permanent arrangement made by this Company for a lease of the same. This subject should receive immediate attention, and the control of the present line to London secured, so that we may rely upon our connection at Columbus—at some future time, if not directly. It is not probable that we can continue to enjoy the benefit of the London Branch without making some compensation for its use. The subject of continuing should receive the attention of our Board; for aside from the increased business it would give, its control seems to be important to us in influencing our connec-

tions with other roads, terminating, as our Road now does, at Sandusky on the north and Dayton on the south.

The entire earnings have been and will, up to January next, be required in repairing and rebuilding the Road and increasing its Equipment, by which time the Road and its Equipment will be in good condition, and extraordinary expenditures therefor will have ceased. The Directors have now no means of making a dividend to the Stockholders; but the Road has demonstrated during the past year *its* ability to pay a dividend on its Stock, and this may reasonably be expected yearly hereafter.

The line has been run with very great regularity and with remarkable exemption from accidents. No passenger has been killed, nor has any passenger even sustained the slightest injury, for more than two years and a half upon any of the passenger trains. The general success with which the Road has been run, is the best commentary upon the attention of those having the trains in charge; and the business of the Road justifies the commendation that the employees and subordinate officers have exercised great care and fidelity in the respective interests committed to their charge.

The company have 17 engines in good order, and 8 in fair running order, 21 passenger, 3 sleeping, 3 smoking and mail, 2 baggage and smoking, 7 baggage and express, 2 freight train caboose, 331 box, 63 stock, 151 flat, 48 hand and 19 push cars. Miles run by engines, 559,259, at a cost of 7.6 cents per mile for repairs, and 9.9 cents per mile for fuel.

CONDENSED BALANCE SHEET, JUNE 30, 1869.

Railway		$5,700,000 00
Materials		74,348 31
Bills receivable		900 00
Stocks and bonds		106,965 00
Due from railroad companies, agents and Post Office department		18,081 81
Insurance—estimated proportion for 12 months		5,550 00
Paid individuals on account to be offset by claims		2,573 25
Cash		6,038 20
Cash assets		13,786 53
Sinking fund		47,486 69
		$5,975,729 79
Capital stock		$2,757,750 00
Preferred stock		428,646 44
San., Day. & Cin., 1st mort.	$988,000	
Eastern bonds, (not extended)	9,000	
San. City and Ind.	350,000	
Cin., San. and Cleveland	1,035,056	
Cin., Dayton and Eastern	19,000	
		2,401,056 00

Pres't and Sup't.—RUSH R. SLOANE.

Directors.—Jacob W. Pierce, Israel M. Spelman, John C. Pratt, John S. Farlow, Boston, Mass.; Elisha C. Litchfield, New York; Wm. Wilshire, E. S. Hamlin, Cincinnati; Rush R. Sloane, Wm. G. Lane, John P. Thorpe, Geo. J. Anderson, Sandusky.

Secretary and Treasurer.—L. H. LATHAM.

Ass't Superintendent.—E. S. QUINTARD.

☞ The Kent County Railroad has been finished to Kennedyville, and the ballasting to that point is progressing as rapidly as the contractor can push it ahead.

Atlanta and West Point Railroad.

The earnings of this road for the fiscal years ending June 30, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$122,889 58	$130,986 41
" freight	205,733 05	203,231 88
" mail	7,028 07	8,649 96
" express	8,763 24	6,240 44
" miscellaneous	7,157 14	13,556 95
	$351,071 08	$362,665 64
Expenses, viz:		
Conducting transp.	$56,832 48	$59,810 39
Motive power	71,216 50	76,412 28
Maintenance of way	72,618 17	73,012 42
Maintenance of cars	9,538 43	8,722 93
Taxes	.....	4,614 81
	$210,205 52	$222,572 33
Earnings less expenses	$140,865 56	$140,093 31
From which deduct extraordinary expenses in 1868–'69, viz:		
Old claims, judgments, etc.	$9,931 49	
New cars	6,000 00	
Re-rolling iron rails	5,000 00	
		20,931 49
Balance net profits		$119,161 82

In 1868, the extraordinary expenses were $29,197 85, leaving the balance of earnings at the close of that year, $111,667 71. The percentage of ordinary expenses to gross receipts in 1869, is 61.3, against 61 for the previous year. The gross earnings show an increase of $11,594 56, and the net profits an increase of $7,494 11, which has enabled the company to continue the payment of 8 per cent. dividends, free of Government tax, and add a respectable surplus to reserved fund. The President in his report says:

This result is fully equal to the expectation of the Stockholders, and realizes the calculations of the Superintendent, and the hopes of the Board, as expressed in the last annual report.

The uncertainty of all Railroad investments is much increased by the growing policy of "State aid" in neighboring States as well as our own. No Railroad built with the capital of the shareholders, to satisfy the real wants of the country, can be long secure against a rivalry and competition, under the patronage of the State. No policy could be more unjust and oppressive than the policy of "State aid." It is a distinguishing feature in this policy, that the citizen who has built his own enterprize *with his own means, is taxed to build up rival enterprises, by which his own may be ruined!* In other words, he is forced to contribute money for the destruction of his own property. The effects of this policy are no longer left to theory. Proof is abundant, that roads will be built with little regard to the wants of the public, if men can organize and build them at the expense of the State. Hence, vast amounts of capital are wasted that might have been better employed—too apt to be followed by loss of credit, and the bankruptcy of the State, and general financial paralysis! Our Road has suffered, and will suffer, perhaps, more from the effects of this pernicious policy in a neighboring State than in our own; though to some extent, we shall suffer in both. The Board may, perhaps, however, safely repeat the remarks made in the last annual report. The Directors there say:

"We have suffered by the progress and completion of rival improvements, and will suffer further from the same cause. This was foreseen and predicted from the beginning of our enterprise. We have suffered still more from the war, and its direct and indirect consequences. This was *not* foreseen," &c.

Some roads are in progress which may affect our receipts injuriously, and others beneficially. The roads which may affect us injuriously, are the Selma, Rome and Dalton Road, the North and South Alabama Road, and perhaps, to some extent, the Griffin and North Alabama Road. Those from which we hope to derive benefit, are the Montgomery and Selma Road, the New Orleans and Mobile Road, the reconstruction of the Pensacola extension of the Alabama and Florida Road, the Air-Line Road, (if completed), and the Columbus and West-Point Road, if the same should be built.

Surrounded by so many difficulties, and increased and increasing competition, any strong and decided opinion upon the future would be hazardous, but with the advantage of the flourishing city of Atlanta as a *terminus*, and the business which still remains to us, and will continue to remain to us beyond competition, a strong hope his entertained by the Board that the Stockholders will continue to enjoy dividends equal to that of the past year.

When it is stated by the Superintendent, that there has not been a single failure of the mail on our Road *for three years*, it will scarcely be necessary to repeat the assurance that the operations of the Road have been conducted with great regularity, and that the officers and employees have generally performed the duties assigned them with commendable zeal and fidelity.

The company have 14 locomotives, 6 passenger, 4 baggage, 1 express, 2 cab, 1 shanty, 54 box, 18 stock, and 21 platform cars. Number of through passengers carried, 10,514; way do., 39,738—total, 50,252, against 42,982 in 1868, a increase of 7,270. Tons of freight transported, 54,535, against 40,480 in 1868, an increase of 14,045. The Superintendent in his report says:

Since our annual report, the management of the Montgomery and West Point Railroad passed, virtually, into the hands and control of the Central Railroad Company of Georgia. The interests of this company and ours, in reference to the transportation of all merchandise, travel, etc., from the Northern and Southern Atlantic seaboard to all points on the Montgomery and West Point Railroad; and the same in reference to travel and all shipments of freight eastward from the line of the latter being the same, and this power and control having been used *to its fullest extent*, you can form some idea of the embarrassments to which we have been subjected.

As the business of Columbus and the country contiguous is of vital importance to this road, I obtained a charter for a railroad from West Point to Columbus, and have had a thorough examination of the route made, and a careful estimate of cost complied therefrom. Without the construction and control of that line, we have no reliable guarantee of freights beyond our immediate local traffic.

The assets and liabilities of the company July 1, 1869, was as follows:

ASSETS.

Road outfit and real estate	$1,200,235 26
Bills receivable	21,357 20
Alabama and Florida Railroad Co.	26,586 29
Supply fund	2,500 00
Due by agents and connecting roads	28,091 50
Cash	59,622 10
	$1,338,392 35

LIABILITIES.

Capital stock	$1,232,200 00
Bonds of the company	47,000 00
Dividends unpaid	2,100 00
Due to agents and connecting roads	10,711 44
Profit and loss	46,380 91
	$1,338,392 35

President.—HON. JOHN P. KING.

Directors.—R. Peters, L. B. Lovelace, John E. Robinson, W. B. Berry, F. Phinizy, John F. Moreland.

Gen'l Superintendent.—L. P. GRANT.

Secretary and Treasurer.—WILLIAM P. ORME.

Canadian Railways.

The Toronto *Telegraph* gives the following list of railways either in course of construction in the Province of Ontario, or which it is intended to construct shortly:

Toronto, Grey and Bruce,
Toronto and Nipissing,
Toronto and Muskota,
Wellington, Grey and Bruce,
Norfolk,
Whitby and Port Perry,
Canada Central,
Kingston and Madoc, and
Great Southern.

In addition to these there are several extensive branches of existing lines proposed.

There may be one or two doubtful schemes in the list; but the greater number may be set down as sound, legitimate undertakings which will not be allowed to fall through, but be pushed on to be completed with the least possible delay.

Finance and Public Debt.

EXTRACTS FROM THE REPORT OF THE SPECIAL COMMISSIONER OF THE REVENUE.

The national revenue for the fiscal year ending June 30, 1869, was $370,943,747 24. The national expenditure for the same period was $321,490,597 75, leaving an excess of revenue over expenditure of $49,453,149 46.

The following table shows the relation of receipts to expenditures for each fiscal year since the termination of the war:

Years.	Receipts.	Expenditures.	Excess of Receipts.
1865-'66..	$558,032,620	$520,750,940	$37,281,680
1866-'67..	490,634,010	346,729,129	143,905 881
1867-'68..	405.638,083	377,340 285	28,297,798
1868-'69..	370,943,747	321,490,598	49,453.149

The amount of outstanding National indebtedness March 7, 1861, was $76,455.299 28.

During the four years of war which terminated in April, 1865, (April 1, 1861, to April 1, 1865,) the actual receipts of the Treasury were as follows:

From internal revenue	$314,337,317 01
From customs	280,861,618 45
From lands	1,812.083 80
From direct tax	4,668 259 31
From miscellaneous sources	74.120,413 37
Total receipts	$675,799,691 94

The receipts of revenue from April 1, 1865, to June 30, 1869, inclusive, during which period the larger portion of the expenditures has been directly in consequence of the war, were as follows:

From internal revenue	$967,207,221 41
From customs	729,991,875 97
From lands	7,402,188 28
From direct tax	9,017,217 30
From miscellaneous sources	194,949,122 13
Total receipts	$1,908,567,625 09
Amount of public debt less cash, and sinking fund in Treasury, June 30, 1869	$2,489,002,480 58
Deducting public debt at breaking out of war	76,455,299 28
Leaving sum borrowed for war purposes and not repaid out of above receipts	$2,412,547,181 80
To which add receipts as above.	2,584,867,817 03
Making total expenditures in 8¼ years of war and its effects.	$4,996,914,498 33
Deduct what but for war would have been average expenditure of Government, say $100,000,000 per year	825,000,000 00
Leaving	$4,171,914,498 33

which sum represents the cost of the war to the United States Government down to June 30, 1869.

To this sum should be added the value of the pensions now paid by the Government on account of the war, if the same were capitalized. This, at eight years' purchase of the present annual payment, would amount to about two hundred millions.

But this aggregate, however large, must still further be increased by other items if we would reach the true cost of the war to us as a people, the above representing only the expenditures of the National Government.

These additional charges are substantially as follows:

Increase of State debts, mainly on war account	$123,000,000
County, city and town indebtedness increased on account of the war (estimated)	200,000,000
Expenditures of States, counties, cities and towns, on account of the war, not represented by funded debt, (estimated)	600,000,000
Estimated loss to the loyal States from the diversion and suspension of industry, and the reduction of the American marine and carrying trade	1,200,000,000
Estimated direct expenditures and loss of property by the Confederate States by reason of the war..	2,700,000,000

These estimates show an aggregate destruction of wealth, or diversion of industry which would have produced wealth, in the United States since 1861, approximating $9,000,000,000—a sum nominally in excess of the entire increase of wealth, as returned by the census, from the whole country from 1850 to 1860.

The present gross annual product of the nation is estimated at $6,825,000,000 in currency. This estimate is based on a *per capita* product of $175.

The following is an estimate of the leading agricultural products for the current year:

Cotton 2,700,000 bales, 450 pounds each, at 25 cents	$303,750,000
Corn, 900,000,000 bushels, at 50 cts.	450,000,000
Wheat, 300,000,000 bushels, at $1 25	375,000,000
Oats, 275,000,000 bushels, at 50 cts.	137,500,000
Wool, 177 000,000 pounds (estimated clip of 1868), at 42½ cents	73,225,000
Tobacco, 225,000,000 pounds, at 16½ cents	37,128,000
Barley, 25,000,000 bushels, at $1 20	30,000,000
Hay, 25,000,000 tons, at $10	250,000,000
Rye, 25,000,000 bushels, at $1 10	27,500,000
Hides, 6,700 000 pounds, at $5 50	86,850,000
Potatoes, 150,000,000 bushels, at 60 cents	90,000,000
Buckwheat, 20,000,000 bushels, at $1	20,000,000
Flesh of animals, deducting value of hay and grain consumed	400,000,000
Dairy products, deducting value consumed of farm products previously enumerated	400,000,000
All other products of agriculture, including the annual increase in the value of cattle and horses, the value of fruits, seeds, and garden products, the annual addition to the value of farms and farm buildings, and implements made by labor not classified as mechanical (fences, drainage, &c.)	650,000,000
Total	$3,282,950,000

In respect to other wealth-producing industries, the following estimates are given:

Manufactures of cotton	$71,500,000
Manufactures of wool	60,000,000
Pig and bar iron	119,950,000
Leather manufactures	222,600,000
Manufactures of paper	72,000,000
Railway service	360,000,000
Fisheries	100,000,000
Total	$4,295,000,000

In regard to the amount of national securities which have been transferred to foreign ownership since 1862-'68, the Commissioner finds a wide difference of opinion among American and European bankers best capable from experience of forming an estimate, the minimum being, however, from $700,000,000 to $800 000,000.

But enormous as is this sum, the process of incurring indebtedness still continues as actively as ever. The account of the United States with foreign countries for the fiscal year ending June 30, 1869, may be exhibited substantially as follows:

Imports of merchandise (gold value)		$417,371,765
Exports (gold value)	$275,611,591	
Re-exports, &c	10,907,763	
		286,519,834
Excess of imports		$130,852,421
Less excess of foreign goods in bond, 1869 over 1868		14,702,079
Adverse balance 1868-'9 merchandise account		$116,150,342
Exports of specie and bullion		$42,915,966
Re-exports " "		14,222,414
Total		$57,138,380
Imports		19,654,776
Loss of specie and bullion		$37,483,604

If we suppose the excess of specie and bullion exports to have been devoted exclusively to the liquidation of balance incurred on the merchandise account, the remaining balance on this account to be settled for in some other manner would be $78,666,738. To this sum must be added the following other items:

Obligations for int. (paid), estimated	$80,000,000
Excess of freights carried in foreign bottoms	24,000,000
Expenditures of Americans in foreign countries	25,000,000

Assuming that the sums chargeable to smuggling and undervaluation of imports are counterbalanced by the undervaluation of exports, the sum total of the adverse balance of indebtedness of the United States to foreign countries will, at the present time probably average about $210,000,000 per annum.

To meet and settle this constantly increasing and adverse balance there would seem to be, under the present condition of prices and cost of production in the United States, but one resource, viz.: to remit certificates of indebtedness—national, State, or corporate. And this process is undoubtedly adopted, and goes on, month after month and year after year, without occasioning thus far any marked disturbance in the trade and commerce of the country.

As to the resumption of specie payments, Mr. Welles argues that unless resumption implies contraction it will cure but a small portion of existing evils. If it were possible to substitute 700,000,000 of gold dollars for the 700,000,000 of paper dollars in circulation, and to hold that amount in the country, there would be the same inflation of prices, the same disproportion between imports and exports, and the same inability to dispose of the products of domestic industry in foreign markets. To be sure, it would be impossible to retain such an amount of gold in the country except by laws of impossible barbarism; but wherein would the reduction of the gold currency then, through exportation, differ from the reduction of the present paper currency through a judicious and well-ordered withdrawal.

There is no such thing possible as the resumption and continuance of specie payments with a continuance of our abnormal system of foreign trade and exchanges; and for the simple reason that gold will not stay here, and would long ago have left us to the last dollar, had not the bonds of the National Government been available for the settlement of adverse foreign balances in the place of gold. We must reduce prices, so that foreign

nations will be willing, because it is for their interest, to exchange product for product. And to accomplish this, there must be contraction, for, to reduce prices permanentally and equitably, while maintaining $700,000,000 of irredeemable paper money, is simply an impossibility.

Seven hundred millions of paper could not be kept redeemable with less than seven hundred millions of gold, because with such an amount of currency it would inevitably be depreciated, and hence gold would bear a premium which every holder of paper would be desirous to realize. With four hundred millions of paper, on the other hand, a hundred millions of gold would probably be ample, because the currency, not being in excess of the wants of commerce, would not suffer depreciation, and, gold and paper being on otherwise equal terms, paper would be preferred for its greater convenience in use, just as in 1860 the banks were fully able to redeem all of their circulation which was presented for payment, although having but 18 cents of specie on each dollar of immediate liabilities. It is not the ratio between gold and paper that needs to be regulated, but the ratio between the amount of paper in circulation and the volume of National production and exchange, of which it is the instrument.

The Commissioner, in view of the above considerations, is constrained to believe that contraction, direct and undisguised, is the one necessity of the situation.

In considering the question of future taxation, the Commissioner estimates that at the present rates the surplus for 1869-70 will exceed that of 1868-69, viz: $80,000,000. The gain for the same time by reduction of expenditures is estimated at $26,000,000. We shall also gain, he thinks, by the elasticity of the revenue, say from $12,000,000 to $15,000,000. The sum of these items makes the estimated surplus for the current fiscal year $124,000,000.

The possession of a surplus so large invests with more than ordinary interest the question of its disposition. Shall the whole of the sum be applied to the reduction of the principal of the national debt, or shall a fair proportion of it be remitted to the people by the abatement or removal of their taxes? Of these two courses the Commissioner unhesitatingly declares his conviction that the latter is the more expedient—if indeed it is not absolutely imperative, demanded alike by the highest economical considerations and by the almost unanimous sentiment of the people. With this view he proposes that the sum of fifty millions be taken as the measure of the taxes to be removed or reduced, and that such reduction should be directed, first, to relieving industry as much as possible of unnecessary burdens, and allowing it to obtain its material at the minimum cost; and, secondly, to the diminution of the cost of the elements of living to the great mass of the people, in their capacity as consumers, irrespective of the consideration whether they are or are not producers of wealth.

The three principal sources of receipts under the internal revenue are the taxes on distilled spirits and fermented liquors, on tobacco, and on incomes. The rate of taxation on the first two of these has been fixed at a standard which the experience of the past year has proved to be most productive. The taxes on whisky, beer, and tobacco should not, in the opinion of the Commissioner, be modified, unless it is desired to repeat the disagreeable experience of former years, and to perpetuate the power of corrupt organizations.

The tax levied under the head of incomes is of a different character, and demands essential modifications. The Commissioner would recommend that, beginning with the next regular assessment, the present rate of five per cent. be reduced to three per cent. upon the net income of individuals. The reason for this recommendation is that the tax of five per cent. is excessive and constitutes a real grievance, being greater than that ever imposed by any other nation, except in extraordinary national exigencies. An additional reason is that an assessment of three per cent. would probably yield to the Treasury a sum very nearly equal to that at present collected; inasmuch as, while the reduction of the rate would afford a great and welcome relief to the classes who now pay, it would at the same time bring within reach of the tax great numbers who now either avoid giving in lists at all, or, while doing so, force the constituents of their income so as to escape contribution entirely.

In connection with this reduction of the general rate, the Commissioner would recommend that, while the absolute exemption to all persons should be allowed to remain as now fixed, namely, at $1,000, the exemption on account of rent should not be left indefinite, as at present, but should be strictly limited to an amount sufficient only to relieve from taxation the rentals of the laboring classes, for instance, $200. It is evident that no claim can be made for the exemption of rent to any extent which would not be equally valid in the support of the exemption of any other expenditure; and certainly high rents are as much a luxury as any form of expenditure, and as little deserving of economical sympathy. If the recommendation of the Commissioner in regard to the exemption of rentals should be adopted, he is confident that, notwithstanding the reduction of the tax from five to three per cent. the amount that will accrue to the Treasury from this source will not be impaired; and, but for the unfavorable condition of industry during the past year, there is great reason to believe that a very decided gain would be realized.

In respect to the proposition, seriously advocated in many quarters, that this tax should be wholly removed, the Commissioner thinks that the attention of the country should be called to the fact that this tax was paid during the year 1868 by so small a number as 250,000 persons out of the entire population, yet representing an aggregate income of not less than $800,000,000, exclusive of the amounts remitted by reason of rents and the minor exemptions. Allowing, then, for the families of these 250,000 contributors, it is evident that only about 1,000,000 of the population are interested in having the tax removed, while the remaining 38,500,000 of the people are interested in having it maintained.

To sum up what has been said upon the income tax, the Commissioner is of the opinion that a reduction of the rate of assessment from five to three per cent. upon individual incomes, without any other change in the law, would not reduce the receipts from this source by more than $5,000,000 at the outside; while, if the exemption of rent were to be limited as suggested, or even fixed at $500, there would be no falling off nor abatement in the receipts.

There then remains a large body of minor and miscellaneous taxes under the internal revenue, which together yielded in 1868 less than $50,000,000. Of these the Commissioner would recommend that the taxes embraced in what is known as Schedule A, viz.: the taxes assessed on watches, silver plate, pianos, billiard tables and carriages, should be entirely remitted. They are inquisitorial in character, highly offensive in collection, petty and contemptible in the revenue yielded. If these taxes are intended to have a sumptuary bearing, they are altogether out of the sympathies of modern civilization; if their object is to secure revenue, they are absurd failures. Ten times the amount could be obtained with the same effort in some other direction, and without exciting half as much of odium and hostility.

As best calculated to carry out the two objects proposed at the outset of this inquiry, the Commissioner would further recommend the repeal of the following taxes now levied under the internal revenue:

First—The whole body of what is known as special taxes or licenses—those levied on banks and bankers, and upon manufacturers and dealers in spirits, beef and tobacco, being, however, retained. The loss of revenue on this account will not be in excess of $10,000,000.

Second—The taxes on the gross receipts of railroads, stage coaches, insurance, telegraph and express' companies, canals, ferries, ships, barges and steamboats. The loss of revenue from this source will not be in excess of $7,000,000.

Third—The taxes on the sale of articles not otherwise specifically taxed. The receipts from this source will approximate $8,000,000.

Allowing, then, for the extreme possible loss under incomes, the amount of taxation above proposed to be remitted to the people in consideration of the present large and increasing surplus of receipts over expenditures would be in the neighborhood of $26,000,000.

Illinois Southeastern Railroad.

At the annual meeting of this company in Fairfield, on the 1st inst., the following gentlemen were elected directors for the ensuing year: Wm. H. Hanna, Wm. Wilson, D. L. McCawley, Chas. A. Beecher, Wm. H. Robinson, E. Bonham, C. C. Boggs, J. T. Fleming, R. P. Hanna, A. L. Johnson, Wm. G. Bowman, Chas. Carroll, Thos. S. Ridgeway. At a subsequent meeting of the directors, Thos. S. Ridgeway was elected President; Chas. A. Beecher, Vice President; E. Bonham, Treasurer; C. C. Boggs, Secretary. This company has five miles completed from Shawneetown northward, and ten miles more graded. Most of the work in White County remains to be done. The grading is completed through Wayne County and about half way across Clay County, to Louisville, which is six miles north of Flora, where the Illinois and Southeastern crosses the Ohio and Mississippi. The officers hope to have this part of the road, from Louisville to Fairfield, about 25 miles, ironed by the 1st of February.

North Carolina Special Tax Bonds.

The annual report of the Treasurer of the State of North Carolina shows that the amount of "Special Tax" bonds issued to Railroads is $12,600,000, viz:

Western (Coalfield) Railroad	$1,820,000
Western North Carolina	6,640,000
Wilmington, Charlotte and Rutherford	1,500,000
Williamston and Tarboro	300,000
Atlantic, Tennessee and Ohio	1,760,000
Northwestern North Carolina	1,080,000
Total	$12,600,000

☞ The San Francisco and North Pacific Railroad Company has been incorporated, with a capital of $8,000,000. The directors are: John F. McCauley, A. Harpending, John L. Romer, C. H. Harrison, A. W. McPherson, David T. Bagley and G. D. Roberts. This company proposes to build a railroad from Saucelito through Marin, Sonoma, Mendocino and Humboldt counties to Humboldt Bay.

☞ The extension of the Wicomico and Pocomoke Railroad, so far as grading is concerned, is now complete to the Wicomico River, and we learn from the President of the road, Dr. H. R. Pitts, that the work of track laying will be commenced as soon as the iron contracted for can be delivered, which will be shortly after Christmas.

☞ The coupons of the Orange, Alexandria and Manassas, and the Orange and Alexandria Railroad Companies, due January 1st, will be paid on and after that date, at the office of Robert Garrett & Sons, Baltimore.

☞ The Madison (Wis.) *Journal* says the point of connection between the Milwaukee and St. Paul and the Western Union Railroads has been decided in favor of Elkhorn. A branch road will be built to that point from Eagle.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, December 25, 1869.

Stock Exchange and Money Market.

Money has been in better supply and less demand, since our last, closing quite comfortably for the borrowing interests, on the basis of 6@7 per cent. on call, and 8@15 per cent. per annum in the discount form. The increase of the supply of Money has come largely from private sources. The city banks, while reporting a gain of $351,733 in specie, showed a falling off of over two millions in their legal tender reserve, and of about 1⅛ millions in their deposit averages. They add a little to their loan and discount item, but slightly reduced their circulation. The impending coin and currency interest disbursements will add some fifty millions to the amount of capital seeking employment, mainly at this centre. Of this amount, $31,841,560 of gold interest will be paid out on the public funds. The U. S. Sub-Treasury reduced its coin balance last week, some two millions; and the currency balance, 1⅛ millions. On Saturday last, the Treasury Department held 108⅛ millions in coin, and 13⅝ millions in currency.

The specie reserve of the city banks according to the latest return is $30,068,095, against $18,643,584 same time last year. The city bank deposits are now $181,073,455, against $183,077,228 week ending Dec. 19 1868. The legal tender reserve amounts to $⅓4 812,273, against $50,796,133 same time last year. The circulation now stands at $34,102,303, against $34,353,758 same time last year. The loans are now $252,834,914, against $262,434,180 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $94,250,101 a day, against a daily average of $90,076 553 the preceding week, and $112,668,564 the week ending with Dec. 4, 1869. The current week's exchanges average about $94,292 021 a day. The city banks, last week, reported a gain of $351,733 of specie, with a loss of $1,106,343 of deposits, and of $2,072,156 of legal tender notes. They increased their loans, $101,959; and reduced their circulation, $25,814.

The city bank exchanges on Wednesday were $80,052,551.

National Bank notes to the amount of $143,770 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $319,702,671, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $19,960,879, leaving, with the existing 1,620 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,741,792. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,499,050; and for the public deposits, $19,291,000—making a total of $361,790,050. The Treasury Department last week redeemed and destroyed $461,200 of worn and mutilated fractional currency, and issued $692,100 of new. The outstanding amount of fractional currency on the 1st of Dec., was $38,885,565, against $37,035,442 on the 1st of November, 1869.

The U. S. Sub-Treasury receipts, week ending with Dec. 18, were $3,914,424 in coin, (including $1,700,000 from customs duties,) and $4,425,683 in currency; payments, $5,922,216 in coin, (including $521,988 of coin interest,) and $5,942,146 in currency; balance at the close of the week $88,749,395, (including $76,635,426 of coin, and $8,426,812 of currency,) against $91,442,462 at the close of the preceding week, showing a decrease of $2,693,067. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $253,501 in coin, (including $211,950 from customs,) and $342,842 in currency; payments, $93,476 in coin, (including $56,712 of coin interest,) and $521,090 in currency. On Tuesday, receipts, $304,929 in coin, (including $210,673 from customs,) and $148,529 in currency; and payments $194,188 in coin, (including $184,274 of coin interest,) and $198,039 in currency. The balance at the close of business on Tuesday stood at $85,299,996, (including $8,256,590 of currency, and $76,906,192 of coin,) against $87,974,694 a week previous; and $89,816,439 on Dec. 7, 1869. The aggregate receipts of the office in Nov. were $67,322,747, including $9,190,801 from customs; aggregate payments, $74,780,059, including $15,992,989 of coin interest.

The outstanding amount of coin certificates on the 1st of Dec. was $36,862,940, against $28,781,-

520 on the 1st of Oct., 1869. The Sub-Treasurer at this port, last week, retired $1,486,681 of coin certificates through the receipts for customs.

Government revenues have been on a moderate scale, since our last. The excises yielded about $3,650,000; customs at the port of New York, $1,609,681, and at the outports about $550,000 (in coin) more, making the grand total income for the week equal to about $6,241,600 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been about 83½ millions.

Gold has been offered freely and has been decidedly lower, on a less confident demand, from both speculative and mercantile buyers. The range of the price, during the week, was from 119¾@122⅛, and the closing quotation on Wednesday 120⅞. On Monday, a Washington dispatch was published, announcing a partial suspension of the government gold sales, which announcement tended to stimulate purchases, mainly on speculative account. Later in the day the purchasing demand fell of, and the price receded again. The customs demand has been on a reduced scale, while the export inquiry has been very limited. The dealings on Wednesday indicated a stronger market, especially toward the close, with a more confident purchasing call.

The customs revenue of the port of Wednesday was $163,204.

The coin balances of the Government at this port on Wednesday morning, amounted about 77 millions.

The coin interest disbursements on Wednesday were $16,675.

The customs demand for Gold last week, averaged $283,335 a day; thus far, this week, it has averaged $211,315 a day, or equal to a weekly aggregate of $1,267,890. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $45,536, and since Jan. 1, $14,734,162, against $6,764,924 same time in 1868. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1869, has been $127,106,469, against $114,309,321 same time in 1868. At San Francisco, from Jan. 1, to Dec. 6, 1869, $8,039,714, against $8,139,338 same time last year.

The U. S. Treasury receipts from customs at all ports from July 1, to Dec. 11, were about 81 millions.

The exports of specie, from this port, last week, were $309,946, against $274,543 same week last year; total, since Jan. 1, 1869, $31,227,190, against $70,109,991 same time last year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $521,998, and since Jan. 1, 1869, $89,607,344, against $82,009,517 same time in 1868. The specie exports from San Francisco, from Jan. 1, to Dec. 11, 1869, were $36,259,476, against $34,240,959 same time in 1868.

Foreign exchange has been more freely offered at easier and irregular rates, on a light trade. Bankers' prime sixty day bills on London closed buoyantly on Wednesday at 108⅜@108⅝, and on Paris to 5.20@5.17½; sight bills on London to 109@109¼, and on Paris to 5.16¼c.@5.15. The offering of produce bills has been less extensive this week. The week's exports of domestic produce have been to the currency value of $3,503,920, making the total since Jan. 1, 1869, $192,778,201, against $163,760,659 same time last year.

Government securities have been in pretty fair supply and quoted cheaper. The demand has been on a limited scale, though it was seemingly on the increase toward the close. A livelier call is looked for, as the probable consequence of the impending heavy interest disbursements. The latest transactions on Wednesday showed more firmness, in the ruling values.

U. S. sixes of 1881 closed here heavily at 118¾@118⅞; U. S. Five-twenties of 1862, ex-coupon, 113¼@113⅜; U. S. Five twenties of 1864 at 111⅝@111⅞; U. S. Five-twenties of 1865 at 111¾@112; U. S. Five-twenties of 1865, consolidated, 114⅜@114½; U. S. Five-twenties of 1867, 114½@114⅝; U. S. Five-twenties of 1868, 114⅞@115; U. S. Ten-forties at 109@109⅛; U. S. Six per cent. currency bonds, 108¾@109.

The latest quotations at the London Stock Exchange compare as follows with former returns:

State and railway bonds have been generally in moderate demand at about former prices.

Railway and miscellaneous share property has been moderately active, closing firmly and buoyantly.

In general business, there has been less animation, though buyers have had any existing advantage as to price. Middling upland cotton closed heavily on Wednesday at 25⅛ cts. per lb. The stock of cotton now here is given at about 28,000 bales. The receipts at the port this week, have averaged about 5,500 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 1,090,350 bales, against 871,750 bales in 1868–'9; exports, same time 575,275 bales, against 435,750 bales same time in 1868–'9; stock on hand at latest dates 326,500 bales, against 276,125 bales same date 1868. The exports of domestic cotton goods from this port, since Jan. 1, have been 20,580 pkgs., against 23,034 pkgs., same time last year. From Boston, 7,076 pkgs., against 8,193 pkgs. same time in 1868.

At the Live Stock markets, this week, Beeves have been in more demand, at from 9@21c., per lb.; week's receipts, 5,710. Milch cows inactive, at $40@$110 each, receipts, 108. Veal calves in slack request at from 8@12c. per lb.; receipts, 934. Sheep and lambs in fair demand at from 4@9½c., and 5@9c. per lb.; receipts, 37,391. Swine in less request at 10¼@11c. per lb., all live weight; receipts, 13,201.

Foreign merchandise has been in limited request at drooping prices. The week's imports reached a specie value of $3,704,216.

Ocean freights have been comparatively dull, and rates have been depressed. For Liverpool we quote flour at 1s. 6d.@1s. 9d. by sail, and 1s. 9d. by steamer, per bbl.; grain at 3d.@3½d. by sail, and 4d.@4½d. by steamer, per bushel; cotton at 3/16d.@¼d. by sail, and 5/16d.@⅜d. by steamer per lb.; and heavy goods 15s. 0d.@30s. by sail, and 17s. 6d.@40s. by steamer, per ton. Total number of vessels in port on Wednesday, 486.

The balance in the Sub-Treasury on Wednesday was $85,188,135 01.

The New York exports, exclusive of specie, for the week ending Dec. 21, and since the beginning of the year, compare as follows:

	1868.	1869.
For the week	$3,666,217	$3,503,920
Prev. reported	160,094,442	189,274,281
Since January 1	$163,760,659	$192,778,201

The imports for the week ending December 18, and since the beginning of the year, have been as follows:

	1868.	1869.
Dry goods	$691,940	$1,043,778
Gen. merchandise	1,100,305	2,660,438
Total for the week	$1,792,245	$3,704,216
Previously reported	236,008,854	278,848,973
Since January 1	$237,801,099	$282,553,189

Dividend Notice.

ROME, WATERTOWN AND OGDENSBURG RAILROAD, VICE PRESIDENT'S OFFICE, No. 12 COLLEGE PLACE, NEW YORK, Dec. 22d, 1869.

THE Board of Directors of this Company, have declared a semi-annual dividend of (5) five per cent. free, payable on and after the 15th January proximo. Transfer books will be closed on the 25th inst., and so remain till date of payment. Stock registered in New York, will be paid at the Mercantile Bank for a period of sixty days.

MARCELLUS MASSEY,
Vice President.

3t52

Michigan—Its Favorable Financial Condition.

From the Report of the Treasurer of Michigan for the fiscal year ending November 30, 1869, we learn that during the year, while the entire taxation by the State amounted to only $1,032,457, including all the specific taxes, of which railroads and insurance companies alone yielded over a quarter of a million, the State debt has been decreased by the sum of $570,000, and the total bonded debt is now only $3,043,578 48. At the close of the year there was a cash balance in the Treasury of upwards of $830,000. Michigan is hampered in the payment of her debt by the fact that it is not due, and the money flows into the Treasury faster than it can be used. It is not allowed to be idle, however, as the item of more than $38,000 received during the year for interest on State deposits shows. None of the interest bearing debt becomes due before 1873, and less than half a million will become due before 1878. The total receipts during the year were $3,246,813 74, and the total expenditures were $2,412,724 02. Among the latter were several very generous appropriations to reformatory, charitable and educational institutions, the insane, deaf, dumb and blind asylums receiving $144,000, the reform school, $56,000, the agricultural college, $45,000, and the geological survey, $5,000. The towns feel so rich and enterprising that they have deposited with the State Treasurer close upon a million and a half dollars in bonds to aid the several railroads now building.

Philadelphia and Reading Railroad.

This company has formally notified the Stock Exchange of its purpose to issue $5,000,000 new convertible bonds, in the amounts and at the dates following: $1,500,000 January, 1870, and $1,000,000 July, 1870, convertible any time after issue; $1,000,000 January, 1871, convertible in 1872; and $1,500,000 1871 or 1872, as required, on giving 60 days' notice, not convertible until 1872. Of these bonds, $2,000,000 have been taken at par by McCalmont Brothers & Co., of London, and the remainder also at par, by McKean, Borie & Co., of Philadelphia. This new issue is to provide for the building of new branch roads, equipments, etc.

☞ The following gentlemen have been elected directors of the South and North Alabama Railroad Company: F. M. Gilmer, Jr., H. P. Lee, E. C. Hannon, Josiah Morris, Bolling Hall, Edmund Harrison, W. G. Farley, J. P. Stow, W. J. Bibb, Thos. G. Glasscock, Luke Pryor, J. T. Tanner, Z. Freeman. E. M. Gilmer was elected President.

☞ Track-laying on the Iowa Falls and Sioux City railroad has reached a point within three miles of Cherokee, and regular trains will soon be running to that place which is sixty miles east of Sioux City.

☞ The coupons of the Arkansas State bonds, falling due Jan. 1, 1870, will be paid on presentation at the American Exchange National Bank, New York.

☞ The formal opening of the new railroad from Camden to Medford, N. J., took place on the 20th inst.

HARVEY FISK. A. S. HATCH

OFFICE OF FISK & HATCH,

BANKERS AND DEALERS IN GOVERNMENT SECURITIES,

No. 5 NASSAU ST., NEW YORK.

Many holders of Government Bonds, who would be glad to capitalize the difference between them and some of the Railroad Bonds offered in the market before the proposed funding of the public debt, at 4 or 4½ per cent. interest, shall materially reduce the profit of the exchange, are hesitating only for want of satisfactory assurance as to *which* of the latter are *safe*.

This caution is necessarily and wisely felt and exercised as to all that class of capital which seeks secure investment rather than speculative or business risks.

Transfers of capital from securities which have, from special causes, reached a high premium, to those of more moderate cost, are prompted by a wise and prudent forethought, when the larger profit from the investment can be secured without the sacrifice of the security with which the invested capital should be guarded.

The fact that the government is rapidly buying up its own bonds imparts to them for the time being a market value in excess of their intrinsic value for investment, and disproportioned to the market price of other perfectly reliable and substantial securities.

The difference in price between them and other bonds does not necessarily imply a like difference in intrinsic value, and it MAY be capitalized with entire safety if a proper selection is made.

The message of the President of the United States and the report of the Secretary of the Treasury express the belief of the whole country that the improved credit of the nation will enable them to fund the Five-twenty bonds, at not over 4½ per cent. interest, within a very short time.

Persons having under consideration the subject of funding their Five-twenties now, while it may be so advantageously done, or of new investments, will find in the FIRST MORTGAGE SIX PER CENT. GOLD BONDS OF THE WESTERN PACIFIC RAILROAD COMPANY—secured by a mortgage of only $2,800,000 on a property worth at least $10,000,000—the required element of safety, combined with reasonable income.

To meet the wants of those who may desire to invest their incoming Revenues, due January 1, we will receive in payment for the FIRST MORTGAGE BONDS OF THE WESTERN PACIFIC RAILROAD COMPANY remaining unsold, gold coupons of the United States, and Central and Western Pacific Railroad bonds, maturing January 1, at the full market price of gold.

The bonds are $1,000 each. Interest payable January 1.

Principal and interest payable in gold in New York.

Full and satisfactory information will be given upon application in person or by letter.

FISK & HATCH, Bankers.

☞ The first section of the Kansas City and Santa Fe Railroad, extending from Olathe to Ottawa, has been let to Messrs. D. L. Wells & Co., of Milwaukee, to be completed by the 1st of July next. Mr. B. H. Edgerton is the engineer in charge of the road.

Journal of Railroad Law.

RAILROAD COMPANIES—NOTICE TO OWNER OR CONSIGNEE—WHEN LIABILITY OF COMMON CARRIER TERMINATES AND IS CHANGED TO THAT OF WAREHOUSEMAN—DEFINITION OF ORDINARY CARE AND DILIGENCE.

The facts of the late case of The Chicago and Alton Railroad Company *vs.* Scott 42 Ill. 132 are as follows:

On the 11th day of October, 1865, the appellee delivered to the appellant, in Springfield, twenty seven sacks of wool, to be transported by appellant's railroad to Chicago. The wool was consigned to Bixby, Hall & Livermore, commission merchants, in Chicago. The wool reached Chicago on the 13th day of October, and on the 14th day of that month was stored by the appellant in its depot, to await the order of the consignees. On the 16th day of October about six o'clock in the evening, a fire broke out in a feed-mill, unconnected with the depot, and on the opposite side of the street, which within half an hour's time communicated itself to the depot, and consumed it with its contents. An action was thereupon commenced by the appellee to recover the value of the wool, of the appellant, and upon the trial, the jury found for the appellee, and a motion for a new trial made by the appellant being overruled, this appeal was taken.

The particular facts upon which the liability of the company depends, are set forth in the following opinion of the court by

Breese, J.—The wool which was destroyed was placed on appellant's cars at Springfield, on the eleventh day of October, to be carried to Chicago, a distance of about one hundred and eighty miles, ordinarily run by freight trains in ten hours. It must have reached Chicago at farthest on the twelfth, and was then suffered to remain on the track in the car until the fourteenth, when it was placed in a building used by appellants as a warehouse, in which it was consumed by fire on the evening of the sixteenth. This court said in the case of Porter *vs.* Chicago and Rock Island R. R. Co., 20 Ill. 407, that carriers by railroad were neither bound to deliver the goods carried, to the consignee personally, nor to give notice of there arrival, to discharge their liability as carriers. But they must take proper care of the goods by safely storing them, or by some other act. When the articles have reached their destination and have been removed and stored in a warehouse owned by the carrier or by some other party, the duty of the carrier is terminated, and, if the carrier be the owner of the building in which the goods are stored, his liability changes to that of a warehouseman and in the same case, we say, when the goods have then reached their destination the owner or consignee by the use of diligence may be there to receive them and take them into his own control, and failing to do so, the presumption should be that he has elected to permit them to be stored by the company, to be held as warehousemen or keepers for hire. The goods are then placed in precisely the same situation as goods in any other warehouse, and the owner has the same opportunity to establish the liability of the company in their new capacity of warehousemen, as he would have, in any other case of a warehouseman.

On reflection, it would seem, if the carrier is not required to give notice to the owner or consignee of the arrival of the goods, he could not know, by the use of any ordinary diligence, when they arrived. Not knowing this important fact, he could not be there to receive them. In this very case, the goods being shipped on the eleventh, a reasonable calculation would be they would reach Chicago on the next day; but, as every one knows, who has transacted business with railroads, as carriers of goods, no calculation can be made when they will deliver what they have received. A better rule would seem to be, that the owner or consignee should be notified of their arrival at the earliest practicable moment, after which, if not removed by the owner or consignee, they might be regarded as at their risk as common carriers until they are stored, for the goods remain under the control of the carrier, against whom the law raises every presumption, and requires of him the exercise of the highest diligence, exonerating him from loss in no case, except such loss as might be occasioned by the act of God or the public enemy. But the rule is settled, that no notice is necessary to the consignee, and if he is not present to receive the goods, which he has no means, by the use of ordinary diligence, of knowing have arrived, the carrier can store the goods safely in a suitable warehouse, to await the demand of the consignee. When thus stored, the duty of the railroad as a common carrier terminates, and that of warehouseman begins. The warehouse must be a safe and secure place. Thomas *vs.* Boston and Prov. R. R. Co., 10 Metc. 472.

The first question then to be determined is, was this wool stored in a suitable warehouse on its arrival at Chicago? The answer to this is to be looked for in the evidence in the record, and for an able and careful anylysis of it, and which we have tested by the record, we are greatly indebted to one of the counsel for appellee.

The weight of the testimony establishes, most clearly, the fact, that the warehouse, in which this wool was stored, was not safe or suitable. It was a wooden building, two stories high and about eighty by forty feet, originally built for a coal warehouse, and so constructed that the coal trucks could be run from the river side over the street and the contents poured down into the building. The building was tall, between sixteen and twenty feet, from the sills to the roof. It was near a feed-mill worked by steam, where the fire originated, and lumber was piled up around it. The building had nothing but a shell roof, nothing but boards and shingles, and no floor between the first and second story, so that there was nothing between the roof and the freight to protect it. One witness, Harris, says "this depot was a flash in the pan, it was all open."

Such a building, it is evident, afforded quite an insufficient protection to freight stored in it, and when we consider by what inflammable materials it was surrounded, being located in a lumber and wood yard, we are satisfied it was not a suitable or safe place in which to store valuable property. The liability to take fire from an adjacent steam-mill was very great, and the difficulty in extinguishing it was rendered insurmountable by the piles of lumber interfering with the movement of the fire engines.

The whole evidence shows it was not a fit building into which freight should be stored. A fire proof building is not required, but a safe one is.

The next question is, when the wool was placed in this insecure building, did the company have a sufficient guard or watch in and about it? Was it under the charge of careful and competent servants. The case of Porter *vs.* The Chicago and Rock Island R. R. Co.; *ante*, and all the other cases, pre-suppose, when the goods are stored, they shall be under the charge of careful and competent servants of the company. The evidence on this branch of the case is equally conclusive as that in regard to the insecurity of the building. That being so very insecure, imposed a higher degree of vigilance on the part of the company, and they should have added to its security by the constant attendance of competent watchmen.

What is the fact in this case? The only watchman on the premises was a one-armed man, and devoid of ordinary firmness and courage, incapable, by his loss of an important member, to give much aid in removing the goods, when the fire took place. All the witnesses concur in saying, if there had been a competent watchman there, or men to attend to the warehouse, with the aid of outsiders, who were present in great numbers, much of the property might have been saved. There seemed to be no parties there ready to save the property, not one of the railroad men to open the doors, so that the property might he reached. The one-armed watchman and one Goodrich, the chief clerk in the freight office, were the only employees of the company that were present, and who did nothing and attempted nothing, in the way of saving the goods. The next question, did the company, by their servants, and agents, make timely and sufficient efforts to save this wool?

No effort is shown to have been made until the roof was on fire rendering it very hazardous for any one to enter the building. Before that the evidence is conclusive that sufficient opportunity was presented to have saved much of the property, had proper efforts been made, which were not made. The law demands that every reasonable exertion should be made to save goods exposed as this wool was exposed. No authority is necessary to sustain this proposition, for it results from the general principle, that a warehouseman is bound to use ordinary diligence in the care of goods intrusted to him. There seems to be no excuse for this negligence by the company. There was time enough, if there had been any brains there, in the employment of the company aided by a thousand bystanders, who were willing to work, if they could have been directed by any person what to do at the proper time, to have saved the great bulk, which was not large, of the contents of the warehouse, and certainly this wool, for the proof is, it was in sacks standing on their ends, and within ten feet of the door of the depot, so situated as to be about the first article that would attract the attention of any one entering the depot. The sacks were in plain view, covered by no intervening article, but in front of them all. It was very strange, indeed, that the exercise of ordinary care and diligence should not have resulted in saving this wool.

The suggestion of appellant's counsel that the employees of the company, who were present at the fire, were induced to believe by some remarks of Harris, chief of the fire department, that the

warehouse was safe, and that the most prudent course was to leave the goods undisturbed in the building, and not expose them to the danger of theft and damage by removing them, loses much of its force when the statements of Harris are considered.

It was no doubt the policy of the company, and greatly to their interest, to throw the responsibility of the loss of this wool on the fire department. One of their employees, their one-armed watchman Metzler admits the goods might have been saved. But he, and Goodrich, another employee, and clerk in the freight office, testified that Harris told them that he would save the depot and that the goods need not be removed. Harris contradicts both these witnesses, and says distinctly that he told them no such thing. He is positive about this, for he says it has always been a settled rule with him never to interfere with the removal of property at fires. This witness was impartial. He had no object or desire to shift the responsibility, and under the circumstances, his statements were entitled to more weight than those of two frightened and timid and excited employees, and so thought the jury.

It would seem to us, in view of all the facts, that the company did not take the same care of this wool while it was in their custody, and use the same diligence to save it when in danger of destruction, as an ordinary prudent man would exercise in regard to his own property. All the facts go to show that it was almost certain, half an hour before the building caught fire, that it would be caught, and, from the materials of which it was built, the length of time it had been erected, causing all the materials to become highly inflammable, surrounded on all sides by combustible materials, and the wind blowing from the feed mill to the depot, that the warehouse must become a prey to the flames. So thought prudent men who owned property in the immediate neighborhood, who at once made the necessary exertions and save the property. It is evident the company would have saved this, by proper and timely effort.

We are fully convinced on the whole evidence that the railroad company did not use ordinary care over this property while it was in their custody, nor make sufficient and timely effort to save it, when endangered, and they ought to pay its value to the owner. The new duties the company had assumed, those of warehousemen, required these of them. Angell on carriers, 45 and note and 75.

What is ordinary diligence, is such diligence as men of common prudence usually exercise about their own affairs, and ordinary care is such care as every prudent man takes of his own goods. Id. §§ 7, 11.

These are facts to be determined by the jury, and having found that appellants did not exercise this degree of care and diligence, but have been guilty of ordinary negligence, and believing the finding was proper under the evidence, we cannot interfere with their verdict. The proof against appellants on the main points is overwhelming against them, and on the conduct of the chief of the fire department, his testimony is more reliable than that of the two employees of appellants.

No exceptions are taken to the instructions, nor could there be any. The judgment must be affirmed.

Judgment affirmed.

The Public Lands.

The following is an abstract of the Report of the Commissioner of the General Land Office:

The operations of the public land system during the fiscal year ending June 30, 1869, were prosecuted in all the public land States and Territories, except Wyoming and Alaska. Surveys have been completed in Ohio, Indiana, Illinois, Michigan, Missouri, Alabama, Mississippi, Wisconsin and Iowa. The entire area of the public domain is 1,834,998,400 acres, of which during the past year 10,822,896 acres were surveyed, involving 40,849 lineal miles of survey. The entire area surveyed is 508,567,752 acres, leaving unsurveyed 1,326,430,648 acres. Interesting accounts of boundary surveys are given, with chorographical and topographical information of great value.

The disposed of public lands in seventy-three local land offices during the year embraced 7,666,151.97 acres, being nearly a million acres more than last year. The cash receipts were $4,472,886 28, an increase of $2,840,160 38 over last year.

The policy of forbidding settlement on the public lands without purchase, enacted by the law of 1807, was overpowered by the press of immigration. Congress first healed a multitude of breaches of this law by special retroactive statutes, and finally, by act of September 4, 1841, established the pre-emption privileges as a permanent element of our system.

The homestead policy is the worthy supplement of the pre-emption. A great increase of appropriation of public lands by actual settlers under these two classes of laws is shown. It is estimated that by direct and indirect operations of the land system during the last fiscal year 60,000 small farms were added to the freeholds of our republic, about double the entire number of land owners in England, as reported in the decennial census of 1861.

The liberality of our naturalization laws has drawn an immense immigration from Europe. About 10,000,000 of our population are due to this cause. These have largely availed themselves of the kindly provisions of our land laws, absorbing an immense amount of public land. It is estimated that foreign immigrants have brought to this country, since 1790, $400,000,000, gold value. Grants of lands have been made to officers and soldiers of the different wars of the republic, thus testifying the nation's gratitude to its defenders. Our immense grants in aid of popular education are vindicated as a social necessity, the only means of securing such a diffusion of intelligence as will serve as a basis of free institutions.

Large grants have been made for the support of universities and colleges. A special donation has also been made to the States of 30,000 acres for each Senator and Representative they were entitled to under the apportionment of 1860. The aggregate amount of land finally accruing under all these grants will be not less than 79,326,802 acres. The disposition of these grants by several of the States is given in the report.

The policy of grants for internal improvements, and especially for railways, is considered at length, and a sketch of the railway system of the United States is given at large. Its history naturally divides itself into three eras:

First. Its primary stage, on the Atlantic slope, in which it had to await the slow accumulations of the necessary capital for its construction.

Second. Its secondary stage, in the Mississippi Valley, in which, by the donation of public lands otherwise unsalable, it created its own endowment by the values it imparted to the soil.

Third. Its definitive stage west of the Mississippi, in which it appears as a forerunner of civilization, gathering strength to project itself across great wilderness tracts to reach our Pacific States. At the close of the the present year there will be in operation 47,000 miles of road. The tonnage of 1868 is estimated at over 100,000,000, representing a cash value of $12,000,000,000. At the close of this century we will have not less than 100,000 miles in operation, with a tonnage beyond present estimate. The enormous expansion of railways was one of our national necessities. The liberal policy of landed and loan subventions by the Government was the ground work of this prosperous movement, but the commissioner thinks that the time for such extraordinary assistance has passed, and recommends its withdrawal.

The report concludes with a review of the commercial position of the United States, tracing a line of commerce around the earth, between the 40th and 50th parallels, to which all the local currents of trade will converge. The completion of our Pacific Railroad, with the increasing advantage of railway communication over every other, is making this country the highway of the world's commerce. Our ability to compass this splendid result springs from our liberal handed policy. Its influence is specially marked. The growth of our resources is startling. The gold value of personal and real property is $30,000,000,000. Our gross annual earnings amount to $10,000,000,000, of which not less than ten per cent. or $1,000,000,000, are surplus for investment. Our civilization, being industrial in its chief characteristics, looks to a broader swsep of original production, and hence our accumulation of wealth will be more rapid than that of any past age.

Wooden Railways.

Mr. C. W. Maberly, Chief Engineer of the Northern (Canada) Railway has made the following report to a Committee of the Canadian Legislature:

TORONTO, Dec. 8, 1859.

SIR: In accordance with the request of your Committee, I have examined the systems of wooden rail tracks introduced respectively by Messrs. Foster and Hulburt, and beg to submit the following observations thereon.

Mr. Hulburt's system is the longitudinal maple rail, the grain of the wood running with the track; the rails are supported on crossed ties laid two feet apart; these ties are notched out, and the rails are fastened into the notches with wooden wedges. He submits two modification of his principle:

1st. A plain longitudinal rail 4 inches by 7 inches, in 14 feet lengths, with square end joints, and simply held in place in the ties by the wedges.

2d. A longitudinal rail 4 inches by 7 inches, two thicknesses in depth, breaking joint with square ends, each joint being fastened together with two half-inch bolts through from top to bottom of rail, and wedged in the ties in a similar manner to No. 1.

Mr. Foster claims an improvement on Hulburt's system inasmuch as he opposes the end grain of the wood to the action of the trains. He places

maple blocks 3¼ inches by 7 inches on end to form the rail. These blocks are held together between two longitudinal stringers, slightly notched out, to give a seat for the blocks to rest on; the stringers break joint, thus forming a continuous rail. The cross ties are notched out and the stringers wedged in the same manner as in Mr. Hulburt's rail. A hardwood pin is driven through the stringers, between each joints of the blocks, in order to keep the blocks from shifting out of place.

The following is a comparative estimate of the cost of each system of wooden rail and of an iron T rail, 56 lbs. to the yard. I do not include the earthwork, ballast, or fencing, as I assume the grades and curves to be common to each. The estimate is based on a 5 feet 6 inch gauge, and the cross ties are included:

Iron rail (56 lbs.).....	$5,000	per mile.
Foster's wood rail	2,100	"
Hulburt's " No. 1	1,290	"
" " No. 2	1,420	"

An iron rail, of say 56 lbs. to the yard, should last in this climate with a fair traffic (such as is done by the Northern railway of Canada) about ten years, and the best hard wood rail with a similar traffic could not last over two years. A well constructed hard wood rail, if properly maintained, would probably last five years with a small traffic, and light engines not running over a speed of from 10 to 12 miles an hour.

The main points to be considered in comparing the different systems of wooden rail are simplicity in the number of parts, and convenience of construction and repair because the greater the number of parts, the greater is the liability to get out of repair, particularly in such a climate as Canada, when the sudden thaws and extreme frosts throw the rails out of line and out of level.

As to the comparative merit of the different systems under consideration, I am of opinion that Mr. Hulburt's single rail No. 1 (with an addition of a wood fish plate, notched and bolted at each point) is the most practicable, as it is the simplest and cheapest in construction, and can most easily be kept in repair.

I consider the wooden rail to be the best adapted for colonization roads through new tracts of country where sufficient money cannot be obtained to build an iron road. A wooden railway would serve the purpose until a sufficient traffic could be established to warrant a more substantial track.

Railroad Improvements.

Metallic Plate about 5×8 inches, 4 holes about ¼ inch thick placed under the ends of the rails with button fasteners to keep the top of the rail even. Coupler cross band or bars or links; the single bar now used may be likened to drawing sled with a cord on the middle of the roller which destroys the superstructure, wheels, etc., every three years, this coupler obviates all that, draws the train true in line and operates with mechanical precision. For sale by the Inventor, A. BEEBE, 78 Cedar street, Room 2, New York.

RAILROAD CAR MANUFACTORY FOR SALE.

THE SUBSCRIBERS, EXECUTORS OF WM. CUMMINGS, deceased, will expose to sale at public vendue, on Thursday, the 20th day of January, 1870, at two o'clock in the afternoon, at Taylor's Hotel in Jersey City, (if not previously disposed of at private sale,) all of the following described lots of land and premises at Jersey City, in the County of Hudson and State of New Jersey, consisting of the RAILROAD CAR MANUFACTORY of the deceased, viz:

Lots Nos. 121, 123, 125, 127, 129, 131, 133, and 135, fronting on Washington street.

Lots Nos. 42, 44, 46, and 48 Steuben street: and Lots Nos. 45 and 47 on Morgan street.

Together with the buildings, factories, shops, and improvements thereon erected.

Dated Jersey City, November 6th. 1869.

THOMAS W. JAMES
ISAAC I. VANDERBEEK,
Executors.

N. B.—The executors will consider any offer to dispose of the above at private sale, made before the vendue.

GENTS' SIZE.

NICKEL WATCHES.

LADIES' SIZE.

The undersigned, agents for the celebrated Borel and Courvoisier's Nickel Equilibrium Escapement Lever Watch, most respectfully call the attention of officers and directors of Railroads to their superiority over any other Watch used for Railroad purposes. These movements are so constructed that they can be adjusted to heat, cold and position at a comparative small cost, and commend themselves to Conductors, Engineers and all Railroad employees that are required to have accurate time. Call and examine before purchasing of other makers. We can refer to parties who have had them in use eight years. For sale by watchmakers and jewelers throughout the country, and by

QUINCHE & KRUGLER, 8 & 10 John-st.,

TELEGRAPHIC TRANSFERS of Money made to EUROPE or CALIFORNIA, on favorable terms.

INTEREST ALLOWED ON DEPOSITS.

THE WHARTON Safety Railroad Switch.

BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line,

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,
